Randy said...

>Lose the half wave dipole moniker. It does not apply.

So now Dino says...
No, but thanks for your input. I understand WHY you say it is a 1/4 wave ground plane and it makes perfect sense. I'm doing the research now to prove one of us wrong...

Randy said again...
>Another correction:
>
>Aluminum antennas were outlawed. It has previously been researched and
>posted in this group, along with the links to back it up. It is now illegal
>to offer for sale an aluminum "CB" antenna.

Again, Dino says...
You are absolutley correct. Did something in another post lead you to believe that I said they were LEGAL for CB? It IS illegal to sell aluminum "CB" antennas. It is NOT illegal to sell Amateur radio antennas.

The Maco V5/8 is a 10 meter antenna.
The Interceptor 10K is a 12/10 meter antenna.

:-)

Dino

These are both GREAT! Thanks for the info!

As I said earlier, I never said they are legal for CB. I knew they were outlawed years and years ago.

4030. Help with DX2547 SSB tuning

Newsgroup: rec.radio.cb
Date: 2002-12-12 02:23:32 UTC
From: tramd300@aol.com
Message-ID: <20021211212332.03197.00000210@mb-cs.aol.com>
Source record: 146566

Hello,
I am having a problem with the receive on ssb.
AM & SSB transmitt frequencies are right on the money, but I cannot tune anyone in on side band. I have pressed the clarifier button in both postions with no results.
I have noticed, on AM the volume and sound are real nice and clear, but when switched to SSB, the volume is like it was turned down. I have spoken on it on sideband with local people when on the phone with them and they can hear me fine. Is there a seperate RF amp transisitor for side band?
I am sure it is something stupid and easy to fix, but I'll be darned if I can find the problem. Maybe someone here has had this problem and knows of a cure.
Please email me direct at tramd300@aol.com
Thanks in advance..

Yes amateurs have access to approved amatuer gear that they are allowed to use, what are they supposed to talk on? What Planet are you from? Cbers have access to "CB Radios"

The starduster is a 1/4 wave ground plane with drooping ground radials. a
dipole has 2 legs, hence the name di-pole. the arrl
manual also agrees.

All D-104's come from the factory wired as follows:

WHITE: Audio
SHIELD: Audio ground
BLUE: Switch common
BLACK: Receive
RED: Transmit
YELLOW: Grounded in transmit (run to linear)

From Astatic's website, you can ascertain the pinouts by matching colors
to function to pin number.

That's the problem I have with the government trying to regulate what radios we can use. I used a 2510 on 10 meters while mobile for a few years and I enjoyed using that radio. Now the government wants to get rid of them because some people use them on 11 meters. The problem with that FCC document is that it's so vague that just about any HF radio can be considered to be an "illegal CB transceiver." My Kenwood TS-140 ham rig can be converted to full 1500 kHz - 30 MHZ transmit just by removing two diodes.

Reading the header, I thought you meant MARS, or Military Affiliate Radio Service. As far as I know, none of them use CB.

At least on Mars, you wouldn't have to worry about the FCC trying to regulate what radios you use.

Tom

How can an antenna, with 3 drooped elements be considered a "dipole"?
Where I come from, we call that a 1/4 wave ground plane. A dipole has a
single active radiator, and a single ground element (Hence the term "di
(meaning 2) pole (meaning elements)").
When you split the ground element into 3 and raise them up from
vertical, it's no longer a dipole, but a ground plane.

> The Sigma IV is also a half wave antenna. I know I'm going to ruffle some
> feathers, but I have spoken with the original engineer from Avanti specifically
> about the Sigma IV.

I won't comment further on that, since I really don't have the
engineering specs on it. But from my own testing, it works a hell of a
lot better than a 1/2 wave ground plane.

> The Sigma IV, while being 3/4 wave LONG, is only electrically a 1/2 wave
> antenna. Its basically a big J-Pole in the sky. The lower 1/4 wave is part of
> the matching circuit. Only the part above the loop radiates. I know its hard

It sort of makes sense, but this wouldn't account for the much superior
performance compared to "normal" 1/2 wave antennas.

> Who out here has replaced a good 5/8 ground plane with a Sigma IV? I replaced
> my Avanti Sigma 5/8 with the Avanti Sigma IV (both original designs!). The
> Sigma 5/8 was better locally and in skip land!

Skip is irrelevant as it is not constant and reliable enough for
scientific comparisons.

I did replace a standard 5/5th wave antenna (A Hustler "trumpet") with
the Sigma 4 and saw an improvement.

I had a particularly stable test bed of locals with base stations, with
radios with RF gain controls and stable setups (I know, not very
scientific, but good for relative purposes). One of the particular guys,
gave me the following signal reports with his gain at minimum, of the
following antennas over the course of several weeks to months, to
average out weather and other infuencing conditions:

1/2 Wave radio shack "Super Maxim": from S1 to S1.25
Avanti Astro Plane: from 3/4 to S1.2
Hustler Trumpet 5/8th: from S2.5 to S3
Avanti Sigmal 4: from S3.5 to S4
Avanti Astro Beam: from S4.5 to S5

With the exception of the Astro Beam, which was mounted on a tower, the other antennas were mounted on the same 20 feet of mast above ground. This gave the Avanti Astro plane a disadvantage, as it mounts about 2/3rds of the way into the antenna. But the other antennas were close to the same, except for differences in active radiator length.

> More on this later.

I am very interested to hear how this works out. Not many people take the time to do objective tests between various antennas. I am also interested in your test setup. At what distances will you be making measurements? As you know, there will be differences in near field radiation, as well as overall radiation angle. Some of these factors may favor one or another type of antenna, in one instance, but favor another at a different point.

I wish I lived closer to you, as I would love to participate. This is the kind of stuff I enjoy. Especially when it settles a lot of "CB hype". And there is no greater hype than antenna gain figures.

Some people here have bad table manners. Seems that sometimes you can't
ask a simple question, without getting a smart assed answer.

As far as your question pertaining to peaking, don't worry about it. The
differnce between 3.5 and 5 watts is hardly noticable at all. If you do
ever intend to run an amp, the less power the radio puts out, the less
likely you are to overdrive the amp and sound crummy, legalities not
withstanding.

Probably not, as the atmosphere on Mars is substantially thinner than
that of Earth. Compound that with its greater distance from the Sun, and
ionospheric propagation is not a likely condition.

No Skip, that would be great for the locals.......

Tom, what is so vague. They list all the radios, your Kenwood is not being
sold as a pseudo "legal" cb like the galaxys etc.
Can it be modified sure can, but it has met the FCC's Type aceptance and
certification while these phony 10 meter radios have not. What is so vague
about that.

How do we know that? :)

I am still trying to figure out what that bright light was that went across three states last year unexplained. I think it was the Martians throwing our spy gear back at us. :)

True dat, but for multiple hop skip contacts, a horizontal loop or end-fed Zepp type is your choice for DX. I personally use a 130' longwire terminated to a MFJ antenna tuner. Works great but for local but I always revert to a vertical polarized antenna for local contacts. I can use this antenna from 3.7 to 30mhz and obtain a flat vswr with the tuner.

This is purely conjecture, but the way I understand it is that it is more
than the modifiable aspect
that makes these radios unapproved. Most all of these sets are "CB-style"
in that they have incre-
mental "channel" indices as well as the frequency display; traditional 10
meter rigs have only the
frequency display and, sometimes, "memory" positions displayed in the same
window. The other
thing that causes them to come under FCC scrutiny and be referred to as
"fake", are the BAND
switches. Reasoning is that if a radio is truly a 10 Meter radio, it should
cover that one band. Therefore, those A thru F "bands" indicate something
other than what the radio is represented to be:
that is, a MULTI-band radio that will operate on more than the one band its
name refers to. These
radios, ergo, are NOT what they SAY they are. Yes, they will operate on 10
meters, but by having those switches for "them extree channels", they become
fraudulent. By the strictest legal def-
inition, the wording of the ban may not be tight enough, but that would easy
to remedy. Hollings-
worth, for example, is an attorney and, BTW, this wording thing HAS already
been brought to his
attention.

Nobody is being fooled by the Galaxy and Connex radios. We all know what
they "really" are (wink, wink), and that their marketing methods are a ploy
to get around bans on their importation.
I have said this before, but it bears repeating: IF these radios were not
being used on illegal freq-
uencies and were not beeping and squeaking all over 10 meters, I don't think
anyone would even
CARE about them. No one would CARE if they put out 10 watts of dead key and
had 60 watts of
"swang". But Noooooooooo! Some users have to have theirs and everybody
else's, too.

Care for some cheese with that? If they only reach 10 meters, even with the band switches, then your position is leaky. If they require a modification to do something illegal, then it is the mod to complain about. The damn radio is only a piece of equipment. As to the implied ease to do the mod, that is a matter of conjecture , some can , some can't. About "CB Style", you now want to control the style of peoples radios? Why don't you take a nice long walk along the RR track, and think about this for a while.

I used to frequent this NG often in the past, mostly as as lucker soaking up all the heipful info I could get my hands on. I soon got tired of the same old anti American Socialist Hambo crap and quit comeing back . Well I see it hasn't changed. Whats amazing is the same old crap I seen two years ago is still being recycled. This list is old news that never accomplished any thing of great value.

It is truley sad to see members of what use to be a good organization turn into protectionist who's main goal in life is to destroy the very thing they care the most about. I suspect that people like the original poster will directly cause the death of Ham Radio within the next two generations because of his hatred of the so called law breakers. You Ham boys had better figure out a way to include the so called out laws into your hobby, or your hobby will die out.

Whats amazing is the same old crap I seen two years ago is still being recycled. This list is old news that never accomplished any thing of great value.
It is truley sad to see members of what use to be a good organization turn into protectionist who's main goal in life is to destroy the very thing they care the most about. I suspect that people like the original poster will directly cause the death of Ham Radio within the next two generations because of his hatred of the so called law breakers. You Ham boys had better figure out a way to include the so called out laws into your hobby, or your hobby will die out.
--

Shux, several of our resident hammies are trying to figure out a way to have the freebanders accept THEM...they just haven't figured it out yet.......like ducks out of water...happy holidays.

Anybody know the size of highest legal antenna u can but on your car.
Most of the big coil antennas I am looking at are 65 to 68 inches long
and my miniv van is 65 to 67 inches high and the antenna on top of my
mini van would be like 10ft 10inches it that too high.

No they are being sold as phony 10 meter radios to Cbers , easily modified
to work on 11 meters, they are not for sale to Hams echo,roger beeps,
channel selector these are not amateur radios. Cry all you want the intended
market is not amatuer radio they would need to be type certified.

You can go up to 60 feet high with that antenna, however if you drive
by an airport you should drop it down to 20 feet.

I suppose you would want to at least stay lower than the lowest over passes in your area. Now in some parts of the country this may be an issue. Especially in New York, or so I've been told. 13' 6" is the norm. 13' 5" should make it safe for you. I'm absolutely positive if those aren't correct heights someone on this newsgroup will tell you.

What I would do is park next to a big truck. Mount your antenna and take it as high as the box goes and you should, I emphasis SHOULD be good to go. I am pretty sure you won't get in trouble for using this method in establishing the height of an antenna on your mobile.

I could be wrong though. I lead a very sheltered life.

Deb :)

Hello 181...the bayou was good and strong this AM into the 'pile....many
of us talk on 555..several in here can be heard on the uppers and lowers
as well.....26.815, 835, 855...etc..happy holidays and happy dxing.

>In case anyone ever asks Twisty here is you >admitting your a federal
Law breaker.

Those words are nowhere to be found in my post. Your interpretation
problem is a manifestation of your communication deficit.

>No one is assuming anything your own >admittance and not under duress.
It is more >than just talk sucka.

It's no more than talk...like N3CVJ telling the world he had a "Phelps".
It was clear he doesn't have one and never did, but that didn't prevent
him from claiming he had one. Even you claimed that even though Lelnad's
call is heard on the freeband, it doesn't mean it's his....this logic
you apply needs applied evenly and across the board or not at all.
But let's cut to the chase.....how can Davey Hall N3CVJ run a
Davemade amp legally while you maintain he can't operate a Galaxy
legally? Since you claim to have greater knowledge than I of hammie
radio, perhaps you can differentiate between that embarrassing scenario
that you helped Davey get into concerning such comments.
Oh, but wait, according to you, N3CVJ is a federal criminal for his
actions......

>Damn Dave, old twist nutz

Damn, George, your ad hominem attacks are no longer in the body of your post..right off the bat these days...your intellect is shining...

>is sure doing some research on you dating >back to
>1995.

Daves lies are hardly waht I hold as research..his lies are a dime a dozen and no effort is required...just a good memory. ...and some good 'ol hammies that don't cotton to lids like him or you.....I wasn't here in '95, and I sure as hell didn't even know what a "Phelps" was...someone told me to ask him if he still had it.....

> It seems he will go to any length but then will >cry you are bothering him LOL is this guy a >hypocrite or what...
--

My usenet posting history is free for anyone to post..never had a problem with it,,unlike you and poor 'ol Dave, I don't lie.....again, the matter is so simple it is lost upon you..treat those as you wish to be treated. You're the one crying about people instead of issues..but that's ok..right about now poor davey-boy needs all the help he can get...even yours.

4080. FT 920 with MD 100 mic and More For trade!!!

Newsgroup: rec.radio.cb
Date: 2002-12-12 22:10:16 UTC
From: Oris <orisnospam@dirtball.com>
Message-ID: <3DF908FE.8070708@dirtball.com>
Source record: 146615
Cross-posted to: rec.radio.swap,rec.radio.amateur.misc,rec.radio.cb,rec.radio.amateur.equipment

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays
73 and thanks for reading
Oris

4082. Cellphone jammer needed. Where can I purchase one?

Newsgroup: rec.radio.cb
Date: 2002-12-12 22:33:09 UTC
From: toomanyradios@aol.com
Message-ID: <20021212173309.03151.00000030@mb-mq.aol.com>
Source record: 146618

Received this e-mail from a friend of mine today. She's not a radio expert or technical type. Just an average citizen who is tired of rude people making nuisances of themselves in public with cellphones:

"I just came from having lunch with friends at (a rather expensive restaurant.) Everything was fine until a cellphone started ringing at the table next to ours. The guy answered and proceeded to engage in a loud argument with his wife/girlfriend/lover. This went on for over 20 minutes! This inconsiderate S.O.B. stayed at his table for the entire time. He made no effort to go to the lobby or outside and finish his call, despite the fact that he had finished his meal and his eating companion was waiting for him to get off the phone so they could leave!

Ove the past few months, I have been interrupted by these selfish slobs at movie theaters, restaurants, even at church! A cellphone rings during the middle of the sermon and it's owner takes the call! Stays right there in the church pew and talks for several minutes, conveniently ignoring the angry glances of both pastor and parishoners. If these were emergency calls, I could understand. But in each instance, these were simply routine telephone conversations that could have been made at another time and place. Due to the loud and boisterous nature of those engaged in the calls, I couldn't help but to hear all the fine details of their conversations.

I realize modern-day America is a society of "me, me, me, and the hell with everybody else." I also realize this type of behavior is only going to get worse, not better. But I am damn sick and tired of having my outings compromised by these people. When I pay money to see a movie or eat at a fine restaurant, I have the right to enjoy myself and not be constantly bothered by some jerk talking on a cellphone. Asking the offending party to "please take your call somewhere else" is a waste of time. These people simply have no regard for common courtesy or public decency. If I'm going to maintain my right to peace-and-quiet, I'll have to take matters into my own hands.

Is there any kind of device I could buy which would allow me to shut off these phones? Someone at work told me that in Japan, they have "cellphone jammers" which cut off all conversations and keep phones from ringing within about a 50-foot radius. Have you ever heard of these? If so, where can I get one? Thanks. I knew that if anyone knew, you would."

I tend to agree with my friend. The cellphone situation has gotten completely out-of-hand. All information and suggestions on this would be greatly appreciated.

One would think; however now theatre patrons have to put up with it. Kids can raise a ruckus. Parents often won't leave with the unruly kids. We've had stabbings in movie theatres of late. Try and stop 'em, you get sued. I've just given up on the whole thing. I haven't been to a movie in years; my 36 inch television, home theatre, and satellite TV work just fine and I don't put up with it. Same can be said of restaurants. Seems whatever one wants to do is fine; just don't find yourself on the receiving end of it. This would appear to be the wrong newsgroup to be complaining how someone conducts himself anyways.

It probably relies on the traffic laws which vary from state to state.
Check with your local law enforcement for the maximum hieght for a mobile
antenna. And watch out for low overpasses.

TooManyRadios,
I tend to agree with you and your friend. And, as
you can probably guess, cell-phone jammers are illegal.
It's still possible to find them, unfortunately, I
don't know exactly how. If there were a portable type,
I would certainly buy and use one. There are times and
places for cell-phones, but some people have no idea
what those times and places are...

I have a midland 79-893, ssb mobile with the 858 chip. It has Rx audio,but
to Tx audio. Also the PA function does not work.
I am suspecting the mic pre-amp, since it is common to all TX modes and the
PA. I need to know which transistor is the mic pre-amp. It is sams #211 if
anyone has the sams series.
Thanks,
Mark

Last saturday night at the local CinemaPlex, a young man's cellfone
kept going off about every ten minutes. After the fith disruption, two
large black gentlemen proceeded to the area of the ringing cellfone
and gently escorted (dragged screeming) the young man outside where
he was never seen again.

The End (true story)

well i pointed out one of your lies a few paragraphs back

>the matter is so simple it is lost upon you..treat those as you wish to >be treated.

Funny I don't see dave saying anything except you attacking him with a post from 1995? regarding something that has no bearing on Cb is not Illegal and would belong in a amateur ng. Who would care if he still had it and why would you care if he had it? You said yourself you don't know what it is?You care your just trolling aling.

Same thing applies to keyclowns. Legal operators of CB radios have to
put up with the splatter and trash from keyclowns. Of course none of
you sissies give a rat's ass about that. Very selective group of
bitchers and whiners here. Heaven forbid you should be called to
accout for YOUR offensive behavior.

It's been a while, but I see the fascists haven't stopped their activities.

Read this message and you'll understand exactly what this means through analogy.

"W7DVJ" <w7dvj@hotwax.com> wrote in message
news:DkDJ9.464$3F.101143683@news.inreach.com...
> ILLEGAL CB TRANSCEIVER LIST
[SNIP] - Legal Jargon

>
> In view of the foregoing, the following "10-meter" transceivers are not
> acceptable for importation or marketing into/within the United States.
> Importation and marketing of these units is illegal pursuant to Section
> 302(b) of the Communications Act and Section 2.803 of the rules. Willful
> violations of the Rules and the Act may subject the violator to a monetary
> forfeiture of not more than $11,000 for each violation or each day of a

> equipment, and additional makes and models may be added to this list in
the
> future.

Basically what this says is that these radios cannot be
imported/manufactured in the united states.
Nor can those radios be marketed in the United States.

No problem, because I don't think Uniden has made those models for a few years now. Same with cars... They won't pass emissions, and don't have airbags. Hence, they cannot manufacture or import those vehicles.

HOWEVER!

That 1969 Ford Galaxy is still perfectly legal to drive, own, sell, barter, trade, and work on.

Why?

It's called the grandfather clause. You should have learned that in 6th grade civics.

Now some make the analogy that these units are analagous to handguns.

You need a permit to carry a handgun. You also need a license to operate these radios.

One thing is different about it though. If someone does key the radio on 11 meters it's a far cry from causing any physical harm. That is why the handgun analogy doesn't hold up.

I'd think of operating those units on 11 meters more as a parking violation than I would a random shooting, that's for sure. Because after all it's the operator that is responsible. Granted the fine is astronomical in comparison to a parking violation, but my point remains no physical harm is done.

Now, as far as this Neo Fascist scare tactic.

If you've read down this far you'll notice that the subject of the message contains the word illegal.

The sender chose that subject to instill a sense of fear. I read nowhere in that memo any thing about the radios being contra-band. It just states that they cannot be imported into the United States.

For those of you not in the United States that have read down this far I humbly apologize for the length of this memo regarding this explanation. On the other hand you're probably laughing at the whole message thread.

The HR2510 is not Contra-Band... You can own one, sell one, etc... Just don't operate it on 11 Meters!

I would also recommend not parking in front of a fire hydrant, or exceeding local speed limits!

I would suggest that as of this very moment they would indeed qualify as collectors items. Just like the 1957 Chevy, 1960 Cadillac Convertible, etc....

Anyone who owns one should realise the sudden increase in value due to this FCC Memo as there will be no more units coming into the United States anymore.

And that's all there is to this tiny little matter blown completely out of proportion by the original poster who chose a subject in an attempt to scare you out of your radio.

It was very well done... I'd almost regard it as New York Times Material...

VOTE FOR GORE OR WE'RE GONNA STARVE!!! -- get real --

Fear... If you can find the humor in it you'll realize why the bible refers to the devil as a prankster.

I really wish these fascist scare tactic fear mongering dipshits like the guy who posted the original message in this thread would go find something else to scare. He'd probably have to resort to puppies, kids, and animals though... Nice Try!

>
> LIST OF TRANSCEIVERS
>
> ILLEGAL TO IMPORT OR MARKET
[SNIP] We know what they are.
1957 Chevy Impala.
1958 Chevy Corvette.
1975 Cadillac Eldorado.

1977 Monza Spyder
-- Could you imagine ?? --

>
> For further information concerning the listed transceivers or similar
> models, contact Ray LaForge or Gary Hendrickson at the FCC Laboratory,
7435
> Oakland Mills Road, Columbia, MD 21046, (301) 362-3041 or (301) 362-3043

If you're still not sure about this after reading this post, contact the people above. That's what they're there for. They get paid to answer your questions. It's what they do for a living!

ILLEGAL... I'm still chuckling about it... I gotta wonder as a child if the original poster of this message lit dogs tails on fire for 'jollies'? I'd hate to light up a smoke, pass gas, or wear leather in front of this guy... And yet, it's people with his very same attitude that piss on the seats in public rest rooms, then tell the waitress someone before him did it. Very unconstructive behavior. Wastes a lot of time.

Well folks, coffee's worn off....
ERROR: Coffee not found, operator halted. Will auto restart in T- 8 hours.

I don't know what the laws (if any) are here in MA now, but a girl I dated about 4 years ago had a 108" whip mounted dead center on the roof of a late 1980s Chevy Blazer with at least a four inch lift kit. The bottom of the antenna must have been...oh...7 feet off the ground...all I know is that ANY bridge we ever encountered, the darn thing would bang against the bridge and then whip back and forth, sometimes hard enough to dent the roof, and twice hard enough to smash the windshield...certainly there's a lesson to learn there.

4113. Re: Power drops - square of the distance - Is this true and what does it mean.

Tom,
You heard right, the power diminishes with the square of
the distance. But at 1, 2, or 4 feet, you would need a very
sensitive meter to measure the decrease in power. This also
is usually measured from the other end, the receiver. So,
considering what most people have to measure power with, there
would appear to be no changes at 1, 2, or 4 feet.
'Doc

Jim Hampton wrote:
>
> This is a free country. Cell phone users should be entitled to use their
> cell phones any way they wish.

This is exactly the type of mentality that causes these kinds of problems in the first place. Yes, this is (supposedly) a free country, and yes, you can (within certain limits) do what you want. But there is such a thing as courtesy, and consideration for the rights of other people. The fact that many of these "cell phone geeks" are oblivious to, or are indifferent to, the effect that their normally inane cell phone blabbering, has on the other people in close proximity to them, underscores the depth of ignorance that many members of our society have.

Here's an interesting business venture for an enterprising individual: Designing RF proof rooms, that can be constructed in places like restaurants, churches and theatres, where cell phone use is most definitely frowned upon. That way, those lacking in basic courtesy, would be unable to disturb anyone else.

10 short years ago, people didn't need to be so tied to their phones. I don't see what has changed now. There is something to be said for the ability to "unplug".

Dave

Damn, George, your ad hominem attacks are no longer in the body of your
post..right off the bat these days...your intellect is shining...

>is sure doing some research on you dating >back to
>1995.

Daves lies are hardly waht I hold as research..his lies are a dime a
dozen and no effort is required...just a good memory. ...and some good
'ol hammies that don't cotton to lids like him or you.......I wasn't
here in '95, and I sure as hell didn't even know what a "Phelps"
was...someone told me to ask him if he still had it.........

>Right there that is an outright Lie you knew he >had it you posted the
archive, so that is a lie,

Of course I posted it.....he denies lying so it had to be shown..but no,
I wasn't around in '95 and I was told to ask him.....

>as a lie can get.<

Correct..once again, it is the reason I posted it..to illustrate his
lying malicious ways.

> You knew he had one from the archive you >posted, yet you wanted to
ask like you had >something on him. Do you know what a >phelps station
master is? Do you always ask >questions for other people?

When they are assisting me with a hammie lid who is on the lying
warpath,,,well, yes,..I would tend to listen to what they say..the
person has heled me a great deal in the past.

>What does him owning on have to do with him >or you?

The same thing this thread has to do with you. TOUCHE'..oh, little man.

>Or is it another lie there is no ham telling you >to ask him that , of
course it is why do I even >need to ask.

Because you and Dave Hall's lies have you cornfused again.

>It seems he will go to any length but then will >cry you are bothering
>him LOL is this guy a hypocrite or what...
--

YOU are the one crying about people, Georgey-boy..not issues..makes you a lid right along side the pathological liar N3CVJ.
My usenet posting history is free for anyone to post..never had a problem with it,,unlike you and poor 'ol Dave, I don't lie.

>That is the first sign of a pathelogical liar he >will never admit to lieing,

Agreed. Dave Hall has been shown to tell whopper aftre whopper but cant bring himself to move on from his mistakes..he laughingly attempts but fails to pile lies with more lies and we all saw what happens when he gets angry and starts posting......
the matter is so simple it is lost upon you..treat those as you wish to be treated.

>Funny I don't see dave saying anything except >you attacking him with a post from 1995?

Odd, you see an "attack" in his post where he told a lie. Nevertheless, I erely ilustrated his post because he is lying again and you are aware that truth always prevails here...I just point thses things out and you, as usual, have a problem with the messenger.....heheheh!

>regarding something that has no bearing on >Cb
>is not Illegal and would belong in a amateur >ng.

Yea,the entire group tried educating you on the matter of the Galaxy...glad you finally grasp the concept..you're welcome.

> Who would care if he still had it

Same reason you care.

>and why would you care if he had it?

I don't "care" per se, ..I point out lies and untruhts,,always have, always will,,,there is a new sheriff in tonn and your personal playground has been effectively neutralized.
How do ya' like the richochet skip dish? It is indeed making its mark.

>You said yourself you don't know what it >is?You care your just trolling aling.

No troll, George,,that is what you are doing now in a thread that has slammed the coffin lid shut on hammie boy Davey-Hall's hypocrisy and lies.....watching you hop up and down on one bloody stump tells me just how effective his self-contradictory posts and lies really are. Tell him to keep it up..we can play this for the next year and every post can be indicative of his lies, ways and mannerisms.
I know it is difficult to hold topic with you, as you would rather focus on ad hominem attacks, but for all the bile you spew concerning your alleged knowledge concerning hammie radio, it seems you have indeed managed to get yourself into quite a quandary with your comments concerning legalities. It is quite entertaining watching you scratch your head and attack me when I merely ask you to differentiate between

your voodoo bullshit where you claimed it is illegal for a Galaxy to be used by an Dave Hall N3CVJ, but you fail to explain how he can run a Davemade illegally..after all,,this is the same amp he uses as his crutch to call others "federal criminals" and so did you. Amazing how one asking you to clarify your comments can send you into a school girl hissy fit with offtopic insults...hahaha! Good boy.

I share your and your friend's pain. I too am often bothered by the seemingly oblivious and indifferent behavior that many cell phone users exhibit. In fact I had seriously considered constructing a jamming device a few years back, when the idiot phone geeks almost caused me to have an accident, while they pay more attention to their phone then their driving.

But the moral dilemma for me, was that while jamming cellphones may solve one problem, the interference it causes could block emergency or other important calls. So with that in mind, I never made the device. Think about these things before you decide to use a jammer.

>

That's a very logical, and sensible guideline. most big rigs have a
height restriction of 13' 6", so that powerlines and bridges can be
accomodated. If you keep to that height, you should be fine, unless you
want to enter a parking garage.

My truck has an 8' whip, mounted on the bed railing. I would assume that
the bed railing is at least 4' in height, so that gives me a 12' antenna
height, and I've not hit anything except some low hanging tree branches.

> exempt from the restriction.

That is not entirely correct. While hams enjoy the protection of PRB-1, that ruling only (As of now) applies to zoning and municipality ordinances that restrict antennas. When restrictions are contained in a lease, or the CC&R's of a property that is a contract, that you sign as part of your agreement, you are legally bound by those restrictions. In the case of an apartment, the property is owned by someone other than yourself, so therefore you are subject to their conditions. There is still no advantage to having a ham license in those cases.

There is some movement toward expanding PRB-1 to cover CC&R issues, but it's still a ways off, and it is doubtful that it will cover rental properties.

I guess the question concerning this "phelps" contraption is going unanswered by N3CVJ, same as the one asking how long he claims to have been operating legally with his Davemade and Texas Star.
What do your psych books say about pathological liars, Davey-boy? I did take your advice and look up the piece concerning pathological liars.....lying about the mundane and simple stuff in the mannner and frequency you do is textbook pathological and deep-rooted usually caused by a character flaw or trait or inherent and overwhelming desire to be accepted.....your feel your accomplishments not worthy of anything at all so in order to compensate for your perceived shortcomings you stretch the truth (lie) to the image you feel would impress others, only your pulse is so far removed from what others are like, you fail to see the damage you inflict upon yourself until it's already done. George recognizes it, but him running to your defense with ad hominem and offtopic attacks that don't concern him serves only to solidify the "lid" moniker you two proudly exhibit. But egad, ,,,,,,the boy can lie.

Yep, he's a real card. He claims that he get's "fed" this information by other hams, yet none of those older posts started showing up until *I* emailed him one as an example one day. Once he knew what to look for, Google does the rest.

I personally don't care what he digs up, as well as his new claim that I "made up" someone to talk to. His glaringly obvious lack of coprehension on internet protocols, and network routing are testimony enough, why he should not even be considered.

As for the antenna, well, a lot happens in 10 years, including lightning strikes and ice storms. I wish I had *another* station master. But you only fall into good deals once in a while, and I'm not paying the going rate to replace the old one.

For now I'll have to make due with a Hustler G7.

>
A better question would be are you comfortable being a federal criminal?

> How can you operate that Davemade legally but a galaxy is illegal?

Whoever said that running a galaxy wasn't legal for a ham? A ham can run
ANY radio or amp, on their assigned frequencies, as long as they pass
minimum spectral purity specs. Which for H.F. is -40 dbc, and for VHF
and above is -60dbc.

> How about those MANY posts where you call people "criminal" for owning the
> same amp you do?

I can use a Dave Made LEGALLY on 10 meters. You, however, cannot use a Dave Made legally on 11. Simple as that.

> How come you invented this w6amp guy to talk to? "His"
> email defaults to yours....

Now your really rolling your own again. You'd better brush up on internet protocols, because once again, you're showing that you don't have the slightest clue. Ask Landshark, or one of the other guys who knows a bit more about this stuff to help you.

Since WA3MOJ is missing poss again and claimed not to see Dave Hall's hurled insults and hypocrisy.....I figured I'd point him in the right direction so he can see for himself....

You tell someone else this:

Dave Hall told someone this in conversation:
>Ad Hominem comments do nothing to bolster >your credibility in any form of debate, so you >would be wise to avoid them. Stick to the >topic.

I know....isn't it the most hilarious thing you ever read coming from the hypocrite HALL.....But wait..he continues and comes off with such gems as this, where he fancies himself a psycho something or other.....:,

>"You do possess the lions share of the >symptoms", this:,

And the ad hominem statements illustrating his proneness, predilecton, predisposition, fondness, and preference for violence:

>"Every so often I'll respond just to bitch< slap >you back to reality"

Hmmm..that reality must be the one where he DOESN'T own a "Phelps"...what say?

And MORE of these attacks that DON'T occur (according to you and our little lying angel-cherubic Hall):.

>"THAT is what makes you a sociopath."<

So.......Ad Hominem comments do nothing to bolster you twos credibility in any form of debate, so you would be wise to avoid them. Stick to the topic, you two. IS this one of those rules for everyone but yourselves that y'all are so quick to implement and hold everyone to but your hypocritical selves? I SAY YES.

DAve goe on ith:

>If you were more observant,

NOTE the uncalled fo dripping sarcasm and condescension....

>you would see that I am a licensed ham as >well as CB radio user.

And gosh darn , people better pay attention to him..........

>And In fact, I don't consider myself a member >of any group.

You're the only one. MOST See you as the lid you are.

>I am a "Radio Hobbiest". I play with whatever >radio bands are available to me. I don't look >down from my holy perch of hamdom to other >radio users. I interact with them.

Yuh!
Then do the exact opposite with:

>Hams frequently give out their phone numbers >or addresses on the air. >Unlike CB, there aren't a bunch of mentally >challenged people waiting to cause trouble >with this information.

Hahhhah.....all the personal information on this group has been fostered and seized upon by WA3moj, kc8ldo, n8wwm, and n3cvj...cbers don't give a damn about your hammie identity crisis issues....stop bringing your trash and personal problems to our doorstep.

In a restaurant or movie theater, you can always use a landline phone in case of an emergency or have to make an important call. Unfortunately, what some people consider "important" is calling friends to tell them about the movie they're watching.

And who else used to post the "illegal CB transceiver list" all the time?
Initials A.V., though not his real name.

> 1977 Monza Spyder

My brother had one. I think it was his first car.

> ILLEGAL... I'm still chuckling about it...

And as we've heard first-hand from the FCC, they are not illegal to own, nor
are they illegal to use by licensed hams on 10 meters.

You know, the whole discussion about "phony 10 meter radios" is pretty silly
when you come right down to it. The same could be said of 2 meter radios.
After all, most of them are single-band radios with extended coverage,
usually around 139-174 MHZ. Most of them can be easily modified to operate
over this range. In fact, I own two of them that can be, but aren't. I bet
when MURS takes off, people will be griping about all the "phony 2 meter
radios" being sold to people who just want to use them on the MURS freqs.
And the FCC will probably feel the need to put a ban on imports.

I'm getting a lot of email asking why my callsign does not appear
on QRZ or Buckmaster so I'll try to explain.

Some of us, myself included, work for agencies that require that we
maintain a level of anonymity in order to protect our families and
neighbors. As a result, information such as real name, address,
etc., etc. are not listed in public databases for public viewing.
No, I'm not in law enforcement but work for a government agency
that monitors foreign communications related to terrorism, hence
the need for anonymity.

I assure you it's a real call, had it since 1967 and currently hold
a advanced class license active in SSTV and digital modes of
communication. Once in a blue moon I do a little ten meter stuff
when the band is active.

I wouldn't worry about W7DVJ.. If the callsign is fake (and it is) then
the person behind it most likely is as well. Perhaps N8 in another
disguise?
-SSB

You have Dogie, Lelnad, and George posting in poorly choreographed
threads...getting their jollies playing their "who am I now"
game.....if you look close enough you will see each of their attempts
at pinching Dave on the bum, giving him "warm fuzzies" and telling him
how much they respect and value his opinion...they see the lies of the
Phelps, his hypocritical amp usage, his claim about a cber getting
popped for disorderly conduct, his "borrowed" college email addy,
etc....it's just too much..... his personal affliction with the
compulsion to lie rather than face the music forces their hand. Vermin
rally.

But the moral dilemma for me, was that while jamming cellphones may solve one problem, the interference it causes could block emergency or other important calls. So with that in mind, I never made the device. Think about these things before you decide to use a jammer.
Dave
"Sandbagger"

--

How can one who self-contradicts himself in a seleçtive and malicious manner daily claim a sense of morality? One can't. Phelps forever!!!

Some of the most courteous operators I know are "Freebanders". They run power and illegal channels, in order to escape from the "riff-raff" on the regular channels, and for some increased range.

I have a minivan, and have a K40 on top. The problem is not a problem, until you need to go to a bank drive-in or a parking garage. Then you have some height issues.

And you get it right back. If you have a problem with it, change your behavior.

>I'm not the one who gave the smart assed >answer.

You are the one who came at me with your personal problems and I requested several times for you to remain topic or take it to email...you refusedand w youor chickenhawks hae come home to roost...get over yourself.

>Why do you always turn every post into >something about me? I've heard of obsessions >before, but you?...

I asked you the same thin several times, Davey-boy...you merely ignored the inquiry and continued yuor personal attack against me.....I have done nothing to you that you have not done to me first.....I even refrained from it or quite awhile, but you kept on and left me no choice but to show the world your word is pure shit.

>Seems that sometimes you can't ask a simple >question, without getting >a smart assed answer.

You simply ignore the questions.
Yea, you pretty much win the prize for ad hominem and off topic attacks.

>I'm sure history will bear out that I am rarely >the aggressor in these circumstances >regardless of what your obviously clouded >judgement may tell you.

That's what makes you so popular among the hammies, Davey-boy..your sparkling clarity of perception of the people who you feel will believe what you tell them and not what they see.

So N3cvj, did you begin obeying the law? When exactly was that again?
A better question would be are you comfortable being a federal criminal?
How can you operate that Davemade legally but a galaxy is illegal?

>Whoever said that running a galaxy wasn't >legal for a ham? A ham can run ANY radio

I kept trying to tell WA3MOJ that, but he defers.

>or amp, on their assigned frequencies, as long >as they pass minimum spectral purity specs. >Which for H.F. is -40 dbc, and for VHF and

>above is -60dbc.

You have claimed in the past that these amps are "basement" amps and have downed them many times and claimed those who use them are federal criminals. You also claimed you would post the information of how you made the Daevmade spectrally pure if asked by another besides myself. You have failed to hold your word yet, again.

>I can use a Dave Made LEGALLY on 10 >meters. You, however, cannot use a Dave >Made legally on 11.
> Simple as that.

That's all I wanted to see you say. You have no idea what I can use legally. You know only what I feed and permit you. Again, it is your arrogance that besieges you at very turn.

How come you invented this w6amp guy to talk to? "His" email defaults to yours....

>Now your really rolling your own again. You'd >better brush up on internet protocols, because >once again, you're showing that you don't >have the slightest clue. Ask Landshark, or one >of the other guys who knows a bit more about >this stuff to help you.

Don't worry...it was taken care of....but when you were asked if you STILL had the Phelps, why did you say "What Phelps?" and come back 2 days later and...never mind. Let's talk about the cber that was busted for disorderly...name...year...town..precinct..
anything at all to go on?
<g>

About "CB Style",
> you now want to control the style of peoples radios?

Only to the extend that for CB radios, "band" switches aren't necessary--nor
for dedicated 10 Meter radios either. For example, Cobra radios don't have
band switches nor do they have frequency displays; it isn't necessary. For
legal CB operation, all that is required is a channel
number. True 10 Meter radios have VFOs where twirling the dial displays an
infinite number of
frequencies within the band and, usually, a number of memories where certain
preferred frequencies
can be programmed for quick reference. The "style", if you will, is already
laid out in FCC rules; it
isn't up to me. The point is that those Galaxy and Connex radios, for
example, are designed, NOT
as *true* 10 Meter rigs, but to be marketed to CBers. Once again, IF the
users of such radios used them within the 40 channels ONLY, I don't believe
even FCC would go after them. But the
fact remains that, whatever "style" you want to call it, those radios are
facilitating illegal operations
within the ham bands by unlicensed operators, some of whom may not even be
aware that they
are eventually going to get into trouble; the rest (the militant illegals
who KNOW what they are doing and don't give a damn) deserve to be tarred and
feathered and run out of town on a rail, IMHO! LOL! Those of us licensed
for those bands, particularly the ones of us who care to preserve our bands
for future generations, are actively seeking to find ways of getting the
word
out to operators that they are not supposed to be there without license, and
also of punishing those
who think they have the "right" to operate a radio anyway and anyWHERE they
choose and to hell
with the licensed users from whom they usurp frequencies. It WILL come to
pass, BTW, and I
await that day with anticipation of snickering and laughing aloud at the
sorry idiots! THAT is why

hams are actively seeking to abate the sale and use of those radios--NOT
because of any hatred for
CB (at least among most of us)

Jerry
Why don't you take a

> Where did you see one advertised as a "PHONY 10 METER RADIO , FOR CB! ????

The only people I see flocking to truck stops are truck drivers AKA CB
operators. I hardly ever
see a multitude of hams gathered there--or at a nearby CB shop. And guess
what. Everytime I have seen those "export" radios, it was in a Flying J or
a Pilot Truck stop---OR in a hole-in-the-wall CB "shop". You know: the
ones that do those $29.95 "Peak and Tune" jobs, or add those
"connex" boards and echo, or beeps and squeaks. The Amateur retailers I
deal with don't seem to
ever HAVE those "export" radios--only Icom, Kenwood, Yaesu, and accessories
related to those
brands. A few DO sell Ranger brands. None of these have those banal beeps
and squeaks nor
idiotic "talkback". If a radio is talking back in the speaker, it usually
means that there is RF in the
shack. I sure don't want it doing that on purpose! <<g>>

So what?
For example, Cobra radios don't have
> band switches nor do they have frequency displays; it isn't necessary.
So what???
For
> legal CB operation, all that is required is a channel
> number. True
In your not humble opinion
10 Meter radios have VFOs where twirling the dial displays an
> infinite number of
> frequencies within the band and, usually, a number of memories where
certain
> preferred frequencies
> can be programmed for quick reference. The "style", if you will, is
already
> laid out in FCC rules;
Where does the FCC say that any radio must be a certan "style"?
it
> isn't up to me. The point is that those Galaxy and Connex radios, for
> example, are designed, NOT
> as *true* 10 Meter rigs, but to be marketed to CBers. Once again, IF the
> users of such radios used them within the 40 channels ONLY, I don't
believe

I have a cobra base 89xlr 4watt & a solarcon a99 antenna 40ft high. I think I am getting about 2 to 4 miles what should I get with this setup. Now my mobile uniden pro 510xl 7watt I think and a 38" whip antenna. Range for this is about 2 to 4 miles and what should I be getting from my mobile setup. I live in Houston Tx on the south west side.

Get off of 19 in the daytime.

You may have a bad coax connector/connection.

4175. FT 920 MFJ Versa Tuner 5 For trade and More

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I also Have the 3 KW Roller Inductor Antenna Tuner.
They are in good shape I will trade both for a FT 990 or a FT 1000..
I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
Happy Holidays

Hi Mark,
Check to be sure you have audio at the wiper of the mic gain pot (VR416) then check C-84 (10 UF Electrolytic) at the base of Mic amp TR15 (2SC945AQ) Then
check C-601 (10 UF Electrolytic) to base of AF amp (TR601) (2SC945AQ) Then C-603 (10 UF Electrolytic), D-601, D-602 and C-605 (10 UF Electrolytic) to base of AF amp TR602 (2SC945AQ) then C-606 (10 UF Electrolytic). That is basically the audio string for the mic audio...

It was a joke, Dave.
Well, I saw the funny side of it.

A few years back, the house I lived in was owned by a church. One day, the Pastor was outside working on his vehicle. As I happened to be making a "cuppa", I decided to offer him one.
So I went outside and said, "more tea, vicar?".

Maybe you need to be British to get the humour of that one... but he had a good laugh at it.

Then there is the wind and air resistance to consider... if you are thinking
really big (I know what you Americans are like).

I saw a small vehicle (UK cars are small) with an antenna on it that must
have been over 20' to the top.
It was on a telescopic pole, with controls inside the vehicle. The pole
went through the roof and was fixed to the floor inside.

Great idea for DXing from the hills (watch for winds), but it would have
been illegal to drive with it up.
Someone I knew had the base of a 1/2 wave antenna bolted to the rear of his
van... the rest went in when DXing on the hills.

Regards,

Peter.

Are you speaking of "daytime groundwave" range, with the band open etc??? I can see why your range would be so limited. Try it late at night. You should see 30 miles easily, if the terrain down there is fairly flat. I assume around Houston it is pretty flat? Good luck.

Doc, at one to four feet, you are in the near field of the antenna. You'll have to move farther away before the e and h fields assume their normal relationship in free space (377 ohms or so ..). At that point, the relationship of power to distance should become apparent.

Nope, it is a radio. You conveniently forget that a cell phone is a radio. In the same manner that some feel it is ok to infringe upon 10 meters, the MURS users may feel it is ok to infringe on other channels (where users PAY for their license), I see a problem with complaining about the radio ... er, cell phone. Free country ... right?

Yes, Dave - and I've had to get a bit more specific on the subject since it seems to escape most folks. A cell phone is a radio. Now, it seems some folks believe it is their right to infringe on 10 meters, VHF and UHF business band (where folks paid for their license) - and now cry because someone with a radio is bothering them when they paid $9.00 for a movie ticket. My point is that I don't want to hear the crying because someone else is now exercising 'their' right and have no care in the world about anyone else. Everyone has a photographic memory - it would appear that some just don't have any film ;)

Good point, Twist. I wonder how many folks that are now crying over this cell phone (radio) thread also advocate taking over frequencies they aren't authorized for. Yes, nothing like self-contradiction in a selective and malicious manner .... I'm having a ball reading the whole thread! All of a sudden, a lot of people seem to feel there should be rules on the use of a radio (cell phone). Fascinating.

But the moral dilemma for me, was that while jamming cellphones may solve one problem, the interference it causes could block emergency or other important calls. So with that in mind, I never made the device. Think about these things before you decide to use a jammer.
Dave
"Sandbagger"

--

How can one who self-contradicts himself in a sele&#65533;tive and malicious manner daily claim a sense of morality? One can't. Phelps forever!!!

Some of the most courteous operators I know are "Freebanders". They run power and illegal channels, in order to escape from the "riff-raff" on the regular channels, and for some increased range.

You might've been right IF those radios were being used within the 40
channels--or even on what
so many call the "freeband". But if you think that unlicensed operation is
going to be tolerated on
LICENSE-REQUIRED bands, then YOU are dreaming. Believe what you want, but
those importers and truckers both are in for a nasty surprise.

> So now it's about how hammie a shop is??????????????????????

No, it's about clientele. Many products have a target market. The target
market for Galaxy and
Connex "reddios" is T R U C K E R S. So they are S O L D in truck stops,
not at Amateur Electronic Supply, or Ham Radio Outlet, or Communications
Headquarters, or R & L Electronics,
and a multitude of other retailers who target HAMS, not CBers or truckers.
You find those radios
in question at Flying J or Pilot or those little CB shops stuck off in a
corner of the truck stop lot
where you will find truckers. On the 'net, you find those radios with the
rebel flags on the face , et al, at dealers who cater to CBers--like
Pacetronics, or Copper, or H & Y. In spite of your efforts
to dilute the market for such radios, they are, indeed, targeted at CBers
and truck drivers. That shouldn't be hard to grasp.

4189. Tristar 848 HELP Lots of Accessories NEED HELP!!!!

Newsgroup: rec.radio.cb
Date: 2002-12-14 01:40:51 UTC
From: tech007@blazemail.com
Message-ID: <8e2d5f6d.0212131740.15353950@posting.google.com>
Source record: 146726

Hello All!

I recently received several pieces of CB equipment as an heritage from a deceased person. I REALLY don't know a lot about CB equipment but I have SOME electronics knowledge. First, let me tell you all this stuff seems old, I have a Tristar 848 CB and SEVERAL other items such as power supplys and lots of little electronic boxes that I really don't know what they're for. There's nothing written on these boxes except the brand and model# and sometimes nothing. Brands are Zetagi, Elp, Monacor, Rama (Power Reducer, it's written) etc... Anyone knows what this stuff is all about? (seems that everything is for the antenna signal though...they all have antenna in and out and 13.8V power wires).

My question is, can someone help me with that stuff? Is there any existing webpages that could give me instructions on how to plug the whole thing? I just need a good introduction to CBing and need to know what are these boxes and stuff. I want to plug at least the transceiver. On the back of the CB there's a power input but it has 2 pins (????) and it's written 13.8 VDC, I assume it's for a car yes? but why 2 pins???

Any help would be greatly appreciated!
Thank you!
Matt

4190. Real deal on RugerP85, AKA "The any color at all Weenie Washer"

On Mon, 9 Dec 2002 01:40:01 -0500 (Eastern Standard Time) "skyhawk",
after having his auction ratted out, <sky444@abs.adelphia.net> whined
like the impotent sissy boy he is...:

yea whatever dipshit....you just money away from my kids
Christmas,,,,,the only reason I was selling this as a package and
cheap I might add so it would sell fast and I could have that cash for
Christmas.....Happy Now asshole.....let me guess now your gonna call
the FBI....we went from Narcing on eBay to Adelphia......wow aren't
you just to special.....please refrain from sending me anymore
email as you are doing nothing but pissing me off more and
more.....and you might think that's funny but you know what it
really isn't....now I'm gonna have to figure out how to sell that
somewhere else quickly to get my damn money for Christmas for my kids
stuff.....this is how the not so rich live....pretty isn't
it...someone like you comes along playing God and they fuck it all
up.....thank you so much ,it really is appreciated

My usual type of totally accurate and completely moral reply"

Hey,
Have fun yourself. You can tell anyone and everyone...They already
know...Anti-Boys been rattin out scumbags like you a long time.
You were just another notch on my holster. As far as being an asshole
goes, I consider it a compliment to see you call me that. If a
criminal hates me I am likely doing something right.

You are really stupid. You think I CARE if you TELL ABOUT ME? On the
contrary. If I did I would not have emailed you to letya know.

Do your worst, buttlick...

I think I will report your illegal business transaction to adelphia.
Since you like to call names so much you can go there and call them
names after your access gets pulled.

You are an impotent shitball and a little boy in a man's world. Take a
hike, sonny.

::cough cough:: bullshit.

You don't show up on the FCC site either..

Others who's names/addresses/etc show up on the FCC site as callsign
only, as a placekeeper, so the callsign shows as valid.

Your supposed amateur callsign has nothing to do with your supposed
job, unless you're stupid enough to be transmitting on the frequencies
you're supposed to be listening to.

so, you're now doubly a liar.

Have a nice day.

de KR8LR, Chris

Mike sent me the info I needed to get my radio working. This is a great group of people, if you need info, there is always someone here who has the info and will help you. I know there have been alot of problems, I hope they go away, and this group can be what it was originally designed for, to share with one another information and knowledge about the hobby.
As problems arise, instead of lashing out, we need to remember we are first and foremost brothers of Jesus Christ, and as Christians we should show the love of Jesus to one another.
God Bless you all, and thanks Mike!
Mark

Use a SWR meter to check out your antenna. If properly tuned
you should get 7 - 10 miles or even more.

A Ranger is to me a CB radio, the manufacturer knew how to get around the
rules when converted you have the CB Channels show up on the display as
they do.Modifiy any real ham radio and you won't have the 40 channel
display like ranger.

You need to acquire a linear amplifier. Look for something in the
1500 to 7500 watt range and is wired for 120VAC.

Add a power echo mike with roger beep. That will increase
your range ten-fold.

While a 8 foot whip is good, a nearby telephone line is better.

Cable TV is fun to feed RF into. The more, the better.

Your Solarcon antenna, model a99, is known for cold solder joints
and extremely poor construction. It also attracts lighting like a hooker
on a hot summer night.

CB radios were invented by Ham radio operators.

The CB band was once the 11 meter ham band.

Lettuce is bad for you. It contains latescence12, a known carcinogen.

By golly it's true! Channel 6 is loaded wit color! Black folk just love CB which
explains why there are so few of them on the Ham bands. Ham radio is for white
people only. Yep, it's true, just listen. If you hear a confused black person, inform
him he's on the wrong band and that he should be on CB!

Thank you.

W7DVJ A Really White Person Who loves Black People!

Like THAT is bothersome? These rectumringer retards can call me anything they wish to. Why would it matter?

What is bothersome is that it is really unfortunate that your kids' have to go without Christmas presents BY YOUR OWN ADMISSION cuz their daddy bought illegal toys for himself. What a scumbag.

I told you that you can bring 'em here so they can see how normal people celebrate the holidays. It might be a turning point for your kids to see non criminal people who live a life of plenty enjoying a holiday. They may see this and NOT grow up to be unemployed white trash like daddy is.

Just think...Chukkee lives 48 miles away. You could take off for a while and meet him in a truckstop toilet. Moparholic is in Cleveland. You could meet him before you get here. Sounds like a good deal all round. You get to be gay and your kids get Christmas.

Dontever say I am not nice.

Yes, courtesy with the use of a radio would be very much appreciated in a lot of circles. BTW, here in NY, they have outlawed talking on a non-hands-free cell phone while driving. Frankly, I worry about the use of the hands free while driving. You still aren't concentrating on the road (an idiot, oblivious to the traffic light, darn near sideswiped me last week while gabbing away on the cell phone). My point is that courtesy is sadly lacking - amongst far more than simple cell phone users.

I have a cobra 89xlr and I opened my radio to see if any mod it and I am pretty sure it has been mod. I adjusted some of the trimmers and tunrned up the sound on like two before the volume was set to low before. Now when I adujested the other trimmers it seems like the superbowl channels bleed all over now. I can not transmitt but I can hear ok and I think my cd radio is off frequency. Will adjusting one of the 7 trimmers put it back on frequency. If not how could I put it back on frequency and what does each trimmer do.

Bzzzzt; wrong again. Amateur radios are not "Type Accepted" at all. No certification is required for ham equipment. It IS required for CB radios, however.

And, as pointed out by another poster, the "vagueness" is in the wording of the Rule itself, and pretty much makes it unenforceable.

I had the A-99 untill a few weeks ago and replaced it with a Maco V
5/8 vertical. Night and day difference. Almost 2 S units better from
my regular contacts. I have been working skip barefoot with it, I
never had much luck with the A-99 without 100 watts. I replaced it
after I read that article a few weeks ago. This was my second Antron,
the first one went bad after a few days. Had a high SWR. I will
never buy another one. Just a wire in a pipe is all it is.

I mentioned that Ranger is sometimes sold by ham outlets in another post. I haven't looked at them closely, but I don't think they include the "channel" indices, do they? I have never actually paid that much attention to Ranger since I prefer all-band rigs like Icom--or a homebrew AM rig for 80 and 40 meters.

And that could be one of the results of the illegals operating out of band;
that is, making the
rigs completely unable to be modded for such things as CAP or MARS. Just
like the ban on
amps that operate out of the box between 24-30 MHZ, hams will be
inconvenienced because of
the selfishness of a number of CBers. Instead of being able to legally use
ONE HF rig on Amateur and MARS, one would then be required to buy a
dedicated commercial radio such as a Motorola
Micom II for around $1500 a pop. That would deal a death blow to great
volunteer programs such as MARS, thanks to those people that think their
activities are perfectly fine and can't see any "harm" to their hobby of
stealing frequencies that don't belong to them and yapping for naught where
they don't belong.

Hey dvj
You must be under a rock somewhere .
Just as so that You will be informed , I'll help You out
OMIK is the second largest Ham radio organization in the US. , Only the ARRL
is larger than Them.
And so that You don't sit as a idiot and say DUH? .
OMIK has been around for 51 Years and even though they welcome People from
all races They are predominantly Black and was founded by blacks .
Read the Nov. issue of qst page 54 .
So You see dvj before You try starting shit You should at least get Your
facts straight .
But what can one expect . There are good People in every part of society but
then there are those scum of the trailer park like Yourself that give
trailer parks a bad name.

Unfortunately, there may be a bunch of trimmers and/or slugs inside a radio. Each has its' own job to perform. One may fine tune a master oscillator (or several for each transmit/receive channel in some OLD cb rigs or UHF business band radios). Some are for tuning if circuits; others for tuning rf circuits. You need someone who knows the radio inside and out or someone who knows what they are doing **and** has the schematics. This is not a job you can do yourself.

73 from Rochester, NY
Jim

I live within local driving distance a nationally known amateur radio retailer. If I buy even a coax connector, the first question is my amateur callsign. There is a consignment table there and on one Saturday a guy came in when I was shopping and wanted to know how much a given radio was, and he made no bones about wanting it for 11 meters. The store owner (read owner, not manager) told him to get lost, and when he didn't move fast enough, again the owner threatened physical force. No license, no sale. It might be legal to sell, but like other places, he can decline service to anyone he chooses.

There are two specific nails that seal the coffin for certain radios.
1. Is the radio channelized? Without a vfo with frequency display, it's
hard to imagine it being very useful to many amateurs.
2. Does it ship from the factory set to transmit on 10 meters, but has a
jumper block that can be changed with a pair of needle nose pliers in 5
minutes? The tradtional amateur brands can be changed but require a
little heat to do the job and it normally isn't all that obvious.

The Meaning of OMIK

OMIK (pronounced "Oh-Mike"), is a national Amateur Radio organization of (mostly) African-American radio hams that is doing good work for Amateur Radio. You may have seen their booth at the Dayton HamVention.

I cited the Quarter Century Wireless Association as an example, pointing out that the QCWA has a much larger membership than OMIK's 500 or so.

its not so big.....

You know enough to be able to operate a keyboard and post a message
but you don't know enough to keep your hands away from your radios
trimmers? Something seems real fishy here. Are you a troll?

If you truly are ignorant enough to mess up your radio in the manner
you stated then you have to be ignorant enough to disassemble the
computer, keyboard, and monitor to see if you can tweak the responses
for this thread.

Start tweaking. I'm sure the answer will come to you eventually.

They require type certification to be sold. They must also meet minimum requirements to be operated by hams no matter if it is a homebrew radio or amp. Those radios being sold do not meet those FCC Specifications that is why they are not Type Certification Issued on those radios.
(d) A modification which results in a change in the identification of a device with or without change in circuitry requires a new application for, and grant of certification. If the changes affect the characteristics required to be reported, a complete application shall be filed. If the characteristics required to be reported are not changed the abbreviated procedure of § 2.933 may be used.

(e) Equipment that has been certificated or formerly type accepted for use in the Amateur Radio Service pursuant to the requirements of part 97 of this chapter may be modified without regard to the conditions specified in paragraph (b) of this section, provided the following conditions are met:

(1) Any person performing such modifications on equipment used under part 97 of this chapter must possess a valid amateur radio operator license of the class required for the use of the equipment being modified.

(2) Modifications made pursuant to this paragraph are limited to equipment used at licensed amateur radio stations.

(3) Modifications specified or performed by equipment manufacturers or suppliers must be in accordance with the requirements set forth in paragraph (b) of this section.

(4) Modifications specified or performed by licensees in the Amateur Radio Service on equipment other than that at specific licensed amateur radio stations must be in accordance with the requirements set forth in paragraph (b) of this section.

(5) The station licensee shall be responsible for ensuring that modified equipment used at his station will comply with the applicable technical standards in part 97 of this chapter.

I don't think Dave Halls amp was certified when he bought it. But this is the FCC's position on them. Oh and Type Certification.

FCC Enforcement Case Highlights FCC Amplifier Certification Rules
NEWINGTON, CT, Oct 2, 2001--The FCC's Riley Hollingsworth used the occasion of a recent Warning Notice to hammer home the FCC's position on the sale of RF amplifiers that have not received FCC certification--formerly called "type acceptance." In a September 19 letter to Extra licensee Sidney Lee Martin, KD4YBC, Hollingsworth reiterated an earlier FCC warning to Martin that he cease commercial marketing of non-certificated external RF amplifiers and amplifier kits capable of operating below 144 MHz.

In 1978, the FCC banned the manufacture and sale of any external RF amplifier or amplifier kit capable of operating below 144 MHz without a grant of certification from the FCC. The rules specifically prohibit manufacture and sale of amps that operate between 24 and 35 MHz as a means to stem the flow of illegal Citizens Band amplifiers.

The case arose from a February 11, 2000, warning to Martin from the FCC's Detroit office as a result of a classified ad Martin had run in QST. The ad featured the sale of external Amateur Radio RF amplifier kits for HF and 6 meters. The FCC letter admonished Martin that selling or offering such units for sale violated §2.815 of the FCC's rules.

Martin--who operated a one-man business called RF Electronics in South Carolina--countered with his interpretation that he was allowed, under FCC Part 97 Amateur Service rules, to sell such kits as one amateur to another under an exception to the certification rules. Martin argued that §97.315 of the Amateur Service rules permitted his licensed customers to purchase from him--as another licensee--and construct or modify one model of a non-certificated RF power amp or kit per calendar year for that licensee's personal use.

The FCC rejected that analysis, however. Hollingsworth emphasized that §2.815(c) of the FCC's rules requires all external RF power amplifier kits that can operate below 144 MHz after assembly be FCC-certificated before they can be made, sold, leased, marketed, imported, shipped or distributed. He noted that other provisions of §2.815 apply only to certain already fabricated amplifiers and do not exempt amplifier kits, particularly those capable of operating between 24 and 35 MHz after assembly.

Hollingsworth said §97.315 also "specifically prohibits the use in the Amateur Service of an amplifier that the operator had constructed from a non-certified kit." He also noted that, in addition to kits, Martin's RF Electronics Web site had been selling non-certificated, assembled RF power

amplifiers for use below 144 MHz. Hollingsworth said at least three of the assembled models were advertised as operational between 24 and 35 MHz.

Hollingsworth said FCC rules permit an individual amateur to construct or modify a non-certificated RF power amplifier once per calendar year for use at that amateur's own station--although the unit may not be built from a kit--and the amateur may then sell the amplifier to another licensee or dealer. The rules do not provide for mass marketing or manufacturing and marketing kits or assembled amplifiers as part of a business, Hollingsworth said.

"Any and all marketing of external RF power amplifiers or amplifier kits capable of operation below 144 MHz must be in strict compliance with ?2.815 of the Commission's rules," Hollingsworth warned. He said the FCC would prosecute any violations and take enforcement action against Martin's amateur license.

Martin's Web site no longer offers any RF amplifiers for sale.

Have you ever thought of building your own amatuer radio? The FCC does
allow that you know!

Any tranciever made to operate between 25 and 30 Mhz can be made to
operate on 27 MHz. No matter what is done. Given the right amount of
circuitry it can be done. There is and there never will be an amature
hf transceiver that can not be modified. The question is,will it be
worth it?

Hollingsworth said FCC rules permit an individual amateur to construct or
modify a non-certificated RF power amplifier once per calendar year for use
at that amateur's own station--although the unit may not be built from a
kit--and the amateur may then sell the amplifier to another licensee or
dealer.

So Dave was able to use the amp if he modified it. As noted if he was to
sell it it should be to a Ham or a dealer.

"For his personal use".
He could not legally sell it because of the rule excluding sale of RF
amps/kits below 144mhz.
The rule did not say "except to another licensee", it said, "sale of".
Period.
Read your own post. The rule was instated to prevent guys like that from
making available to CBers that kind of equipment.
Want an amp for CB? Become a licensed ham and build your own.
Even better, build your own CB and put the power output section in with the
guts.

Did you miss this paragraph?

'Hollingsworth said FCC rules permit an individual amateur
to construct or modify a non-certified RF power amplifier
once per calendar year for use at that amateur's own station
--although the unit may not be built from a kit--and the
amateur may then sell the amplifier to another licensee or
dealer. The rules do not provide for mass marketing or
manufacturing and marketing kits or assembled amplifiers as
part of a business, Hollingsworth said.'

Clearly says he may sell his amp to a dealer or another
licensed amateur. The conditions on the building/modifying
and the selling of such amps is worded so as to prevent
someone from making a commercial business out of it.

Dave

Amateur Radio Newsline™ Report 1322 – December 13, 2002

Amateur Radio Newsline report number 1322 with a release date of Friday, December 13, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds as a winter blizzard sweeps the Carolinas and the FCC asks a V-E team to explain. Find out what on Amateur Radio Newsline report number 1322 coming your way right now.

(Billboard Cart Here)

**
RESCUE RADIO: HAMS RESPOND TO CAROLINA BLIZZARD

Weathecasters described it as a clash of titans. A large cold mass of air from the North collided with a warm wet airmass from the Gulf of Mexico. The result was blizzard-like conditions in many areas of the Mid-West and along the Eastern Seaboard.

It all happened late Wednesday December 4th and all day on Thursday December 5 th. Hardest hit was North Carolina. Gary Pearce, KN4AQ, lived through the storm in Raleigh and has this first hand report:

--

The storm began moving across North Carolina as snow and sleet on Wednesday afternoon, and turned to ice overnight. With temperatures hovering just below freezing, a half-inch or more of ice coated trees and power lines. Power failed to several million homes across a wide belt in the center of the state. Telephone service had fewer outright failures, but both wired and cellular service was sluggish due to the high volume of calls.

The amateur radio story began Wednesday afternoon, as SKYWARN spotters tracked the storm for the National Weather Service. As night fell and power failed, the Red Cross and county emergency management's began opening shelters to give people a warm place to stay. Amateurs in several dozen counties staffed EOCs, shelters and Red Cross offices to assure continued communications. There was no statewide communications emergency, but ARES operators kept watch on the statewide ARES HF nets, and the state EOC in Raleigh remained on the air.

On Friday, with millions of people heading into the second night without power out and temperatures predicted to dip to 18 degrees, North Carolina Governor Mike Easley declared a state of emergency and decided to send the National Guard out to do house-to-house canvassing in 22 counties, to make sure people without phones, radio and TV knew there were shelters available.

The communications plan for the Guard units was to use cell phones to call into the State EOC and make their reports. North Carolina Emergency Management asked if Amateur Radio could provide a backup if the cell phones didn't come through. But, they couldn't pin down when or where amateurs might be needed.

John Guerriero, KG4HDT, the Emergency Coordinator assigned to cover the State EOC, arranged for the Tarheel net -- NC's statewide ARES -- Net to operate all day Saturday. He announced on Friday's nets that operators may be needed at any time in the 22 counties covered. He was especially interested in hams with HF mobile capability.

Operators from many of the affected counties maintained watch Saturday, and Guerriero demonstrated the HF and VHF Amateur Radio operation to the National Guard coordinator at the EOC. Ultimately, however, the hams received no requests for Amateur Radio communication.

One county did work directly with the Guard. In Alamance County, ARES operators who already on duty providing communications between the EOC, the Red Cross and shelters offered to accompany the Guard, but were told that civilians could not ride in military vehicles. Instead, the county provided VHF radios left over from a recent move to 800 MHz, and the Amateurs at the EOC acted as dispatchers. Alamance County EC Dwayne Ayers, N4MIO, reported that this arrangement wasn't nearly as good as the coverage the hams could have provided, but it was all the Guard would accept.

ARES operation in some counties continued through Monday, though with much power restored and shelters closing, most Amateur Radio activity secured by Tuesday.

For the Amateur Radio Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

As we go to air almost everyone in North Carolina have had their power restored. And the hams of North Carolina are standing by -- just in case Mother Nature has more winter storms up her sleeve. (KN4AQ, ARNewsline(tm))

**

HAM RAIO IN SPACE: ARISS MEETS IN WASHINGTON

It may have been snowing outside, but that did not stop ham radio delegations from descending on the Washinton D-C area for the Winter 2002 meeting to plan the future of ARISS and manned ham radio on board the International Space Station. Roy Neal, K6DUE, was there and filed back this report:

--

THE DELEGATES AND REPRESENTATIVES OF ARISS…AMATEUR RADIO ON THE INTERNATIONAL SPACE STATION... MET AT THE GODDARD SPACE FLIGHT CENTER, NEAR THE NATION’S CAPITOL.THEY DECIDED THAT 2 THOUSAND AND TWO WAS A GOOD YEAR FOR THE SPACE STATION. IT GREW RAPIDLY AND IS WORKING WELL. THE SAME IS TRUE OF ARISS.

THERE WERE MANY EXCELLENT CONTACTS WITH SCHOOLS ALL OVER THE WORLD, INCLUDING EUROPE, SOUTH AFRICA AND JAPAN. GROUND STATIONS IN SOUTH AFRICA, AUSTRALIA AND HAWAII WORKED VERY WELL IN MAKING THOSE CONTACTS .

PACKET HAS BEEN BROUGHT ON LINE AND SEVERAL THOUSAND VERY SATISFIED USERS ARE MAKING THE MOST OF IT.

FOUR EXTERNAL ANTENNAS WERE INSTALLED LAST YEAR. A MONUMENTAL ACHIEVEMENT THAT GAVE ARISS THE CAPABILITY OF OPERATING ALMOST ANY FREQUENCY FROM 20 METERS UP INTO THE GIGAHERTZ RANGE.

AMONG ITS PROBLEMS, THE SPACE STATION HAS A CREW OF ONLY THREE ASTRONAUTS AND COSMONAUTS., INSTEAD OF SEVEN AS ORIGINALLY PLANNED. THAT SEVERELY LIMITS OPERATING TIME FOR AMATEUR RADIO. THE ARISS DELEGATES WERE TOLD THAT THE INTERNATIONAL PARTNERS HOPE TO INCREASE CREW SIZE IN THE NEAR FUTURE. HOPEFULLY A LOT MORE AIR TIME WILL BE AVAILABLE.

HAM RADIO ON THE SPACE STATION PLANS FOR THE NEXT PHASE CALL FOR EXPANSION TO 70 CENTIMETER OPERATION AND A SECOND STATION ON THE AIR. THIS WOULD OPEN THE DOOR TO FULL DUPLEX OPERATION. AT A FUTURE DATE IT MIGHT EVEN ALLOW STUDENTS TO RECEIVE PICTURES ON 70 CM WHILE TALKING ON 2 METERS!

WORK WILL CONTINUE, TESTING SLOW SCAN TELEVISION AND SPACE CAM HARDWARE, HOPEFUL OF GETTING BOTH THESE PROJECTS ON THE AIR PERHAPS BY THIS TIME NEXT YEAR.

MANY OTHER EXCITING, ADVANCED TECHNOLOGY PROJECTS WERE DISCUSSED. THEY WILL BE REPORTED HERE ON NEWSLINE DURING THE COMING YEAR AS THE ARISS TEAM CONTINUES BUILDING ITS HAM RADIO STATION IN ORBIT.

ROY NEAL, K6DUE, FOR AMATEUR RADIO NEWSLINE

--

Thanks Roy. (K6DUEE, ARNewsline(tm))

**

HAM RADIO IN SPACE: RS-20 IN ORBIT

Russia has a new ham satellite in space. Well, kind of.
According to the AMSAT News Service, the new ham radio bird is actually an Amateur Radio telemetry beacon operating as a secondary payload of a new Russian navigational and scientific satellite. It was launched on November 28th, is at an altitude of 720 kilometers and circles the Earth every 99 minutes. Its beacons can be heard transmitting telemetary on 145.828 and 435.319 MHz. The new satellite has been officially named RS-20. (AMSAT NA)

**

SPECTRUM ISSUES: 40 METER REALLIGNMENT DISCUSSED
The just-ended preparatory meeting for next years World Radiocommunication Conference heard five ways to fix the problems plaguing 40 meter. It also heard a sixth presentatoion that would essentially leave things as they are.

Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
Without going into minute detail, the five concepts differ markedly from one anotgher. League Executive Vice President Dave Sumner, K1ZZ, says in the ARRL Letter that all five options do represent improvements for Amateurs operatng in the 40 meter band, although two fall short of fulfilling the 300-kHz worldwide requirement.

The International Amateur Radio Union is on record as supporting a 300-kHz worldwide amateur allocation in the vicinity of 7 MHz. Sumner says that achieving this will require the fixed and mobile services to make room for broadcasters and for the broadcasters to change their operating frequencies.

The five proposed methods for change include a variety of transition schedules to ease the impact on these other services. Even with this Dave Sumner says that there is no guarantee that proposals will be limited to the six methods described in the report.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

More on this story is on the web at www.arrl.org (ARRL)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4VRB repeater serving warm Vero Beach Florida.

**

ENFORCEMENT: VE'S ASKED TO ANSWER STRANGE PASSING GRADE

The FCC's Enforcement Bureau has begun an audit an ARRL VEC sponsored test session held in Pelham Georgia on June 10th 2000. Letters have been sent to the three V-E's who supervised the test. They ask some key questions:

--
Duckworth" “The bureau seeks information as to how a candidate who has seriously failed seven tests passed the Pelham test with a perfect score on Element 2 and only one wrong answer on Element 3.”

--

The reason for the suspicion? Again the FCC's Daryl Duckworth, NN0W:

--
Duckworth: “The candidate got a license but was recalled for testing. He did not appear and his license was canceled.”

--

The three V-E's were given an appropriate amount of time to respond. In the meantime the FCC has also recommended to the ARRL VEC that it not not accept their services while the matter is under review. (FCC, RAIN)

**

ENFORCEMENT: FCC SUGGESTS THAT FIVE VE'S ARE OUT

Meantime, the FCC has closed the books on its audit of a pair of ARRL sponsored ham radio exams in Cookville Tennessee. The sessions were held back on December 14th 1999 and March 11th, 2000. And as the FCC's Daryl Duckworth, NN0W, tells us, the Enforcement Bureau has recommended that five Volunteer Examiners not be used again:

--
Duckworth: “It recommended that the services of five V-E's be no longer accepted because they knew or should have known that one of the test candidates was related to a V-E. Also, the location of one of the test sessions was not revealed in the documentation sent to the ARRL.”
--

A final decision on the future of the five V-E's is now in the hands of the ARRL VEC. (FCC, RAIN)

**

HAM RADIO TESTING: NEW TECHNICIAN CLASS QUESTIONS NOW AVAILABLE

Scotty Neustadter, W4WW, says that the new question pool for Technician class exams is out. Neustadter heads the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators. And, in an e-mail, W4WW says that the committee has released a revised and expanded Amateur Technician class question pool into the public domain.

The new question pool becomes effective July 1, 2003. It must be used for all Technician written examinations given on or after that date. The complete set of questions can be downloaded in text or Portable Document File format from www.arrl.org/arrlvec/pools.html. You will need a free Adobe Acrobat reader program to view and print the P-D-F version. It can be downloaded at www.adobe.com. (W4WW)

**

ENFORCEMENT: FCC EXPECTED TO OK MITNICK RENEWAL

The FCC is expected to approve the license renewal of former computer hacker Kevin Mitnick, N6NHG, if it has not done so already. The W5YI Report says that an Administrative Law Judge says that Mitnick has paid his debt to society and has been adaquitey rehabilitated to where he now holds the requisite character requirements to continue as an FCC license holder.

In rendering his decision the Judge added that Mitnick has been using his radio gear since his release from prison and it is significant that there have been no complaints filed regarding his radio operations. Also, that Mitnick's post

prison conduct demonstrates that his rehabilitation can be relied upon to deal honestly with the Commission and to comply with all rules and regulations.

Mitnick's ham radio license renewal had been on hold based on his conviction for computer hacking which the FCC alluded brought with it questions regarding his fitness to remain a Commission licensee. (W5YI, ARNewsline(tm))

**

ENFORCEMENT: FCC RE-LICENSES HERB SCHOENBOHM

The former KV4FZ is back on the air but not under that call sign. Herb Schoenbohm who used tohold that call sign showed up on the air during last weekends 160 metrer D-X contest sporting the call NP2MJ.

FCC records show that Schoenbohm’s new call was issued to him on December 7th. The action to grant a new ham license comes about two months after an FCC Administrative Law Judge ruled that he now holds the requisite requirements to again become a Commission license holder.

Two years ago Schoenohm was forced off the air after the FCC refused to renew his ham ticket based on an earlier fraud conviction and the U.S. Supreme Court refused to hear his license renewal appeal. Its not known if Schoenbohm will apply for his old KV4FZ call under the vanity progam -- or -- if the FCC would grant such a request. (Numerous listener reports)

**

ENFORCEMENT: VK CB'ERS IN TROUBLE

Still with enforcement news, word from down-under that a pair of Australian C-B operators are in trouble with communications regulators. VK7HG-O reports that the two U-H-F C-B operators have been charged with breaches Australia's Radiocommunications Act for operating where they were not supposed to be.

On November 22nd, the two C-Bers were talking on the input channel to an emergency repeater. They refused to relinquish the frequency and would not move away. They were tracked from the town of Reinna to Richmond and back to Honbart by a ham radio direction finding team and the Australian Communications Authority. The regulatory agancy has already spoken with the two V-K Citizens Radio operators and is reportedly considering further action. (Q-News)

**

RADIO POLITICS: HAM ELECTED MAYOR OF CALIFORNIA CITY

The New Mayor of Agoura Hills California is a ham. Jeff Reinhardt, AA6JR was sworn in as the city's new leader on December 3rd. He says his theme for 2003 is “The Year of Discovery.”

Reinhardt, a public relations specialist, is best known nationally as he author of his “Magic in the Sky” column at appears regularly in C-Q Magazine. He will be starting a new quarterly column on mobiling also for C-Q.

Among those attending the swearing-in ceremony were Reinhardt's wife Melissa KD6BIT, daughter Jessica KD6ARA and son Steven K6SJR. Also present were Jim Fortney K6IYK, Doug Wynn WY6NN and a number of other local Southern California hams.

2003 marks the 20th year of cityhood for Agoura Hills but only the first time a licensed radio amateur has sat in the Mayor's seat. (WY6NN)

**

CONFERENCES: THE SOUTHEASTERN VHF SOCIETY

Turning to conventions and hamfests, a first call is out for papers to be presented at the 2003 Southeastern VHF Society Conference. This gathering is slated for Huntsville, Alabama, on April 25 and 26. The deadline for submitting papers to Dick Hanson, K5AND, is March 11. Dick's e-mail address is k5and@adelphia.net. Contact him directly with any questions. (VHF Reflector)

**

HAM RADIO MEMORIBILIA: COLLINS REPRODUCTIONS AVAILABLE ON-LINE

Collins reproduction items, including a new antenna switch unit are now being marketed by the Collins Radio Association. This, through its Collins Radio Center location, near Johnstown, Pennsylvania. Items can be picked up in person at the center or shipped via U-P-S. More information on what's available is in cyberspace at www.collinsra.com. (Press release)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO LAW: NEW STUDY SAYS MOBILE PHONES CAUSE ACCIDENTS

Researchers say increased cell phone use has led to more crashes caused by drivers on the phone. According to a December 2nd news report, researchers at Harvard's Center for Risk Analysis, drawing on previous research involving cell phones and government figures for auto accidents, say there is a growing public health risk from the reliance on cell phones in cars.

Data on the number of crashes caused by cell phones is incomplete but it suggested that drivers talking on their phones are responsible for about 6 percent of U.S. auto accidents each year. Translated into a human toll it means that an estimated 2,600 people are killed and another 330,000 are injured.

Researchers say that the figure was reached using current cell phone usage estimates to update a 1997 study. That study looked at phone records of Canadian drivers involved in crashes to see if they were making calls at the time.

The number of cell phone subscribers has grown from 94 million in 2000 to more than 128 million today. Opponents of banning mobile phone usage by drivers say that the benefit of car calls outweigh the possible dangers that they may pose. (Published reports)

**

EMERGING TECHNOLOGY: EMERGENCY RADIO CAN INTERFERE WITH PACEMAKERS

If you wear a pacemaker or know someone who does, listen up. A new emergency radio system could affect you. Q-News Graham Kemp, VK4BB, has the details:

--
United Kingdom and setting the pace –makers: New Scientist 23 November carry an article warning that TETRA, the two-way radio system being adopted by many of the worlds emergency services can interfere with the operation of medical devices like heart-pacemakers.

TETRA operates at 400 megs and uses pulse-rates of 17.6 Hz. Rex VK4LR suggests that anyone playing with PCM at VHF or even HF should be very careful in case someone nearby suddenly has unanticipated ticker problems!
--

The TETRA system is a European developed standard that being adopted by emergency services in 50 countries. In addition to Europe, TETRA radios are in Africa, Asia and Latin America. Great Britains' Devices Agency found that TETRA radios can upset heart pacemakers, confuse defibrillators, and stop ventilators from working. (Q-News)

**

INTRUDER WATCH: AIR ACTS ON INTERFERENCE TO 10 MHZ

A shortwave broadcaster has acted to eliminate interference to a ham band. Following a report that All India Radio was radiating spurious signals from it's 9.950 Mhz channel the broadcaster has taken the offending transmitter off the air.

All India Radio's Deputy Director said that the company decided to suspend the transmission on November 21st to investigate the cause of spurious emissions. The unwanted spurs were being heard in 50 kHz increments and included 10.1 and 10.150 MHz . (Q-News)

INTERNATIONAL - KENYA: NEW US-KENYA RECIP AGREEMENT
According to ZS6AKV, Kenya has new reciprocal licensing agreement between it and the United States. Under it, U-S citizens with F-C-C issued licenses may apply for and be granted Kenyan licenses.
ZS6AKV notes that it has taken the IARU close to ten years to achieve this

agreement. The application form to operate in Kenya can be downloaded a www.cck.go.ke. (SARL)
**
INTERNATIONAL – UK: NEW UK-THAILAND RECIP AGREEMENT

The United Kingdom's Radiocommunications Agency has signed a reciprocal licensing agreement with Thailand. Visitors to Thailand may apply for a Thai license with an H-S-Zero prefix and long-term residents of Thailand receive a full Thai callsign. (RSGB)

**

DX

In D-X, HG4I reports that he will be on from Hungary between the 20th of December and 12th January with the special event call sign H-G-Zero 3-H-N-Y. This call celebrates the new year with the numerals Zero 3 representing 2003 and the H-N-Y suffix is abbreviation of phrase Happy New Year. Look for him on all of the H-F bands running CW, RTTY, BPSK, SSB, and FM on 29 MHz.. QSL directly with a self addressed stamped envelope to HG4I at the call book address. (HG4I)

**

THAT FINAL ITEM: THE PAPER SAID WHAT?

And finally this week, an update to a simple story that has now taken a rather bizarre twist. As in -- a reporter made part of it up and nobody caught it. Fred Vobbe, W8HDU, is back with the rest of the story:

--
Last week we at Amateur Radio Newsline brought you an item about a call by the Partnership for Public Warning to create a national wireless emergency alert system. One that could send warnings to citizens via their pagers, mobile phones or computer screens.

It sounds like a good idea, only thats not what P-P-W had in mind when it released a report based on a workshop that the group conducted last June.

You see, one of the worlds largest news services picked up the story and put it out on the wires. Several news organizations including many newspapers picked up wire service story and ran their own versions of it. We were sent a number of copies by our own listeners that appeared in their local papers. And who ever questions a newspaper article? Well in this case we all should have.

Richard Rudman, W6TIA, is a Director of the Partnership for Public Warning. He ways that when his organization learned of the story its Press Relations Director contacted the news agency. Rudman says they admitted to P-P-W that their reporter made up the lead sentence about using pagers to contact the public. And as a result, the news agency actually issued a very rare retraction, but many news organizations that ran the original story did not pick up the corrected release.

For the record, Rudman says that the Partnership for Public Warning does not endorse any one vendor or technology over another. Its goal is to promote what it terms as a level playing field. One where all warning marketplace players can be more certain of rules and standards. This says W6TIA will permit them to develop on a level playing field which does not now exist. It will also promote development of common warning terminology to better serve the publics need.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

That full report of last June's P-P-W workshop was released on November 25th. You can read it on-line at www.ppw.us.org. (PPW via W6TIA, W6VR)

I once had a Starduster that I picked up at a yard sale, it was in bad shape, I piced it together with sticks and duck tape. It lasted about 6 years with me, I had to leave it when I moved to where I couldn't set up a radio.

From what I hear, the problems have been here for years, so they are
unlikely to disappear soon.

However, I am pleased to see that someone has been helped by this group.
The helpful and friendly contributors are out there, just as with so many
groups. You just don't have to let the problems hide that fact.

Behind the scenes, there are also groups of people on here who e-mail each
other regularly... usually just to send something funny to brighten up the
other peoples day.

Hi there

I am considering purchasing a CB radio for use in my vehicles. I am looking for some advice on this. The unit I am considering is the Uniden PRO520XL or PRO510XL, mostly because of it's size, price and availability. I need something that will not take up too much room, and this will not be permanently mounted, rather it will likely be used in several vehicles.

I am sort of lost when it comes to antenna selection. I think I will be ok with a magnet mount model, easy to find at any truck stop. Will it be possible to route the cable through a door or hatchback, or will I need to do more permanent mounting/installation, such as drilling holes etc.

I am also considering a scanner. Will I be able to use the same antenna as the CB for this(using a cable splitter) or does each unit need it's own antenna?

Thanks for any info it is much appreciated.

Source record: 146886

Jim,
Routing coax cable through a door isn't exactly the best way of doing things. Depending on how tightly the door seals, sooner or later, the cable will be deformed enough to ruin it. If you can find a convenient 'knock-out' to route the cable through it would be better in the long run (or drill a hole).
Scanners and radio transmitters on the same antenna is an idea that isn't too good either. Sure, it can be done, but like welding on a gas tank, it ain't simple, and the altenatives are better. Since a mobile scanner's antenna doesn't have to be very much to start with, I would think that some other idea may be 'better'. How about a cell-phone antenna and just leave it mounted, or use a 'clip-on' type? Not much for distance reception, but then most people using a scanner when mobile are interested in stuff closer to hand.
'Doc

PS - You know, one option that almost no one ever thinks about is drilling a hole in glass. But get someone who knows how to do it...

You'd need an entirely different antenna for the scanner.
When running cables through window joints, you rn the risk of pinching the
cable.
If it's a leased vehicle, drilling holes is not an option.
If it has a trunk, most people run the cable through the floorboard under
the carpet, then out through the backseat and into the trunk.
Using a trunk lip mount base for the antenna instead of a maggie.
Your possible other choice to consider would be to run the cable under the
carpet, drill a hole in the floorboard and run the cable out that way.
The hole is not noticeable and easy to seal.
if you're not willing to mess with connecting the end connector, your hole
must be big enough to slip the entire connector through as well.
To help seal the large hole, use a grommet or some type of vinyl sealant.
You could possibly use an oversized washer, cutting a slit in it just big
enough for the cable.
But running the cable through the window has always been the wrong way to do
it.

For a bare basic home brew amp, not to shabby looking though.
Kind of high priced though. For that price, I'd expect something better for
the box.

4305. Ham Gear for trade!

Newsgroup: rec.radio.cb
Date: 2002-12-15 18:14:03 UTC

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get
the technical supplement too (AKA Service manual), as well as the owners
manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in
good shape I will trade both for a FT 990 or a FT 1000.. I have been
using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working
Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM Han station
with at least 200 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter) two 3-500s 100 in
will give you 1250 out, New Caps,
that I will trade for a Globe King or full legal output Ham band AM transmitter.
this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
Happy Holidays
73 and thanks for reading

It worries me that if you right click on the animation and select "settings" there is a setting for "Allow [insert name of site using macromedia 6] access to your microphone and camera" Just why would I let macromedia player have access to my camera or microphone? Wonder if a site can by default have "yes" selected until you change the settings to no. Guess I'm just paranoid.

I have a K-40 drilled/hard mounted in the center of my Aerostar van. I've never measured it, but while down railfanning the Finger Lakes Railway(the former Auburn Road of the New York Central) from Auburn, NY to Canandaigua, NY, I found two of their overpasses that my antenna hits. One was in Shortsville, NY, the other in Canandaigua near the YMCA. I kept forgetting to check the posted heights in the way back. They were both in town in 30 MPH zones, so no damage, but it gives a good scare when it hits!

Mr. Anti-Keyclown should not be opening his mouth!
Mr. AK is being monitored at this time.
We watch daily routines and listen to the radio channels that Mr. A.K. and the "cronies" are on.

Mr. AK, WE will be coming for you!
Don't pull no "Bill Cooper" on us, BOY!!!!
We watch you all the time!
Will bring you a butt-buddy!
His name is "Long-Will"!
He'll shove his cock up in you so far you won't know what hit ya!!
He might do you ANYWHERE he wants!

That will teach you to mess with others!!

EBAY SUCKS!!!!!!
Mr. Anti-Keyclown Takes It ANYWHERE!!

Carl,

Where is this wattage supposed to come from? A radio can only do so
much before you are stressing the parts from heat and excessive
current. Even if you do get a few more watts from the radio, no
one will notice in signal strength, but will notice a decrease
in audio.

Please check out the AM tutorial at:
http://www.bigradios.com/kd6tas/

Leave the radio alone. Get a box or a better antenna.
Do you want to be laughed at like the guy with the Cobra and the trimmers?

Happy Holidaze.

Have Texas Ranger 6900F 150W all mode mobile, 10 thru 12M coverage, digital display, etc. etc. . EHam recently had a review posted that was positive about this rig being a legitimately decent mobile/entry level rig for HF. Rig is in good condition BUT....
In transit, the volume/squelch control was bent by good old Buster Brown. Tried carefully to straighten, the volume (center) shaft held, but the outer sleeve that controls the squelch didn't, leaving the squelch set at a high threshold level. Everything appears to work just fine, got FB signal reports and looks good on the meters, just the fact that the squelch is set high. The part is available from Ranger for $4.65 plus the shipping. I've had this thing in my way on the bench for a month or more and have yet to find the time to even order the pot, which is a surface mount so no big deal to replace, and I don't see any time soon when I will get to it. Santa is beating me up soundly this year, will sell for $220 shipped Priority Mail insured lower 48 only, ppd. with MO, or whatcha got to swap? Email replies please, thanks for looking.

I have a NorthStar-3000 mobile forsale. Bought about a year ago. I still have the box for it. I lost the mounting bracket. Has the stock mic. Has Hi Med Lo switch. It will key about 2 watts on hi and swing 25 watts on hi. Has extra channels, just like the galaxy models, but its built into the dimmer switch. has dual echo controls. has talkback ONLY when echo switch is flipped on. This is a real nice sounding radio...looks and works like BRAND spanking new. I'll take $100 plus $15 for shipping...thanks for looking

From: rcranus@hotmailcom (Go Deep)
I don't think Dave Halls amp was certified >when he bought it.

And my Galaxy wasn't on the list of "banned radios" when I bought *it*.
--
  But this is the FCC's position on them. Oh and Type Certification.
FCC Enforcement Case Highlights FCC Amplifier Certification Rules
NEWINGTON, CT, Oct 2, 2001--The FCC's Riley Hollingsworth used the occasion of a recent Warning Notice to hammer home the FCC's position on the sale of RF amplifiers that have not received FCC certification--formerly called "type acceptance." In a September 19 letter to Extra licensee Sidney Lee Martin, KD4YBC, Hollingsworth reiterated an earlier FCC warning to Martin that he cease commercial marketing of non-certificated external RF amplifiers and amplifier kits capable of operating below 144 MHz.
In 1978, the FCC banned the manufacture and sale of any external RF amplifier or amplifier kit capable of operating below 144 MHz without a grant of certification from the FCC. The rules specifically prohibit manufacture and sale of amps that operate between 24 and 35 MHz as a means to stem the flow of illegal Citizens Band amplifiers. The case arose from a February 11, 2000, warning to Martin from the FCC's Detroit office as a result of a classified ad Martin had run in QST. The ad featured the sale of external Amateur Radio RF amplifier kits for HF and 6 meters. The FCC letter admonished Martin that selling or offering such units for sale violated §2.815 of the FCC's rules. Martin--who operated a one-man business called RF Electronics in South Carolina--countered with his interpretation that he was allowed, under FCC Part 97 Amateur Service rules, to sell such kits as one amateur to another under an exception to the certification rules. Martin argued that §97.315 of the Amateur Service rules permitted his licensed customers to purchase from him--as another licensee--and construct or modify one model of a non-certificated RF power amp or kit per calendar year for that licensee's personal use.
The FCC rejected that analysis, however. Hollingsworth emphasized that §2.815(c) of the FCC's rules requires all external RF power amplifier kits that can operate below 144 MHz after assembly be FCC-certificated before they can be made, sold, leased, marketed, imported, shipped or distributed. He noted that other provisions of §2.815 apply only to certain already fabricated amplifiers and do not exempt amplifier kits, particularly those capable of operating between 24 and 35 MHz after assembly.
Hollingsworth said §97.315 also "specifically prohibits the use in the Amateur Service of an amplifier that the operator had constructed from a non-certified kit." He also noted that, in addition to kits, Martin's RF

Electronics Web site had been selling non-certificated, assembled RF power amplifiers for use below 144 MHz. Hollingsworth said at least three of the assembled models were advertised as operational between 24 and 35 MHz.
Hollingsworth said FCC rules permit an individual amateur to construct or modify a non-certificated RF power amplifier once per calendar year for use at that amateur's own station--although the unit may not be built from a kit--and the amateur may then sell the amplifier to another licensee or dealer. The rules do not provide for mass marketing or manufacturing and marketing kits or assembled amplifiers as part of a business, Hollingsworth said.
"Any and all marketing of external RF power amplifiers or amplifier kits capable of operation below 144 MHz must be in strict compliance with §2.815 of the Commission's rules," Hollingsworth warned. He said the FCC would prosecute any violations and take enforcement action against Martin's amateur license.
Martin's Web site no longer offers any RF amplifiers for sale.
--
I never doubted the information....I know the amps are illegal....you appear to be taking the stance that his Davemade is legal..... if that is the case it is indeed legal for an authorized hammie to use a Galaxy. I was but merely attempting to educate an upperclassmen, N3CVJ, who should already be familiar with the laws and thoroughly comprehend them.....but with hammies like you spewing untruths such as you do, Dave is very impressionable to what he sees here, subject to such influences, and reacts as he sees fit.....it is indeed a sad day for hammie radio when you have a hammie lid like N3CVJ Davey-boy Hall slamming me and others for barefoot dxing and calling us criminals when he can't even comprehend the law he is allegedly fostering but failing to enforce while breaking it himself the entire time.....it magnificently illustrates his reserved and disturbed personal issues that have nothing to with radio or legalities.
The same is said for yourself. As many times as he, and you, have claimed status by virtue of self-professed years-of-experience or how long you held a license, one would think y'all would at least comprehend the communication laws that pertain to your hobby in a satisfactory manner instead of blatantly holding yourselves above the law and rationalizing N3CVJ's "criminal" actions of using a "basement" amp..
Y'all are doing a slow burn..... waxing yer hypocrisy to the point where a low-life cber must step in, take control, and educate you two losers on what you are allegedly licensed for...my, my, my. Still waiting for N3CVJ to show us how he made this Davemade spectrally pure like he said he would...and so are others.....perhaps he was lying, perhaps he doesn't know what he was talking about...perhaps it was all in his psycho-babbled little head just like his conjured scenario of a cber getting poppped near him for disorderly conduct....anything for attention...it's the damaged ego thing.

And my Galaxy wasn't banned when I bought *it*. If you're going to apply standards, do it in a consistent and even manner across the board, not just to those situations that appear to lend credibility to your current chosen stance.

>But this is the FCC's position on them. Oh >and Type Certification.
>Hollingsworth said FCC rules permit an >individual amateur to construct or modify a >non-certificated RF power amplifier once per >calendar year for use at that amateur's own >station--although the unit may not be built from >a kit--and the amateur may then sell the >amplifier to another licensee or dealer.
>So Dave was able to use the amp if he >modified it. As noted if he was to sell it it >should be to a Ham or a dealer.

His claim of modifying a Davemade in a manner that made it "spectrally pure" is 100% golden bullshit, much like his pathological warblings concerning a local cber getting cited for disorderly. He needs help, George, but it ain't you.

4351. FS: Henry 2KD Classic Linear Amplifier

Newsgroup: rec.radio.cb
Date: 2002-12-16 15:19:36 UTC
From: jonweiner@aol.com
Message-ID: <20021216101936.18139.00000114@mb-fc.aol.com>
Source record: 146784

Nice condition Henry model 2KD Classic desk top 2000 Watt P.E.P. linear. Uses pair of 3-500Z's. Has 10 meter modification. Covers all bands, including WARC bands, from 3.5 thru 30 mHz. In very good condition, with no dents or dings. Recently removed from service, and could use a bit of cleaning. Complete with copy of the original instruction manual. Pick up at Greer, SC preferred, but will ship. Photos available. Price $450.

> back on frequency and what does each trimmer do.

These are not things that are set to a certain postition, they are
adjusted while the radio is connected to the correct test equipment
and a dummy load.

So, you have two choices...
1. DIY
Learn about electronics, radio theory, test equipment,
how to use it, etc.
Then go out and buy all the required equipment.
Connect it to the test equipment and tune it.

2. Quick method:
Take it to someone who has already done the theory, has
the equipment, and can do it for you.

Sorry if this sounds like we are all being assholes, but it is a technical
area... needing knowledge that cannot be given in a few lines of text.
If you really want to get into the technical side, take the time to learn
the theory... you will find people here are very helpful. But, there is no
quick way to the point where you can set up a radio correctly - it takes
time to learn.

Peter.

Brian makes a different kind of amp. His amps are for people who want a well designed and clean running amplifier. Nascar engines, while being more powerful, are designed to give 110% for 500 miles...then you rip them apart and rebuild them. The engine in a Corvette is designed to give you 100,000+ miles and still supply a whole lot of fun.

Wins at a shootout is a poor value of measure...unless you are looking to participate and win shootouts! :-)

I'll take the Griff's amp...thank you!

Tony:

All said the two web pages are very well presented and nice data is presented. I still have some questions about how the tests were conbucted.

1) What was the heigth above ground for the test antennae?

2) What was the pickup antenna?

3) How far was the spacing between the test antennae and the pickup antenna?

4) in you web page you mentioned free field. Please explain how you got free field on an outdoor range?

5) what software did you use to minimize ground reflections? What constants did you use in substracting ground reflection out?

6) how often was the field calibrated?

On an active frequency as the CB band is, it is near impossible to have constant field densities over long period of time. The noise floor had to be changing on a rapid period of time. I have tested antenna at 32 Mhz and have seen the noise floor and calibration of the range change by as much as 3 db over the course of just a half hour. Trying to measure 1 db or less difference on an outdoor range is difficult at VHF frequencies. At 27.2 MHz this to me seems a near imposibility.

I know that a 5/8 wave antenna will have more gain over a 1/2 wave. The gain is minimal at best. The major advantage of a 5/8 wave antenna is that it has lower angle of radiation. The losses thru the matching network are mainly due to the "Q" of the components used and the power transmitted through them. Coil heating lowers "Q". An end fed 5/8 wave presents lower matching impedance point than that of and end fed 1/2 wave. (100 Ohms to about 1800 Ohms)

Tony:

The GPK will help in the radiation patterns of the antenna if you have feedline radiation. The GPK will help to decouple the feedline from the antenna and improve radiation and suppress the radiation of harmonics from a feedline.

Copied from site:

Can its cellular coverage by opened up?.....
No. Today's radios are controlled by the software programmed into the electrical components so there's no way to trick it into tuning frequencies which it is programmed to disallow.

What about importing a Canadian or European model?.....
Looking at the original TrunkTrackers (BC235XLT & BC895XLT), there was only a North American version which was sold in the US and Canada which had no cellular band coverage. They were also not sold in Europe which means there is no version of these radios with cellular coverage intact.

It's very likely the TrunkTracker II line will be treated the same.

4368. GMRS / FRS question

Newsgroup: rec.radio.cb

Yeah.......462---467 Mhz isn't very forgiving. Pretty line of sight.
FRS.....500mw won't do much. GMRS with a repeater is another story. I have
to laugh at the manufacturers marketing radios with FRS AND GMRS in the same
radio! One being license free, while the other requires a license. Not real
swift, but with the genie out of the bottle, on any protocol, no one seems
to care-:)

Under ideal conditions, you'd be surprised how well both frs and gmrs work. I have a friend using frs and unobstructed line of sight operation can be as much as a few miles.

I can take an frs radio up to a repeater site and hear & work stations up to 20 miles away pretty much. Not bad when your standing 2800 ft above the Valley floor.

GMRS is a different animal with much more power and better radios (for the most part). We can easily talk a 50 mile radius around the repeater using 30 watt radios. Hand held operation depends more on the quality of the repeater receiver system and location.

You will see combo gmrs and frs radios which switch power levels as you change services... (back and forth from gmrs to frs and the converse).

Reduce your usable range in congested areas...

Some real fun is to put one of the Radio Shack or similar simplex voice repeaters on a scanning frs radio and listen to the excitement begin...

cheers
skipp

But this is the FCC's position on them. Oh and Type Certification.
FCC Enforcement Case Highlights FCC Amplifier Certification Rules
NEWINGTON, CT, Oct 2, 2001--The FCC's Riley Hollingsworth used the occasion of a recent Warning Notice to hammer home the FCC's position on the sale of RF amplifiers that have not received FCC certification--formerly called "type acceptance." In a September 19 letter to Extra licensee Sidney Lee Martin, KD4YBC, Hollingsworth reiterated an earlier FCC warning to Martin that he cease commercial marketing of non-certificated external RF amplifiers and amplifier kits capable of operating below 144 MHz.
In 1978, the FCC banned the manufacture and sale of any external RF amplifier or amplifier kit capable of operating below 144 MHz without a grant of certification from the FCC. The rules specifically prohibit manufacture and sale of amps that operate between 24 and 35 MHz as a means to stem the flow of illegal Citizens Band amplifiers. The case arose from a February 11, 2000, warning to Martin from the FCC's Detroit office as a result of a classified ad Martin had run in QST. The ad featured the sale of external Amateur Radio RF amplifier kits for HF and 6 meters. The FCC letter admonished Martin that selling or offering such units for sale violated §2.815 of the FCC's rules. Martin--who operated a one-man business called RF Electronics in South Carolina--countered with his interpretation that he was allowed, under FCC Part 97 Amateur Service rules, to sell such kits as one amateur to another under an exception to the certification rules. Martin argued that §97.315 of the Amateur Service rules permitted his licensed customers to purchase from him--as another licensee--and construct or modify one model of a non-certificated RF power amp or kit per calendar year for that licensee's personal use.
The FCC rejected that analysis, however. Hollingsworth emphasized that §2.815(c) of the FCC's rules requires all external RF power amplifier kits that can operate below 144 MHz after assembly be FCC-certificated before they can be made, sold, leased, marketed, imported, shipped or distributed. He noted that other provisions of §2.815 apply only to certain already fabricated amplifiers and do not exempt amplifier kits, particularly those capable of operating between 24 and 35 MHz after assembly.
Hollingsworth said §97.315 also "specifically prohibits the use in the

Amateur Service of an amplifier that the operator had constructed from a non-certified kit." He also noted that, in addition to kits, Martin's RF Electronics Web site had been selling non-certificated, assembled RF power amplifiers for use below 144 MHz. Hollingsworth said at least three of the assembled models were advertised as operational between 24 and 35 MHz.
Hollingsworth said FCC rules permit an individual amateur to construct or modify a non-certificated RF power amplifier once per calendar year for use at that amateur's own station--although the unit may not be built from a kit--and the amateur may then sell the amplifier to another licensee or dealer. The rules do not provide for mass marketing or manufacturing and marketing kits or assembled amplifiers as part of a business, Hollingsworth said.
"Any and all marketing of external RF power amplifiers or amplifier kits capable of operation below 144 MHz must be in strict compliance with ?2.815 of the Commission's rules," Hollingsworth warned. He said the FCC would prosecute any violations and take enforcement action against Martin's amateur license.
Martin's Web site no longer offers any RF amplifiers for sale.
--

I never doubted the information....I know the amps are illegal....you appear to be taking the stance that his Davemade is legal......
****

Yes acording to Riley it is legal for him to modify 1 per year, but you are comparing the amp to the radio the radio. As sold the Galaxy(among other exports) cannot be used. They have not been type certified. A ham has it aligned etc to meet FCC's min spectral requirements he can then use it. Other than that he cannot take a Galaxy or any export radio and just use it it is not Type certified by the FCC in it's current form.

"Hollingsworth said FCC rules permit an individual amateur to construct or modify a non-certificated RF power amplifier once per calendar year for use at that amateur's own station"

if that
is the case it is indeed legal for an authorized hammie to use a Galaxy.
****
No that is not the case and just because you say it doesn't make it so, you can say it 100 more times it won't make it true.the Galaxy is not type certified, he has to have it aligned to FCC minimum specs before it can be used LEGALLY by a Ham. .

I was but merely attemptin to educate an upperclassmen, N3CVJ, who should already be familiar with the laws and thoroughly comprehend them.....but with hammies like you spewing untruths such as you do, Dave is very impressionable to what he sees here, subject to such influences, and reacts as he sees fit.....it is indeed a sad day for hammie radio when you have a hammie lid like N3CVJ Davey-boy Hall slamming me and others for barefoot dxing and calling us criminals when

he can't even comprehend the law he is allegedly fostering but failing
to enforce while breaking it himself the entire time......it
magnificently illustrates his reserved and disturbed personal issues
that have nothing to with radio or legalities.

The same is said for yourself. As many times as he, and you, have
claimed status by virtue of self-professed years-of-experience or how
long you held a license, one would think y'all would at least comprehend
the communication laws that pertain to your hobby in a satisfactory
manner instead of blatantly holding yourselves above the law and
rationalizing N3CVJ's "criminal" actions of using a "basement" amp..
****
I am not rationalizing anything Twithed, Riley Hollingsworth has stated,

"Hollingsworth said FCC rules permit an individual amateur to construct
or modify a non-certificated RF power amplifier once per calendar year
for use at that amateur's own station"

You are the one doing all the barking about Daves amp and have been proven
wrong about it, he is not performing any criminal action using the amp. Why
can't you get it thru your head.

>a low-life cber must step in, take control, and educate you two losers
>on what you are allegedly licensed for..

You got that shot right twist you certainly are a low life CBer , and you
are spreading lies and misinformation, Galaxy radios cannot be used in there
current form by hams, Why ? because they are not type certified, they also
woul;d have to be modified to comply with FCC requirments. .

Still waiting for
N3CVJ to show us how he made this Davemade spectrally pure like he said
he would...and so are others......perhaps he was lying, perhaps he
doesn't know what he was talking about...perhaps it was all in his
psycho-babbled little head just like his conjured scenario of a cber

twisty who is the us you speak of? I don't hear any other babbling like you
are you speaking for others again.

LOL, James take a hike you piker, I guess there are thousands and hundreds of thousand appliance operators carrying ham licenses. I build my own antennas, does that count? who cares what you think ..just because someone doesn't have the time to build a radio they are a appliance operator.? Can we see pics of your hombrew amps and radios.
Did you build your own car?

Good observations Skip. Yeah....the little simplex repeaters are quite enjoyable, and amusing too. We use one regularly on 222 Mhz!

Are these made by Dave??? They do look similar in many respects. I can't understand why any designer would enclose the heatsink in a semi-closed case with no fan like on the smallest unit. That is just beyond comprehension...

They are certainly two different kind of animals. While the Davemade, Xforce, and others are class "C" (no bias) amps that are made for "all out" performance at the expensive of longevity and harmonic splatter... my amps are designed so components work within their design limits. This ensures reliability and low harmonic content. Dino's analogy was good... either you're looking for an every day driving car... or one you take to the strip and blow up.

When a radio a working as it should, I keep the covers on them.
Last cold solder joint, it took 5 minutes to find it. The covers
went right back on it. The cold seems to have shifted my little
122 a bit lately, so I may have to fire up the freq counter and
locate my plastic screwdriver set...let all items warm up for .5 hr...
follow the instructions in my TRC-465 service manual from step 1...

If Your just looking for something to talk to people in traffic i.e.: Smokey report , road conditions , traffic jams act. act. . Then just use a glass mount antenna .
You can get a glass mount for 11mtr and a dual band should work well for the scanner.
And no You wouldn't have to drill through the glass . The glass mount antenna is used with an adhesive tape . one on the outside holding the antenna then one on the inside that holds the coax and these two pieces sandwich the glass between them
This should work well for You just as so Your not talking about running amps and soforth.
I run a glass mount antenna on My Corvette because the body is all fiberglass and I was impressed with it.

Bill, I think they had their signals crossed. I don't think they should question your callsign at all - I think the question was to what audience is the sale aimed at? That aside, it is unfortunate that One Time Use Cameras is closing the Rochester plant as I would otherwise be very likely interested since you are apparently in my local area. However, at this point I am up to my knuckles in resumes ... ;)

> band, while GMRS was the 5 mile range. If I see a GMRS radio that
> claims only 2 miles, should I be skeptical?

It depends on the power output. For an FRS radio to be legal, it can not put out more than 500 mW. GMRS, on the other hand, can put out up to 5 watts on the interstitial channels. Most GMRS/FRS radios run around 2 watts in GMRS mode, and .5 watt in FRS mode. At .5 watt, the radio is spec'ed to get near 2 miles range on average. Most will get between 1 and 5 miles depending on terrain. Some of the guys on alt.radio.family, have ran range tests, and some ranges in excess of 20 miles were achieved, when mountain topping.

In GMRS mode, with 2 watts, you should be able to jump up to 5 miles on average, with the same limitations on terrain.

The really sad thing is that these "combo" radios, are sold with very fine print explaining the need for an FCC license to use GMRS. Many will inadvertently be used illegally on GMRS frequencies. Many current GMRS licensees and repeater owners are fit to be tied as they envision their systems being overrun with kids playing cops and robbers and budding DJ's.

Gotta love those marketing folks......

From 25th Dec. 2002 (00.01 h UTC) until 26th Dec. 2002 (23.59 h UTC) the International Radio DX-Group (Spirit of Australia) is organizing the 1st Xmas QSO Party 2002 open for all 11m DXers of good will, whatever group they belong to or not.
All 11m DXers, whatever group they belong to, are invited to take part in this Xmas QSO Party. You just have to use the same call-sign for the whole contest (e.g. if you work contest(s) with a friend and use multi-callsign, do not give out a contest progressive number with your own call-sign!). The rules for the Xmas QSO party are almost the same as for IR-DX World Contest 2003.
For more information, please contact the Contest Manager Jimmy 13IRØ11
Including the logbook you have to send the table of results to the contest manager by postal mail or e-mail.
These sheets can be downloaded at our website www.irdx.org : Useful forms
!!!!
Together the table of results and the logbook must be received at the contest manager before 31. January 2003
Prizes will be awarded during the International Radio DX-meeting in Italy
2003. 1st, 2nd and 3rd prize will receive a certificate and a special gift. Good DX ! Merry Christmas and a Happy New Year 2003

WA3MOJ wrote:
I never doubted the information....I know the amps are illegal....you appear to be taking the stance that his Davemade is legal......
****
>Yes acording to Riley it is legal for him to >modify 1 per year,

Not exactly...Riley doesn't make law and has no authority to do so, but your interpretation does go against your previous stance of calling them basement amps and also illustrates how totally off the cuff and incorrect you are/were in referring to those who talk about these amps as criminals...never mind the fact that you take mere talk as evidence as guilt, but more interesting is the idea that you automatically assume that everyone you don't know, agree with, or are unable to get a call sign on or other personal info on, is automatically breaking the law, perfectly illustrating your haste in searching for discontent and hate.

>but you are comparing the amp to the radio >the radio.

No, I'm not...you are using the "grandfather clause" as an excuse for Dave's amp, which isn;t addressed, but do not wish to apply it to a Galaxy as it voids your point.
You have always had problems applying the standards you speak of...holding yourselves above the standards or applying them to others only.

>As sold the Galaxy(among other exports) >cannot be used. They have not <been type certified.

As used a Galaxy CAN indeed be used by an authorized hammie. Ten meter radios do not need be "type accepted" as you speak of it, such as referring to the stickers disclaiming cb use and alluding to not being "type certified".

>A ham has it aligned etc to meet FCC's min >spectral requirements he >can then use it.

Really? Where did that come from? Show me. And what are these requirement concerning this spectrally pure bullshit? Who makes certain it meets these "requirements"?
Show me the part of the law that distinguishes and give specs for the Galaxy and what a hammie must do to it before you claim it can be used.
Don't tell me about it, quote it, which you apparently are unable.

>Other than that he cannot take a Galaxy or >any export radio and just >use it it is not Type certified by the FCC in it's >current form.

Pay close attention. It doesn't need be as it's not a cb.

>"Hollingsworth said FCC rules permit an >individual amateur to
>construct or modify a non-certificated RF >power amplifier once per
>calendar year for use at that amateur's own >station"

Make up your mind..you aren't too clear here.. are you defining
"non-certificated" as constituting exemptness from "type-acceptance" If
thats the case, there is no need for bringing a "Davemade" in line to
"spectral purity", whatever voodoo definition you apply to that. This
same discussion tripped you up last time we were all discussing type amp
classes, despite your self-bolstered claims of amp knowledge-greatness.
Seems you can't quote the passage you claim exists.

if that
is the case it is indeed legal for an authorized hammie to use a Galaxy.
****
>No that is not the case and just because you >say it doesn't make it
>so, you can say it 100 >more times it won't >make it true.

Ditto for you and the "Spectral purity" rule you claim concerning Dave
Hall's use of a Davemade....does this apply to his Texas Star? Is it
already "spectrally pure"? Be very careful how you answer for N3CVJ here
so you don't f*ck him up even more.

>the Galaxy is not type certified, he has to have >it aligned to FCC
>minimum specs before it can be used >LEGALLY by a Ham. .

Cite it...cite the rule that specifically shows the requirements for
spectral purity in order to run a davemade legally and a galaxy and a
Texas Star...that's all..just cite it..copy and paste it and don't ad
lib, and I'l have a heapin' help of crow.. but you can't, can ya.?

I was but merely attempting to educate an upperclassmen, N3CVJ, who
should already be familiar with the laws and thoroughly comprehend
them.....but with hammies like you spewing untruths such as you do,
Dave is very impressionable to what he sees here, subject to such
influences, and reacts as he sees fit.....it is indeed a sad day
for hammie radio when you have a hammie lid like N3CVJ Davey-boy Hall
slamming me and others for barefoot dxing and calling us criminals when
he can't even comprehend the law he is allegedly fostering but failing
to enforce while breaking it himself the entire time......it
magnificently illustrates his reserved and disturbed personal issues
that have nothing to with radio or legalities. The same is said for
yourself. As many times as he, and you, have claimed status by virtue of
self-professed years-of-experience or how long you held a license, one
would think y'all would at least comprehend the communication laws that
pertain to your hobby in a satisfactory manner instead of blatantly
holding yourselves above the law and rationalizing N3CVJ's "criminal"
actions of using a "basement" amp..
****
>I am not rationalizing anything Twithed, Riley >Hollingsworth has
stated, "Hollingsworth said >FCC rules permit an individual amateur to
>construct or modify a non-certificated RF >power amplifier once per
>calendar year for use at that amateur's own >station"

Redundant parroting of something you clearly do not comprehend doesn't make it conform to your flawed and incorrect interpretations..no dice. You have demonstrated it has nothing to do with spectral purity. It was addresed nowhere but from you and Hall........

>You are the one doing all the barking about >Daves amp and have been proven wrong >about it,

Dave didn't proe a damn thing, even though he said he would several times...it's why he has taken to masking his ID again (so he thinks) and posting pseudo-anonymously (yea, right...hahhhahahahhh). He has NOT proved anything. He has NOT showed how he has made this Davemade spectrally pure like he claimed he would. He has NOT shown anything concerning his lie about a cber getting arrested and found guilty of a misdemeanor of disorderly. Hehas proved absolutley nothing. Again, Geroge, Dave needs help, but you aren't it, even if your intentions are intended as such. You need to educate yourself before you can assist another floundering lid.

> he is not performing
>any criminal action using the amp. Why can't >you get it thru your head.

He uses it on the freeband......and openly endorsed the freeband..recently, when he claimed he was advocating nothing but legal, responsible cb..then he selectively chooses who to go after for the same actions he does himself. Ignoring his hypocritical and self-contradictory remarks and attacking me personally with ad hominem and off topic remarks won't make his actions, behaviors, and statements go away.
--
a low-life cber must step in, take control, and educate you two losers on what you are allegedly licensed for..

>You got that shot right twist you certainly are a >low life CBer ,

And you are a shining example of apicture perfect lid to hammie radio. You base this on your intense dislike for me, not my radio personality, not my operating mannerisms, but what you read here and disagree with. The sign of an enlightened and intelligent individual, no doubt about it. I take full credit and responsibility for you being proud of the fact. I have the uncanny ability to make you swine shine and I'm enjoying it to the fullest extent possible. This much fun ought to be illegal, hey? <g>.

>and you are spreading lies and >misinformation,

If you are referring to my Galaxy statement, it can only be one, either a lie, or disinformation. You can' even produce a single passage from the law, how can anyone call on you to produce anything else.......,
since you claimed two....you haven't managed to come up with a rule or law quote claiming anything about type-acceptance for an authorized hammie concerning the Galaxy or a Davemade as far as making them spectrally pure and in regs with the FCC as you claimed.......

>Galaxy radios cannot be used in there current >form by hams, Why ?
>because they are not type certified, they also >woul;d have to be
>modified to comply with FCC requirments. .

Which are what? Why does this point have you stuttering and flopping around like a fish out of water? Still waiting for either of you to answer any of the questions posed to you concerning your claims..so far you both have done nothing but fail and lie,,,,,and attack me when it's pointed out as such.
--
Still waiting for
N3CVJ to show us how he made this Davemade spectrally pure like he said he would...and so are others......perhaps he was lying, perhaps he doesn't know what he was talking about...perhaps it was all in his psycho-babbled little head just like his conjured scenario of a cber

>twisty who is the us you speak of? I don't hear >any other babbling
>like you are you speaking for others again.

The group. See, you can't have it both ways....even though you try to selectively apply standards unevenly. You and your posse of hate and discontent who have pledged to troll rec.radio.cb have claimed this group is full of illegal cbers using illegal amps...Dave Hall N3CVJ even made a comment that cbers aren't satisfied with barefoot radios and almost all run illegal power..since the both of you have been rendered impotent all you can do is cry about your own statements that have you chasing your cur and lice ridden tails...hehehhe.
And since the group is chock full of illegal amp owners and Davemade is a very popular amp......many would be intereste in the info. the fact that I am in touch with the pulse of cbers and you don't have a clue seems to upset you greatly..stop allowing such trivial and mundane matters to control your emotive responses..it looks quite foolish and juvenile. I wasn't the only one that asked..although he did claim he wouldn't indulge us unless another asked, he has failed to produce yet once again.

You attacking me for asking him about his own claims illustrate your own insecurity and personal issues that are completely independent of radio. And I guess since his personal issues with me has him all riled up, he will use the same excuse, that he won't (read: can't) produce anything that would lend one iota of credibility to his already compromised imaginative conjurations, the latest one of disorderly charges against cbers in the state of Pa......and all because of his disdain for little 'ol me, no doubt..otherwise, he would have no problem showing that all his wild-azzed claims have perfectly sound explanations....but 'ol twist prevents that. Let me ask you something,,,you attribute magical feats to me too often.

>claims only 2 miles, should I be skeptical?
****

Range is dependant on th eamount of transmitted power, antenna
configuration and terrain. Some of the GMRS radios may have lower
transmitter power than others and thus less range. Overall the ranges
quoted are met under ideal conditions such as flat terrain with no
trees or buildings between the units.

My level of Language? I called you a piker not a PeckerHead, perhaps I should have you started hurling the insults in typical Hammie fashion. And then can't back up the bullshit you post. You don't operate homebrew equipment so I am assuming you classify yourself as a appliance operator, as per you that is what you are if you don't build your own radio. Jim do us all a favor we don't need you in this NG another Hammie with an attitude....Lose it your not all that Peckerhead...

The Uniden 2510, which is on that list, has a VFO with a frequency display.

Once again, the 2510 ships from the factory operating on 10 meters only. To change it to 10/11 meters, you had to cut a trace and solder in a resistor somewhere, if I remember correctly. However, on newer units you have to purchase and install a completely new processor chip, from what I've heard.

With my Kenwood, it ships from the factory transmitting on 160-10 meter ham bands only. All that needs to be done is clip two diodes for full transmit.

> appreciated.

I'm against jamming cellphones, mostly because doing so contitutes
major lawfucking in Amerika (this is one reason why I think our
lawmakers should be ground up into dog food & law books ripped up for
toilet paper). I hate cellphones too---somebody once called them
Cigarettes of the '90s---but unfortunately monkeying around with
cellphone freqs can land a well-meaning person in the crossbar hotel
for 5 years. The carriers are THAT protective of the freqs, and they
keep our lawmakers on a very short leash.

The jamming device you might have heard about is a little videotape
sized white box made in Israel, not Japan... *BUT* the last I heard of
it, our Feds are just ITCHING to bust the living hell out of the 1st
joe who goes to Israel to buy one and bring it back though Customs or
ship it through the mail. Even trying to get ahold of the schematic is
probably too risky.

Cellphone freqs are not very accessible anyways, unless you have the
technical expertise to mod 800mhz trunk-junk, or possibly hitch up a
33cm ham transverter to a modified 2m transceiver and work the rest
out with math... but remember, I'm not going to post your bail if you
try it & get yourself busted.

Moral: just grin & bear it.

No one said he makes the Law asslip, he enforces the Law he is also a lawyer
I am sure he knoiws the FCC laws better than you.

> but your interpretation does go against your previous stance of calling
them
>basement amps

They still are basement amps what part has changed. They must be modified to
meet FCC specs. My interpretation is right on the money Dave Hall can modify
his amp as he stated.

> and also illustrates how totally off the cuff and incorrect you are/were
in referring to those who talk about these amps
>as criminals...

They are criminals the amps are still illegal to build, for anyone.

>never mind the fact that you take mere talk as evidence as guilt,

Funny you say that you have taken everything Dave Hall has said as evidence
why is it different when you say something about something that you are
doiing that is illegal. .

>but more interesting is the idea that you automatically assume
>that everyone you don't know, agree with, or are unable to get a call
>sign on or other personal info on, is automatically breaking the law,

Use that amp on 11 meters you are a criminal, build that amp you are a
criminal and breaking the Law. Say you use an amp , your a criminal or a
liar. In your case your both, you won't What part don't you understand.
don't be such a pussy twisty stand up for your illegal actions instead of
making excuses. Your the best at that.

>perfectly illustrating your haste in searching for discontent and hate.

I have to look no farther than you for discontent and hate.

>but you are comparing the amp to the radio >the radio.

>No, I'm not...you are using the "grandfather clause" as an excuse for Dave's amp,

Grandfather clause? what are you smoking of course you can provide proof of this wild imaginary claim. I will take a link form the FCC page as proof.

> which isn;t addressed, but do not wish to apply it to a Galaxy as it voids your point.

You are attempting to twist the topic now The amp and the Galaxy are 2 different things It is you who is trying to compare the 2 they are totally different. Get over it no matter how much you cry they are not the same.

You have always had problems applying the standards you speak of...holding yourselves above the standards or applying them to others only.

>As sold the Galaxy(among other exports) >cannot be used. They have not <been type certified.

>As used a Galaxy CAN indeed be used by an authorized hammie.

No they can't you maroon, any radio used on amateur radio bands need to be type certified. I have already proven that with
proof from FCC web page. argue with them.

>Ten meter radios do not need be "type accepted" as you speak of it, such as
>referring to the stickers disclaiming cb use and alluding to not being " type certified".

They need to be type certified to be used legally by a Ham, although they don't need to be type accepted to be imported into this country. For use they either have to be modified to meet FCC specs or be type certified. A ham radio will not have any stickers on it alluding to CB use. Your making thoings up again bedcause you have no clue.

>>A ham has it aligned etc to meet FCC's min >spectral requirements he >>can then use it.

>Really? Where did that come from?

FCC

> Show me.

You show me your grandfather clause statement

>And what are these requirement concerning this spectrally pure bullshit?

Get a ham license if you want to find out

>Who makes certain it meets these "requirements"?

Fcc you nimrod, how do you think radios are "type accepted" they must meet these requirements.
A radio is sent to the FCC lab the FCC checks the radio for spectral

quality, if it passes all other units of this model must all meet these requirements before they can be sold.

>Show me the part of the law that distinguishes and give specs for the Galaxy and what a hammie must do to it before you >claim it can be used. .

A Ham is required by his license to make sure his radio is within specifications. No matter if it is a kenwood or a homebrew radio, you just don't put any piece of shit radio on the air.

>Don't tell me about it, quote it, which you apparently are unable

Don't tell you about it that is all you are doing, you have not posted one shred of evidance to back your claims especially this grandfather clause I have quoted the FCC page and pasted it, you read it I am not leading you by the hand. The rules aren't going to change overnite so they will still be there for you tommorow.

>Other than that he cannot take a Galaxy or >any export radio and just >use it it is not Type certified by the FCC in it's >current form.

>Pay close attention. It doesn't need be as it's not a cb.

You pay close attention, Hams must use type certified equipment. The galaxy is not one of them.

>"Hollingsworth said FCC rules permit an >individual amateur to >construct or modify a non-certificated RF >power amplifier once per >calendar year for use at that amateur's own >station"

>Make up your mind..you aren't too clear here..

Talk to Riley.

> are you defining "non-certificated" as constituting exemptness from "type-acceptance"

Listen up real close I will say it one time, A ham such as dave hall can use an amp that he built, which of course hasn't been sent in for type certification. if dave wants to start selling them he will have to send the amp in for type certification, which means he can build it and have the FCC accept or reject it, if they accept it any additional units he builds for sale must also meet the same specs. If he is going to use a non type certified amp it is up to the amateur operator to make sure it is meets or exceeds the FCC spectral requirements. It is up to the amateur

>If thats the case, there is no need for bringing a "Davemade" in line to "spectral purity",

There sure is, a ham must operate a radio amp or whatever he is using within the FCC spectral requirements.
Whether he built the amp himself or bought it.

> whatever voodoo definition you apply to that.

Argue with the FCC it is not my fault you don't understand.

>This same discussion

Has screwed you up for a while. you see no one backing you nor any hammies running to your side...

if that
is the case it is indeed legal for an authorized hammie to use a Galaxy.
****
>No that is not the case and just because you >say it doesn't make it
>so, you can say it 100 >more times it won't >make it true.

>Ditto for you and the "Spectral purity" rule you claim concerning Dave
>Hall's use of a Davemade....does this apply to his Texas Star?

It applys to all amps that aren't type certified. Homebrew or whatever.

>Is it already "spectrally pure"? Be very careful how you answer for N3CVJ here
>so you don't f*ck him up even more.

How am I fucking up Dave, he can use his amp if he wishes it is up to him to acertain that it is within legal operating specs.
Is it already spectrally pure nah i doubt it it is a class c splatter box none of the factory made ham amps are Class C what does that tell you right off the bat?

>the Galaxy is not type certified, he has to have >it aligned to FCC
>minimum specs before it can be used >LEGALLY by a Ham. .

Cite it...cite the rule that specifically shows the requirements for spectral purity in order to run a davemade legally and a galaxy and a Texas Star...that's all..just cite it..copy and paste it and don't ad lib, and I'l have a heapin' help of crow.. but you can't, can ya.?

I was but merely attempting to educate an upperclassmen, N3CVJ, who should already be familiar with the laws and thoroughly comprehend them.....but with hammies like you spewing untruths such as you do, Dave is very impressionable to what he sees here, subject to such influences, and reacts as he sees fit.....it is indeed a sad day for hammie radio when you have a hammie lid like N3CVJ Davey-boy Hall slamming me and others for barefoot dxing and calling us criminals when he can't even comprehend the law he is allegedly fostering but failing to enforce while breaking it himself the entire time......it magnificently illustrates his reserved and disturbed personal issues that have nothing to with radio or legalities. The same is said for yourself. As many times as he, and you, have claimed status by virtue of self-professed years-of-experience or how long you held a license, one would think y'all would at least comprehend the communication laws that pertain to your hobby in a satisfactory manner instead of blatantly holding yourselves above the law and rationalizing N3CVJ's "criminal" actions of using a "basement" amp..
****

>I am not rationalizing anything Twithed, Riley >Hollingsworth has
stated, "Hollingsworth said >FCC rules permit an individual amateur to
>construct or modify a non-certificated RF >power amplifier once per
>calendar year for use at that amateur's own >station"

>He has NOT showed how he has made this Davemade
>spectrally pure like he claimed he would.

If he biased it he probably cleaned it up quite alot.
Since when does he have to prove what he does to you> who are you?

He has NOT shown anything
concerning his lie about a cber getting arrested and found guilty of a
misdemeanor of disorderly. Hehas proved absolutley nothing. Again,
Geroge, Dave needs help, but you aren't it, even if your intentions are
intended as such. You need to educate yourself before you can assist
another floundering lid.

> he is not performing
>any criminal action using the amp. Why can't >you get it thru your
head.

He uses it on the freeband......and openly endorsed the
freeband..recently, when he claimed he was advocating nothing but legal,
responsible cb..then he selectively chooses who to go after for the same
actions he does himself. Ignoring his hypocritical and
self-contradictory remarks and attacking me personally with ad hominem
and off topic remarks won't make his actions, behaviors, and statements
go away.
--
a low-life cber must step in, take control, and educate you two losers
on what you are allegedly licensed for..

>You got that shot right twist you certainly are a >low life CBer ,

And you are a shining example of apicture perfect lid to hammie radio.
You base this on your intense dislike for me, not my radio personality,

My intense dislike for you is derived at how you are and how you are a liar
and twist things to suit you. You are correctly named and I didn't name you
so I assume you have had this affliction since birth.

>not my operating mannerisms, but what you read here and disagree with.

Well this can go 2 ways twisty, you then are either a lair which I believe
to be true or what you talk about is the truth you operate on the freeband
etc. which is it are you a liar or are you telling the truth when you say
you break federal law and talk on the freeband.

>and you are spreading lies and >misinformation,

If you are referring to my Galaxy statement, it can only be one, either
a lie, or disinformation. You can' even produce a single passage from
the law, how can anyone call on you to produce anything else.......,

since you claimed two....you haven't managed to come up with a rule or law quote claiming anything about type-acceptance for an authorized hammie concerning the Galaxy or a Davemade as far as making them spectrally pure and in regs with the FCC as you claimed.......

>Which are what?

Get a ham license and find out,
Let me ask you this do you think hams can just operate any piece of shit they want on the band? with out requirements
and specifications. use your head a little hear twisty.

Why does this point have you stuttering and flopping
around like a fish out of water? Still waiting for either of you to answer any of the questions posed to you concerning your claims..so far you both have done nothing but fail and lie,,,,,and attack me when it's pointed out as such.
--
>Still waiting for N3CVJ to show us how he made this Davemade spectrally pure like he said
>he would...and so are others.....

He biased the amp, If I were dave I would charge for the info you are asking for.

>twisty who is the us you speak of? I don't hear >any other babbling
>like you are you speaking for others again.

>The group.

I don't see the group saying the same thing you are about htis subject. But then again this is a CB NG what do they know about Ham laws.

> See, you can't have it both ways....

And neither can you.

>even though you try to selectively apply standards unevenly. You and your posse of hate and
>discontent who have pledged to troll rec.radio.cb have claimed this
>group is full of illegal cbers using illegal amps...

<<<snipp snipp>>>>

Stay on topic Twisty

>Dave Hall N3CVJ even made a comment that cbers aren't satisfied with barefoot radios and
>almost all run illegal power..

He is 100% correct, look at the first thing you and your vermin say... A person posts "My cb doesnt have the range I expected" .. the first reply always is get a amplifier I call that a fact

> And since the group is chock full of illegal amp owners and Davemade is
>a very popular amp......many would be intereste in the info.

Well perhaps Dave would be wiling to sell this info. Your admitting the
group is full of illegal amp owners is correct

>the fact that I am in touch with

yourself?

> the pulse of cbers and you don't have a clue seems to upset you greatly..

Oh you haven't a clue what my clue is

> I wasn't the only one that asked..although he did claim he
>wouldn't indulge us unless another asked, he has failed to produce yet
>once again.

And that is his perogative he is under nothing to give you free info...

BOY!!!
YOU HAD BETTER GO SUCK YO MOMMA'S COCK LIKE YOU BEEN DOIN'!!!
(sound of whip cracking)
GET TO IT!!!!
GIT!!!

You still hoin' ?
Thought dat was you going in one of them showers at da truckstop the other night.
Had your "goodbuddy's" hand in yours!! AWWW Ain't that special!!
I knows you used them items in that list you just posted!
Your "Good-buddy" walkin kinda funny comin' outta that there shower.
Had his hand on his ass bitchin' and moanin like a molested cat!
Da whole place just busted out laughin', li'l chilluns was pointin and laughin!
They was waitin' fo yo sorry ass to come out but ya nevva did!!
What you do, climb through da ceilin?
HEHEHEHEHEHEHEHEH!!
BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

I bets yo dick was a sore muthafucka when you got back home!
(drinking my 40oz malt liquor)

Lawdy Mercy!! Mmm!
You is retarded!
Your breath stank!!
Getcha some scope from the drugstore---it might get that "taste" out yo mouth!!!!!

Thanks for the compliment...

As for Lou... I have asked him nicely to stop the full advertisments and he has totally ignored me. My definition of spam is when somebody posts nothing but and ad in a post. If someone provides a link, that's fine and I certainly welcome that... but a full page ad several times daily can be called nothing but spam...

I have a NorthStar-3000 mobile forsale. Bought about a year ago. I still have the box for it. I lost the mounting bracket. Has the stock mic. Has Hi Med Lo switch. It will key about 2 watts on hi and swing 25 watts on hi. Has extra channels, just like the galaxy models, but its built into the dimmer switch. has dual echo controls. has talkback ONLY when echo switch is flipped on. This is a real nice sounding radio...looks and works like BRAND spanking new. I'll take $100 plus $15 for shipping...thanks for looking

4455. Microphone for a Midland 73-650

Newsgroup: rec.radio.cb
Date: 2002-12-18 03:51:27 UTC
From: Jim <jimwill2@kc.rr.com>
Message-ID: <3hSL9.110323$ry.1368811@twister.rdc-kc.rr.com>
Source record: 146992

I'm new to this site... I just found an old Midland 73-650 (am/fm/cb/8-track) that I would like to install in my old truck. Nice condition but no mic or documentation. It has a mic plug with lots of pins in it... looks like most of the cb controls are in the mic? Has a "cb" button and a meter on it. Any info would be appreciated!

Jim Williams

Jim,

Went down the Big Yellow Chute in '86 after Uncle George lost the Berkey and Polaroid suits, 5,500 of us out the door in 5 days, believe me when I tell you there is life after K.

Thanks for the note...the sale is aimed at whichever audience has cash. Too much of a realist, (and have been around long enough to know where the proverbial bodies, as well as all those Tempo Ones, are buried) to think that all of the 1 by 2 calls around here didn't maybe have a XX or 11W first. We all start somewhere, and progress to our own level of achievement based upon interest, time available to pursue, money and other factors. There are some damned good radio folks on 11M, and some absolute idiots on UHF/VHF/HF, and vice versa. I'm not only referring to operation "ethics", but electrical skill and knowledge as well. Radio in and of itself is a hobby on the downhill cycle, with these damned computers, and the average guys' lack of time available to devote to learning a hobby, and a million other reasons that see the numbers of radio folks shrinking, or at least getting older. Interest in the hobby, from whatever angle, is a good thing. Having said that, in a perfect world it would be nice if everyone would progress along to a General or better, some will, some won't. Many will lose interest after CH 19 gets boring, some will discover "freeband" and stop there, and some will go farther. Narrow mindedness by the rest of us won't help the progression and "evolution" process at all. It's like the old sign over the bar at the California Brew Haus stating the "Rules for Beginners". The last rule is "Don't be a Beginner every night!" One can only hope.

Thus endeth the sermon....
good luck with the search.
Bill

Your amp has no airflow either, from what it seems. They both are illegal
they do have that in common.

To this group....Rec.Radio.Cb:

On the personal advice of my Attorney, Mr. Levon King, I am making
this public statement reguarding this newsgroup and my activity in it.

It appears that Mr. Doug Adair of Toledo, Ohio and some his "friends" have taken it upon themselves to start a smear crusade against myself. Well, in some respects, they have achieved what they've have set out to do.

Doug, I've got one thing to say to you. You're a low-life scum of the earth. you come back to this NG, and started this stuff again, after we shook hands and agreed on a truce. you had no intention of stopping and you know it... You're a low-life scum, without a job or a real life.

after some serious consulting with my attorney, I have decided it is best that I refrain from posting or reading this NG for a while... These people have gotten what they've wanted...and I hope they're sasified.

on conclusion I will say this.... Doug, I will continue to be attending the local and otherwise Hamfests. I hope to run into you again.

73 and Farewell for now....

-Chuck Adkins K8CPA

You sure can no one said you can't, sorry if I wasn't clear in that yet it
must meet certain FCC requirements .
You can't put a junk signal on the air though either.

Any info available for running 2 amps into one
antenna?? I saw 2 class C 5-pill amps key against
a 16 with suprising results.(not one amp driving another,
but split coax from cb to amps and joining coax to a
single antenna. similar to co-phase antenna coax for
a 18-wheeler.
Thanks,
Butcher, 501

The only place for homebrew radios is in the classroom. They aren't
worth the bother otherwise.

Hey Ruger, I coulda been yer dad, but a toy poodle crawled under the
fence while I was climbing over and beat me to the bedroom door.

As far as "taking it" goes...I think that you should inquire with your
wife. She "took it" quite well last time, as I recall.

Later white trash.

A friend of mine is trying this application,he may understand some of the
info. at these sites. In
laymans terms (as i am not that tech. inclined), can this application be
done without going into the amps and
just joining with coax ?? Or would that spell disaster??
"Thanks" for the reply and info. Any further info or
advice would be appreciated. Has anyone out there
tried running two amps together into one antenna.
Thanks,
Butcher, 531

Don,
In layman's terms, you'd have one chance in 5 of not ruining something the first time you turned it on. The second time you turned it on you would have one chance in 25 of not ruining something. If you haven't ruined something by the time you're ready to turn it on the third time, don't turn it on...
It can be done but it isn't as simple as just hooking things up with equal length feed lines from transmitter to the amplifiers.
'Doc

It is obvious that you have never been involve with the manufactureing
or design of commincation electronics. If one takes care, one can
build their own tranceiver that will meet or exceed many commercially
manufactured radios. Especially anything that is designed for the CB
Band. Cost wise it will be slightly more. What you failed to realize
commercial manufacturers are driven by profit. So they will sacrifice
specs for cost control.

It sure is he would need a combiner/ LC network. to step up the 2- 50 ohm loads which would then = 25 ohms, of course the combiner/ via LC network.would transfom it back to 50 ohms. rather easy concept

Appliance Operator,
You're right about the impedance matching. Now,
what happens when you feed two signals of the same
wave form together 180 degrees out of phase?
'Doc

I never doubted the information....I know the amps are illegal....you
appear to be taking the stance that his Davemade is legal......
****
>Yes acording to Riley it is legal for him to >modify 1 per year,

Not exactly...Riley doesn't make law and has no authority to do so,

>No one said he makes the Law asslip,<

Lid.

> he enforces the Law he is also a lawyer I am >sure he knoiws the FCC
laws better than you.

but your interpretation does go against your previous stance of calling
them basement amps
>They still are basement amps what part has >changed.

The part where you said they were not legal period. Now you take the
position that the Hypocrite Hall is attempting to foster. Are you
denying saying it? You have made self-contradicting posts concerning
this matter..not as many as Hall, but you have just the same.

>They must be modified to meet FCC specs. >My interpretation is right on
the money Dave >Hall can modify his amp as he stated.

and also illustrates how totally off the cuff and incorrect you are/were
in referring to those who talk about these amps
as criminals...

>They are criminals<

No George. You are halfwitted to think talk of such is illegal, but it
does illustrate the intellect you hold.
Never mind the fact that you take mere talk as evidence as guilt,

>Funny you say that you have taken everything >Dave Hall has said as
evidence why is it >different when you say something about

Different Because I don't deny or lie about my actions. I dont deny
freebanding or dxing, never did, it was Hall that lied and denied
breaking the law while attacking those that take part in the same
actions he does illustrating his hypocrisy and selective personal
problems independent of radio and it's participants. As much as you two

losers would like to make a topic personal and about me, it's not and never was..it's about N3CVJ's posts that self-contradict and lie. And the group, I see, has carved you a new haircut over the last day.....yes, you are alone with your little lid clique of HALL, Lelnad, N8 and Sparky.

--
but more interesting is the idea that you automatically assume that everyone you don't know, agree with, or are unable to get a call sign on or other personal info on, is automatically breaking the law,

>Use that amp on 11 meters you are a criminal,

Someone denied it's illegal? Using your lelnad logic, your ISP is governed by the FCC and breaking those rules makes you a criminal..your entire clique of lids...hahahhahahhahah!

>Say you use an amp , your a criminal or a liar.

Lid.
No..YOU say I use an amp.....otherwise, as usual, you have no point.

>In your case your
>both, you won't What part don't you >understand.
> don't be such a pussy

Lid.

>twisty stand up for your illegal actions instead >of making excuses.

Hehe...I freely admit actions and it makes girls like you and Hall wetyourselves.....

> Your the best at that.

Actually, Hall is...his excuses and lies have be hysterical..almost as funny as your excuses you keep throwing out for Davey..ahaahah! There are no excuses from me because I have no problem admitting my actions as I am not a hypocrite nor pathological liar, unlike N3CVJ and yourself. Your radical defense of him has turned into malicious ad-hominem attacks on me. Instead of answering mere questions conerning his statements, you choose to call names and attempt to change the subject to that of the inquirers behavior. You guys live pretty close, right? Maybe it's true love.

--
you perfectly illustrating your haste in searching for discontent and hate.

>I have to look no farther than you for >discontent and hate.

You have illustrated this many times George. We all know you and your lid group of Lelnad, N8, Hall, and Sparky have no debate skills,,,we all know I have the uncanny ability to make your clique come collectively unglued, abandoning any sense of self-worth and reducing yourselves to

the lowest common denominator manifesting in radiated and emanated hate and discontent to all who hold a different view. Poor babies.

>but you are comparing the amp to the radio >the radio.

No, I'm not...you are using the "grandfather clause" as an excuse for Dave's amp,

>Grandfather clause? what are you smoking of >course you can provide proof of this wild >imaginary claim. I will take a link form the FCC >page as proof.

I'm waiting.

which isn;t addressed, but do not wish to apply it to a Galaxy as it voids your point.

>You are attempting to twist the topic now

You started it. The topic was about N3CVJ's comments and directed to him and you inserted yourself to change the topic to divert attention away from his lies of the Phelps, the cber that he said was busted, the mods to the Texas Star, Davemade (that he uses on the freeband) and many, many more I haven't even begun to scratch the surface with. Pathological is what he is and his own posts prove it, not mine, not yours, but only his.

--
>The amp and the Galaxy are 2 different things >It is you who is trying to compare the 2 they >are totally different. Get over it no matter how >much you cry they are not the same.

You are the only one always crying Geogeboy......Hall was called on his lies and you attempt to answer and change the topic....get over yourself. He is seen for what he is, and from viewing the last days post from the group, you really cemented a nice rep for yourself. Holidays got ya' down, huh? Must suck being alone. Join a therapy group or something..there is help for people like you who have a hard time coping during the holidays..your posts from the last 24 hours show a real hatred..when the entire group is(except for Hall and Nad and N8 and Sparky, of course) is telling you the same thing, you may want to take a look at it..............denial is not a river in Egypt.
-
You have always had problems applying the standards you speak of...holding yourselves above the standards or applying them to others only.

>As sold the Galaxy(among other exports) >cannot be used. They have not <been type certified.

As used a Galaxy CAN indeed be used by an authorized hammie.

>No they can't you maroon,

Lid.

> any radio used on amateur radio bands need >to be type certified.

Not true.

> I have already proven that with proof from >FCC web page. argue with them.

It didn't say anything about ten metr radios needing any "type acceptantance."
Your communication deficit is responsible. Maybe it's time to upgrade.
Ten meter radios do not need be "type accepted" as you speak of it, such as
referring to the stickers disclaiming cb use and alluding to not being " type certified".

>They need to be type certified to be used >legally by a Ham, although they don't need to >be type accepted to be imported into this >country.

Again, hammie radios do not need "type acceptance"..nowhere will you find this and to say you already posted it has me seriously wondering for the first time if you are of slight handicap.

> For use they either have to be modified to >meet FCC specs or be type certified.

Please show the specs and cite the rule for the umpteenth time.

>A ham radio will not have any stickers on it >alluding to CB use.

Just like a Galaxy.

>Your making thoings up again bedcause you >have no clue.

You're getting a valuable education where you are clueless.

>A ham has it aligned etc to meet FCC's min >spectral requirements he can then use it.

Really? Where did that come from?

>FCC

Show me.

>You show me your grandfather clause >statement

It was yours, not mine, and you said it first...decorum says the first person asked must respond prior to asking their own question, but you don't play by fair rules, do ya' ?

.
And what are these requirement concerning this spectrally pure bullshit?

>Get a ham license if you want to find out

In other words, you are just like Hall,,,lying through your teeth but won't answer a single inquiry or offer anything insults and offtopic ad-hominem remarks, even after you said you would post a page from the FCC backing this bullshit. Lid.

--
Who makes certain it meets these "requirements"?

>Fcc you nimrod, how do you think radios are >"type accepted" they must meet these >requirements.
>A radio is sent to the FCC lab the FCC checks >the radio for spectral quality, if it passes all >other units of this model must all meet these >requirements before they can be sold.

So Hall sent his Ranger to the FCC after he worked on it and converted it to ten meter and they approed it "spectrally pure"? Ahahhahah! You know, you have all the answers for him, you ought to know this one..
-..
Show me the part of the law that distinguishes and give specs for the Galaxy and what a hammie must do to it before you claim it can be used.

>A Ham is required by his license to make sure >his radio is within specifications.

Don't say it , cite the specs..show it, post it........

>No matter if it is a kenwood or a homebrew >radio, you just don't put any piece of shit radio >on the air.

Don't tell me about it, quote it, which you apparently are unable

>Don't tell you about it that is all you are doing, >you have not posted one shred of evidance to >back your claims especially this grandfather >clause

Au contraire..I have posted many of N3CVJ's posts backing my claims. I ask him if he STILL had the Phelps..he said "What Phelps".
Not "NO", not "Not anymore", not "it was hit by lightning" but rather.."What Phelps?"..a clear indication of his pathological lies. I have posted the email where he claims he no longer uses the university account..another lie. I have shown where he has endorsed freebanding and AMPS, then taken the opposite stance when it was someone he had a personal issue with (IE: anyone, who, for whatever reason, he sees as a threat). Do try
to stay on topic, lid.

> I have quoted the FCC page and pasted it, >you read it I am not leading you by the hand.

You read it. It says absolutely nothing of "spectral purity".

>The rules aren't going to change overnite so >they will still be there for you tommorow.

And they won't contain anything concerning "spectral purity" or bringing his Davemade into regulation either. The dance you two are doing over his ownership of illegal amps is oh so sweet music and just.

>Other than that he cannot take a Galaxy or >any export radio and just use it it is not Type >certified by the FCC in it's current form.

Pay close attention. It doesn't need be as it's not a cb.

>You pay close attention, Hams must use type >certified equipment.

Please show what constitutes "type certification". Again, you tripped over your hairlip once again, either intentionally (which makes you a lid) or ignorantly (which makes you an ignoramus) confusing "type acceptance" with this "certification" you speak of, and are two separate avenues and processes. See, I told you that you were gaining valuable experience and education.

>The galaxy is not one of them.

Hammie radios do not need "type acceptance".

>"Hollingsworth said FCC rules permit an >individual amateur to construct or modify a >non-certificated RF power amplifier once per >calendar year for use at that amateur's own >station"

Make up your mind..you aren't too clear here..

>Talk to Riley.

You're the one that can't comprehend what it means..hahha..the rest of us have no problem...even Hall understands he is in volation of the law, which is why he scrambled with more lies as attempted but defeated damage control.

--
are you defining "non-certificated" as constituting exemptness from "type-acceptance"

>Listen up real close I will say it one time, A >ham such as dave hall can use an amp that >he built, which of course hasn't been sent in >for type certification.

But he didn't BUILD the Texas Star OR the Davemade,,your attempted obfuscation doesn't appl in his situation.

>if dave wants to start selling them he will have >to send the amp in for type certification, which >means he can build it and have the FCC >accept or reject it, if they accept it any >additional units he builds for sale must also >meet the same specs. If he is going to use a >non type certified amp it is up to the amateur >operator to make sure it is meets or exceeds >the FCC spectral requirements. It is up to the >amateur

Yet you fail to show any of these "spectral purities" you speak of. If you can't find them, how can you claim N3CVJ made the proper adjustments

to bring an illegal amp in line?
Certainly you must have a reference point,,but you don't, as it's merely a continuation with N3CVJ's bullshit that doesn't even exist.

--
If thats the case, there is no need for bringing a "Davemade" in line to "spectral purity",

>There sure is, a ham must operate a radio >amp or whatever he is using within the FCC >spectral requirements.

And where are these requirements and
what are they? Dave claims he did it, but can't tell us what or how. He would be beat down by the amp doctors if he even attempted to explain his lie concerning bringing a Texas Star and davemade into FCC acceptance.

>Whether he built the amp himself or bought it.

whatever voodoo definition you apply to that.
Argue with the FCC it is not my fault you don't understand.

>This same discussion
>Has screwed you up for a while. you see no >one backing you nor

I'm not like you. I don't need others to validate myslef such as you and the lid Hall. Truth needs no assistance form anyone or anything.

> any hammies running to your side...

They're busy bashing and educating you from the looks of the last 24 hours posts.

if that
is the case it is indeed legal for an authorized hammie to use a Galaxy.
****
>No that is not the case and just because you >say it doesn't make it so, you can say it 100 >more times it won't make it true.

Ditto for you and the "Spectral purity" rule you claim concerning Dave Hall's use of a Davemade....does this apply to his Texas Star?
>It applys to all amps that aren't type certified. >Homebrew or whatever.

Is it already "spectrally pure"? Be very careful how you answer for N3CVJ here so you don't f*ck him up even more.

>How am I fucking up Dave, he can use his >amp if he wishes it is up to him to acertain that >it is within legal operating specs.

How?

>Is it already spectrally pure nah i doubt it it is a >class c splatter box none of the factory made >ham amps are Class C what does that tell you >right off the bat?

According to you, that it is illegal for him to use it. This makes another lie he told. Thanks.

>use the Galaxy is not type certified, he has to >have it aligned to FCC minimum specs before >it can be used LEGALLY by a Ham. .

Cite it...cite the rule that specifically shows the requirements for spectral purity in order to run a davemade legally and a galaxy and a Texas Star...that's all..just cite it..copy and paste it and don't ad lib, and I'l have a heapin' help of crow.. but you can't, can ya.?
--
I was but merely attempting to educate an upperclassmen, N3CVJ, who should already be familiar with the laws and thoroughly comprehend them.....but with hammies like you spewing untruths such as you do, Dave is very impressionable to what he sees here, subject to such influences, and reacts as he sees fit.....it is indeed a sad day for hammie radio when you have a hammie lid like N3CVJ Davey-boy Hall slamming me and others for barefoot dxing and calling us criminals when he can't even comprehend the law he is allegedly fostering but failing to enforce while breaking it himself the entire time.....it magnificently illustrates his reserved and disturbed personal issues that have nothing to with radio or legalities. The same is said for yourself. As many times as he, and you, have claimed status by virtue of self-professed years-of-experience or how long you held a license, one would think y'all would at least comprehend the communication laws that pertain to your hobby in a satisfactory manner instead of blatantly holding yourselves above the law and rationalizing N3CVJ's "criminal" actions of using a "basement" amp..
****
>I am not rationalizing anything Twithed, Riley >Hollingsworth has >stated, "Hollingsworth said FCC rules permit >an individual amateur to >construct or modify a non-certificated RF >power amplifier once per calendar year for use >at that amateur's own station"

You aven't answered yet,,,are you interpreting "non-certificated" be construed as "non-type accptance?" You appear very cornfused over the two.
--
He has NOT showed how he has made this Davemade
spectrally pure like he claimed he would.
-
>If he biased it he probably cleaned it up quite >alot.

Does that make it legal according to this non-existent rule you claim the FCC made?

>Since when does he have to prove what he >does to you

The "who" doesn't matter. His word does.
He claimed he would answer,,but lied about it. Why did he lie? Cause he's full of shit.

> who are you?

You have alwasy strained yourself with this question..so has poor 'ol Frank,,angry azzed Lelnad, perv boy N8, and the Hypocrite Hall.
--
He has NOT shown anything
concerning his lie about a cber getting arrested and found guilty of a misdemeanor of disorderly. He has proved absolutley nothing. Again, Geroge, Dave needs help, but you aren't it, even if your intentions are intended as such. You need to educate yourself before you can assist another floundering lid.

>he is not performing
>any criminal action using the amp. Why can't >you get it thru your head.

He uses it on the freeband......and openly endorsed the freeband..recently, when he claimed he was advocating nothing but legal, responsible cb..then he selectively chooses who to go after for the same actions he does himself. Ignoring his hypocritical and self-contradictory remarks and attacking me personally with ad hominem and off topic remarks won't make his actions, behaviors, and statements go away.
--
a low-life cber must step in, take control, and educate you two losers on what you are allegedly licensed for..

>You got that shot right twist you certainly are a >low life CBer ,

And you are a shining example of apicture perfect lid to hammie radio. You base this on your intense dislike for me, not my radio personality,

>My intense dislike for you is derived at how >you are and how you are a liar and twist things >to suit you.

I don't lie. You can say whatever you wish about me, but I do not lie.

> You are correctly named and I didn't name >you so I assume you have had this affliction >since birth.

The fact that a cartoon ID can elicit such a profound reaction in so many losers is testament to your lack of self-control when it comes to emotive responses.

-
not my operating mannerisms, but what you read here and disagree with.

>Well this can go 2 ways twisty, you then are >either a lair which I believe to be true or what >you talk about is the truth you operate on the >freeband etc. which is it are you a liar or are >you telling the truth when you say you break >federal law and talk on the freeband.

I freely admit talking on the freeband and dxing...Dave Hall has also, and attacked those who have done nothing that he hasn't done..matter of fact, I don't use anywhere near the power he has to use. Inone post he claims he doesn't use more than a few watts..ever..in another post it is shown he has several illegal "basement" amps. Aain, the topic was, and

still is, until he responds, Dave Hall N3CVJ's lies and hypocritical and off-topic and off-the-cuff attacks on those for the same thing he does.

>and you are spreading lies and >misinformation,

If you are referring to my Galaxy statement, it can only be one, either a lie, or disinformation. You can' even produce a single passage from the law, how can anyone call on you to produce anything else......, since you claimed two....you haven't managed to come up with a rule or law quote claiming anything about type-acceptance for an authorized hammie concerning the Galaxy or a Davemade as far as making them spectrally pure and in regs with the FCC as you claimed.Which are what?

>Get a ham license and find out,

You don't know..there is plenty you don't know.
Wasn't that much easier than your diatribe of attacks? Quite simple to just admit you don't know or were wrong..no wonder you are breaking your neck defeding Halls lies,,he can't come clean either...it's a pathological thing, ya' know....

>Let me ask you this do you think hams can >just operate any piece of shit they want on the >band? with out requirements and >specifications. use your head a little hear >twisty.

Has nothing to do with what I think, nor what you think, and especally what N3CVJ thinks.
 Why does this point have you stuttering and flopping around like a fish out of water? Still waiting for either of you to answer any of the questions posed to you concerning your claims..so far you both have done nothing but fail and lie,,,,,and attack me when it's pointed out as such.
--
Still waiting for N3CVJ to show us how he made this Davemade spectrally pure like he said
he would...and so are others.....

>He biased the amp, If I were dave I would >charge for the info you are asking for.

I didn't ask for it. He threw it out there..I merely questioned him on it and here you are floundering over the question posed to him for almost a week....it looks as if you are certain he is lying or inacapable of such acts and you come in to attack me instead of allowing poor Davey Hall to answer.

>twisty who is the us you speak of? I don't hear >any other babbling like you are you speaking >for others again.

The group.

>I don't see the group saying the same thing >you are about htis subject.

t's not about me or the group, despite what you attempt but fail at
regularly. It is merely about N3CVJ's claims that he is drowning in.

>But then again this is a CB NG what do they >know about Ham laws.

Much more than you,obviously, as many are hammies.

See, you can't have it both ways....

>And neither can you.

Ahh, that selective snip hit home hard for you, eh?
=
even though you try to selectively apply standards unevenly. You and
your
posse of hate and
discontent who have pledged to troll rec.radio.cb have claimed this
group is full of illegal cbers using illegal amps...
<<<snipp snipp>>>>

>Stay on topic Twisty

The topic is Dave Hall's lies.......try to remember that, lid.

--
Dave Hall N3CVJ even made a comment that cbers aren't satisfied with
barefoot radios and
almost all run illegal power..

>He is 100% correct, look at the first thing you >and your vermin say...
A person posts "My cb >doesnt have the range I expected" .

No, I never said that. My radios have better range than most of the
angry hammies here..that's why they have a hard-on for me..ya''ll can't
STAND it that ya' can't key on a cber that gets better dx than you and
enjoys his hobby much more than y'all and at a fraction the cost you
curs spend.

>the first reply always is get a amplifier I call >that a fact

So what does this have to do with me? Your first reply, along with Halls
and N8s and Sparky's has always been to insult when someone posts an
opposing view..then you make it personal and use the group as your
personal sounding board for insults and ad-hominem and off topic
attacks.

--
And since the group is chock full of illegal amp owners and Davemade is
a very popular amp......many would be intereste in the info.

>Well perhaps Dave would be wiling to sell this >info.

He should have thought of that prior to shooting his mouth off.

>Your admitting the group is full of illegal amp >owners is correct

You know only what we allow you. it's what makes your ignorance worth tuning in for each day.

>the fact that I am in touch with
>yourself?

Believe me, you are not in touch with anyone, lid.
-
the pulse of cbers and you don't have a clue seems to upset you greatly..

>Oh you haven't a clue what my clue is

The entire contingency knows what you are. You are the only one that fails to see it, a malady shared by Hall and Nad,,the uncanny inability to see themselves as others view them..hohohohoo....absolutely hysterically entertaining.

-
I wasn't the only one that asked..although he did claim he wouldn't indulge us unless another asked, he has failed to produce yet once again.
>And that is his perogative he is under nothing >to give you free info...

But he is under an obligatioon to hold his word and no one forced him to say a cber was arrested and found guilty, no one forced him to say he gets excited and finds listening to pre-teen girls talk of their first sexual experiences as "juicy"..no one forced him to say he would tell the group how and what he did. His words are by the same hand that slit his own throat. These are his own words.....your daily attacks on me illustrate even you agree he is in over his head, otherwise you wouldn't feel the need to answer for him then attack me with an off-topic and ad-hominem display of your lack of intellect.

Thanks for the compliment...
As for Lou... I have asked him nicely to stop the full advertisments and
he has totally ignored me. My definition of spam is when somebody posts
nothing but and ad in a post. If someone provides a link, that's fine
and I certainly welcome that... but a full page ad several times daily
can be called nothing but spam...
--
Fortunately, the group isn't governed by individual definitions and
opinions. It's not like he's spamming you.......... it's not spam since
I requested it. I have sent many folks to sites posted on this forum.

twist i learned long ago the folks on rec.radio.cb arent interested in this and 10 out of 10 times posting such to the group just ensures a AM dick head will be out there doing his thing disrupting. people are a trip
--
Subject: IR DX XMAS Party

Hmm..you may be right...but it is a great place to get the word out. I don't allow one or two sorry azzes to spoil my fun...they mostly can't mess with me here in the 'pile so they spazz out and the internet is all they can turn to..the impotent thingy, ya' know.....but if any of the participants complain, I'll know what to do. Hell, you're in many of the forums and groups, you see that little message at the bottom of most of these messages about being "absolutely allowed" to repost the message.....they encourage the spread of the information, WANT to get it out there. Nevertheless, since I can tune out the rest of the country, I wasn't too concerned about it..maybe I'll send a cc'd email to group members asking their opinion. I guess the situation with renegade hammies on the freeband is getting worse. Too bad I can't hear most of them.

Florida station,
Many of us talk on 555. Can't say I heard you though. Who should I be
listening for?
I only knowingly talked to two planes on the freeband before and both
planes
--
Ok Twisty, you are either a liar or a bullshitter you have said you
don't break federal fcc rules, here you admit to talking on the freeband
you then are an admitted federal lawbreaker when called one don't get
your panties in an uproar remember you said it.
--
I have never claimed otherwise...ever.
I have no problem saying I talk on the freeband and dx. Unlike N3CVJ and
a few other hammie curs, I have nothing to lie about or to hide. One day
you may find the education that eludes you and the faculties will be in
place that will allow you to distinguish between federal law and
protocol rules imposed by a federally governed and funded establishment.

add me and make that four :)
-
I beg to differ.....I haven't found the station that has the capability of keying on me when I'm pointed east to Europe, outside of another Florida station, Of course I don't have a trashy mouth like some of our resident angry hammies of pledged hate to rec.radio.cb..... I give credit where credit is due..if you can knock me out or put a huge signal on me, I''l be the first to give your station a warm fuzzy..so far, there are 3 stations in the past year that have been able to key on me when I'm pointed east to Europe..and I know all 3 of them,,and you ain't one of 'em.

Tim, I somehow don't doubt it..of course, my sideband setup is way different than my AM play.....and that other bad dude by you,,he still pretends he don't hear me <g>!
Seriusly, man, those European stations are stepping on stateside stations..even happens when I'm pointed west on occasion....I'll try for you again Thursday.

Man allegedly had sex with sheep

Toledo police arrested an East Toledo man for allegedly having sex with a sheep used in a West Side funeral home's live nativity scene.

Dougles Adair, 44, allegedly broke into a shed that housed the animals used in the holiday scene at the Bartles&James Funeral Home on Tennessee Avenue about 5:50 a.m. Saturday, Toledo Police Sgt. Brent Weester said.

Police, who were responding to a suspicious person call, say they found the suspect at the nativity scene, Weester said.

Adair was charged with trespassing, destruction of property and cruelty to animals. He was being held at South Central Regional Jail on $2,500 bond.

Weester said police are consulting with the prosecutor's office and bestiality charges could be issued against Adair.

------- cut ---------

(no word on how this affects the AKC as of yet....)

Hey, thanks 4 the replys. It has been a year or 2 since we
had seen this. There could have been a final componnet
that the output coax from both amps ran into and one from there to antenna.
Does that sound reasonable, maybe with a combiner?? He has 2 5-pill amps to
hook
together, but not before researching and maybe some trial
time with smaller older equipment. He felt there would be
a problem with equalizing output from both amps and joining these feeds,
along with them wrestling each other
or feeding back to 1 or both amps. Once again, all sugestions, info, tech,
and replys are appreciated. If he were able to get on here it could probably
be explained.
better. Thanks,
Butcher, 531

For use at one band of frequencies (27mhz):

Use an electrical 1/4 wave sections of 75 ohm coax for each
(equal amplifier). Then run any appropriate length of 50 ohm
coax between the T connector and a (50 ohm antenna).

1/4 wave section of 66% velocity factor coax = 70 inches
1/4 wave section of 78% velocity factor coax = 82.5 inches

It is obvious your reading comprehension is lacking. On a cost basis a
homebrew radio falls short. Way short.

As far as "It is obvious that you have never been involve with
the manufactureing or design of commincation electronics."
Manufacturing, no I haven't but why re-invent the wheel if it isn't
cost effective?

I am having trouble with this radio and need help or suggestions on repairing it. When I first key it up when i get in the truck in the morning it works for about a minute ,but then it loses all the power on A.M. but it works fine on the side bands. Could someone tell me what is wrong or what to replace to fix this problem.
THANKS IN ADVANCED FOR THE HELP,
s.c.m. 124 OHIO

Because even modest increase in cost can yield superior performance
that many mid tier to low end of high tier radios. Even the Japanese
transcievers are driven first by cost of manufactureing. Performance
is secondary. A home constructed unit can be driven by performance
over cost.

Granted if one is striving to just meet commercial manufactured
specification then you are right why re-invent the wheel. But if one
wants to exceed say sensitivity and selectivity specs of most
commercial transcievers, then a home built transceiver that pays
attention to shielding and layout can far exceed radios costing in the
$1000 to $1500 range for about the same amount of money. Granted the
cabinetry will not be a pretty and the lights and flashy stuff may not
be there, but then that is what helps sells those radios.

I am looking to get a new CB radio and would like to boost the
power from 5 watts to maybe only 20 to 25 watts. I don't want to go
crazy and pump out 200 watts. I just want a little extra power. Could
someone reccomend a way to boost the output just a moderate amount and
the best radio that would suit this purpose. Thak You Very Much.
Please e-mail me directly if possible.

Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT□s inspectors shall carry proper identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT□s notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT□s certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual furnished to the user, information concerning the model and technical specifications, and importation or manufacturer□s certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant□s application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer□s certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.

2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants□ purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 1-1 Flow Chart of Type-approval for Amateur-Radio Equipment(For Manufacturers)

Attachment 1-2 Flow Chart of Type-approval for Amateur-Radio Equipment (For Individuals)

Attachment 2-1 Application Form of Type-approval for Amateur Radio Equipment(For manufacturers)

Applicant (Company) : _____

Address : _____

Contact Person : _____

Telephone No. : _____

Equipment Name : _____

Equipment Model : _____

Manufacturer : _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Four copies of the product catalogues and color photographs larger dm 4x6 inches in

size.
1.. photograph with front side of equipment
2.. photograph with rear side of equipment
3.. photographs with right side and left side of equipment
4.. photograph with internal structure of equipment
5.. photograph with both sides of base board (with parts).
3. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

4. One copy of the block diagram.

5. One copy of the circuitry diagram.

6. One original and four copies of the testing report of the sample product performance.

7.. One copy of the licensing permit for the operation of controlled radio frequency equipment.

Application Date: Year Month Date

Applicant (company) Stamp: Responsible Person□s Signature:

(Internal Use Only)

Application Date: Year Month Date

Number:

Approval Fee: Accepted date: Year Month Date

Opening Hours: 9:00 - 12:00 AM, 2:00 - 5:00 PM, exclusive of public Holidays.

Note: Applicant should ask certified testing institutions to perform testing on the Technical Specifications of Amateur Radio Equipment. Testing fee will be collected by respective institution.

Attachment 2-2 Application Form of Type-approval for Amateur Radio Equipment(For Individuals)

Applicant : _____

Address : _____

Contact Person: _____

Telephone No: _____

Equipment Name: _____

Equipment Model: _____

Manufacturer: _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Operating manual furnished to the user (or instructions)
3.. Product catalogue and information concerning technical specifications.
4.. Import or manufacturing documentation.

Application Date: Year Month Date

Applicant□s Signature:

(Internal Use Only)

Application Date: Year Month Date

Number:

Approval Fee: Accepted date: Year Month Date

Opening Hours: 9:00 - 12:00 AM, 2:00 - 5:00 PM, exclusive of public Holidays.

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement ☐No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act.☐ in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement ☐No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act.☐ in a conspicuous manner on every outside of the packing.

Attachment 5-2 Certification of Type-approval For External RF Power Amplifier of Class 1 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement ☐No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act.☐ in a conspicuous manner on every outside of the packing.

Attachment 6-1 Certification of Type-approval For Class 2 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement ☐No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 2 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act.☐ in a conspicuous manner on every outside of the packing.

Attachment 7-2 Certification of Type-approval For External RF Power Amplifier of Class 3 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Attachment 9 Certification of Type-approval For Individual Amateur Radio Equipment Model.

(1)Model:

Serial number:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Affix hereinbefore label in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification

Oh it is so true twisty, you call me a liar i call you dead wrong!

§97.307 Emission standards.
(a) No amateur station transmission shall occupy more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice.

(b) Emissions resulting from modulation must be confined to the band or segment available to the control operator. Emissions outside the necessary bandwidth must not cause splatter or keyclick interference to operations on adjacent frequencies.

(c) All spurious emissions from a station transmitter must be reduced to the greatest extent practicable. If any spurious emission, including chassis or power line radiation, causes harmful interference to the reception of another radio station, the licensee of the interfering amateur station is required to take steps to eliminate the interference, in accordance with good engineering practice.

(d) The mean power of any spurious emission from a station transmitter or external RF power amplifier transmitting on a frequency below 30 MHz must not exceed 50 mW and must be at least 40 dB below the mean power of the fundamental emission. For a transmitter of mean power less than 5 W, the attenuation must be at least 30 dB. A transmitter built before April 15, 1977, or first marketed before January 1, 1978, is exempt from this requirement.

(e) The mean power of any spurious emission from a station transmitter or external RF power amplifier transmitting on a frequency between 30-225 MHz must be at least 60 dB below the mean power of the fundamental. For a transmitter having a mean power of 25 W or less, the mean power of any spurious emission supplied to the antenna transmission line must not exceed 25 µW and must be at least 40 dB below the mean power of the fundamental emission, but need not be reduced below the power of 10 µW. A transmitter built before April 15, 1977, or first marketed before January 1, 1978, is exempt from this requirement.

(f) The following standards and limitations apply to transmissions on the frequencies specified in §97.305(c) of this Part.

(1) No angle-modulated emission may have a modulation index greater than 1 at the highest modulation frequency.
(2) No non-phone emission shall exceed the bandwidth of a communications quality phone emission of the same modulation type. The total bandwidth of an independent sideband emission (having B as the first symbol), or a multiplexed image and phone emission, shall not exceed that of a communications quality A3E emission.

(3) Only a RTTY or data emission using a specified digital code listed in §97.309(a) of this Part may be transmitted. The symbol rate must not exceed 300 bauds, or for frequency-shift keying, the frequency shift between mark and space must not exceed 1 kHz.

(4) Only a RTTY or data emission using a specified digital code listed in §97.309(a) of this Part may be transmitted. The symbol rate must not exceed 1200 bauds. For

frequency-shift keying, the frequency shift between mark and space must not exceed 1 kHz.

(5) A RTTY, data or multiplexed emission using a specified digital code listed in §97.309(a) of this Part may be transmitted. The symbol rate must not exceed 19.6 kilobauds. A RTTY, data or multiplexed emission using an unspecified digital code under the limitations listed in §97.309(b) of this Part also may be transmitted. The authorized bandwidth is 20 kHz.

(6) A RTTY, data or multiplexed emission using a specified digital code listed in §97.309(a) of this Part may be transmitted. The symbol rate must not exceed 56 kilobauds. A RTTY, data or multiplexed emission using an unspecified digital code under the limitations listed in §97.309(b) of this Part also may be transmitted. The authorized bandwidth is 100 kHz.

(7) A RTTY, data or multiplexed emission using a specified digital code listed in §97.309(a) of this Part or an unspecified digital code under the limitations listed in §97.309(b) of this Part may be transmitted.

(8) A RTTY or data emission having designators with A, B, C, D, E, F, G, H, J or R as the first symbol; 1, 2, 7 or 9 as the second symbol; and D or W as the third symbol is also authorized.

(9) A station having a control operator holding a Novice or Technician Class operator license may only transmit a CW emission using the international Morse code.

(10) A station having a control operator holding a Novice Class operator license or a Technician Class operator license and who has received credit for proficiency in telegraphy in accordance with the international requirements may only transmit a CW emission using the international Morse code or phone emissions J3E and R3E.

(11) Phone and image emissions may be transmitted only by stations located in ITU Regions 1 and 3, and by stations located within ITU Region 2 that are west of 130° West longitude or south of 20° North latitude.

(12) Emission F8E may be transmitted.

(13) A data emission using an unspecified digital code under the limitations listed in §97.309(b) of this Part also may be transmitted. The authorized bandwidth is 100 kHz.

§97.309 RTTY and data emission codes.
(a) Where authorized by §97.305(c) and 97.307(f) of this Part, an amateur station may transmit a RTTY or data emission using the following specified digital codes:

(1) The 5-unit, start-stop, International Telegraph Alphabet No. 2, code defined in International Telegraph and Telephone Consultative Committee Recommendation F.1, Division C (commonly known as Baudot).
(2) The 7-unit code, specified in International Radio Consultative Committee Recommendation CCIR 476-2 (1978), 476-3 (1982), 476-4 (1986) or 625 (1986) (commonly known as AMTOR).

(3) The 7-unit code defined in American National Standards Institute X3.4-1977 or International Alphabet No. 5 defined in International Telegraph and Telephone Consultative Committee Recommendation T.50 or in International Organization for Standardization, International Standard ISO 646 (1983), and extensions as provided for in CCITT Recommendation T.61 (Malaga-Torremolinos, 1984) (commonly known as ASCII).

(4) An amateur station transmitting a RTTY or data emission using a digital code specified in this paragraph may use any technique whose technical characteristics have been documented publicly, such as CLOVER, G-TOR, or PacTOR, for the purpose of facilitating communications.

(b) Where authorized by §§97.305(c) and 97.307(f) of this Part, a station may transmit a RTTY or data emission using an unspecified digital code, except to a station in a country with which the United States does not have an agreement permitting the code to be used. RTTY and data emissions using unspecified digital codes must not be transmitted for the purpose of obscuring the meaning of any communication. When deemed necessary by an EIC to assure compliance with the FCC Rules, a station must:

(1) Cease the transmission using the unspecified digital code;
(2) Restrict transmissions of any digital code to the extent instructed;

(3) Maintain a record, convertible to the original information, of all digital communications transmitted.

§97.311 SS emission types.
(a) SS emission transmissions by an amateur station are authorized only for communications between points within areas where the amateur service is regulated by the FCC and between an area where the amateur service is regulated by the FCC and an amateur station in another country that permits such communications. SS emission transmissions must not be used for the purpose of obscuring the meaning of any communication.

(b) A station transmitting SS emissions must not cause harmful interference to stations employing other authorized emissions, and must accept all interference caused by stations employing other authorized emissions.

(c) When deemed necessary by a District Director to assure compliance with this Part, a station licensee must:

(1) Cease SS emission transmissions;
(2) Restrict SS emission transmissions to the extent instructed; and

(3) Maintain a record, convertible to the original information (voice, text, image, etc.) of all spread spectrum communications transmitted.

(d) The transmitter power must not exceed 100 W under any circumstances. If more than 1 W is used, automatic transmitter control shall limit output power to that which is required for the communication. This shall be determined by the use of the ratio, measured at the receiver, of the received energy per user data bit (Eb) to the sum of the received power spectral densities of noise (N0) and co-channel interference (I0). Average transmitter power over 1 W shall be automatically adjusted to maintain an Eb/(N0 + I0) ratio of no more than 23 dB at the intended receiver.

§97.313 Transmitter power standards.
(a) An amateur station must use the minimum transmitter power necessary to carry out the desired communications.

(b) No station may transmit with a transmitter power exceeding 1.5 kW PEP.

(c) No station may transmit with a transmitter power exceeding 200 W PEP on:

(1) The 3.675-3.725 MHz, 7.10-7.15 MHz, 10.10-10.15 MHz and 21.1-21.2 MHz segments;
(2) The 28.1-28.5 MHz segment when the control operator is a Novice Class operator or a Technician Class operator who has received credit for proficiency in telegraphy in accordance with the international requirements; or

(3) The 7.050-7.075 MHz segment when the station is within ITU Regions 1 or 3.

(d) No station may transmit with a transmitter power exceeding 25 W PEP on the VHF 1.25 m band when the control operator is a Novice operator.

(e) No station may transmit with a transmitter power exceeding 5 W PEP on the UHF 23 cm band when the control operator is a Novice operator.

(f) No station may transmit with a transmitter power exceeding 50 W PEP on the UHF 70 cm band from an area specified in footnote US7 to §2.106 of the FCC Rules, unless expressly authorized by the FCC after mutual agreement, on a case-by-case basis, between the EIC of the applicable field facility and the military area frequency coordinator at the applicable military base. An Earth station or telecommand station, however, may transmit on the 435-438 MHz segment with a maximum of 611 W effective radiated power (1 kW equivalent isotropically radiated power) without the authorization otherwise required. The transmitting antenna elevation angle between the lower half-power (-3 dB relative to the peak or antenna bore sight) point and the horizon must always be greater than 10°.

(g) No station may transmit with a transmitter power exceeding 50 W PEP on the 33 cm band from within 241 km of the boundaries of the White Sands Missile Range. Its boundaries are those portions of Texas and New Mexico bounded on the south by latitude 31° 41' North, on the east by longitude 104° 11' West, on the north by latitude 34° 30' North, and on the west by longitude 107° 30' West.

(h) No station may transmit with a transmitter power exceeding 50 W PEP on the 219-220 MHz segment of the 1.25 m band.

Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On

Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT's inspectors shall carry proper

identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT's notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT's certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual furnished to the user, information concerning the model and technical specifications, and importation or manufacturer's certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant's application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer's certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.
2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants' purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-2 Certification of Type-approval For External RF Power Amplifier of Class 1 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 6-1 Certification of Type-approval For Class 2 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 2 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 7-2 Certification of Type-approval For External RF Power Amplifier of Class 3 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Attachment 9 Certification of Type-approval For Individual Amateur Radio Equipment Model.

(1)Model:

Serial number:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Affix hereinbefore label in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification

Source record: 147014

§97.315 Certification of external RF power amplifiers.
(a) No more than 1 unit of 1 model of an external RF power amplifier capable of operation below 144 MHz may be constructed or modified during any calendar year by an amateur operator for use at a station without a grant of certification. No amplifier capable of operation below 144 MHz may be constructed or modified by a non-amateur operator without a grant of certification from the FCC.

(b) Any external RF power amplifier or external RF power amplifier kit (see §2.815 of the FCC Rules), manufactured, imported or modified for use in a station or attached at any station must be certificated for use in the amateur service in accordance with Subpart J of Part 2 of the FCC Rules. This requirement does not apply if one or more of the following conditions are met:

(1) The amplifier is not capable of operation on frequencies below 144 MHz. For the purpose of this part, an amplifier will be deemed to be incapable of operation below 144 MHz if it is not capable of being easily modified to increase its amplification characteristics below 120 MHz and either:

(i) The mean output power of the amplifier decreases, as frequency decreases from 144 MHz, to a point where 0 dB or less gain is exhibited at 120 MHz; or
(ii) The amplifier is not capable of amplifying signals below 120 MHz even for brief periods without sustaining permanent damage to its amplification circuitry.

(2) The amplifier was manufactured before April 28, 1978, and has been issued a marketing waiver by the FCC, or the amplifier was purchased before April 28, 1978, by an amateur operator for use at that amateur operator's station.

(3) The amplifier was:

(i) Constructed by the licensee, not from an external RF power amplifier kit, for use at the licensee's station; or
(ii) Modified by the licensee for use at the licensee's station.

(4) The amplifier is sold by an amateur operator to another amateur operator or to a dealer.

(5) The amplifier is purchased in used condition by an equipment dealer from an amateur operator and the amplifier is further sold to another amateur operator for use at that operator's station.

(c) Any external RF power amplifier appearing in the Commission's database as certificated for use in the amateur service may be marketed for use in the amateur service.

§97.317 Standards for certification of external RF power amplifiers.
(a) To receive a grant of certification, the amplifier must satisfy the spurious emission standards of §97.307(d) or (e) of this Part, as applicable, when the amplifier is:

(1) Operated at its full output power;
(2) Placed in the "standby" or "off" positions, but still connected to the transmitter; and

(3) Driven with at least 50 W mean RF input power (unless higher drive level is specified).

(b) To receive a grant of certification, the amplifier must not be capable of operation on any frequency or frequencies between 24 MHz and 35 MHz. The amplifier will be deemed incapable of such operation if it:

(1) Exhibits no more than 6 dB gain between 24 MHz and 26 MHz and between 28 MHz and 35 MHz. (This gain will be determined by the ratio of the input RF driving signal (mean power measurement) to the mean RF output power of the amplifier); and
(2) Exhibits no amplification (0 dB gain) between 26 MHz and 28 MHz.

(c) Certification may be denied when denial would prevent the use of these amplifiers in services other than the amateur service. The following features will result in dismissal or denial of an application for certification:

(1) Any accessible wiring which, when altered, would permit operation of the amplifier in a manner contrary to the FCC Rules;
(2) Circuit boards or similar circuitry to facilitate the addition of components to change the amplifier's operating characteristics in a manner contrary to the FCC Rules;

(3) Instructions for operation or modification of the amplifier in a manner contrary to the FCC Rules;

(4) Any internal or external controls or adjustments to facilitate operation of the amplifier in a manner contrary to the FCC Rules;

(5) Any internal RF sensing circuitry or any external switch, the purpose of which is to place the amplifier in the transmit mode;

(6) The incorporation of more gain in the amplifier than is necessary to operate in the amateur service; for purposes of this paragraph, the amplifier must:

(i) Not be capable of achieving designed output power when driven with less than 40 W mean RF input power;
(ii) Not be capable of amplifying the input RF driving signal by more than 15 dB, unless the amplifier has a designed transmitter power of less than 1.5 kW (in such a case, gain must be reduced by the same number of dB as the transmitter power relationship to 1.5 kW; This gain limitation is determined by the ratio of the input RF driving signal to the RF output power of the amplifier where both signals are expressed in peak envelope power or mean power);

(iii) Not exhibit more gain than permitted by paragraph (c)(6)(ii) of this Section when driven by an RF input signal of less than 50 W mean power; and

(iv) Be capable of sustained operation at its designed power level.

(7) Any attenuation in the input of the amplifier which, when removed or modified, would permit the amplifier to function at its designed transmitter power when driven by an RF frequency input signal of less than 50 W mean power; or

(8) Any other features designed to facilitate operation in a telecommunication service other than the Amateur Radio Services, such as the Citizens Band (CB) Radio Service.

ah either way a combiner that can hold the amount of watts will suffice.

Umm, George, who is the Ministry of Transportation and Communications (MOTC)? It appears this is not a US agency. What country does this apply to, because it is not the US?

"Maul Popper" <ranus@hotmialcommie> wrote in message news:m8acnTr_tdM0yZyjXTWcog@comcast.com...
Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT's inspectors shall carry proper identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT's notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT's certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual

furnished to the user, information concerning the model and technical specifications, and importation or manufacturer's certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant's application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer's certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.
2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants' purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Pick up a 80 - 100 watt single pill amp/modulator with a variable output.
You'll be very happy with the result.

The other night I noticed that this transceiver is not putting out full
power on channels 1-19....
e.g. ch. 1 - 1/4 watt ch. 5 - 1/2 watt, etc.....

When I go above ch. 20, it IS putting out full 4 watts.... any ideas???

Why would the lower 20 channels not be transmitting full power when the high
20 are?????

Thanks for any input

> Please e-mail me directly if possible.

Keep in mind that transmiting with more than 4 watts of output power
on CB is illegal in the US. With that in mind, most CB's have an
internal resistor that can be adjusted to increase the output. 20 - 25
watts is probably a stretch for most standard CB's (not talking about
the so called "export 10 meter" radios). Do a search for CB mods and
look around the sites to see what CB's you can increase the power on.

I looked into this for myself. Eveyone I spoke to said the same thing. Get a small amp. What will happen if you do this is burn out your radio, or run in real hot. Some people don't even compensate for the extra heat by adding a bigger heat sink. This was unanimous. Suggest I took the advice. I suggest the same for you.

Vinnie S.

Dweebo the keyclown is a gaping anal hole
With a jizz soaked face and dried cum lips
And a lust for men's hard pole

Dweebo the keyclown is a fairy boy they say
He loves to blow and the children know
To stay the hell away

There must have been some cum stains
On the pink panties he found
Cuz when he placed them on his head
He began to dance around

Dweebo the keyclown is as queer as he can be
And Landshark says he sucks and licks
And just loves that gay pee pee

Dweebo faggot as he can be
Watch him visit truckstops
Goes in the john to the glory hole
And there his lips he plops

Dweebo the keyclown knew the sun was hot that day
So he found a spot in a parking lot
And sucked black dick all day

Down to the porn store
With a broom stick in his hand
He walked raight in to the viewing booths
And begged for gayboys' gland

He led the fags to the downtown bars
And right in to the back
He said let's play the gayboy way
Please let me lick your anal crack

Dweebo the keyclown then hurried on his way
He waved goodbye saying gotta go get high
And get crammed in my can

Suckety Suck Suck
Suckety Suck Suck
Look at Dweebo slurp

Suckety Suck Suck
Suckety Suck Suck
Without a single burp

Really? Where did that come from?

>FCC

Show me.

§97.307 Emission standards.
(a) No amateur station transmission shall occupy more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice.

(b) Emissions resulting from modulation must be confined to the band or segment available to the control operator. Emissions outside the necessary bandwidth must not cause splatter or keyclick interference to operations on adjacent frequencies.

(c) All spurious emissions from a station transmitter must be reduced to the greatest extent practicable. If any spurious emission, including chassis or power line radiation, causes harmful interference to the reception of another radio station, the licensee of the interfering amateur station is required to take steps to eliminate the interference, in accordance with good engineering practice.

(d) The mean power of any spurious emission from a station transmitter or external RF power amplifier transmitting on a frequency below 30 MHz must not exceed 50 mW and must be at least 40 dB below the mean power of the fundamental emission. For a transmitter of mean power less than 5 W, the attenuation must be at least 30 dB. A transmitter built before April 15, 1977, or first marketed before January 1, 1978, is exempt from this requirement.

Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT's inspectors shall carry proper identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT's notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT's certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual furnished to the user, information concerning the model and technical specifications, and importation or manufacturer's certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant's application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for

its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer's certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.
2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants' purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 1-1 Flow Chart of Type-approval for Amateur-Radio Equipment(For Manufacturers)

Attachment 1-2 Flow Chart of Type-approval for Amateur-Radio Equipment (For Individuals)

Attachment 2-1 Application Form of Type-approval for Amateur Radio Equipment(For manufacturers)

Applicant (Company) : _____

Address : _____

Contact Person : _____

Telephone No. : _____

Equipment Name : _____

Equipment Model : _____

Manufacturer : _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Four copies of the product catalogues and color photographs larger dm 4x6 inches in size.
1.. photograph with front side of equipment
2.. photograph with rear side of equipment
3.. photographs with right side and left side of equipment
4.. photograph with internal structure of equipment
5.. photograph with both sides of base board (with parts).
3. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

4. One copy of the block diagram.

5. One copy of the circuitry diagram.

6. One original and four copies of the testing report of the sample product performance.

7.. One copy of the licensing permit for the operation of controlled radio frequency equipment.

Application Date: Year Month Date

Applicant (company) Stamp: Responsible Person's Signature:

(Internal Use Only)

Application Date: Year Month Date

Number:

Approval Fee: Accepted date: Year Month Date

Opening Hours: 9:00 - 12:00 AM, 2:00 - 5:00 PM, exclusive of public Holidays.

Note: Applicant should ask certified testing institutions to perform testing on the Technical Specifications of Amateur Radio Equipment. Testing fee will be collected by respective institution.

Attachment 2-2 Application Form of Type-approval for Amateur Radio Equipment(For Individuals)

Applicant : _____

Address : _____

Contact Person: _____

Telephone No: _____

Equipment Name: _____

Equipment Model: _____

Manufacturer: _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance

with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-2 Certification of Type-approval For External RF Power Amplifier of Class 1 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 6-1 Certification of Type-approval For Class 2 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 2 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 7-2 Certification of Type-approval For External RF Power Amplifier of Class 3 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Attachment 9 Certification of Type-approval For Individual Amateur Radio Equipment Model.

(1)Model:

Serial number:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Affix hereinbefore label in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification

Hahaha..poor Georgeyboy..in addition to being ID'd on the freeband he's gonna try and pass off some forighn bullshit as proof as type acceptance and specrtal purity? MINISTRY of TElecommunications? AHHAHAHHAHAHHAHAHHAHHAHHAHAHAHHAHHHA! Plenty of forms and no adddy to mail it to..hey Georgey..what happened to your email addy? Lose something?
With all that info, N3CVJ ought to be able to at least manage to share with us the frequency response of the Texas Star after he hacked at it.....but I kow how everyone is interested in cb enforcement, so I'll keep reminding him he needs to enlighten the group on this cber he claims got busted for disorderly conduct Taking it in context with the rest of his sicko and wild azzed claims,,,,,,he seems to have you spinning your wheels. Y'all are being watched. Play nice. Click click.

I called you AND N3CVJ liars..and it still holds. According to what you posted, he is in violation of several laws just as some of his posts claim. Read it a few times, think about it, and see if you can tell me why. Hint: Texas Star, Davemade, Ranger..just to start. Now which of these items couldn't be brought into "spectral acceptance" according to the FCC? 10 bonus points if you can match the item and tell why in the same post. C'mon, junior,,,let that knowledge you boast about shine.....

4555. Happy Holidays little keyclown boys...

Newsgroup: rec.radio.cb

Dear Keyclowns:
I wanted to let you know how pleased I am with your sissy selves giving me so much amusement over the last several years. Hopefully you will continue to be the same yellow bellied feminine mewlers in 2003 that you have been in the past. I am looking forward to seeing you whine and cry in the future. Nebo Dweebo and his wife twithed have especially amused me. Twithed's vacation journal was a great account of what it is like to be a keyclown. Dweebo's drug and alcohol soaked posts of his stupid tattoo pic and all his whigger fantasies never fail to raise a laugh. A few of you have also made a chuckle or two, but these 2 are the emmy award winners of idiocy. Together they do not have the collective brains of chukkee-sukkee. If they would just turn hetero and give up illegal CB. Twithed speaks for himself, and damned poorly at that. Dweebo, as we all know, is a druggie, a high school dropout, was tossed out of his parent's home, and glorifies the abuse of women through pimping. A sad and stupid mentality, and one that exemplifies the BETTER people on here.

You are all scumbags, druggies, criminals, neglecters of your kids' needs, hide behind the keyboard crybabies, threateners who can't back up a damned thing you threaten and full blown wackaloons. Truly, keyqueens are the unnamed 5th group in George Carlin's discussion of "Four Groups Who Gotta Go".

Some time ago the admitted crack user and disgrace to ham radio named Randy Chapwoman had this to say about the Anti-Keyclowns:

"Well, what has been done so far has been working. If they wish to press the
issue, they can feel free to do so.....but I really don't think they have
the nards to do it. I can, and will follow up with what I have told them I
will do. One way or another, they will not be allowed to continue."

Well, lightloafered little CB dorks, it has not happened. We will smash your criminal auctions, we will never leave the NG. You cannot do a single thing about it and we know how that lights up your feminine mewling, don't we keyqueens?

The might of the AntiBoys continues to defeat your effeminate and socially inadequate selves.

Happy Holidays,

N8WWM
PS More auction ratouts posted PROUDLY soon.

Please show the specs and cite the rule for the umpteenth time.

>A ham radio will not have any stickers on it >alluding to CB use.

Just like a Galaxy.

>Your making thoings up again bedcause you >have no clue.

No really....a Galaxy is not a cb.
You're getting a valuable education where you are clueless.

>A ham has it aligned etc to meet FCC's min >spectral requirements he
>can then use it.
Really? Where did that come from?

>FCC

Show me.

>§97.307 Emission standards.
>(a) No amateur station transmission shall >occupy more bandwidth than
necessary for >the information rate and emission type being
>transmitted, in accordance with good amateur >practice.
>(b) Emissions resulting from modulation must >be confined to the band
or segment available >to the control operator. Emissions outside the
>necessary bandwidth must not cause splatter >or keyclick interference
to operations on >adjacent frequencies.
>(c) All spurious emissions from a station >transmitter must be reduced
to the greatest >extent practicable. If any spurious emission,
>including chassis or power line radiation, >causes harmful interference
to the reception of >another radio station, the licensee of the
>interfering amateur station is required to take >steps to eliminate the
interference, in >accordance with good engineering practice.
>(d) The mean power of any spurious emission >from a station transmitter
or external RF >power amplifier transmitting on a frequency >below 30
MHz must not exceed 50 mW and >must be at least 40 dB below the mean
power >of the fundamental emission. For a transmitter >of mean power
less than 5 W, the attenuation >must be at least 30 dB. A transmitter
built >before April 15, 1977, or first marketed before >January 1, 1978,
is exempt from this >requirement.

I read it twice and still fail to see where it addresses linears except
in (d). Above that it refers to transmitters and in (d), it says nothing
of the sort concerning bringing an amplifier somewhere so it can be

"aligned". It mentions nothing at all..your communication deficit is showing again. Just to make certain, I read it a third time and still failed to see where it confirms N3CVJ's lie about a cber getting arrested, or how it sheds light on his not having a clue concerning the "Phelps" he lied about, or about how all his linears can't go above 80 watts or so..like I said..he musta had his fingers in them and butchered the hell out of them, sort of like you helped do to his reputation.

You have good answers already to your query; engineers would get fired if they used components readily capable of much more than they run at (cost overrun). Stock radios (non-export) aren't capable of modification without problems (at least not enough to be meaningful). You'll likely need at least 20 watts to be noticeably stronger (that would be 6 dB over 5 watts - a 4X power increase) and stock radios aren't going to do this.

Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT's inspectors shall carry proper identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT's notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT's certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual furnished to the user, information concerning the model and technical specifications, and importation or manufacturer's certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant's application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for

its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer's certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.
2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants' purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 1-1 Flow Chart of Type-approval for Amateur-Radio Equipment(For Manufacturers)

Attachment 1-2 Flow Chart of Type-approval for Amateur-Radio Equipment (For Individuals)

Attachment 2-1 Application Form of Type-approval for Amateur Radio Equipment(For manufacturers)

Applicant (Company) : _____

Address : _____

Contact Person : _____

Telephone No. : _____

Equipment Name : _____

Equipment Model : _____

Manufacturer : _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Four copies of the product catalogues and color photographs larger dm 4x6 inches in size.
1.. photograph with front side of equipment
2.. photograph with rear side of equipment
3.. photographs with right side and left side of equipment
4.. photograph with internal structure of equipment
5.. photograph with both sides of base board (with parts).
3. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

4. One copy of the block diagram.

5. One copy of the circuitry diagram.

6. One original and four copies of the testing report of the sample product performance.

7.. One copy of the licensing permit for the operation of controlled radio frequency equipment.

Application Date: Year Month Date

Applicant (company) Stamp: Responsible Person's Signature:

(Internal Use Only)

Application Date: Year Month Date

Number:

Approval Fee: Accepted date: Year Month Date

Opening Hours: 9:00 - 12:00 AM, 2:00 - 5:00 PM, exclusive of public Holidays.

Note: Applicant should ask certified testing institutions to perform testing on the Technical Specifications of Amateur Radio Equipment. Testing fee will be collected by respective institution.

Attachment 2-2 Application Form of Type-approval for Amateur Radio Equipment(For Individuals)

Applicant : _____

Address : _____

Contact Person: _____

Telephone No: _____

Equipment Name: _____

Equipment Model: _____

Manufacturer: _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Operating manual furnished to the user (or instructions)
3.. Product catalogue and information concerning technical specifications.
4.. Import or manufacturing documentation.

Application Date: Year Month Date

Applicant's Signature:

(Internal Use Only)

Application Date: Year Month Date

Number:

Approval Fee: Accepted date: Year Month Date

Opening Hours: 9:00 - 12:00 AM, 2:00 - 5:00 PM, exclusive of public Holidays.

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance

with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-2 Certification of Type-approval For External RF Power Amplifier of Class 1 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 6-1 Certification of Type-approval For Class 2 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 2 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 7-2 Certification of Type-approval For External RF Power Amplifier of Class 3 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Attachment 9 Certification of Type-approval For Individual Amateur Radio Equipment Model.

(1)Model:

Serial number:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Affix hereinbefore label in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification

Hi Guys;
I have for Sale:
1)- 4 Ceramic couplings.
Price is $15.00ppd>>
http://www.myradioroom.com/4couplings.jpg
2)- US Army Audio filters NEW, Marked FL-5C
Price is $13.00ppd>>
http://www.myradioroom.com/armyfilter1.jpg
http://www.myradioroom.com/armyfilter2.jpg
http://www.myradioroom.com/armyfilter3.jpg
3) Johnson LP filter for 72 ohm w/box.
Price is $20.00PPD>>
http://www.myradioroom.com/johnsonlp.jpg
4)- Yaesu 2-meter converter board for FR-101 SW receiver, these are super hard to find.
Price is $50.00ppd>>
http://www.myradioroom.com/fr101-2mtr.jpg
5- Bogen Desk mike, by astatic & looks like Drake model but better, has switchable impedence, excellent!
Price is $50.00 ppd>>
http://www.myradioroom.com/bogen1.jpg
http://www.myradioroom.com/bogen2.jpg
6)- Hallicrafters HA-26 VFO for 6 & 2mtrs for thier AM rigs, in original box w/papers, like new & hard to find.
Price is $60.00ppd>>
http://www.myradioroom.com/hallivfo1.jpg
http://www.myradioroom.com/hallivfo2.jpg
http://www.myradioroom.com/hallivfo3.jpg
7)- Three Hi-Quality VU meters, all Brand new, 2 are simpsons.
Price is $50.00ppd>>
http://www.myradioroom.com/3vumeters.jpg
8)- Johnson Ranger II reliminary assembly instructions, new in original mailer,
Price is $20.00ppd>>
http://www.myradioroom.com/rangermanual.jpg
Thanks & 73,

Boy!
What you cryin' 'bout now?
Yo "good-buddy" will gives YOU somethin's ta cry about!

You oughtta know better than to get involved with those who are in the CB
business.
That ain't spam.
Lou has been doin' this fer years.
He puts out a catalog with kits and hardware for CBs.

You better watch yo self or
You might gits yo self a visit one night.

"Sleep with one eye open, touchin' yo self all night!
Exit light....Enter Night;
Fill your hands- off in the "Good-buddy Land"

So, quits yo cryin' and mosy yo 'tarded ass on out to da woodshed and your
"good-buddy" will make you feel better again.
Heh-heh-heh-heh-heh-heh!

Cryin' over a CB crystal Mixing Chart.
What in dee hale is da world cummin' too?

What is your phone-number, big-boy?
I'd shore like ta hear ya talk like that in my ears.
Makes me horny as hell.

Where ya live, sugar britches?
So, I can CUM and see you sometime.

Let's go in the showers a truckstop one night.
I'd shore like to make you moan.
I love to watch the soap run down the crack of my partner's ass.

You write some good poetry fo' a "good-buddy".
Most of them mens I meet don't do shit.

I'll gives yo ma phone number so we can get together.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters.
It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get
the technical supplement too (AKA Service manual), as well as the owners
manual . I also Have the 3 KW Roller Inductor Antenna Tuner. They are in
good shape I will trade both for a FT 990 or a FT 1000.. I have been
using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working
Viking Valant and SX 300 or Hamuland HQ 110. I'm looking for a good AM
Han station
with at least 200 watts out. I hope to find something to work with my
Audio rack.
I also have a Henry Amp 2 KD 5 Desktop,(It needs a new Plate amp meter)
two 3-500s 100 in will give you 1250 out, New Caps, that I will trade
for a Globe King or full legal output Ham band AM transmitter. this is a
pickup trade only. I will be willing to travel 100 miles from Athens GA.
Happy Holidays
73 and thanks for reading
Oris

I read it twice and still fail to see where it addresses linears except in
(d).
****
This is the info you asked for FCC requirements for Radios the
specifications that don't allow a Galaxy from being used.

I never said it was about a AMP there are different sets of rules for radios and amps .
STOP TRYING TO CHANGE THE TOPIC. This was IN regard to RADIOS/TRANSMITTERS

> Above that it refers to transmitters and in (d), it says nothing of the sort concerning
>bringing an amplifier somewhere so it can be "aligned".

No one said you have to take a linear anywhere to get "aligned" the above is about non- certified radios like the GALAXY...A Ham can align it himself if he has the know how. It just has to meet the requirements I have never said they have to take the radio or amp anywhere you are putting words in my mouth again. BTW STOP CHANGING THE TOPIC .GET DAVE HALL OF YOUR MIND!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> It mentions nothing at all..
It sure does it mentione the FCC requirments for spectral purity etc regarding the use of a transmitter. Thats where the Galaxy radio fails to meet

>your communication deficit is showing again.

your comprehension skills are lacking again.

>Just to make certain, I read it a third time and still failed to see where it confirms N3CVJ's

That is pretty pathetic, you ask for me to post info from the FCC, regarding why a Galaxy radio cannot be used, you said there are no minimum specral requiremnts. I post the evidance, you change the subject to dave Hall and his phelps. Now you see why I nor anyone else wants to watse thier time providing you with the correct info, you will only change the subject.

No really....a Galaxy is not a cb.

>I never said it was a lie on your part, and it is >not a type certified
radio for use by hams, it >can't be used by a ham legally in it's
current >form.

Sure it can be used legally by a ham in it's present form. You still
have failed to show anything that claims it cannot be used by an
authorized hammie. Smoke and mirrors..the "mistry of Telecommunications"
was a novel approach...are you that desperate to post something from a
foreign government and try to come across as if it applies somehow?
Really, George.....as I have always maintained..you are full of
intentional disinformation otherwise you would never have reduced
yourself to such a pitiful attempt.

>A ham has it aligned etc to meet FCC's min >spectral requirements he
can then use it.

Really? Where did that come from?

>FCC

Show me.
****
>Just did
>§97.307 Emission standards.
>(a) No amateur station transmission shall >occupy more bandwidth than
>necessary for the information rate and >emission type being
>transmitted, in accordance with good amateur >practice.

Information rate? We were talking of Dave Hall's claim that his amps
were legal for him to use. You failed to show the "spectral purity"
"scale" or rules or whatever you claim exists that allows him to operate
his Texas Star and Davemades
The Galaxy was an additional statement, one that you are still incorrect
about.

>(b) Emissions resulting from modulation must >be confined to the band
>or segment available to the control operator. >Emissions outside the
>necessary bandwidth must not cause splatter >or keyclick interference
>to operations on >adjacent frequencies.
>(c) All spurious emissions from a station >transmitter must be reduced

power of the fundamental emission. For >a transmitter of mean power less
than 5 W, >the attenuation >must be at least 30 dB. A >transmitter built
before April 15, 1977, or first >marketed before January 1, 1978, is
exempt >from this requirement.

I read it twice and still fail to see where it addresses linears except
in (d).
****
>This is the info you asked for FCC >requirements for Radios

Again, it doesn't say anything at all about a Galaxy. Are you merely
implying that a Galaxy out of the box emits spurious emissions that
violate the "40db below mean power" you wrote?
YOU were the one that lumped them together. Show the info needed to
allow N3cvj'S claim to be accurate allowing him to use the amps,,,

>the specifications that don't allow a Galaxy >from being used. I never
said it was about a >AMP there are different sets of rules for radios
>and amps .

Sure you did,,you said that Dave is legally allowed to use the amps.

>STOP TRYING TO CHANGE THE TOPIC.

George, the topic was me bouncing Dave Hall off the wall concerning his
lies when you inserted yourself into this thread and messed him up
even more with our incoherent babbling about foreign radio policy.

>This was IN regard to >RADIOS/TRANSMITTERS

Acyually, it was about N3CVJ's lies when you inserted yourself and I
allowed you to fondloff topic for awhile. The issue was his lies, the
legal status of the Galaxy and N3CVj's use of a Texas Star and Davemade
and his claim that he is legally able to use them. This contrasts wildly
with his tales of freebanders and freebanding when seen alongside his
posts calling others a criminal for the same.....

--

Above that it refers to transmitters and in (d), it says nothing of the
sort concerning
bringing an amplifier somewhere so it can be "aligned".

>No one said you have to take a linear >anywhere to get "aligned" the
above is about >non- certified radios like the GALAXY...

This is where you trip all the time. Hammie radios need not be
certified.

>A Ham can align it himself if he has the know >how. It just has to meet the requirements

Which are what, concerning this "spectral purity" you keep as a hymn.

>I have never said they have to take the radio >or amp anywhere you are putting words in my >mouth again. BTW STOP CHANGING THE >TOPIC .GET DAVE HALL OF YOUR
>MIND!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Dave Hall IS the topic, despite you demanding otherwise and balling up your fists and holding your breath ....YOU changed the topic when I permitted. His lies were the topic and he was getting called on each one when you tried to play Captain Amerika and ended up looking like the cosmic ooze.

--
It mentions nothing at all..
>It sure does it mentione the FCC requirments >for spectral purity etc regarding the use of a >transmitter. Thats where the Galaxy radio fails >to meet

Says who? Surely your knowledge has been foundered several times by men much better than myself, but I still consider it an honor the way I play Pied Piper to the rats.

-
your communication deficit is showing again.
your comprehension skills are lacking again.
Just to make certain, I read it a third time and still failed to see where
it confirms N3CVJ's

>That is pretty pathetic, you ask for me to post >info from the FCC, regarding why a Galaxy >radio cannot be used, you said there are no >minimum specral requiremnts. I post the >evidance, you change the subject to dave Hall >and his phelps.

ODave never had a Phelps, just another lie shown,,and he WAS the topic, George. YOU ran to his helpess defense and effectiely destroyed any credibility coming from yourself by posting that "ministry" junk. With such disinformation, everything you post is suspect.
Still waiting for an answer on the amps....

>Now you see why I nor anyone else wants to >watse thier time providing you with the correct >info, you will only change the subject.

The only thing "everyone knows", is that you don't know a quarter of what you claim.

heheh sorry but it drives me nuts when I have to scroll sideways and
down at the same time to read a post especially when they have a line
that when wrapped whould take 5-6 lines and next few are short and
then more long ones, I get lost lol.

Happy Holidays

You have a point Brian. The question at hand is a matter of personal preference, and we just happen to have different preferences. I think that if you asked him nicely not to post ads then he should cease. Again, that's just my opinion.

You have a Merry Christmas, or any other holiday/event you may be celebrating this season. I'm enjoying the inches of rain we've received as of late (numbers are rising, it's been pissing rain all day) and can't wait for a little time off to relax and work on the house.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station with at least 100 watts out. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer) I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
Happy Holidays
73 and thanks for reading

I have a Realistic TRC 458 sideband forty channel CB rig for trade.
I'll trade it for a good Ham all mode receiver.
I have a Cherokee CBS 1000 sideband radio for trade. I'll trade it for
a good Ham all mode receiver.
I have a Road talker sideband CB radio that has been converted to ten
meters. I'll trade it for a good Ham all mode receiver.

Thanks for reading

Type certification is all you need to ask about. Go do some homework.

> Smoke and mirrors..the "mistry of Telecommunications"
>was a novel approach...

The FCC uses the same criteria when they "type certify" radios for use in the US. Remember the FCC isn't the only ones who use the airwaves they all fall under the ITU. In fact the heading and title was exactly about what we talked about Amateur Radio Technical Guidelines.

>are you that desperate to post something from a foreign government and try to come across as if it applies somehow?

actually I had so many links and I did accidently include that one, but the point remains the FCC type certidfies radios the exact same way.

>Information rate? We were talking of Dave Hall's claim that his amps
>were legal for him to use.

NO we were not, you have been arguing with me about Galaxy radios and there use by hams for weeks, it is you who keeps attempting to bring DAVE HALLS NAME UP at every attempt. I hope you got him a nice christmas present, he sounds like he has you by the balls.

>You failed to show the "spectral purity" "scale" or rules or whatever you claim exists that allows him to operate
>his Texas Star and Davemades The Galaxy was an additional statement, one that you are still incorrect about.

No in fact it is the exact opposite, I have been telling you for weeks about the Galaxy, you keep attempting to bring DAVE HALL into the equation I told you before I don't want to talk about DAVE HALL> In fact did I not say I will not engage you if you bring his name up again. Well sorry must hold my ground when you care to debate the true facts anout Galaxy Radios and NOT DAVE HALL. Post without mentioning his name and we can continue.

>This is the info you asked for FCC >requirements for Radios

Again, it doesn't say anything at all about a Galaxy. Are you merely implying that a Galaxy out of the box emits spurious emissions that violate the "40db below mean power" you wrote?

It does not have to a galaxy isnt type certified. It doesnt mention any names of radio did you notice that?
I am implying it may violate the 40db below mean power, here is the crux of it all..... That is why radios are type certified to find out if they meet the FCC spec's for them to be offered for sale, the manufacturer send the FCC Lab the radio to be analyzed if it meets spec then all of that current model can be offered for sale. The point is the galaxy radio or none of the current export radios have done this that means they are not type certified, why do you think the FCC does not allow them to be sold? I mean really Twsity you are trying to argue something that should be common sense.

>YOU were the one that lumped them together. Show the info needed to allow N3cvj'S claim to be accurate allowing him to use the amps,,,

BBBBBZZZZZZZZZ there is the buzzword again DAVE HALL....

>STOP TRYING TO CHANGE THE TOPIC.

George, the topic was me bouncing Dave Hall off the wall concerning his lies when you inserted yourself into this thread and messed him up even more with our incoherent babbling about foreign radio policy.
****

Right there is an outright lie I started this thread , so it was you who inserted yourself. I also posted info right from FCC, in my haste to post info I did post some other amateur guidleines. Yet all follow the same guidelines whether you like it or not.

>This was IN regard to >RADIOS/TRANSMITTERS

>Acyually, it was about N3CVJ's lies when you inserted yourself and I >allowed you to fondloff topic for awhile.

Never was about DAVE HALL, I started this thread It is you who inserted your opinion whcih is allways DAVE HALL

> The issue was

Nothing that you have said the issue was me starting this thread and you attempting to "TWISTEDHED" it to your topic DAVE HALL

>legal status of the Galaxy and N3CVj's use of a Texas Star and Davemade

Funny you bring up the texas star, it is a cw transmitter, when modified it is allowed to be used by a ham, he may modify 1 non type certified amp per year, the texas star is a non type certified amp.

-

Above that it refers to transmitters and in (d), it says nothing of the sort concerning
bringing an amplifier somewhere so it can be "aligned".

>No one said you have to take a linear >anywhere to get "aligned" the above is about >non- certified radios like the GALAXY...

>This is where you trip all the time. Hammie radios need not be certified.

Homebrew radios don't have to be type certified unless you plan on selling them, Manufactured radios do indeed have to be type certified to be used by a ham in the usa. A ham cannot use a amateur radio made for japanese hams they are not legal for use in the usa, they have different specs and freqs.

>A Ham can align it himself if he has the know >how. It just has to meet the requirements

Which are what, concerning this "spectral purity" you keep as a hymn.

You know what they are remember the paragraph from Part 97 about the 40 db down, oh you forgot I posted them, your only concern is trying to malign DAVE HAL:L

>I have never said they have to take the radio >or amp anywhere you are putting words in my >mouth again. BTW STOP CHANGING THE >TOPIC .GET DAVE HALL OF YOUR
>MIND!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Dave Hall IS the topic, despite you demanding otherwise and balling up your fists and holding your breath ....

I started the thread he was not the topic no where near it, so every time I see DAVE HALL come from your TV Screen, FUck you and take your dave hall blow up doll with you.

Just to make certain, I read it a third time and still failed to see where it confirms N3CVJ's

Go fuck yourself and take your dave hall blow up doll with you

>ODave never had a Phelps, just another lie shown,,and he WAS the topic, >George.

Go fuck yourself and take your dave hall blow up doll with you

>The only thing "everyone knows", is that you don't know a quarter of what you claim.

I will give you 3 100% guarantees, you are a asshole, You will mention dave Halls anme about 200 more times, You have not be able to prove me wrong, I have posted info from FCC page you turn it into a DAVE HALL athon, Twsity, JUST BECAUSE YOU SAY IT DOESN"T MAKE IT SO... You have not proven anything except you are in love with DAVE HALL...

"Hollingsworth said FCC rules permit an individual amateur to construct
or modify a non-certificated RF power amplifier once per calendar year"

Dave Hall may construct a non type certified amp or he may modified a non type
certified amp(such as his Dave made).
The key word is he may use a modified one.

"The rules do not provide for mass marketing or manufacturing and marketing kits
or assembled amplifiers as part of a
business, Hollingsworth said."

if you put a woman on a pedistal and try to protect her from the rat race, you are a male chauvinist......if you stay home and do the housework , you are a pansy
if you work too hard, there is never enough time for her, and if you don't work enough, you are a good for nothing bum.
if she has a boring repetitive job, she is being exploited, if you have a boring repetitive job, you should get off of your ass and find something better.
if you get a promotion ahead of her, that is favoritism, if she gets a job ahead of you, its equal opportunity.
if you mention how nice she looks, that is sexual harassment, if you keep quiet, its male indifference.
if you cry, you are a wimp, if you don't, you are a insensitive bastard.
if you thump her, its wife bashing, if she thumps you, its self defense.
if you make a decision without consulting her, you're a male chauvinist, if she makes a decision without consulting you, she is a liberated woman.
if you ask her to do something she doesn't like, that's domination, if she ask you, its a favor.
if you like a woman to shave her legs , and keep in shape, you're a sexist, if you don't, you are unromantic.
if you try to keep yourself in shape, your're vain, if you don't you're a slob.
if you buy her flowers, you're after something, if you don't you're not thoughtful.
if you're proud of your achievements, you're stuck on yourself, if you are not, you are not ambitious.
if she has a headache, she's tired, if you have a headache, you don't love her anymore.

yep it sure is getting hard to be a guy.....unless you are a pimp.....

Just tryin' to help the guy... I have no interest in stealing any designs
from Xforce.
I'm not sure they even have schematics for any of their stuff... lol

P.S. - COR (carrier operated relay)

Oh its true twisty, take a few days to read it so it soaks in it gives you a good taste, I wouldexpect you to publicly announce your lack of understanding in this matter and thank me for learning you in this manner. I have more twisty fire away, but first your admittance that amateur radios do indeed need to be type certified. And they indeed do need to meet FCC requirements. Then I will give you you next lesson.

Amateur Radio

Type Approval Guidelines

Directorate General of Telecommunications (DGT)

Ministry of Transportation and Communications (MOTC)
Table of Contents

Amateur Radio Type Approval Guidelines

Article 1

The Guidelines are established in accordance with Articles 46,51,70 of the Telecommunications Act, Article 4 of The Regulations On Inspection And Certification Of Controlled Telecommunications Equipment, Article 10 of the Administrative Regulations On Controlled Telecommunications Radio Frequency Equipment, and Article 51,52,56,58 of the Administrative Regulations On Amateur Radios.

Article 2

The responsible administrator:The Directorate General of Telecommunications (hereinafter referred to as "DGT") the Ministry of Transportation and Communications.

The examination executor: The measurement units authorized by DGT.

Article 3

Flow Chart of Type-approval For Amateur Radio Equipment. (Attachment 1).

Article 4

Application Form of Type-approval For Amateur Radio Equipment (Attachment 2).

Article 5

To obtain certification of the Amateur Radio Equipment Type-Approval, the following rules shall be considered:

1.In order to apply for a certification for amateur radio equipment, the amateur radio operator shall make the application in accordance with the frequency usage, transmission power, and type of transmission of their class which equal to the qualification class of the applying amateur radio operator:

A. Radio equipment suitable for Class 1 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 1 amateur radio equipment.

B. Radio equipment suitable for Class 2 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 2 amateur radio equipment.

C. Radio equipment suitable for Class 3 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 3 amateur radio equipment.

D. Radio equipment suitable for Class 4 amateur radio operator shall meet the standards set forth in the amateur radio technical specification guidelines with respect to Class 4 amateur radio equipment.

E. Amateur radio stations shall meet the standards set forth in the amateur radio technical specification guidelines with respect to amateur radio stations.

2. Separate application for certification shall be made for each brand or model of the amateur radio equipment model, whether such equipment is manufactured by the same or different manufacturers.

3. With respect to the amateur radio equipment officially certified by DGT, DGT may from time to time randomly select manufacturers for inspection of the certified equipment to determine whether such equipment conforms with the appearance and structure of the sample provided to DGT at the time of certification and whether such equipment complies with the required technical specifications and meet the standards set forth in the amateur radio technical specification guidelines. All of DGT's inspectors shall carry proper identifications and documentation during the said inspections. Manufacturer whose equipment does not conform to the original sample or fails to pass the inspection shall improve and correct such deficiencies within three months after DGT's notice for correction. DGT may revoke the certification issued to manufacturers who fail to correct the deficiencies within the notice period. Upon revocation of the certification, manufacturer shall recall all amateur radio equipment sold.

4. Manufacturers who have obtained certification for its amateur radio equipment model shall, prior to the sales of such equipment, affix duplicates of DGT's certification labels or permanently print such labels in a conspicuous manner on the certified amateur radio equipment.

5. Manufacturers shall be responsible for all matters relating to the distribution rights and patent issues of its amateur radio equipment. DGT may revoke the certification given to an amateur radio equipment if such equipment is finally adjudicated by court as an infringing or illegal product in a legal dispute.

6. Any individual who imports from abroad less than two units of the amateur radio equipment or less than five units of self-made amateur radio equipment for personal use and equal to the qualification class shall submit one copy of each of the operating manual furnished to the user, information concerning the model and technical specifications, and importation or manufacturer's certificate, accompanied by the amateur radio equipment to be inspected, to the applicable regional telecommunications regulatory station for certification. Usage of such amateur radio equipment shall be permitted only upon proper certification and affixation of a given certificated label conspicuously displayed on the equipment.

7. The affixed certificated label on the equipment shall be properly maintained and protected. If certain functions of the amateur radio equipment are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification.

8. If any deficiency or error exists with respect to the submitted documents or samples, such applicant shall supplement and correct such deficiencies and errors within one month after notification. If no supplement or correction is made within the notification period, such application shall be returned and become void.

9. All radio equipment before manufactured, marketed and imported must meet the amateur radio frequency standards set forth in Region 3 by IARU, and pass the inspection and certification. All frequency band usage must pursuant to the plan of radio spectrum allocation announced by the DGT, and the detail of radio frequency allocation shall be marked in the license.

Article 6 Equipment Standards for Type-approval:

All equipment standards shall comply with the Amateur Radio Technical Specification Guidelines.

Article 7 Documents and equipment required for application:

1.Manufacturer application:

A. One set of sample

B. Four copies of the product catalogues and color photographs larger than 4×6 inches in size.

C. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

D. One copy of the block diagram.

E. One copy of the circuitry diagram.

F. One original and four copies of the testing report of the sample product performance.

G. One copy of the licensing permit for the operation of controlled radio frequency equipment.

The performance testing aforementioned in Item 6 shall be conducted by the measurement units authorized by DGT via applicant's application to such measurement units for testing. If the sample cannot be submitted to DGT due to size, weight or power related factors, manufacturer of such sample shall submit a written explanation specifying the reasons for

its inability to submit such sample.

2. Individual application:

A. Operation manual

B. Information concerning the model and technical specifications.

C. Importation or manufacturer's certificate.

D. Submitted sample.

Article 8 Appropriate Inspection Fee, Certification Fee

1.. DGT shall collect all necessary inspection fee and certification fee from applicants for inspection and certification in accordance with those certain governmental fee collection standards established by the Ministry of Transportation and Communications.
2.. Measurement fee shall be collected by the measurement units authorized by DGT as stipulation.
Article 9 Testing items:

1.. The measurement units shall complete amateur radio equipment application form in accordance with the detail of Testing Items and Qualifying Standards. The amateur radio transceivers shall complete the form of attachment 3-1, and the external RF power amplifier shall complete the form of attachment 3-2.
2.. The qualifying standards of certificate for individuals shall meet the Amateur Radio Technical Specification Guidelines and complete the form of attachment 3-3.
3.. The radio station shall meet the Regulations on Radiative Low-power Radio Wave Stations and complete the form as required.
Article 10 Type-approval Procedures and Issuance of Certification:

1.The procedures for type-approval are set forth in Attachment 1 of the " Type-approval for Amateur-Radio Equipment flow chart".

2. Applicants failed to meet the requirements will be sent a notice with respect to the reasons for non-compliance.

3. Applicants' purpose of application is for personal use, Article 5(6) of this Guidelines shall be followed.

4. Certificates for Type-Approval will be sent to applicants who have obtained approval. (As attachment 4,5,6,7,8,9)

Attachment 1-1 Flow Chart of Type-approval for Amateur-Radio Equipment(For Manufacturers)

Attachment 1-2 Flow Chart of Type-approval for Amateur-Radio Equipment (For Individuals)

Attachment 2-1 Application Form of Type-approval for Amateur Radio Equipment(For manufacturers)

Applicant (Company) : _____

Address : _____

Contact Person : _____

Telephone No. : _____

Equipment Name : _____

Equipment Model : _____

Manufacturer : _____

Purpose : _____

Type : Transceivers External RF power amplifier Radio receiver

Grade of application : Class 1 Class 2 Class 3 Class 4

Technical papers & equipment:

1.. One set of sample(return after type approval).
2.. Four copies of the product catalogues and color photographs larger dm 4x6 inches in size.
1.. photograph with front side of equipment
2.. photograph with rear side of equipment
3.. photographs with right side and left side of equipment
4.. photograph with internal structure of equipment
5.. photograph with both sides of base board (with parts).
3. One copy of operating manual furnished to the user (or instructions) and information concerning technical specifications.

4. One copy of the block diagram.

5. One copy of the circuitry diagram.

6. One original and four copies of the testing report of the sample product performance.

7.. One copy of the licensing permit for the operation of controlled radio frequency equipment.

Attachment 4 Certification of Type-approval For Amateur Radio Receiver Model.
(1)Model:

Frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. Manufacturer whose equipment does not conform to the original sample, DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-1 Certification of Type-approval For Class 1 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance

with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 5-2 Certification of Type-approval For External RF Power Amplifier of Class 1 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 1 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 6-1 Certification of Type-approval For Class 2 Amateur Radio Equipment Model.
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Manufacturers shall duplicate or permanently print such labels hereinbefore and affix labels in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification. . Manufacturer whose equipment does not conform to the original sample , DGT may revoke the certification.

3. Manufacturers shall print and affix labels with the statement "No amateur radio stations shall be established, owned or operated unless granted the amateur operator license class 2 and radio station license. Any violation of this regulation shall be punished in accordance with the Telecommunications Act." in a conspicuous manner on every outside of the packing.

Attachment 7-2 Certification of Type-approval For External RF Power Amplifier of Class 3 Amateur Radio Equipment Model
(1)Model:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Attachment 9 Certification of Type-approval For Individual Amateur Radio Equipment Model.

(1)Model:

Serial number:

Frequency:

Power of radio frequency:

(2) Manufacturer:

(3) Applicant:

(4) Examination Date: Year Month Date

(5)Pattern of certificate label:

Explanation:

1. Affix hereinbefore label in a conspicuous manner on every equipment.

2. If certain functions, design or outlook of the amateur radio stations are altered or changed after certification, the equipment with such alteration or changes shall be resubmitted to DGT for inspection and certification

A Cobra 25 or 29LTD can swing 20watts with a 10watt deadkey when done
properly...Bill at Jaguar electronics in Duncan,SC at the T/A should be able
to
help you achieve your goal

And yes I believe it means that when modified it has to meet the same
requirements of type certified ones.

First, we'll work on the spelling, then the grammar.

"there" should be "they're". A contraction of "they are".

Sentences end with a period. (.)

Thank you for:

- wrapping your lines
- quoting a small amount of relevant previous post
- posting under the stuff you just quoted
- making the stuff you just added able to be found within
the post without having to refer to the previous post

Thank you and happy holidays.

2.1033 Application for certification.
(a) An application for certification shall be filed on FCC Form 731 with all questions answered. Items that do not apply shall be so noted.

(b) Applications for equipment operating under Parts 11, 15 and 18 of the rules shall be accompanied by a technical report containing the following information:

(1) The full name and mailing address of the manufacturer of the device and the applicant for certification.

(2) FCC identifier.

(3) A copy of the installation and operating instructions to be furnished the user. A draft copy of the instructions may be submitted if the actual document is not available. The actual document shall be furnished to the FCC when it becomes available.

(4) A brief description of the circuit functions of the device along with a statement describing how the device operates. This statement should contain a description of the ground system and antenna, if any, used with the device.

(5) A block diagram showing the frequency of all oscillators in the device. The signal path and frequency shall be indicated at each block. The tuning range(s) and intermediate frequency(ies) shall be indicated at each block. A schematic diagram is also required for intentional radiators.

(6) A report of measurements showing compliance with the pertinent FCC technical requirements. This report shall identify the test procedure used (e.g., specify the FCC test procedure, or industry test procedure that was used), the date the measurements were made, the location where the measurements were made, and the device that was tested (model and serial number, if available). The report shall include sample calculations showing how the measurement results were converted for comparison with the technical requirements.

(7) A sufficient number of photographs to clearly show the exterior appearance, the construction, the component placement on the chassis, and the chassis assembly. The exterior views shall show the overall appearance, the antenna used with the device (if any), the controls available to the user, and the required identification label in sufficient detail so that the name and FCC identifier can be read. In lieu of a photograph of the label, a sample label (or facsimile thereof) may be submitted together with a sketch showing where this label will be placed on the equipment. Photographs shall be of size A4 (21 cm ´ 29.7 cm) or 8x10 inches (20.3 cm ´ 25.4 cm). Smaller photographs may be submitted provided they are sharp and clear, show the necessary detail, and are mounted on A4 (21 cm ´ 29.7 cm) or 8.5x11 inch (21.6 cm ´ 27.9 cm) paper. A sample label or facsimile together with the sketch showing the placement of this label shall be on the same size paper.

(8) If the equipment for which certification is being sought must be tested with peripheral or accessory devices connected or installed, a brief description of those peripherals or accessories. The peripheral or accessory devices shall be unmodified, commercially

available equipment.

(9) For equipment subject to the provisions of part 15 of this chapter, the application shall indicate if the equipment is being authorized pursuant to the transition provisions in § 15.37 of this chapter.

(10) Applications for the certification of direct sequence spread spectrum transmitters under part 15 shall be accompanied by an exhibit demonstrating compliance with the processing gain provisions of § 15.247(e) of this chapter. Applications for the certification of frequency hopping transmitters under part 15 shall be accompanied by an exhibit describing compliance of the associated receiver or receivers with § 15.247(a)(1) of this chapter.

(11) Applications for the certification of scanning receivers shall include a statement describing the methods used to comply with the design requirements of § 15.121(a) of this chapter or the marketing requirements of § 15.121(b) of this chapter.

(12) Applications for certification of transmitters operating within the 59.0-64.0 GHz band under part 15 of this chapter shall also be accompanied by an exhibit demonstrating compliance with the provisions of § 15.255 (g) and (i) of this chapter.

(c) Applications for equipment other than that operating under parts 15 and 18 of the rules shall be accompanied by a technical report containing the following information:

(1) The full name and mailing address of the manufacturer of the device and the applicant for certification.

(2) FCC identifier.

(3) A copy of the installation and operating instructions to be furnished the user. A draft copy of the instructions may be submitted if the actual document is not available. The actual document shall be furnished to the FCC when it becomes available.

(4) Type or types of emission.

(5) Frequency range.

(6) Range of operating power values or specific operating power levels, and description of any means provided for variation of operating power.

(7) Maximum power rating as defined in the applicable part(s) of the rules.

(8) The dc voltages applied to and dc currents into the several elements of the final radio frequency amplifying device for normal operation over the power range.

(9) Tune-up procedure over the power range, or at specific operating power levels.

(10) A schematic diagram and a description of all circuitry and devices provided for determining and stabilizing frequency, for suppression of spurious radiation, for limiting modulation, and for limiting power.

(11) A photograph or drawing of the equipment identification plate or label showing the information to be placed thereon.

(12) Photographs ($8^2 \prime 10^2$) of the equipment of sufficient clarity to reveal equipment construction and layout, including meters, if any, and labels for controls and meters and sufficient views of the internal construction to define component placement and chassis

assembly. Insofar as these requirements are met by photographs or drawings contained in instruction manuals supplied with the certification request, additional photographs are necessary only to complete the required showing.

(13) For equipment employing digital modulation techniques, a detailed description of the modulation system to be used, including the response characteristics (frequency, phase and amplitude) of any filters provided, and a description of the modulating wavetrain, shall be submitted for the maximum rated conditions under which the equipment will be operated.

(14) The data required by §§ 2.1046 through 2.1057, inclusive, measured in accordance with the procedures set out in § 2.1041.

(15) The application for certification of an external radio frequency power amplifier under part 97 of this chapter need not be accompanied by the data required by paragraph (b)(14) of this section. In lieu thereof, measurements shall be submitted to show compliance with the technical specifications in subpart C of part 97 of this chapter and such information as required by § 2.1060 of this part.

(16) An application for certification of an AM broadcast stereophonic exciter-generator intended for interfacing with existing certified, or formerly type accepted or notified transmitters must include measurements made on a complete stereophonic transmitter. The instruction book must include complete specifications and circuit requirements for interconnecting with existing transmitters. The instruction book must also provide a full description of the equipment and measurement procedures to monitor modulation and to verify that the combination of stereo exciter-generator and transmitter meet the emission limitations of § 73.44.

(17) A single application may be filed for a composite system that incorporates devices subject to certification under multiple rule parts, however, the appropriate fee must be included for each device. Separate applications must be filed if different FCC Identifiers will be used for each device.

[63 FR 36599, July 7, 1998, as amended at 63 FR 42278, Aug. 7, 1998]

EFFECTIVE DATE NOTE 1: At 63 FR 36599, July 7, 1998, § 2.1033 was revised, effective Oct. 5, 1998.

EFFECTIVE DATE NOTE 2: At 63 FR 42278, Aug. 7, 1998, § 2.1033 was amended by adding paragraphs (b) (12) and (13), effective in part Oct. 5, 1998.

§ 2.1035 [Reserved]

§ 2.1041 Measurement procedure.

The measurement procedures are specified in the rules governing the particular device for which certification is requested.

§ 2.1043 Changes in certificated equipment.

(a) Changes to the basic frequency determining and stabilizing circuitry (including clock or data rates), frequency multiplication stages, basic modulator circuit or maximum power or field strength ratings shall not be performed without application for and authorization of a new grant of certification. Variations in electrical or mechanical construction, other than these indicated items, are permitted provided the variations either do not affect the characteristics required to be reported to the Commission or the variations are made in

compliance with the other provisions of this section.

(b) Two classes of permissive changes may be made in certificated equipment without requiring a new application for and grant of certification. Neither class of change shall result in a change in identification.

(1) A Class I permissive change includes those modifications in the equipment which do not degrade the characteristics reported by the manufacturer and accepted by the Commission when certification is granted. No filing with the Commission is required for a Class I permissive change.

(2) A Class II permissive change includes those modifications which degrade the performance characteristics as reported to the Commission at the time of the initial certification. Such degraded performance must still meet the minimum requirements of the applicable rules. When a Class II permissive change is made by the grantee, the grantee shall supply the Commission with complete information and the results of tests of the characteristics affected by such change. The modified equipment shall not be marketed under the existing grant of certification prior to acknowledgement by the Commission that the change is acceptable.

(3) Except as specified below, permissive changes, as detailed above, shall be made only by the holder of the grant of certification. Changes by any party other than the grantee require a new application for and grant of certification.

(c) A grantee desiring to make a change other than a permissive change shall file an application on FCC Form 731 accompanied by the required fees. The grantee shall attach a description of the change(s) to be made and a statement indicating whether the change(s) will be made in all units (including previous production) or will be made only in those units produced after the change is authorized.

(d) A modification which results in a change in the identification of a device with or without change in circuitry requires a new application for, and grant of certification. If the changes affect the characteristics required to be reported, a complete application shall be filed. If the characteristics required to be reported are not changed the abbreviated procedure of § 2.933 may be used.

(e) Equipment that has been certificated or type accepted for use in the Amateur Radio Service pursuant to the requirements of part 97 of this chapter may be modified without regard to the conditions specified in paragraph (b) of this section, provided the following conditions are met:

(1) Any person performing such modifications on equipment used under part 97 of this chapter must possess a valid amateur radio operator license of the class required for the use of the equipment being modified.

(2) Modifications made pursuant to this paragraph are limited to equipment used at licensed amateur radio stations.

(3) Modifications specified or performed by equipment manufacturers or suppliers must be in accordance with the requirements set forth in paragraph (b) of this section.

(4) Modifications specified or performed by licensees in the Amateur Radio Service on equipment other than that at specific licensed amateur radio stations must be in accordance with the requirements set forth in paragraph (b) of this section.

(5) The station licensee shall be responsible for ensuring that modified equipment used at his station will comply with the applicable technical standards in part 97 of this chapter.

(f) For equipment other than that operating under parts 15 or 18, when a Class II permissive change is made by other than the grantee of certification, the information and data specified in paragraph (b)(2) of this section shall be supplied by the person making the change. The modified equipment shall not be operated under an authorization of the Commission prior to acknowledgement by the Commission that the change is acceptable.

(g) The interconnection of a certificated or formerly type accepted AM broadcast stereophonic exciter-generator with a certificated or formerly type accepted AM broadcast transmitter in accordance with the manufacturer's instructions and upon completion of measurements showing that the modified transmitter meets the emission limitation requirements of § 73.44 is defined as a Class I permissive change for compliance with this section.

(h) The interconnection of a multiplexing exciter with a certificated or formerly type accepted AM broadcast transmitter in accordance with the manufacturer's instructions without electrical or mechanical modification of the transmitter circuits and completion of equipment performance measurements showing the transmitter meets the minimum performance requirements applicable thereto is de-fined as a Class I permissive change for compliance with this section.

(i) The addition of TV broadcast sub-carrier generators to a certificated or formerly type accepted TV broadcast transmitter or the addition of FM broadcast subcarrier generators to a type accepted FM broadcast transmitter, provided the transmitter exciter is designed for subcarrier operation without mechanical or electrical alterations to the exciter or other transmitter circuits.

(j) The addition of TV broadcast stereophonic generators to a certificated or formerly type accepted TV broadcast transmitter or the addition of FM broadcast stereophonic generators to a certificated or formerly type accepted FM broadcast transmitter, provided the transmitter exciter is designed for stereophonic sound operation without mechanical or electrical alterations to the exciter or other transmitter circuits.

(k) The addition of subscription TV encoding equipment for which the FCC has granted advance approval under the provisions of § 2.1400 in subpart M and § 73.644(c) of part 73 to a certificated or formerly type accepted transmitter is considered a Class I permissive change.

(l) Notwithstanding the provisions of this section, broadcast licensees or permittees are permitted to modify certificated or formerly type accepted equipment pursuant to § 73.1690 of the FCC's rules.

I've got one machine here loading XP, another that had Klez 149 times,
and I just got that one on my network. Now to backup all the data and
nuke it (fdisk) and reload it win 98SE, then let windowsupdate fly.

XP had about 100MB of updates. I already had IE61 on a CD. (45 megs)

Only took about an hour on a P4 2.4GHz with a 533Mhz bus. Intel D845EBG2
motherboard. This thing is FAST. Whole thing under a grand.

As an aside, did you know that 95/98/ME won't work with video
cards if you have more then 512MB of RAM? NT/2K/XP will work.

Hi all, I have a Palomar 90A base linear for sale for $75.00 + shipping. It looks and works like a new one.

I also have a Courier Centurian 23 ch am/ssb base radio that looks and works like new for $50.00 + shipping, beautiful radio and has an awesome noise blanker and the selectivity is unbeatable.

Please email me if you are interested.

Thanks,
Doug W.

"Jim Hampton" <aa2qa@frontiernet.net> wrote in message
news:v03vq9m2aric40@corp.supernews.com...
And you think Twist is confused?

73 from Rochester, NY
Jim

Sorry Jim, I had dug thru many links it was late etc etc, I did cut and copy many things, he should be paying me to prove him wrong. Amateur Radios do indeed need to be type certified. unless it is homebrew

Section 302 of the Communications Act of 1934, as amended, authorizes the Commission to make reasonable regulations, consistent with the public interest, governing the interference potential of equipment which emits radio frequency energy. The purpose of this section is to ensure that radio transmitters and other electronic devices meet certain standards to control interference before they reach the market. The Commission carries out its responsibilities under Section 302 in two ways. First, the Commission establishes technical regulations for transmitters and other equipment to minimize their potential for causing interference to radio services. Second, the Commission administers an authorization program to ensure that equipment reaching the market complies with the technical requirements. The authorization program requires that equipment be tested either by the manufacturer or at a private test laboratory to ensure that it complies with the technical requirements. For a large number of devices, once the equipment has been tested and found to comply, it may be marketed without any approval from the Commission. However, for certain equipment which poses a greater risk of interference, the Commission requires the submission of an application which must be reviewed and approved before the equipment can be marketed. The Commission may request a sample of a device to confirm it complies with the applicable technical requirements, but that is only done in a very small number of cases.

III. DISCUSSION

Simplification of Existing Equipment Authorization Processes

5. There are currently five different equipment authorization procedures specified in Subpart J of Part 2 of the Commission's Rules. The following is a brief description of each procedure:

Type acceptance calls for the manufacturer or importer to submit a written application for review and approval by the Commission. The application must include a complete technical description of the product and a test report showing compliance

with the technical requirements. The type acceptance procedure has traditionally been applied to radio transmitters that are used in authorized radio services.

Certification is similar to type acceptance. The manufacturer or importer must submit a written application that includes a technical description of the product and a test report showing compliance with the Commission s technical standards. Certification has traditionally been used for low power, unlicensed consumer devices that operate under Parts 15 and 18 of the rules.

6. In order to reduce the complexity of having so many authorization procedures, we proposed to reduce the number to three, which we believe to be the minimum necessary for an effective program. Specifically, we proposed to eliminate the notification procedure, and
to combine the type acceptance procedure with certification. We proposed to retain the two self-authorization procedures, verification and declaration of conformity, although we requested comments on the possibility of combining them.

<snipped>

10. As we stated in the Notice, the current certification and type acceptance procedures are very similar, in that both require the filing of an application form and technical
report, and the filing procedure is the same for both. The primary difference is that certain
technical information filed with the application is different. In light of this, we believe that it is more efficient to combine them into a single category. We understand Motorola's concern about making changes to procedures which have been in existence for a long time. However, we note that Motorola has a thorough understanding of the current system, which other parties may not, due to the large number of filings it has made with the Commission.

As we have found in our dealings with the public, parties that are less familiar with the equipment authorization program frequently are confused by the multiple authorization procedures currently contained in the rules. Having a single procedure for equipment that must be authorized by the Commission will make the rules more understandable and thereby promote compliance. Moreover, we note that the term "certification" is generally used worldwide for a system requiring a third-party product approval. Accordingly, we are simplifying the rules by combining the type acceptance and certification procedures into a single procedure called "certification". We have implemented the suggestions of Rockwell to
clarify the rules.

<snipped>
V. ORDERING CLAUSES

43. Accordingly, IT IS ORDERED that Parts 0, 1, 2, 5, 15, 18, 21, 22, 24, 26, 73, 74, 78, 80, 87, 90, 95, 97 and 101 of the Commission's Rules and Regulations ARE AMENDED as specified in Appendix A effective 90 days after publication in the Federal Register. This action is taken pursuant to Sections 4(i), 301, 302, 303(e), 303(f), 303(r), 304
and 307 of the Communications Act of 1934, as amended, 47 U.S.C. Sections 154(i), 301, 302, 303(e), 303(f), 303(r), 304 and 307.

Another time where simple is better. One Wilson 1000 mag mount
in the center of the roof is good for about 100 watts.

Replace the AM power regulator. It's a transistor on the back wall of
the rig with a red, a yellow, and a black wire going from it to the
board on the right side (where the power cable comes in).

Common problem with the Grant and 148. It might also pay to go out to
Radio Shack and get a small heat sink, drill a small hole in it, and
mount it on the outside back of the radio using the same screw that
the AM power regulator mounts to the back with.. Heat sink this part,
and it will last MUCH longer.

DJ,
My first inclination is to try to talk you out of
using 'co-phased' antennas. But if you really want to
then here's how.
The antennas should be spaced about 9 feet appart, a
couple of inches one way or the other won't make much
difference. Each antenna should be tuned exactly alike,
and for the same frequency. You will beed a 'phasing'
harness of 75 ohm coax to connect the two antennas, and
enough 50 ohm coax to reach your radio.
You have two choices about the 'phasing' harness, you
can buy one, or make your own. That just depends on how
'handy' you are with a soldering iron, and PL-259s. If
you decide to make your own, then you will need about
15 feet of either RG-59 or RG-11 coax. That just
depends on how your antennas are fed, the RG-11 is the
big stuff, the RG-59 is the smaller sized coax, use which
ever will work with your antennas. Each 'phasing' line
needs to be 5'10" long, measured from the antenna to the
tip of the PL-259. After measuring, cutting, putting on the
PL-259 connectors for both 'phasing' lines, run them to
a 'T' connector. The third connection on the 'T' is where
the feed line to the radio connects. The coax to the radio
should be 50 ohm coax (what ever kind you prefer). That's
about it.
'Doc

* Hi,
You should know, than having a 100% modulation is much better,
than - if swing is 20W, the dead key MUST be 5W. There's
no need to hear from somebody "S9", but it's very useful
to be understood.

--
The "best" distance to have them apart isn't possible on your van. Matter of fact, co-phasing on the van will actually be a detriment to any performance and any attempted directional increase will be marginal at best. Rethink your antenna set-up.

Taken from Georges quoted post he claims governs Dave Hall's use of Davemades, Texas Stars, and a Galaxy radio:

"Second, the Commission administers an authorization program
to ensure that equipment reaching the market complies with the technical
requirements. The
authorization program requires that equipment be tested either by the
manufacturer or at a
private test laboratory to ensure that it complies with the technical
requirements. "

Hmmm...by the "manufacturer or a private test lab." Since N3CVJ is neither, it is safe to say he was indeed lying.

Let us continue:

"However, for certain equipment which
poses a greater risk of interference, the Commission requires the
submission of an application
which must be reviewed and approved before the equipment can be
marketed. The
Commission may request a sample of a device to confirm it complies with
the applicable
technical requirements, but that is only done in a very small number of
cases."

You claimed the amps can't be used in their current form but failed to say why. The above passage appears to blow your theory, and Hall's out of the water.
Also, according to subpart B in the last paragraph, it states, and I quote:

"transmitted bandwidth shall be within the operating frequency band by
an amount equal
to 50 percent of the bandwidth utilized for the tests."

Yesterday you quoted a line and claimed IT was correct concerning a "below 40 db mean power level" concerning transmitters AND ther sources of emissions and your quote in this post claims the same thing,,no distinguishing between trasmitter or amp..are they both correct as applying to radios or amps or one or not the other? But forget that for a sec,,concerning the above, N3CVJ claimed he was going to tell the group, if anyone inquired (which they did) the steps he took to make his Davemade equal to 50 percent of the bandwith utilized for tests. I have been informed he has claimed the impossible concerning his abilities and what he had to work with concerning the Davemade AND Texas Star. Thanks

for the heads up and for cementing his lies..next time, try not to try
so hard and he'll probably come away cleaner without your input.

Wa3moj tried a N3CVJ lie to anothe hammie with:
>Sorry Jim, I had dug thru many links it was >late etc etc,

(ROAR!I) Late had nothing to do with it.....you were scrambling and desperate and intentionally posted some bullshit that you obviously didn't read or did read and thought you and Hall's ignorance was widesread.

> did cut and copy many things, he should be >paying me to prove him wrong.

That's what I say about Hall and his Phelps, freebanding, dxing, amp using, breaking the law, lies, electronic abilities, and email addresses, to scratch nly the surface.

>Amateur Radios do indeed need to be

If nothing else you were taught the difference between type acceptance and certification which you obviousl didn't know yesterday (you know,because was ."late" (mmmmmphh.ahahha)! Can you now attempt to explain how he brought his amps in line with this spectral purity level that you admit is different from a radio but posted something from the FCC saying the exact opposite (that any DEVICE must be brought into line) without having it tested by an official lab? How about his comment concerning the "Phelps" or his admitted freebanding? OW AOUT YOUR comments saying these amps are illegal PERIOD...of course, you can always deny saying it so I can pen you up in the same hog stall as Hall merely by allowing your own words to cut your throat....hey..you guys really are two peas in a pod..and you live within repeater earshot of each other and you both display a vulgar inquiry into the personal lives of cb strangers and you both lie like rugs......quite an exclusive hammie clique you have there,,,no wonder N8WWM, Gililand, and Kc8LDO were made a part of your troll brigade. Dingleberries cling together.

Source record: 147297

The whole purpose of co-phasing is to achieve a 3db gain in two directions
while sacrificing side 2 side.
Co-phasing splits the available power between 2 antennas but gain can be
realized in 2 directions when and if the 1/4~ antennas are spaced a 1/4~
apart (9ft.)
Without the proper spacing the near-fields overlap and no gain is realized
therefore
a single antenna will outperform a poorly installed co-phase rig.
I would suggest u do your research on RF radiation patterns.

And like Hall, you managed to place yourself on both sides of an argument. You have made some whoppers concerning the legality of amps...some very interesting posts of you blaiting those who would use such amps..even went as far and said why would a real hammie use such *crap* when they can use a Henry or similar amp.
Anyways...you quoted....

"(d) A modification which results in a change in the identification of a device with or without change in circuitry requires a new application for, and grant of certification."

Well, YOU claimed he changed the bias, which in effect would indeed *change* the identification of the device,,,as you claim it would now be legal. He, or you, can post, anytime y'all feel like it, his new grant of certification that is precedent setting.

>If the changes affect the characteristics
>required to be reported,

Geee.....such as spurious emissions and harmonics?

>a complete application shall be filed.

Did he file it for the Davemade, Texas Star, or both?

It has been my experience that some on the CB band prefer to push the
components to the max. Reliability and long life are secondary
concerns as to max output. Their concerns for replaceing transistors
often is near nonexistant. They are more conceerned how far to thge
right the watt meter swings, not how long it will do it.

Sure it can be used legally by a ham in it's present form. You still
have failed to show anything that claims it cannot be used by an
authorized hammie.

>Type certification is all you need to ask about. >Go do some homework.

You're the one unable to distinguish. Hell, you even were chasing
rainbows form another land with your"ministry" report.
-
 Smoke and mirrors..the "mistry of Telecommunications" was a novel
approach...

>The FCC uses the same criteria when they >"type certify" radios for use
in the US.

Hahhaahahahahh!

>Remember the FCC isn't the only ones who >use the airwaves they all
fall under the ITU. In >fact the heading and title was exactly about
>what we talked about Amateur Radio >Technical Guidelines.

The requirements for radios are vastly different concerning exports
verses imports.

--
are you that desperate to post something from a foreign government and
try to
come across as if it applies somehow?

>actually I had so many links and I did >accidently include that one,
but the point >remains the FCC type certidfies radios the >exact same
way.

Information rate? We were talking of Dave Hall's claim that his amps
were legal for him to use.

>NO we were not, you have been arguing with >me about Galaxy radios and
there use by >hams for weeks,

Not true. You inserted yourself into the lies Hall was being called on
and attempted to defend him by saying his amps were legal for him to
use..

>it is you who keeps attempting to bring DAVE >HALLS NAME UP at every
attempt.

Actually, it is you that is trying with every ounce of energy to get me to drop the focus on Hall but it ain't gonna happen as long as you keep crying or util he answers for several of his claims...most specifically why he feels he has the right to act like a dick to others for doing the same thing he does...oh yea,why he lied concerning the cb bust would be acceptable also..and maybe an explanation of just *why* he lies so much. I mean, I know, and you know he is pathological, but the explanations from him are so much more entertaining and incongruous.

>I hope you got him a nice christmas present,

You had a big hand in it,,,and I thank you.

>he sounds like he has you by the balls.

And we al know where this conversation is going once you begin to show your lack of control and that sparkling class you were brought up with.....

--
You failed to show the "spectral purity" "scale" or rules or whatever you claim
exists that allows him to operate
his Texas Star and Davemades The Galaxy was an additional statement, one that
you are still incorrect about.

>No in fact it is the exact opposite, I have been >telling you for weeks about the Galaxy, you >keep attempting to bring DAVE HALL into the >equation

No. You keep trying to take him out of it.

> I told you before I don't want to talk about >DAVE HALL

Then take your personal problems to email, then, as Davey-boys claims was and is the topic. He has too many self-contradicting posts and claims to answer for..

> In fact did I not say I will not engage you if >you bring his name up again.

You shouldn't have engaged me in the first place,,the topic didn't concern you.

>Well sorry must hold my ground when you >care to debate the true facts anout Galaxy >Radios and NOT DAVE HALL.

The Galaxy item was a byproduct of the original text and not the main concern.
You remain fixated on it and it only.
I prefer to concentrate on any of the dozens of lies Hall arrogantly tries to pass off on this group. Unlike him, I care not WHY he does it...this is a cb group, not his or yours personal mental health therapy group.

>Post without mentioning his name and we can >continue.

C'ya. Now maybe N3CVJ can come back and post under his real call without claiming he had to go away for a while. <g>..and maybe even provide some relief for himself by getting over himself and moving on from his lies, or he can continue to harbor a personal agenda like I claimed he does, and has. I feel this is perfectly illustrated by the analogy that a leopard doesn't change it's spots...see, he can simply move on from his mistakes like a man, or he can wallow and hurl attacks and off-topic hypocritical ad-hominem attacks like he has superbly demonstrated.

>This is the info you asked for FCC >requirements for Radios

Again, it doesn't say anything at all about a Galaxy. Are you merely implying that a Galaxy out of the box emits spurious emissions that violate the "40db below mean power" you wrote?

>It does not have to a galaxy isnt type certified.

We were talking about a Galaxy in addition to his amps. You avoided the question. Are you claiming a Galaxy out of the box emits spurious emissions that violate the "40 db below mean power" you quoted?

>It doesnt mention any names of radio did you >notice that?

Yea,,matter of fact, I even pointed it out to you.

>I am implying it may violate the 40db below >mean power, here is the crux of it all.....

Now you're saying it "may"?
Well, doesnt that allude to exactly what I am saying? If it doesn't violate it right out of the box (which it very well doesn't...c'mon, man, I thought you had the knowledge concerning radio to put me to shame, baba.....apparently you know not what you espouse) then it is perfectly acceptable and legal for an authorized hammie to use it. BWTTHHHHHTTTTTTTT! <g>

> That is why radios are type certified to find >out if they meet the FCC spec's for them to be >offered for sale, the manufacturer send the >FCC Lab the radio to be analyzed if it meets >spec then all of that current model can be >offered for sale. The point is the galaxy radio >or none of the current export radios have done >this that means they are not type certified,

This much we agree on.

>why do you think the FCC does not allow them >to be sold?

Poor policy, just like every other beauracratic decision they make..

> I mean really Twsity you are trying to argue >something that should be common sense.

Sort of like Hall and his freebanding comments.......
--

YOU were the one that lumped them together.
Show the info needed to
allow N3cvj'S claim to be accurate allowing him to use the amps,,,

>BBBBBZZZZZZZZZ there is the buzzword >again DAVE HALL....
>STOP TRYING TO CHANGE THE TOPIC.

George, the topic was me bouncing Dave Hall off the wall concerning his lies when you inserted yourself into this thread and messed him up even more with our incoherent babbling about foreign radio policy.
****
>Right there is an outright lie I started this
thread

Umm..no, you didn't..you merely changed the title of the subject.

> , so it was you who inserted yourself. I also >posted info right from FCC, in my haste to >post info I did post some other amateur

Your certainly did...just like I claimed yesterday.."in your haste".

>Yet all follow the same guidelines whether you >like it or not.

It's not me that has a problem with rules or guidelines or even abiding by them..it's N3CVJ, and you, from what I am hearing recently. More to come on this as the world turns.....

>This was IN regard to >RADIOS/TRANSMITTERS

-
Acyually, it was about N3CVJ's lies when you inserted yourself and I allowed you to fondloff topic for awhile.

>Never was about DAVE HALL, I started this >thread It is you who inserted your opinion >whcih is allways DAVE HALL

No, I started the thread, you changed the title and topic.

>Nothing that you have said the issue was me >starting this thread and you attempting to >"TWISTEDHED" it to your topic DAVE HALL
>legal status of the Galaxy and N3CVj's use of >a Texas Star and Davemade

Not true. You inserted yourself telling me it was legal for Hall to run his Davemade and Texas Star.

>Funny you bring up the texas star, it is a cw >transmitter, when modified it is allowed to be >used by a ham, he may modify 1 non type >certified amp per year, the texas star is a non >type certified amp.
-
But the point has been lost on you intentionally. Fortunately, the group is not subject to the arrogance you two attempt. His claims concerning his amps, freebanding, Phelps, cb arrests, don't jive with his other self-contradictions and claims. The exact nature of his illegalities are irrelevant, despite your love for him and attempts to circumvent the

light being cast upon his swill.

--
Above that it refers to transmitters and in (d), it says nothing of the sort concerning
bringing an amplifier somewhere so it can be "aligned".

>No one said you have to take a linear >anywhere to get "aligned" the >above is about non- certified radios like the >GALAXY...

This is where you trip all the time. Hammie radios need not be certified.

>Homebrew radios don't have to be type >certified unless you plan on selling them, >Manufactured radios do indeed have to be >type certified to be used by a ham in the usa.

Ok, now that you appear to have made a slight distinction between type acceptance and the play and interchangeability you frequented with the words "type certified" we appear to be reaching somewhat of an agreement on what constitutes the definition of each.

>A ham cannot use a amateur radio made for >japanese hams they are not legal for use in >the usa, they have different specs and freqs.

Which absolutely voids your pathetic defense and contradicts your earlier claim concerning the "ministry" page you posted and claimed carries the exact same legalities and standards applied here.

--
>A Ham can align it himself if he has the know >how. It just has to meet >the requirements

Which are what, concerning this "spectral purity" you keep as a hymn.

>You know what they are remember the >paragraph from Part 97 about the 40 db down, >oh you forgot I posted them, your only concern >is trying to malign DAVE HAL:L

Not at all. Dave Hall attacked me for no reason other than he has a problem debating those who hold opposing views. Any attempts at maliciousness came from his unfounded claims, offtopic ad-hominem attacks. While it may be true what I post maligns N3CVJ, himself is to blame, for they are all re-posts
of his own words and claims. I asked him several times to take his personal problem to email and he refused and chose to continue with off topic personal attacks. Pointing out his own posts damage his credibility much more than anything I, or you , could possibly conjure.

>I have never said they have to take the radio >or amp anywhere you are >putting words in my mouth again. BTW STOP >CHANGING THE TOPIC .GET DAVE HALL >OF YOUR
>MIND!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Dave Hall IS the topic, despite you demanding otherwise and balling up your fists and holding your breath ....

>I started the thread

No..you "changed" it when I allowed. Again, you came into it when I said it was illegal for Hall to use his amps.

>he was not the topic no where near it, so >every time I see DAVE HALL come from your >TV Screen, FUck you and take your dave hall >blow up doll with you.

Exactly what one has come to expect from you when you are not permitted to control the conversation.

--
Just to make certain, I read it a third time and still failed to see where it confirms N3CVJ's

>Go fuck yourself and take your dave hall blow >up doll with you

One day, several sexual innuendos to me and others, and talk of filth form you when you are refused things your way.

-
ODave never had a Phelps, just another lie shown,,and he WAS the topic, George.

>Go fuck yourself and take your dave hall blow >up doll with you

Your superb communication skills that you have managed to hone all these years serve you well.
-
The only thing "everyone knows", is that you don't know a quarter of what you
claim.

>I will give you 3 100% guarantees, you are a >asshole,

Naturally. Anyone who doesn't allow you or Hall or Nad or N8 or any of you lowlives to control things is a natural target from what you aughingly refer to as an "organisation (SIC)."

>You will mention dave Halls anme about 200 >more times, You have not be able to prove me >wrong, I have posted info from FCC page you >turn it into a DAVE HALL athon, Twsity, JUST >BECAUSE YOU SAY IT DOESN"T MAKE IT >SO...

Ditto, George.

>You have not proven anything except you are >in love with DAVE HALL...

Then you must be in love with Landshark.
But you are correct, I have proven nothing concerning N3CVJ. N3CVJ proved N3CVJ is a liar.

Source record: 147321

I have a Uniden 520XL, and after about a month of operation (where I frequently had the speaker turned up to max volume in my noisy Jeep), the speaker will work for about 20 minutes, then lose all volume. When I turn off the CB for an hour or so, it will work again for a little while. Any advice?

Also, when I run the line-out signal from the Uniden to my car stereo (it has a line-in on the front), everything sounds great, but when I transmit, I get an enormous amount of screeching feedback. Does this happen when you connect an unamplified speaker to the line-out?

Thanks for any assistance.

There lies the problem with good shops trying to make a living. They spend
the money on the equipment to do the work right. Then you have the shops
that buy the equipment, use it for twenty years and never calibrate.

Oh and then you have the shops that have to tune meters they sell to match
what theirs say. What's up with that. Go figure.
Although, we have found being honest is the best policy, these hack and pack
shops that are still in business (what's up with that) never cease to amaze.

That's like selling a pretuned cb antenna. Mull all that over for a while.
Really sets me on edge sometimes.

Tried to e-mail you, Here is my input.

You probably have a bad solder joint in the radio. It is usually under the
mirror board on these radio's.

The solder problem is very common on these smaller radio's. Especially if
you are using this in an off road vehicle. All radio's will eventually
shake apart this way. Some do it a little faster than others.

> What is your proof of that Tom?

It's not an accusation, it's an observation.

Who has the pattern of behavior? Who exhibits it? We all know who
farted... Come on... I wasn't going to point the finger, and I'm not going
to pull the finger of the person who pointed neither.

I can't believe that these fascist knuckle headed scare tactic fear mongers
have nothing better to do now than scare people out of their own equipment.

Since I was last seriously into this newsgroup this country has been through
a lot. Heck, in my neck of the woods they nabbed 6 Al Qaeda alone.

I simply cannot believe that after all we have been though, and what we are
about to go through that they would still take time out of their lives to
further put fear into the minds of us Americans.

To the original poster of this thread: While you got your head buried in
the sand, why don't you take some time and think about where your ass is at?

My Advice: Find something more constructive to do with your time. Go to
the mall, go see a movie, rent a pay per view. Go christmass shopping! Put
together a puzzle! Anything...

You know, if he'd follow his own logic he'd probably have to junk his own
car!!!! lol

I'll tell ya, people never cease to amaze me. The stupid ones especially.
I've seen some whoppers in my time, but to think that one of my own
countrymen would subscribe to the very premise that our own government would
make people's own personal property contra-band is just absolutely
astounding. Especially when the most physical harm that the consumer
product could possibly do would be to stub a toe when dropped from a
significant height.

I mean wow... He took the effort to post, so he must actually believe that
WE THE PEOPLE would EVER let that sort of thing happen.

For fun, let's just suppose for a moment that something like that could
actually happen in this fine and upstanding nation. But let's say that
instead of a Radio Activist it was an Animal Rights Activist that succeeded

in lobbying for the contra-ban of leather products.

What would happen?????

1.) Everyone would have to get a new wallet or purse. But that's kind of hard when the sign on the door says no shirt, no shoes, no service and it's only lil ole you in your tube socks for fear of being arrested wearing your timberlands or Nikes.

2.) The German-Americans want to make sure their cultural heritage isn't affected, would want a variance covering their lederhosen pants because it infringes on (my heritage as well) cultural heritage. It takes months to tune up a good pair of lederhosen, and lots of sauer kraut & beans too! You can't get the same tone out of Vinyl. The low notes just don't have the impact desired.

3.) Tandy (parent company of Radio Shack) shreds all documents that ever suggested that it ever sold any leather products. This in turn gets the SEC involved in an investigation brought on by the fascist janitor who notices extra shreddings in the trash from the accounting department. This immediately causes massive green peace protests in front of various Radios Shacks. When the CEO of Radio Shack was questioned about the protests he replied, "I do not have an answer."

4.) Bikers across the nation..... It gets more and more rediculous...

BUT THANKS TO THE WISDOM OF THIS NATIONS FOUNDING FATHERS!

We have the grandfather clause... Which insures that something as rediculous as the above cannot happen.

What's really scary though is that some people (original author fingered) seem to think that the government controls the citizens. I would bet that he probably doesn't know the difference between a civilian and a citizen. And if asked would probably call himself a civillian.

China has Civillians.
Iraq has Civillians

The U.S. has Citizens. Why?? Because each and every single one of us is guaranteed those rights. Interesting observation though... Very few people educated in public schools seem to know or understand what those rights are. What's even worse is that the vast majority of those that don't know what their rights are actually consider themselves smart enough to vote! AND!! Of those I would bet most consider it more of a popularity contest than a decision.

Can't we have Civillians in the U.S. ??

Yes... Civillians in the U.S. are from another nationality. A Canadian within the borders of the U.S. is a Civillian. All U.S. Citizens are ALSO civillians. But one would not refer to a Luxury Cadillac as a mere "car". A Hyundai hatchback is a car, but I'd rather have a" luxury vehicle" any day

of the week.

Al Qaeda are not Civillians because they are millitary AND if within the United States are considered behind enemy lines. They are in most cases not U.S. Citizens and since they are military are covered by military law. Not the U.S. Constitution. Which means that if they don't succeed in killing their own hopeless miserable lives we give them a fair trial, then shoot em. ;-)

Al Qaeda that are U.S. Citizens is still a grey area, however I have a feeling that the distinction would boil down to an individual basis. IE, were they Al Qaeda before or after becoming a U.S. Citizen? Before? They are spy... After, they are McVeigh.

If U.S. Citizen before Al Qaeda are they traitors?
No. Why? Because they were not a commisioned officer in any branch of the U.S. Military. When one becomes a commisioned officer in the United States armed forces (rank above sergeant) one swears an oath to the President of the United States, to carry out those orders faithfully. The crime of traitor is generally reserved for commisioned officers in the U.S. Armed Forces and do not apply to civillians. If Al Qaeda and in the U.S. Military but not commisioned, they are again spy. If commisioned they are Traitor.

Are non-commisioned military personnel Civillians?
Obviously not. When one becomes a member of the U.S. Armed forces ones own self becomes G.O.P. (Government Owned Property), and yes... Technically a sodier can be charged on the grounds of destruction of government property after getting a tattoo on their own person that has not been approved by their commanding officer.

Then aren't soldiers slaves?
No. They are paid a wage, and they volunteer unless drafted which is another matter entirely.

Another thing I think that needs to be clarified while I'm at it...

MILITIA: Who can give me an example of one? And I don't mean the Army National Guard. It is a branch of the military and cannot be regarded as Militia.

Here is a prime example folks... Very recent history too! Remember the passengers on board that airliner that crashed in Pennsylvania 9/11? Those very people who ASEEMBLED and took the matter into their own hands on board that very plane are the very definition of Militia. If you think the national guard is the militia you're severly mistaken. If the militia on board that plane did accomplish securing their own lives I would find it hard pressed to find some half cocked attorney to charge them with assault. If you did find one I guarantee their law degree is from harvard.

Quote of the day: "The truth is easy to spot... It doesn't smell like bullshit!"

Hi Brian (and the group),

A variable capacitor can be made by reverse bias voltage across a diode. As you vary the voltage,
the capacitance changes.
You can see them in many vfo circuits, nowadays varicap diodes are common place.

Super Diode is a slang CB world description for a diode with much larger capacitance range over
a similar (to "normal") varicap diode. The thought would be to replace a standard range varicap diode in your ssb radio clarifier circuit with the Super Diode.

The range of an example clarifier would extend from the original few kc's (KHz) of operation up to some much larger value like plus or minus 15 KHz. You would be able to move into the next frequency "channel" or "hole slot". For the most part, only receive operation is changed with the clarifier, but mods are often done which tie both the transmit and receive functions to the clarifier knob.

The M-65 is just a varicap diode with a large range...

hope that helps
cheers
skipp

4692. Increaased Output From CB Radio

Newsgroup: rec.radio.cb
Date: 2002-12-20 21:01:30 UTC
From: johnnycat89@hotmail.com
Message-ID: <6116-3E03852A-5@storefull-2337.public.lawson.webtv.net>
Source record: 147328

I recently posted saying I was looking to increase the output of a CB radio. I wasn't clear enough in my intent. I did /do not want to modify the radio itself. I meant to say I wanted to find an add on or supplementary amplifier to increase the modest 5 watt output of the CB radio by just a small amount (maybe an extra 25 watts or so) without modifieng the radio. I don't know if this is something a linear amp could do. I do not know much about these matters but does a linear amp connect in the antenna wire between the radio and the antenna. Also what range of powers do the linear amps come in and are they adjustable. I currently have a Radio Shack sideband radio and am wondering if there is a particular brand or model of radio that is best suited to this modification. Thank you very much. Pleaase e-mail me directly if possible.

JC,
Sounds like you're looking for an amplifier. There
are gobs of different brands and types ranging from
just a few watts output to totally ridiculous amounts,
just depends on how much you want to spend. Most 'CB'
amplifiers are 'hot keyed' meaning there's no connection
between radio and amplifier other than the feed line.
'Doc

Moparholic,
If you've never done any soldering on the 'million' leg chips, you might want to practice on something before you do it for real. You WILL need a low power iron, a 'solder-sucker', and the usual tools for 'small' soldering. An alternative to un-soldering a multi-leg chip is to clip the 'legs' near the chip, remove chip, unsolder legs carefully. Do NOT drink a gallon of coffee before you start! You're gonna need steady hands.
'Doc

PS - Put in a socket instead of soldering the chip to the board...

Mo,

Are those full component legs, or hybrid surface mounts? I used to do a ton of soldering in my bench days, but that was about 8 years ago. In addition to Doc, I always found it helpful to put on a bit of fresh solder before user the sucker.

And thanks for reminding me. I need a new solder sucker, because my old one doesn't suck anymore, and that sucks.

BTW, I bought some new gear. email me and I will tell you about it.

Vinnie S.

Message-ID: <XLQM9.30711$NV.592810@news.direcpc.com>
Source record: 147343

This evening on channel 19 in Richmond, Virginia (VA),
at about 5:15 / 1715 Hrs Est / 2215 UTC,
A "good-buddy" opened up his mouth and the naughty words started pouring out.
That was fine and dandy. A bunch of us truckers are gonna go to this "subject's" place of living and blindfold and sedate the muthafucka with A 40oz MALT LIQUOR!!
"We'll sew his asshole closed and keep feedin' him and feedin' him and feedin' him !!!" (WU-TANG CLAN)

Ya see, He/She/It was using these words to snare him/her another "good-buddy" but he/she/it was not as smart, as he/she/it was playin' wit his/her/it's own self.
Anyway I gave out a hotline phone number for him/her/it to call. It ain't much, but it'll keep him/her/it busy for a long while.
Next, some very nice folks will come to pick him/her/it up in a secret location with and will soon be on the way to, beautiful "CENTRAL STATE" in Petersburg, Virginia.

They'll give their "new resident" a make believe CB radio so that "new adventures" can be created without someone else ever hearing it. The "good-buddy" will be drugged so much, that no difference will be noticed that the CB ain't real.
It'll have realistic lights and CB sounds that will keep "Good-Buddy" entertained FOR LIFE!!!!!!!

equipment.

No one is proposing that people be deprived of the use of CB Radio! What is
happening is
that those radios that have already been determined NOT to meet the FCC's
technical specs
are allowing an ever bolder group of people to operate on frequencies for
which a license is
required.

>

>
> I simply cannot believe that after all we have been though, and what we
are
> about to go through that they would still take time out of their lives to
> further put fear into the minds of us Americans.

It is not to put fear into people's minds. What you conveniently forget is
that those people
who received authorization to use those bands are being interfered with by
unlicensed persons.
Those people have "rights", too. They have every reason to expect that
their turf will be protected
just as much as CBers have the right to use channel 1 thru 40.
>

>
> I'll tell ya, people never cease to amaze me. The stupid ones especially.
> I've seen some whoppers in my time, but to think that one of my own
> countrymen would subscribe to the very premise that our own government
would
> make people's own personal property contra-band is just absolutely
> astounding.

Property that is not legal to import to begin with, and wouldn't even cause
a raised brow
IF they were being used on the regular 40. But that property is being used
in the commission of
an illegal act; that being operation on frequencies for which the users have
no license.

Especially when the most physical harm that the consumer
> product could possibly do would be to stub a toe when dropped from a
> significant height.

See above that OTHER people have a reasonable expectation of protection from
intrusions
on their frequencies from unlicensed bandit operators.

>
> I mean wow... He took the effort to post, so he must actually believe
that
> WE THE PEOPLE would EVER let that sort of thing happen.

Continue to believe that nothing can or will be done about the use of those
Galaxy and
Connex radios on the ham bands without license. There are efforts and
discussions about
how to combat this at this time, and you can expect to see *some* publicity
about this sometime
this year. There are several hams that are in Congress, at least one of
which is on the powerful
Committee on Communications. I know for a fact that that ham is aware of
this problem. Sure, there are other more pressing things going on, but they
WILL get around to this---just like they
did with the PL106-521.

>
> For fun, let's just suppose for a moment that something like that could
> actually happen in this fine and upstanding nation. But let's say that
> instead of a Radio Activist it was an Animal Rights Activist that
succeeded
> in lobbying for the contra-ban of leather products.

Rights have (read slowly) N O T H I N G to do with the use of a radio. In
this country, the
government (Congress) has sole control of the airwaves and may allow or deny
the use of same
as it sees fit. So the fact remains that certain radios do NOT meet the
government's technical requirements for use on CB, nor are they to be
imported. Again, if the bandit operators hadn't
strayed onto 10 and 12 Meters, you wouldn't even be hearing about this.
THEY are the ones to
blame for any negative results that Congress may impose.

>

>
> BUT THANKS TO THE WISDOM OF THIS NATIONS FOUNDING FATHERS!
>
> We have the grandfather clause... Which insures that something as
> rediculous as the above cannot happen.

There is NO grandfather clause (this a patently stupid premise) governing a product that is
banned from import into the US.
>
> What's really scary though is that some people (original author fingered)
> seem to think that the government controls the citizens. I would bet that
> he probably doesn't know the difference between a civilian and a citizen.
> And if asked would probably call himself a civillian.

Exactly, BUT our government seeks to treat ALL fairly under the existing law. In your defense of
one group (those who import, sell, and use those Galaxys, etc), you fail to take into account the
protection given to those affected by illegal operators. Once again, none of us have a "right" to use
a radio; it is a privilege granted by the government that they can also deny.
>
>
> The U.S. has Citizens. Why?? Because each and every single one of us is

"Hollingsworth said FCC rules permit an individual amateur to construct
or modify a non-certificated RF power amplifier once per calendar year"
Dave Hall may construct a non type certified amp or he may modified a
non type certified amp(such as his Dave made).

>The key word is he may use a modified one.

But what about the posts where he, AND you in the past, have said these
amps are not legitimate (YOU) or legal (HALL).

They are not legitimate, why do you think they are? The amp must be made to
perform just like the type accepted ones afetr he mods it.

Appears you also share
the selective application of the law that Hall has demonstrated he holds
himself above.

>And yes I believe it means that when modified >it has to meet the same
requirements of type >certified ones.

You still can't tell the difference between "type acceptance" and
"certificated." *You* posted the definitions yet erroneously refer to
them as the same thing.

They are the same exact thing, you have poor comprehension skills I already have
proven the FCC has said they are the exact same thing. Just because you don't
understand it doesn't mean it is not true.

There is nothing to reason about The Facts, Mopar the FCC has said it not me, it is a shame twistys can't understand it.

> *change* the identification of the device,,,

Twisty this statement just shows how far in left field you really are in relation to this subject, read the FCC quote, It pertains to a type certified amp, not a amp like a davemade that is not type certified it has no "identification", PLEASE read it carefully and try to understand what you read, if you will notice it says it will require a new application for a grant of certification, well the davemade never had been certified from day 1, so Dave Hall as a ham is allowed to modify (1) non type accepted amp (which the davemade is, per year), and yes he must make it meet the FCC requirements, the same scenario as the galaxy radio, Dave doesn't have to take it to any shops, labs, hack shops, FCC he can do this himself. I did claim for starters he probably at the least changed the bias to make the amp cleaneryou need to ask him what he did I can only assume since I am not dave

> He, or you, can post, anytime y'all feel like it, his new grant of
certification that is precedent setting.

He doesn't get or need a grant of certification, that is only for units that are to be sold to other hams.

> >If the changes affect the characteristics

He doesn't have to file for anything get over it , he is not going for a grant of certification something that you say doesnt exist anyhow. If you can't understand what you read get a new hobby, I just for the life of figure out why you a cber is concerned with what a ham can use. Oh btw did he file for what? grant of certification?

Sure it can be used legally by a ham in it's present form. You still
have failed to show anything that claims it cannot be used by an
authorized hammie.

>Type certification is all you need to ask about. >Go do some homework.

>Not true. You inserted yourself into the lies Hall was being called on
>and attempted to defend him by saying his amps were legal for him to
>use..

Twisty, I will repost you repeated asking me about Dave Hall and his amps, you
are the one who has tried and tried to shift focus

>it is you who keeps attempting to bring DAVE >HALLS NAME UP at every
attempt.

>Actually, it is you that is trying with every ounce of energy to get me
>to drop the focus on Hall

Yes you are obsessed with him and I am not your sounding board regarding him. I
don't speak for him either, so what I have to say is irrelevant regarding your
relationship with him. I know what you are doing you are trying to draw him out
by mentioning his name in every sentence you type.

> but it ain't gonna happen as long as you keep crying or util he answers for
several of his claims...
>most specifically why he feels he has the right to act like a dick to others
for doing the same thing he does...

Ask Dave Hall not me.

>oh yea,why he lied concerning the cb bust would be acceptable also..

ask dave hall not me

>and maybe an explanation of just *why* he lies so much.

ask Dave hall not me

>I mean, I know, and you know he is pathological, but the explanations
>from him are so much more entertaining and incongruous.

Then why are you bringing up in regards to me, direct your post to him and stay
the on topic of which we speak. You are trying to cloud the real facts with

your sideshow. Stick to debating the topic and facts, I have yet to see you post anything negating that the FCC does not type certify radios yet i have shown to you the most certainly do. Dave hall has nothing to do with that topic, type certification of amateur radios see if you can stay on that topic with out adding your sideshow.

>I hope you got him a nice christmas present,

You had a big hand in it,,,and I thank you.

>he sounds like he has you by the balls.

And we al know where this conversation is going once you begin to show your lack of control and that sparkling class you were brought up with.....

I heard you also have alot of class, shame all of it is low.

> I told you before I don't want to talk about >DAVE HALL

>Then take your personal problems to email, then, as Davey-boys claims
>was and is the topic. He has too many self-contradicting posts and
>claims to answer for..

You ignorant moron, you have the personal problem with Dave Hall, you should take it to email and stick to debating the facts which you are far removed from. Amateur radios require type certification, the galaxy is not type certified. That was the topivc i started the thread not you

>You shouldn't have engaged me in the first place,,the topic didn't concern you.

I started this thread how could it not concern me.

>.You remain fixated on it and it only.

That is you regarding dave hall

>I prefer to concentrate on any of the dozens of lies Hall arrogantly tries to pass off on this group.

Yes I see you do and you take the thread completly of its topic because you have a mental problem with a gy named dave Hall
thank the good lord dave live in pa if he loived in the pile I would fear for his safety you sound borderline insane in regards to him.

>C'ya. Now maybe N3CVJ can come back and post under his real call without
>claiming he had to go away for a while. <g>..and maybe even provide some
>relief for himself by getting over himself and moving on from his lies,
>or he can continue to harbor a personal agenda like I claimed he does,
>and has. I feel this is perfectly illustrated by the analogy that a
>leopard doesn't change it's spots...see, he can simply move on from his
>mistakes like a man, or he can wallow and hurl attacks and off-topic
>hypocritical ad-hominem attacks like he has superbly demonstrated.

Please twisty, leave it alone man at least when we are debating something I don't want to hear dave halls name brought up, it would be the same with me telling you how many lies landshark has been caught in every post and just about every sentence, you see it gets old.

>It does not have to a galaxy isnt type certified.

We were talking about a Galaxy in addition to his amps. You avoided the question. Are you claiming a Galaxy out of the box emits spurious emissions that violate the "40 db below mean power" you quoted?

I told you i don't know if it does or not, they haven't sent it to the FCC lab for certification to find out. If it passes then they can sell all the galaxys they want to.

>It doesnt mention any names of radio did you >notice that?

Yea,,matter of fact, I even pointed it out to you.

so then why did you ask the question if you saw it ?

>>I am implying it may violate the 40db below >mean power, here is the crux of it all.....

Now you're saying it "may"?

Yes It may i haven't tested it, if galaxy thought it would pass then they can send it in for type certification, if it passes they can sell that particular model. Why haven't they sent it in for certification?

Well, doesnt that allude to exactly what I am saying? If it doesn't violate it right out of the box (which it very well doesn't...c'mon, man, I thought you had the knowledge concerning radio to put me to shame, baba.....apparently you know not what you espouse) then it is perfectly acceptable and legal for an authorized hammie to use it.

How can you say it doesn't violate it out of the box any more than I can, if it was able to be type certified why is it not? Why haven't they sent it to the FCC for type certification. Why don't the real Ham radio stores sell them? You always want to ask the questions yet you provide nothing but your opinion and no facts just opinions, I have proven and posted the FCC radio requirements re: type certification you got off that subject real quick never brougth it up again did ya, to worried about changing it to dave hall.

BWTTHHHHHTTTTTTTT! <g>

> That is why radios are type certified to find >out if they meet the FCC spec's for them to be >offered for sale, the manufacturer send the >FCC Lab the radio to be analyzed if it meets >spec then all of that current model can be >offered for sale. The point is the galaxy radio >or none of the current export radios have done >this that means they are not type certified,

>This much we agree on.

>why do you think the FCC does not allow them >to be sold?

Poor policy, just like every other beauracratic decision they make..

That is an opinion and no facts they are not sold because they are not type certified, plain and simple, they will not allow equipment that produces that many watts go on the air with out meeting thier requiremnts.

--
YOU were the one that lumped them together.
Show the info needed to
allow N3cvj'S claim to be accurate allowing him to use the amps,,,

>BBBBBZZZZZZZZZ there is the buzzword >again DAVE HALL....
>STOP TRYING TO CHANGE THE TOPIC.

George, the topic was me bouncing Dave Hall off the wall concerning his lies when you inserted yourself into this thread and messed him up even more with our incoherent babbling about foreign radio policy.
****
>Right there is an outright lie I started this
thread

Umm..no, you didn't..you merely changed the title of the subject.

Bullshit! there is 25 posts in that thread and I made the first one and another 12 out of the 25 you have been chasing me ever since
talking about dave hall.

>It's not me that has a problem with rules or guidelines or even abiding
>by them..it's N3CVJ, and you, from what I am hearing recently. More to
>come on this as the world turns.....

You know nothing of my operating habits, I see your up to yur silly games.

>This was IN regard to >RADIOS/TRANSMITTERS

-
Acyually, it was about N3CVJ's lies when you inserted yourself and I allowed you to fondloff topic for awhile.

>Never was about DAVE HALL, I started this >thread It is you who
inserted your opinion >whcih is allways DAVE HALL

No, I started the thread, you changed the title and topic.

Listen to what you are saying, are you on drugs? Honestly? You started the thread Hear ya go Twisty?

You say I changed the title and topic, I sure did I created a new post and title and posted it ? lol wouldn't that be a new thread? are you really that brain dead?

>Not true. You inserted yourself telling me it was legal for Hall to run
>his Davemade and Texas Star.

Exactly if certain conditions are met he most certainly can you for some reason disagree when the FCC clearly states he can modify (1) non type certified amp per year, so that means he can modify it to fit the FCCs requirements for use.

>Funny you bring up the texas star, it is a cw >transmitter, when
modified it is allowed to be >used by a ham, he may modify 1 non type
>certified amp per year, the texas star is a non >type certified amp.
-
>But the point has been lost on you intentionally. Fortunately, the group
>is not subject to the arrogance you two attempt. His claims concerning
>his amps, freebanding, Phelps, cb arrests, don't jive with his other
>self-contradictions and claims. The exact nature of his illegalities are
irrelevant, despite your love for him and attempts to circumvent the
>light being cast upon his swill.

Unbelievable, you added nothing to the question which I just gave you the answer about the TEXAS STAR you had been whining about just you worried about DAVE HALL again...

--
Above that it refers to transmitters and in (d), it says nothing of the
sort concerning
bringing an amplifier somewhere so it can be "aligned".

>No one said you have to take a linear >anywhere to get "aligned" the
>above is about non- certified radios like the >GALAXY...

This is where you trip all the time. Hammie radios need not be
certified.

>Homebrew radios don't have to be type >certified unless you plan on
selling them, >Manufactured radios do indeed have to be >type certified
to be used by a ham in the usa.

Ok, now that you appear to have made a slight distinction between type acceptance and the play and interchangeability you frequented with the words "type certified" we appear to be reaching somewhat of an agreement on what constitutes the definition of each.

--
>A Ham can align it himself if he has the know >how. It just has to meet
>the requirements

Which are what, concerning this "spectral purity" you keep as a hymn.

>You know what they are remember the >paragraph from Part 97 about the
40 db down, >oh you forgot I posted them, your only concern >is trying
to malign DAVE HAL:L

No..you "changed" it when I allowed. Again, you came into it when I said it was illegal for Hall to use his amps.

Check Google instead of giving me your opinion the facts will shut your mouth

>Ditto, George.

I have provided you with facts from the FCC, you have provided nothing at all to help your hopeless claim, you always change the subject to dave hall instead of providing some web page a piece of FCC rule making something to sup[port your side. remember Sgt Shultz on Hogans heroes.... """ I see Nothing""" talk is cheap twist let alone from a cber who knows nothing of ham rules and regulations.

>Then you must be in love with Landshark.

Really why I havent brought him up in every post like you have dave hall. In fatc he was and probably still is in love with me he was so in love he counted my screen names and posted them everyday, he also uses my name as a sig file so he and you share a common malady. Infatuation

Hi,
Just take two pieces of an ordinary wire, 262 cm each
(103 inches each) and built a dipole antenna. Example : take 206
inches wire, cut it in the middle and connect a middle of coax to
one piece, and shield of coax to another piece. Hang it, as you
like, maybe horizontal, even anylike. Warning !! : the coax should
be in 90* angle to the dipole wire.
Let me know if any problem occure.
Sorry of my english ...
Best regards,
Chris
Poland

8 pins isnt too bad. that chip lets you play bootleg playstation games. i'm sure who ever sells the mod chip would have sockets for it. i'm sure you could do it just becarefull not to over heat the traces and pads or they lift up.

If the translation is done correct, it appears to.

A word about surface mounted parts. The leads are fragile. In lifting
pins from the PCB you can either damage the board or damage the pin.
Either way the modification describe in the web page should be not be
done by someone who is a beginner with a solder iron.

Also the microcontroller from one radio may or may not work in another
radio, unless the pins of the two microcontrollers do the same
functions. Other wise you maybe transmitting when you want to receive.
Or if you are really fortunate you just may damage the
microcontrollers.

I've done the 29-wire modchip.. It's NOT a job for the amateur solderer, let me tell you! Your looking at soldering "hair" wire to extremely tiny pads (or even chip legs) on the circuit board... You will need a VERY fine (needle) tip for your soldering iron, a steady hand, LOTS of patients!

Eight wires isn't as bad as mine... You should feel lucky! The PS2 isn't exactly easy to get apart either... Make sure you have REALLY good instructions to go along with your install job...

Jerry ,even if they do try to banned export radios they will still make into the states.Just like amps and everything else.You forget this is America people think for themselves.If there is a demand there will be a supply.Now the other good news is ,you could just buy any older ham(or new one$) radio and with just the clip of a diode you have full band.As your ham freqs.disappear there will be a big market for used ham radios.With the advent of computers thats already happening.Good luck on your quest Jerry.

"Trik-stik".
If allowed, you can mount it on the outisde window sill.
if you can find one that is.
the major problem with doing the apartment scene is the closeness to other
tv sets.
interference would be a big problem if the local dwellers aren't on cable.
You could even take a short fiberglass whip, make up a mounting bracket and
use that on the outside of the window sill.
might have to use a ground plane adapter on it though.

Wow! That really pisses Me off that some thieving low life would take what
You worked so hard for .
I have many Friends that try to help the victims of crimes .
They sometimes are not able to restore Them to the full standards that They
are used to But what little That do is sometimes a very big help .
Especially at this time of the Year. They may even have something there in
the donation bin that They could give You to help You on Your way.
I am told by My assistant that Our contact number in Houston is ,
(713)222-3131. Call this number and tell Them what happened and I'm sure
They will be able to help You.
Please let Us know how You came out after You talk to Them. I'm confident
that You will be feel better afterwards.
Best of 73" to You My Friend , And Yule time Greetings to You and Your
Family.
Good Luck.

If I was starting trouble, I would have talked down
in a condescending manner. I was merely stating a fact.

I said it was in a ham band. I did not state which
one or how big that band was.

You all argue among yourselves, I'm gone for the night
right after I hit send.

Message-ID: <v0alns62t8st9d@corp.supernews.com>
Source record: 147377

My brother gave me a CB radio (rci-2950), so I can install it
in my RV. Now that its installed, I'd like to be able to use it.
Can some send me a website with information on how to use
the radio? Or, explain some things about the knobs and buttons:
knob 1: fm, am, usb, lsb, cw, pa {which one should i be using?}
knob 2: clr->pf gain {what does this do?}
knob 3: rf->pwr-> mic {what is this for?}
knob 4: vol {this seems to turn the unit off/on}

button 1: nb/anl {i think anl is analog - what is nb and which one?
button 2: dim {seems like a toggle for display brightness}
button 3: r.beep {what does this do?}
button 4: swr {how about this?}
button 5: split {???}
button 6: scan {seems like this should scan, but does nothing when pressed}
button 7: prg {does nothing}
button 8: mem {does nothing}
button 9: ent {maybe some sort of enter key?}
button 10: shf {seems like this shifts between reg channels and high number
ones}
button 11: lock {locks something?}
then, an up and down arrow to change channel in display...

This is a 10 meter radio, what does this mean? Is there a 100 meter radio?

I guess, what I'm really looking for is, what settings should I be setting
this
cb radio to is I planned on using it with an RV while on the road. I'm
hoping
it will be helpful if I ever need help.

Sorry if these questions are too basic and simple. This seems like the
appropriate place to look for help.
Thanks,
Bob

Bob:

First off, the RCI-2950's not a CB. It's a 10M HAM rig that's most
likely been converted to run on CB. Not entirely legal, but ::shrug::

The rest of it's below:

Bob Beaulieu wrote:
> My brother gave me a CB radio (rci-2950), so I can install it
> in my RV. Now that its installed, I'd like to be able to use it.

> knob 1: fm, am, usb, lsb, cw, pa {which one should i be using?}

AM for Channel 19.

> knob 2: clr->pf gain {what does this do?}

This is a new one on me.. Maybe it's something different you misread?
Could it be RF Gain? if it is, this is the trimmer to turn up the
sensitivity of the receiver. Most people run it fully clockwise.

> knob 3: rf->pwr-> mic {what is this for?}

RF PWR/Mic Output power (from 0-100%) sets the AM carrier. Run it at
about 50%. Mic = mic gain, which sets the modulation level. Again, run
at about 50%.

> knob 4: vol {this seems to turn the unit off/on}

on/off/volume. Not really hard to figure that one out.

>
> button 1: nb/anl {i think anl is analog - what is nb and which one?

Noise Blanker/Automatic Noise Limiter. Noise filters. Use them or
don't. Up to you.

> button 2: dim {seems like a toggle for display brightness}
You got that one right

> button 3: r.beep {what does this do?}
Roger Beep. Annoying as hell for the guys on the other end. Leave it
turned off.

> button 4: swr {how about this?}
Sets the meter display for rf power/SWR. Use this to tune your antenna.

> button 5: split {???}
Don't use this. CB doesn't utilize split frequencies.

> button 6: scan {seems like this should scan, but does nothing when pressed}

> button 7: prg {does nothing}
For programming the memories

> button 8: mem {does nothing}
for memory recall.

> button 9: ent {maybe some sort of enter key?}
Yep

> button 10: shf {seems like this shifts between reg channels and high number
> ones}
Also sets the duplex mode for split (above)

> button 11: lock {locks something?}
Locks the VFO so you can't bump the knob.

> then, an up and down arrow to change channel in display...
>
> This is a 10 meter radio, what does this mean? Is there a 100 meter radio?
>
Not really. CB transmits on the 11M band. 10M is a HAM band. Don't
transmit there without a license.. it'll get you in ALOT of trouble.

> I guess, what I'm really looking for is, what settings should I be setting

The RCI2950 was designed to be a poor man's 10 meter band amateur radio,
not an 11 meter CB radio. Now that you have it all hooked up, unhook it,
take it out, give it back, and buy a CB radio. You should be able to
find a nice one at Wally World, Rad Shack, or Little Bubba's CB World
down next to the truck stop on the interstate.

Dweebo,
Drug and alcohol soaked minds can do no better. You should apologize
to the group for having an unimagiantive, unmelodic song made up for
posting. It does not match in number of syllables or in inflection to
the original lyrics.
Try harder. In 10 years or so of constant practice you may become
proficient. I doubt it.

Was it "peaked and tuned" before? Might be running a little to high on the output side. If you haven't fixed it yet, or bought the parts for it yet. I suggest you call mauser electronics for a semiconductor cross reference book. It was five bucks and it helped me alot. I had the same problem before. It was the regulator allright. I replaced it with a higher value transistor and it cooled it down alot.But then again the manufacturing was shoddy. There wasn't the right amount of heat sink compound in there either. Good luck.

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitter and receiver. I want the transmitter to have at least 100 watts out. I hope to find something to work with my Audio rack. I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA. I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer) I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer) I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
Happy Holidays

Yer the chickenhawk, chickenhawk. Taking your FUGGLY kid on a gay sex
tour. You oughta be ashamed. The part about Ozark333 and the
Rottweiler was pretty funny, though.

As far as stooping to this or that level goes, we KNOW you don't
stoop, chickenhawk. You KNEEL. <and bob!>
By the way you faggot piece of shit, the sentence ending with "...your
self-control is no longer voluntary." is redundant. Just so a droolin'
gaping ass tard like you gets it I will explain. Self control, by
nature, IS voluntary.

I hope I have clarified an area of grammar and wording for you, sawed
off little faggot boy.

I can tell Dweebo has infected you with an STD that's getting to your
brain.
You better divorce that punk and get medical treatment. I don't wantya
to die yet, there are many more good years of treating you like the
sawed off gay hoebag you are to come.

Hey, is FUGGLY available for a party? Landshark and Chapwoman are
getting married and they need a suckslut for the bachelorette party.
Maybe you could help out those two. With all your experience in the
area maybe you can tell which one is the wife.

Later, Ya sawed off hoebag!

Hello
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2 meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading

Hello,
I have an old Cobra 138-XLR (circa 1977) that is cosmetically in great shape. Would love to find someone who knows this radio and, if possible, bring it back to original specs. It has a stupid echo thing installed and one of those roger beeps. Some of the knobs were re-configured to accomodate these silly mods....I bought this radio new 25 years ago, and remember it being one helluva rig...before it was raped...
I would be willing to pay a reasonable price to repair it. Probably would cost more than it is worth, but figure it would be worth a shot. I'm pretty sure no parts were removed inside; it does need a new mic, but I can get that anywhere. Any techies out there willing to help?
-Mike

Bob,

Some simpole facts for you to muster;

It is most certain this radio has been modified.
I've yet to see one that has been left stock.

If you use it on the 10 meter bands and get caught
you can be fined up to $10,000 per day by the FCC.

If it has been modified for use on the 11 meter band,
you can be arrested, fined and tossed in jail if caught.

From the moment you took possesion you violated
federal law and now you've told the whole world
you're a lawbreaker, change your name and move.

If you doubt me, visit the FCC web site and do a little
reading. www.fcc.gov

Terry,

The mod is easy, just open the case and find
the variable resistor marked, " R-33 "

Attach a wattmeter set for the 200 watt range
and slowly turn the pot clockwise until the watt
meter needle rests at the 200 watt mark.

I've done this mod several times with now success
so good luck!

True, if you are talking about cutting, tweaking peaking.
Wrong if you are talking jumpers.

>
> If you use it on the 10 meter bands and get caught
> you can be fined up to $10,000 per day by the FCC.

Per Day? No, $10,000 fine? That would be like saying
David Duke can win the nomination for president of the
United States. Yes, you might get caught, but the fines
are 99% way less than that.

>
> If it has been modified for use on the 11 meter band,

Yes! Precisely! It's not the equipment, it is the action taken with the
"tool".

You can use an axe to split wood, OR you can use it to break an entering.
But the axe by itself is perfectly legal to own, operate, etc...

You are mistaken about one thing. Most of those radios on the list were
marketed as Amateur Radio Equipment. Which means that there is no "type
acceptance". The amateur band was set aside for experimenting with radio.
Hence, there cannot, and will never be "type accepted" equipment, because
experimental gear cannot be "Type Accepted". You'd have to approve the
theory, before you implement the design. And that impedes on research.

And for those of you who think us Amateurs are a bunch of gardening gluttons
talking about the trade in value on our rider lawn mower, I got some
examples of history for ya. But next time you make a digital cell phone
call, you can thank Phil Karn (KA9Q) for the technology that made it
possible.

The problem with the models listed in the new regulations is that they are
easily modifiable to 11M. Where the fact of the matter is that most 10M
rigs can easily be modified to go down to 11M. I think what the FCC desires
is that any further 10M rigs that are manufactured and marketed within it's
borders have sufficient protection built into them so that they cannot be
modified to transmit on 11M. Now how to do that cost effectively and
maintain a profit is another matter entirely.

Because of that fact what would a good business decision be for an RF
Manufacturer? Make 10M Amateur rigs and sell them at a loss, or stop making
them entirely? You do the math, but I can't name one good buggy whip
manufacturer, I can tell you that.

I'll say it again... "COLLECTORS ITEMS"... Why? Because they won't be available anymore. Just like Model T Fords, 59 Corvettes, but yet people will still want them. As far as what the market is willing to pay for them, that's another matter entirely, and from what history tells us of these very same situations is that the price goes up. Fact: When they stop making them there is a set quantity, now demand sets the price.

How to get these off the air?

Let's use the good old reliable history flashlight to shed some light on the subject and see if we can identify this situation. Hmmmm, I've seen this before.
Have demand set the price so high that one would dare not connect one to an antenna for risk of lightning damage.

Either that or let history take it's toll and wait for most units within the borders to breakdown and malfunction themselves out of existance.

So just like Model T's, 59 Corvettes, etc... The less units functional, the more the price increase. How many 59 Corvettes outside of Las Vegas are there? I think I spotted one about a year ago. I have however seen lots of Kia, Hyndai, and other new products from Japan. Wonder why everyone isn't driving 59 Vettes these days...

In my humble opinion, that's how I see this whole matter playing out.

Now, some people are going to cry for legislation involving type acceeptance on the HAM bands to try and insure that this situation never happens again. That I am pretty certain of. But there is a problem with that. And here it is in a nut shell.

If Amateur gear had to be type accepted before it could be used on amateur bands I'm sure you'd find a rapid decline in RF technology progress.

Here's why:

The Ham bands were set aside for exactly what KA9Q did with them. They weren't set aside so that Japan could market the worlds smallest handheld 2M rig to us year after year perpetually.

> an illegal act; that being operation on frequencies for which the users
have
> no license.

Yes. And I'm sure that the axe has also been used throughout criminal history in burglaries, etc... Yet, it's still perfectly legal to own an axe. The only difference here is that there are no regulations on the manufacturing of axes, and a 10M radio cannot be construed as a physical weapon.

You must realize the distinction between the action and the object. You still seem to be confusing it.

>
>
>
> Especially when the most physical harm that the consumer

>
> See above that OTHER people have a reasonable expectation of protection
from
> intrusions
> on their frequencies from unlicensed bandit operators.

First off, they aren't "YOUR" frequencies. They're commisioned by the regulatory agency for use by licensed stations within the borders of the United States.

How many unlicensed drivers are out on the road today?

You've hit the nail on the head though with the other part, "Reasonable Expectations." When I was younger I expected to be able to ride my bike without the fear of getting mugged for it. I think that's a reasonable expectation. I expect and demand all sorts of things in life, but I don't get seriously upset over being disappointed.

People will continue to park in front of a fire hydrant, speed down the highway in a construction zone and key their non type-accepted radio. Some people for some reason desire to be considered "outlaws." I think the root of the psychology involved would also be present in compulsive gamblers.

How to keep the compulsive gambler from gambling?

Make the minimum bet large enough that they can't afford it.

Right now the equipment is fairly cheap, and it takes effort to catch them and fine them. It's easier to eliminate the equipment than it is to go out and chase them. (Which is what the radio pirate wants - a chase -. It's part of the "thrill".) So, stop the manufacture and import of the problem, and wait for the behavior to stop.

Just like cars that don't have pollution control, air bags, etc...

[snip]
> > BUT THANKS TO THE WISDOM OF THIS NATIONS FOUNDING FATHERS!

> banned from import into the US.

Are you telling me that because a 1959 corvette does not have pollution control on it that I cannot own one? Are you telling me that because a 1959 corvette does not have air bags that I cannot drive one? Are you telling me that beause a 1959 corvette won't pass government crash tests that I cannot drive one down the road today?

There is no fundamental difference between the car and any other personal property.

Just like the Radios on the list, a car manfacturer today could not manufacture, import, or otherwise sell a BRAND NEW 1959 corvette.

So, your whole statement about there not being a grandfather clause is definitely false. Better take some civics lessons.

Section 1 of the Fourteenth Amendment to the United
States Constitution states:

"...nor shall any state deprive any person of life, liberty,
or property, without due process of law; nor deny to any
person within its jurisdiction the equal protection of the
laws."

Hence, the radio is not contra-band. HOWEVER!!! If you key it up on 11M, then yes the unit can be seized, and whatever process is set forth for that crime then takes place. IE, equipment seizure, fine, etc... Since it's the FCC's territory I'm not sure if the Judicial branch is even involved. I'm not that familiar with how the FCC imposes a fine, and if it has to go through the judicial branch at all to impose the fine. The question is when it comes to FCC regs is "what is the due process?". I may be mistaken, but I think the forfeiture and fine are mandatory.

But you still can own one, and if licensed by the FCC use it on 10M in full compliance with FCC Regulations. Just as you can own, and operate a 1959 Chevy Corvette at no more than the legal speed limit on any state or local municipality roadway. If you do it without a license, then you are committing a crime. Do it without a license, and speed on top of it? That's double jeopardy. (- more thrill -). But my observations tell me that people do this sort of thing time and time again. Turn on Cops and watch an episode. It's blatantly apparent. People do incredibly idiotic things every day of the week knowing full well they're taking a chance.

This isn't a national problem. It's a localized problem. And I bet a lot of truckers out there use these rigs. Why doesn't the state or local enforcement care about the radio on the dash as they're writing out the ticket for the 75 in a 55? Because they have no incentive to do so. They don't receive dime one of the fine imposed.

I'm not sure of what legislation made having a portable scanner in the vehicle deemed "burglary tools", but I suspect that if similar legislation was imposed with the following conditions that the infraction would catch the interest of the local authorities:

Conditions (This part is obviously subject to debate):

1.) Neither the driver, or the owner of the station/vehicle, or passenger(s) are licensed amateur operators with HF Privleges.
2.) If unlicensed, a microphone or other such key up and modulation device must be located in ?close? proximity to the transmitter.

I'm not suggesting that the above be taken verbatim, I'm merely stating that it is a possible outline.

The root of the inability to handle this problem is that the local enforcement doesn't have any interest in enforcing. That is due to the fact that the RF Spectrum is not their jurisdiction.

That's the whole conundrum in a nutshell. That is why nothing is being done about it.

So the question is, how to get local enforcement involved. How do you make it worthwhile, how do you make it so there isn't a jurisdiction conflict.

Fear Mongering is not the way to solve the problem. That's what I find so entertaining about this entire thread.

> >
> > What's really scary though is that some people (original author fingered)

> protection given to those affected by illegal operators. Once again, none
> of us have a "right" to use
> a radio; it is a privilege granted by the government that they can also
> deny.

-- Yes, I think I said that above, shortly after you referred to the radio waves as your property. I'm glad we're both clear on that now. ;-)

I'm not defending the criminal behavior, I'm just saying that it will happen and there is a distinction between the object and the action.

I outlined above with examples of history, and what I expect the whole outcome of this situation to be, and I feel I was exceptionally clear through analogy on what the impact of the new FCC Regulations mean.

It's the fear mongering tactic the author took that got me interested in dispelling the myth being created.

I'd rate Mr. Voobner a 6 out on 10 "spin" wizard any day of the week. Selective facts, and a misleading headline. That's 5 points there. But this thread has been the best one of his yet. So I gave him a +1 for extra credit.

eastcoast girls are dammmmm ugly
all they do is smoke butts and have many wrinkles around the
mouth.
they stink two
i was in new york saw two of them in coffee store talking
about the other women very dirty mouth

good for a quick poke in the bed if they keep mouth shut

Thanks for the comments...

I don't think my rci2950 is modified in anyway; most certainly, I would have no idea of what to do with such if it were. I have not used the unit, so no violations for me...

I did checkout the FCC's web site and looked at fines issued for various violations. I couldn't fine any CB radio violations with $10k fines for every day of use. I did see in every case I looked at, the FCC was very thorough and the violator had warnings to stop, yet ignored such - in those cases, the fines were higher. Each case had someone that originated a complaint, which was followed up on by the FCC.

I think, I'll probably just listen to another poster and simply get a cheap CB from Radio Shack and get rid of the rci2950.
Thanks,
Bob

4832. OT - Gasoline Info

Newsgroup: rec.radio.cb
Date: 2002-12-22 22:38:59 UTC
From: WMaC <not@listed.here>
Message-ID: <3E063F03.784A2994@listed.here>
Source record: 147268

Gas companies

Every time you fill up the car, you can avoid putting more money into the coffers of the Middle East. Just buy from gas companies that don't import their oil from the Middle East. Nothing is more frustrating than the feeling that every time I fill-up the tank, I am sending my money to people who are trying to kill me, my family, and my friends. I thought it might be interesting for you to know which oil companies are the best to buy gas from.

Major companies that import Middle Eastern oil
Shell..... 205,742,000 barrels
Chevron/Texaco.....144,332,000 barrels
Exxon/Mobil..... 130,082,000 barrels
Marathon..... 117,740,000 barrels
Amoco.....62,231,000 barrels
If you do the math at $30/barrel, these imports amount to over $18 BILLION!

Here are some large companies that do not import Middle Eastern oil:
Citgo 0 barrels
Sunoco 0 barrels
Conoco 0 barrels
Sinclair 0 barrels
BP/Phillips 0 barrels
Hess 0 barrels
All of this information is available from the Department of Energy and can be easily documented. Refineries located in the U.S. are required to state where they get their oil and how much they are importing. They report on a monthly basis.

Keep this list in your car; share it with friends. Stop paying for terrorism..... But to have an impact, we need to reach literally millions of gas buyers. It's really simple to do.

Now, don't wimp out at this point...keep reading and I'll explain how simple it is to reach millions of people.

I'm sending this note to about thirty people. If each of you send it to at least ten more (30 x 10 = 300)... and those 300 send it to at least ten more (300 x 10 = 3,000) and so on, by the time the message reaches the sixth generation of people, we will have reached over THREE

MILLION consumers!

If those three million get excited and pass this on to ten friends each, then 30 million people will have been contacted! If it goes one level further, you guessed it..... THREE HUNDRED MILLION PEOPLE.

GOD BLESS AMERICA!!

4833. Canadian Babies

Canadian Babies

A Canadian is drinking in a New York bar when he gets a call on his cell phone. He hangs up, grinning from ear to ear, and orders a round of drinks for everybody in the bar.. He announces, his wife has just produced a typical Canadian baby boy weighing 25 pounds. Nobody can believe that any new baby can weigh in at 25 pounds, but the

Canuck just shrugs, "That's about average up North, folks... like I said, my boy's a typical Canadian baby boy."
Congratulations showered him from all around, and many exclamations of "WOW" were heard and lots of rounds ensued.
Two weeks later the Canadian returns to the bar. The bartender says, "Say, you're the father of that typical Canadian baby that weighed 25 pounds at birth, aren't you? Everybody's been making' bets about how big he'd be in two weeks. We were gonna call you..... so how much does he weigh now?"

The proud father answers, "Seventeen pounds." the bartender is puzzled,

and concerned. "What happened? He already weighed 25 pounds the day he was born." The Canadian father takes a long, slow swig from his Molson , wipes his lips on his shirt sleeve, leans into the bartender and says, "Had him circumcised".

Put your Ranger on Ebay, list in the ham radio area.

Specify it as being a 10 meter legal radio only.

If you even mention the word " CB " in your ad,
it will get pulled by Ebay Security and you will
be banned from placing further ads.

Average sell price is around $150 plus.

No self-respecting ham will buy it but a CB'er will
grab it faster then a hot leech on warm night.

Good luck my brother

~You have just been hit with an e-mail snow ball!~

It's the start of.....

The Great Snow Ball Fight 2002 - 2003!!

One rule to this game....

You can NOT hit someone who has already hit you!

Now...

go out there and get as many people as you can,

before they get you!

I got you first! and you can't get me back!

Nanee - Nanee - Nanee!

(hehe)

We do not stop playing because we grow old;

we grow old because we stop playing.

4840. BS Meter!

4841. Best Audio

Newsgroup: rec.radio.cb
Date: 2002-12-23 00:35:59 UTC
From: Paul <lazpaz@teleweb.net>
Message-ID: <1040603530.205343@axilla.wwnet.net>
Source record: 147277

I have a Midland 79-290. Its a cool radio but the audio quality is poor and gets annoying real fast.

Can anyone recomend a radio with really good audio quality when used with an external speaker. I mostly just monitor the frequencies in the car and I would like to get a unit with a warmer sound that can be turned up without a lot of distortion.

Many thanks for your help!

P. Zook

Nope, if all you have to do is move 1 jumper and another,
you can just as easy move it back and remove the one
added. So then is still a modified radio?

> reading is difficult for you.
>

No problem here, but you seem to want scare this guy into
thinking what you said will happen to him. I can site case's
as you did below to the fact that most people caught with
these rigs, not using them in the 10 metere portion, are
almost always sent a warning letter.

> > >
> > > If it has been modified for use on the 11 meter band,

I see you resorted to insults on just the first response,
just proves you wrong.

Please provide the link, as I will not waste my time
to find out exactly that he was warned repeated times,
given a nal disregarded it, got fined previously for the
same thing warned, then after years of doing exactly
what they asked him not to do, he got a month in jail
(Or six months).
Not the first time he uses it does all that happen.

> radio capable of transmission on CB channels.

It is against the law to use said radio on the cb bands, type certifaction
is needed, none is needed for the 10 meter
band. Just having one does not violate any law, using it
does, so as you stated above, "Do your research numbnuts"

> > > If you doubt me, visit the FCC web site and do a little

> However if you can't read, find someone to read it to you,
> better yet, sell your radio and find a new hobby.

I've got lots of radio's and have no desire to sell them or find another
hobby, you on the other hand have decided to try

to scare this person with "Mojo" legalities. When in
other posts you tell people how to do modify radios, by
pass e bay rules and such, all the while trying to scare this guy
with your bs, pretty hypocritical if you ask me.

Enough, have a good Christmas, you are now in
the kill file along with George, Aaron, Doug and Sparky.

Possession? Violation? Not!
I can possess ANY transceiver modified in ANY matter.
Mere possession is NOT a violation. Get your facts straight.

Nice guess George, but alas, you are still wrong. Do you actually think that Tim and I are the only posters here that don't see eye to eye with you and the rest of the posse? I mean really, it is nice that you think so highly of me, but the kudos are really unwarranted.

At any rate, Merry Christmas to all, and to all, yes even you George, Happy New Year!

midlands were always crappy on audio.
try a cobra. even a uniden is better.
not only did they use funky speakers, but the circuitry was bare basics.

Well Good luck on E bay Bob, they seem
to have a problem with all of those type of 10 meter
radios. If for some reason they pull your auction,
you might try Yahoo auctions, they aren't as up tight
about those things.

Well Chunks sorry to hear about your lack of friends if you are telling the truth and not just joking around. Christmas can certainly can be especially lonley if you have noone in your life. I would say the best way to find a friend outside the group is to tie a T-Bone steak (raw of course) around your neck and take a walk around the neighborhood, Before you know it you will have lots of friends, Merry Christmass

It is not a point of being up tight Fairy God Mother it is about following the laws. Something you seem to have a problem with.

4858. CB Repair & Mod. Books 40% Off

Newsgroup: rec.radio.cb
Date: 2002-12-23 04:44:36 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <695d0vsvngfr38613hvug7jdlgmdn9fsaj@4ax.com>
Source record: 147294
Cross-posted to: rec.radio.cb,rec.radio.swap

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out! Go to this link:

http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?ViewSellersOtherItems&userid=lou@cbcintl.com&completed=0&sort=3&since=-1&include=0&page=1&rows=25

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

We've now added all our crystal charts for free download/printing (PDF) on our site. These 32 charts cover about 95% of all American mobile & base CB models, and show exactly which crystal(s) affects which mode or channel. Very useful for troubleshooting "dead channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB accessories. Please visit our Web site to see all those "goodies" you just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form from the home page. We've also got a new Email Order Form (for VISA/MC) if you're in a hurry.

4864. Increase The Power Of My CB

Newsgroup: rec.radio.cb
Date: 2002-12-23 05:09:19 UTC
From: johnnycat89@hotmail.com
Message-ID: <13623-3E069A7F-345@storefull-2332.public.lawson.webtv.net>
Source record: 147400

I posted a question recently about increasing the power of a CB
radio. I am not looking to make a flamethrower. I just want to increase
the power enough to to have a little edge to get through the background
noise etc. A variable power level would be ideal. I have a radio now but
what I am looking for is to not have to modify my radio but add some
kind of an adjustable output to it. My current radio is a Radio Shack
sideband mobile unit (I don't recall the model but it cost me $ 150) it
performs fairly well but I want more power. Any ideas would be welcome
and appreciated. Another question I have is what
is a linear amplifier and how is it installed. Maybe that is what i
need. Thank all and Merry Xmass,

Listen up speedbump,

The violation occurs when you posses or attempt to sell
a MODIFIED 2950. Now whether or not a gray-suited
thug in loafers and a 4-door sedan knocks upon your
door is another story. A yard full of pitbulls makes a great
deterrent and discourages youthful offenders who might
decide to come upon your property and pin your coax
as well.

Trolls? Trolls in rec.radio.cb? No way. No self-respecting CB'er is going to troll this newsgroup. Now on the other hand, licensed ham radio types might just attempt something just to stir the pot. But why would they do that? I just don't understand.

Not my neighborhood. A brother would come along and shoot you for it.
" Shoot first, ask questions later, " that's the general technique here.

I used to wear my crack pipe hanging around my neck so I could pop
it into the bush when the police stopped me.

Any other suggestions bro?

Clearspeech makes the best sounding speaker you will ever hear.
Removes 95 percent of background noise. Great for mobile use.

Another question I have is what
> is a linear amplifier and how is it installed. Maybe that is what i
> need. Thank all and Merry Xmass,

Is that right. Well good luck but most of us haven't seen a linear
amplifier for cb radio in like ....mmmmm......well let me
see.......mmmmm.......Oh, I had to get a cup of coffee. Sure is early.

Christmas shopping I must do. Off we go to spread some cheer.

Happy Holidays to you and Yours.

NEVER in response to the first line. Man I lost track again. Comes with
age I suppose.

that radio has zero rejection and it makes it real shitty to listen to. 2950's and galaxies sound the same way. either find you a HR2510 or a older cobra 148 or grant xl. all three are pleasant to listen to for long periods of time.

Variable power won't neccessarily increase it. It might only lower it. Depends.

I small amp is the way to go. Essentially, you connect it inline with your antenna, and you have extra power. You can get small enough to get exactly what you want.

I tried to go the Mod route. But everyone told me it was not cost effective. If you change your finals, then you need a realignment. Then your radio runs hot, and have chances of burning it out. In this case, you need know alignment, and you won't do damage to it.

You can get something liek a 50 watt linear.

No that is called a forge Randy not an impersination. And you most certainly did use Aol to create the name Wa3mojo, you have aol and use it regularly. Randy your slip is showing again. One mention of your name in a post that you weren't involved in wink wink and you jump all over it, and you haven't been posting to the NG recently under your Roadrunner account lately, yet I make that post and minutes later your on it. why? because you made the original post and saw I replied to it blaming you.
Doesn't drive me nuts that aol doesn't post Ip it just shows why you use it bevcause it doesn't show the IP. Grow a set of balls and post under your road runner account instead of being anonymous.

Thanks for the compliment...
As for Lou... I have asked him nicely to stop the full advertisments and
he has totally ignored me. My definition of spam is when somebody posts
nothing but and ad in a post. If someone provides a link, that's fine
and I certainly welcome that... but a full page ad several times daily
can be called nothing but spam...
--
Fortunately, the group isn't governed by individual definitions and
opinions. It's not like he's spamming you..... it's not spam since
I requested it. I have sent many folks to sites posted on this forum.

Check this out for a fun time!!!!!!!

http://www.toonedin.com/movies/WhiteTrashXmas.html

Definition of the SuperBowl
If 10,000 CB'er's are on the SuperBowl
then only 1000 can be heard some of the times
& only 100 can be heard most of the times
& only 10 can be heard all the time
This is a great example why the bowl is not for the weak!

>

You might try having the radio "tweaked" to increase the mod output.
some radios can go as high as 40 watts or so with modulation power.
then you get heard.
a small linear amp, 25 t0 50 watts wouldn't be to much of a problem.
they get installed between the radio and antenna and get hooked up with
power.
some may have a switch for high and low power outputs, but rarely do they
have a "slider" control.

From: lou@cbcintl.com (Lou Franklin)
To learn the technical TRUTH about CB Radio without all the hype from
people who are just plain ignorant, check out the following books from
CBC International. They're selling right now at a big discounts on
our EBAY & AMAZON stores too.
Check it out! Go to this link:
http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?ViewSellersOtherItems&userid=lou@cbcintl.com&com
pleted=0&sort=3&since=-1&include=0&page=1&rows=25
To see exactly what these books look like, plus all the specific,
chapter-by-chapter details, see our Web at:
                                www.cbcintl.com
Some of the books included are:
BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB
Radios. List $25. The most popular "big dummy's" guide ever published on
do-it-yourself CB repairs & modifications. Covers peaking of receivers,
transmitters, modulation, mike problems, antenna & SWR problems,
detailed frequency modifications for both crystal & PLL radios. Loaded
with charts, illustrations, and specific instructions for most brands
including the new export models. This latest edition also covers slider
and broadbanding tricks, FM conversions, and much more!
BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference
source on CB PLL synthesizer circuits ever published! Detailed PLL
theory explained in layman's terms. How they work, and how to modify
them for many more channels. Includes specific PLL block mixing
diagrams, truth charts, & IC pin function diagrams for nearly every PLL
chip ever used. Covers all the most popular U.S. & export chassis, with
specific listings of all models using the chip.
BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page
technical book for the professional repairman. Picks up where the
"SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions &
troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state &
tube, AM, FM, SSB, CW, American & export models. Covers test equipment
(& where to find it), transistor basics, synthesizers, receivers,
transmitters, power supplies, T/R switching, antennas, interference,
parts & accessory sources. Over 350 illustrations including schematics,
charts, and photos. Huge subject index also lets you look up repairs by
symptoms. This is "must" reading for any serious CB technician!
For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:
www.cbcintl.com/galaxy.htm
****
Who are we? Since 1976, we've been THE source for CB Radio technical
information & high-performance CB accessories!

First off, it's not a right, it's a privledge to be licensed for operation. A lot of people seem to forget that. Secondly you're not identifying the problem. In a nutshell the problem isn't a physical object, it's the behavior. I summarized what could be done to prevent the behavior in my other post. Read the section on handheld police scanners, and possible legislation that could be done to further prevent the behavior.

First off, it isn't a right, it's a privledge. And as far as the "fear" and whatnot that I refer to, I'm not saying that the FCC is causing the fear, what I am saying is that the original author of this thread used selective facts, and a misleading headline in order to cause the audience (you, me, etc..) to get the wrong impression. I am certainly not suggesting that the FCC is fascist. Quite the contrary.

I'm not sure I follow you here, but if I understood you correctly what you're suggesting is that the units (are not) but should be contra-banned because they can be used for an illegal activity. Much the same could be said for cars, motorcycles, and let's not forget using an axe to break an entering. Everyone seems to be forgetting that there is a very clear distinction between the physical object, and the action taken with it.

That's why I use the car analogy time and time again. For a car you must be licensed, and operate it on roadways and obey the traffic laws. For a 10M radio you must be licensed, and operate it within a range of frequencies, and not exceed the maximum effective radiated power. (Combination of watts and dB gain w/ antenna.)

You can use a car on the roadways, or you can exhibit your total lack of respect for your neighbors by driving it across their front lawn. Same by operating 10M radio on 11M. And just like the car, some unlicensed jerk can take a 10M on a joy ride all over 11M.

The 10M radio just like the car is "property".

You can be unlicensed, and own a car. But you must not operate it.

There is a clear distiction between the action and the object here.

What the author of the original message did was an attempt to mislead the public into believing that it was an illegal act to own one of these units. Which is analagous to saying that it's illegal to own a car if you don't have a drivers license. Both are equally rediculous.

Hence those that own these radios should not worry about ownership. It's not an illegal act to sell it, touch it, oogle it, just don't operate it on 11M. That's where you're gonna get in trouble.

>

Just as one would expect reasonable protection from burglars breaking an entering. Yes, I fully agree with that. You're absolutely correct. Yet homes and businesses get broken into all the time. That's the reality of the situation. And yes, some/most of the time those that break an entering are prosecuted, fined and jailed.

But you can't stop the behavior by making it illegal to own the object capable of doing that action.

Pick your object... You can't ban screwdrivers because some thugs use them to steal cars with. You can't ban rocks because some local punks use them to smash car windows with. And you can't ban cars because some unlicensed jerks drive them in playgrounds late at night.

You can only prevent the action of doing so.

My other article in the newsgroup does just that. I suggested that similar legislation be debated such as with having a police scanner in the car is considered burglary tools. The intent with the legislation is how to get local enforcement involved without infringing on property rights possibly setting a very dangerous premise.

> THEY are the ones to
> blame for any negative results that Congress may impose.

We're clear on the transmitting part not being a "right"... What you seem
to be forgetting is that the radio just like a car is property. Owning one
is perfectly legal. Operating it, that's another matter entirely.

> > The U.S. has Citizens. Why?? Because each and every single one of us is

AND!!
> > Of those I would bet most consider it more of a popularity contest than
a
> > decision.
>
> Rights. Those are C I V I L rights, none of which applies to CB radio.

I can't believe what I just read... If I understand you correctly, what you
are suggesting is, "CIVIL property rights don't apply to the owner because
it can be operated as a CB radio?"

Ok... Let's take that logic and apply it to a car. "CIVIL property rights
don't apply to the owner because a car can be operated in an unlawfull
manner."

That's certainly not what the FCC Regulations state. The FCC Regulations
state that you can't make them, and you can't import them. Just like the
DOT Regulations state that you cannot make the Mazda 280ZX any more. It
won't pass DOT crash or emissions tests.

Ask any law enforcement officer how many times a CB was found
in the same vehicle that a sawed-off shotgun was located.

It's common knowledge that illegal weapons and illegal radios are
often found together. When Law Enforcement spots a illegal radio
installed in a stopped vehicle they will issue a radio command to
other units warning of potential hidden weapons. My brother, a
Georgia Hiway Trooper will handcuff a suspect until a sweep
can be conducted in the suspect's vehicle. The illegal radio is
a tip-off to him that drugs or weapons may be nearby and that
extreme caution is required.

You have made some whoppers concerning the legality of amps...some very interesting posts of you attacking those who would use such amps....even went as far and said why would a real hammie use such *crap* when they can use a Henry or similar amp. Anyways...you quoted....
-

"(d) A modification which results in a change in the identification of a device with or without change in circuitry requires a new application for, and grant of certification."
-

Well, YOU claimed he changed the bias, which in effect would indeed *change* the
identification of the device,,,

>Twisty this statement just shows how far in left >field you really are >in relation to this subject,

Oh ok..please differentiate and clarify...you DIDN'T say Hall changed the bias and you DIDN'T say that would bring his Davemade into "spectral purity" levels acceptable to the FCC to make it acceptable and legal for him to use on ten meter? And changing the bias would NOT make a change in the device*?
(*device..NOT radio.)

>read the FCC quote, It pertains to a type >certified amp, not a amp like a davemade that >is not type certified it has no "identification",

YOU are the one that posted it..now here you are saying it doesn't apply...(chuckle).... why did you post it if it has no pertinence whatsoever to N3CVJ's claim of "I can legally use a Davemade."...?

>PLEASE read it carefully and try to >understand what you read,

Ok,,deal,,if you will do the same to avoid embarrassing yourself in your desperate attempt at finding an incorrect sentence somewhere in my posting history, regardless of how mundane. The "Ministry of Telecommunications" farce you posted would fall in this category.
If it doesn't apply, then don't post it or take issue with me pointing it out,,and for Pete's sake, do try to remain on topic, old boy.

,
>if you will notice it says it will require a new >application for a >grant of certification, well the davemade never >had been certified from day 1, so Dave Hall as >a ham is allowed to modify (1) non type >accepted amp (which the davemade is, per >year), and yes he must make it meet the FCC >requirements, the same scenario as the >galaxy radio,

We appeared to be communicating ok until this point......modification of the Davemade to bring it into "requirements by the FCC". Ok, what are they? Are you speaking again of the "40 db mean power" and spurious emission quote or what? Again, I have been informed his statement concerning modification of his Davemade, and the one you are allluding to, is total bullshit. While you haven't come out and said anything else except "He biased the amp"....the innuendo is there. Riddle me this....what did he "bias" it to? Another class? Which one? I won't even go into how he doesn't have the test equipment (Oh, but I am certain he'll claim in retrospect...*something*,,haha!) to calibrate let alone perform such tasks at this point in time.

>Dave doesn't have to take it to any shops, >labs, hack shops, FCC he >can do this himself.

Not without proper equipment he can't.....but then again, no telling what he may claim.

>I did claim for starters he probably at the least >changed the bias to >make the amp cleaneryou need to ask him >what he did I can only assume since I am not >dave

Number one, I did ask and he stuttered and began to drool. Number two, he became so bitter and embroiled with his personal issues he spat a refusal to answer, citing he would do so only if another asked. Number three, a third party did ask and he wrapped his tail between his lying legs and changed ID's...again. Number four, it was safe to ask you the question since you have been actively engaged answering for him. Number five, you sure became passionate with your incorrect assumptions over the past week, to the point of attack.

--
He, or you, can post, anytime y'all feel like it, his new grant of certification that is precedent setting.

>He doesn't get or need a grant of certification, >that is only for >units that are to be sold to other hams.

Units of *what*?
Radios or amps or both?
Again, please try to remain on topic..if it doesn't apply, try not to cite it, as it merely bounces you around and adds to your confusion.
--

Your quote:
>"If the changes affect the characteristics
>required to be reported,"

Geee.....such as spurious emissions and harmonics?

So technically, if one reduced the emissions and harmonic output and made the amp "clean",
you are saying it would NOT affect the characteristics of the amp? C'mon now with the double-talk.....

"a complete application shall be filed."

>Did he file it for the Davemade, Texas Star, or >both?

>He doesn't have to file for anything get over it , >he is not going for >a grant of certification something that you >say doesnt exist anyhow.

It doesn't matter what I say,,,,,if what you posted is true, it indeed changed the characteristics of his amp and according to your quotes and snips, it must be "reported".

>If you can't understand what you read get a >new hobby,

It is much more simpler than that. Attempting to convey a problem with me soothes your ego only temporarily. You merely can not comprehend what you read or post.
Besides, hammie radio isn't my thing right now....lids like you that break the law and play hypocritical morality cop turn me off....besides, the DX ain't fading as fast as orignally predicted....it's much more exciting than anything the few derelict nocodes among us can do or achieve.
You must admit, when you have to retreat and use another countries set of rules in a misguided attempt to cloud the issue, how can anything you say after that be taken with but a grain of salt? It appears I am the only one left willing to give you the time of day concerning a serious issue or topic,,eveyone else has long abandoned you...what does that tell you, George?

>I just for the life of figure out why you a cber is >concerned with >what a ham can use.

You have it backwards. I don't care and never did. Hall and your trouble posse was and is overly concerned with what cbers were and are doing and brought his personal issues to my doorstep concerning such. I merely return things to their rightful owners and which they came, even if it is tenfold at times.

>Oh btw did he file for what? grant of >certification?

First you post something that says he must do this whenever he changes the circuitry of a "device"..not a "radio", not an "amp", but "device." I offer this to you from your own quote and you proceed to interpret that as you see fit ("it applies to radios')..only you are wrong,,it clearly states.."device", despite your incorrect interpretation of "device" to mean only "radios".
You also moved quite quickly to disavow certain parts of your posts claiming "that doesn't apply".....of course it doesn't...you posted a buncha junk to obfuscate Dave Hall's dilemmas and lies.....it's where you inserted yourself into the equation, remember?

Looks like one of our comrades has fallen ill.
Word is Pepper is in an Arizona hospital with
pneumonia.....our thoughts are with him and his family...
Some of the folks are trying to pony up some
money to help the family get out to be with him...
If you know who i'm talking about then you know
where to tune for more info.....333 Springfield MO

"Got RF?"

4910. Re: Increase The Power Of My CB

Just bear in mind that a doubling of power will be about the least to be noticeable at the receiving end. Quadrupling power is 6 dB (or 1 S unit). I doubt I'd want to mess with the radio as it is unlikely you could get the power to be very noticeable without causing all kinds of other problems (like distortion), especially a stock (non-export) cb. There are other ideas being put forth in this thread, however.

Can you explain just what this maximum effective radiated power
is? As far as I know the amateur regs do not state anything about
antenna gain in reference to the legal power limit.

>
> I can't believe what I just read... If I understand you correctly, what
you
> are suggesting is, "CIVIL property rights don't apply to the owner because
> it can be operated as a CB radio?"

CIVIL Law and ADMINISTRATIVE Law are not exactly the same. The FCC
regulations
fall under Administrative Law whereby Congress has passed an enabling Act to
govern a particular
area, created an agency to ADMINISTER said law under US Code with
regulations that guide how such activities are to be conducted. Those very
regulations, WRT CB Radio, already specifically outline what equipment can
or cannot be used in a CB station. By the mere act of picking up the mike
and transmitting, you have agreed to abide by those rules. In essence, by
using
the CB, you have already contracted, if you will, with the government to
operate the station within the applicable rules. Therefore, if you break
those rules, you will answer to an administrative law judge, not in regular
civil court. It does, indeed, mean that such equipment being used to commit
the offense CAN be considered contraband and subject to seizure. Even more
so if that equipment
is already deemed to be illegal to import to begin with. Yes, darn it, you
can buy one of those bootleg Galaxys, sit it on the shelf and look at it,
and nobody can just arbitrarily come and take it away. You can buy an X
Force amp, sit it on the shelf, and it would sit there forever. No one's
gonna know you even have it, right? Because no crime has been committed
with it. But splatter over your neighbor's TV--even without the amp in
line--and the agents come to call, they CAN confiscate it under current law;
read the regulation, it's there. Try applying "property rights" in the
above scenario, sorry---you'll lose!

Therefore, in the case of the Galaxy and Connex radios because they are
already enjoined from
import, you are splattering over Mrs. Jones TV, the Galaxy is sitting on the
shelf, when the agents
come to call, they CAN seize it (it's called "in rem seizure") because the

rules state that if you have a
piece of equipment that is not allowed at your CB station, they can and will
assume that you have or
are using it. Never draw the wrong kind of attention, and that Galaxy could
gather layers of dust.

I am fully aware that I do not "own" spectrum, and I fully understand the
regulations that govern my
station. But I HAVE been granted a license to operate on certain
frequencies by fulfilling the requirements set forth by the FCC. In that
sense, I have "paid" the price of use whereas the bandits
have not. Amateur Radio is somewhat self-policing, unfortunately less so
than it once was. Witness the yahoos that sometimes embarrass me with their
infantile behavior, and it is not only a desire of mine to attempt to rid
those airwaves of unlicensed operators, it is my duty to do so! The idea of
some "romantic", adventuresome, and lawless cowboys running roughshod over
everybody else
screaming "Ah've got mah r'ahts" and to hell with everybody else is not
going to fly. It is with that in
mind that many of us who are being affected by this crap are attempting to
do something about it; wrong is wrong, and right is right. Whatever the
outcome (and what I'm being told doesn't agree with what the outlaw
operators want us to believe), it won't be without the strong efforts of
hams
worldwide to get rid of this sh**.

Whoa! Boy did I hit a nerve! Sorry to offend you, didn't realize I could offend somebody that easily. You gotta learn to recognize a troll post. Separate fact from fiction, don't let simple printed words get to you. Hey, it's just the internet, get it?

I'll bet dollars to donuts you probably could use a decent blood pressure medication as well. Look into that after the holidays okay?

Merry Xmas!

4917. HOW TO KILL YOURSELF " A Special Holiday Event "

Newsgroup: rec.radio.cb
Date: 2002-12-23 21:54:08 UTC
From: "\"chunks\"" <nothanks@seeya.bye>
Message-ID: <_tMN9.1179$wn1.261623912@news.inreach.com>
Source record: 147452

Many thanks to the Church of Euthanasia

http://www.churchofeuthanasia.org/

HOW TO KILL YOURSELF

This text attempts to establish unambiguous criteria by which potential suicide methods can be judged. This text does not attempt to list or evaluate all known suicide methods. A comprehensive list of suicide methods is maintained by the alt.suicide.holiday newsgroup.

CRITERIA

For a suicide method to be Church of Euthanasia approved, it must be:

QUICK
PAINLESS
CERTAIN
DISCREET
SAFE
ACCESSIBLE
TIDY
RATIONALE

QUICK: Fast methods cause less psychological anguish, and provide less opportunity to "chicken out". Why be unnecessarily tormented by doubts and second thoughts? An ideal method would be essentially instantaneous.

PAINLESS: The Church of Euthanasia opposes suffering, even for humans. Therefore a Church-approved method must be at least painless, if not outright enjoyable.

CERTAIN: A failed suicide usually results in close surveillance, or even confinement to a mental hospital, greatly reducing the odds of a successful second attempt. In addition, many suicide methods have the potential to cause severe suffering if unsuccessful, in the form of irreversible organ damage, disfigurement, and so forth. An ideal method would be 100% certain to cause death, with no chance of mere injury.

DISCREET: Many methods would be effective under ideal conditions, but in practice have too great a risk of detection. No matter how promising the method may be from other perspectives, it is useless unless you can get away with it.

SAFE: Safe to others, not you! The Church of Euthanasia only supports VOLUNTARY population reduction. An ideal method would have zero chance of "collateral damage" to other living things.

ACCESSIBLE: No matter how nifty a method sounds, it doesn't do you any good if you can't obtain it, and obtain it discreetly at that.

TIDY: Don't be selfish! If you make a nasty mess, someone will have to discover it, and clean it up too. That someone could be a friend or family member. Most people aren't trained to deal with trauma, and even if they are, that doesn't mean they like it. No one is going to appreciate mopping up bits of your head.

EVALUATION OF SELECTED METHODS

Shooting: Assuming minimal knowledge of anatomy, sufficient caliber, and a steady hand, it's quick and certain alright, and probably painless too, though it's hard to be sure. Discreet? Well, once you have the weapon in hand, no one can stop you, so the question is moot. Accessibility varies widely: obviously in the USA it's more accessible than we'd like, but in the UK for example it could be nearly impossible. Safety depends heavily on the choice of location. All in all, it wouldn't be such a bad method, if it didn't make such a terrible mess.

Hanging: Not very quick or certain, with a decent chance of mere injury. High marks for accessibility, but unfortunately the risk of detection is also high, because hanging takes a while, unless you manage to break your neck, which is relatively hard to do. Most people probably wouldn't consider hanging painless, but obviously there's a minority who enjoy this type of thing (see the classic British film "The Ruling Class" for example). No one who has ever seen a choking victim would describe this method as "tidy".

Driving: A fine example of an unsafe method. What did all those total strangers ever do to you? Cars are accessible enough, but collisions have surprisingly low fatality rates, and usually aren't quick, painless, or tidy.

Jumping: Fairly quick, depending on the height, but not all that certain. You'd be astonished at how many people have survived outrageous jumps. San Francisco's Golden Gate bridge draws jumpers from all over the world, but the locals are hip, and many people are stopped in the act. This method has a high probability of a making a truly disgusting mess.

Slashing: Unless you're a Marine, you probably don't have what it takes to slice yourself deeply enough to do the job. There's a fine line between self-mutilation and an actual suicide attempt. In most cases this method is just a cry for help. Straight razors are accessible enough, but this method is definitely not painless, certain or quick. It might look glamorous in the movies, but don't be fooled: a bathtub full of blood is not a pretty sight.

Drowning: Not particularly discreet except in very isolated areas, and even then it's advisable to do it at night. If you're a good enough swimmer to get far enough out, it's fairly certain, especially in frigid water, but it's not quick by any means. By some accounts it's moderately painless, but where your bloated corpse will wind up, and to what extent it will be chewed, is another matter.

Freezing: If you can manage to get above the timber line in winter and get naked, this method has a good chance of success, but be careful to take public transportation. People have been rescued by over-zealous park rangers who were tipped off by an extra car in the parking lot. Unless you're in the Arctic circle, it takes a while, but it's relatively painless once you get past a certain point. Accessibility varies widely, but freezing gets high marks for safety and tidiness, and is ideal for nature-lovers.

Overdosing: This is a huge topic, and beyond the scope of this text. Suffice it to say that the lethal dosage for a given substance depends enormously on the individual. In many cases the odds of organ damage are much higher than the odds of death. Many attempts fail due to the human body's annoying tendency to vomit when poisoned. Most experts recommend combining drugs with alcohol and a garbage bag over the head, secured with an elastic.

Nitrous Oxide (NO2): When properly applied (using a mask or a garbage bag), it's astoundingly quick and certain, and downright pleasurable. The hard part is getting the stuff. It takes a lot of whippets to fill up a garbage bag, and it's difficult to purchase a tank unless you happen to be a dentist.

Oven Gas: This method is totally unacceptable, due to the obvious danger of blowing up total strangers.

Car Exhaust: This is a fine example of a method that's reasonable in theory but rarely works out in practice, because it's so hard to do discreetly. A tube from your tailpipe to your car window is bound to attract attention. Run your engine in your garage long enough, and you'll be visited by a nosy neighbor. Sure it's painless, but failure means brain damage. The active ingredient (carbon monoxide) is effective, though other gases are much better (see below); it's the delivery method that's unacceptable.

Carbon Monoxide: This gas binds to your hemoglobin better than oxygen. Your body thinks it's oxygen, and you breathe normally, except that you die. It's not as much fun as nitrous oxide but it's also somewhat easier to obtain. The best way is from an industrial gas supplier but acceptable concentrations can be obtained by indoor use of a charcoal grill. The main problem with carbon monoxide is that it's flammable! It also tends to sink, so it could accidentally asphyxiate your downstairs neighbors. For a demonstration of how to kill yourself with carbon monoxide, see the Jerry Hunt video.

Helium: In addition to being odorless, colorless, and non-flammable, helium is also considered non-toxic, but it's an excellent suicide method; it's as easy to breathe as air, except that your voice becomes high-pitched, and after a few minutes, you become unconscious and die. Helium is used to inflate balloons, and is therefore inexpensive and widely available, compared to nitrogen, or other inert gases (such as neon) which would work just as well. Helium also disperses easily, provided you leave your windows open. Helium is quick, painless, certain, discreet, safe, accessible, and tidy, and is therefore the Church of Euthanasia's official Recommended Method.

CONCLUSION

Suicide is hard work, and should not be undertaken lightly. It's easy to do it badly, or make rookie mistakes. As with many things, the best results are achieved by thorough research and careful preparation.

Good luck and Merry Xmas!

>the
>> future.
>
>Basically what this says is that these radios cannot be
>imported/manufactured in the united states.
>Nor can those radios be marketed in the United States.
>
****
actually the quoted material yu so amply have shown says nothing about
manufacturing. I believe that is states that the FCC has reviewed and
found a list of units that are not to be imported or marketed into the
US.
If a company wanted to manufacture here and export to a country that
allows such units then the FCC has no objectionto that. In fact they
can not stop a compnay from doing that.

****
>No problem, because I don't think Uniden has made those models for a few
>years now. Same with cars... They won't pass emissions, and don't have
>airbags. Hence, they cannot manufacture or import those vehicles.
>
****

Yes many are no longer manufactured. The order of no marketing also
applies totheused market. In fact if yo ugo back to 1977 when the 40
channel radios wer introduced they did the same thing. They forbid the
resale of 23 channel radios. While it is easier to go after a vendor
or CB shop that sells units,used and new, it much more difficult to go
after individual sales.

****
>HOWEVER!
>
>That 1969 Ford Galaxy is still perfectly legal to drive, own, sell, barter,
>trade, and work on.
>
>Why?
>
>It's called the grandfather clause. You should have learned that in 6th
>grade civics.
>
****

Not exactly. The order, or at least the part that you attempt to
explain, does not grandfather these radios in. It is still illegal to
operate them . Your analogy of operating a '69 Ford today is not
valid.

****
>Now some make the analogy that these units are analagous to handguns.
>
>You need a permit to carry a handgun. You also need a license to operate
>these radios.
>
****

You need a permit to carry a concealed weapon!

Correct you do need a license to operate a transmitter in the US. On
certain bands of frequency that license maybe a blanket license issued
by the FCC. In that case there is no application filed by the user.
This also means that the user upon using the transmitter has agreed to
the rules and regualtions covering the service opertinf in. Ignorance
ot he rules and laws is no acception. FRS and the CB band are inthat
ruling.

****
>One thing is different about it though. If someone does key the radio on 11
>meters it's a far cry from causing any physical harm. That is why the
>handgun analogy doesn't hold up.
>
****

In nearly all cases no physical harm is done inusing a legal or
illegal radio. Because no physical harm is done does that mean it is
not illegal operation?

An anolgy.
If you are driving on a road at say 2AM in the morning. There are no
other cars on the road. You come to a stop sign. If you do not stop
are you guilty of running a stop sign? If you did not stop was anyone
harmed?

****
>I'd think of operating those units on 11 meters more as a parking violation
>than I would a random shooting, that's for sure. Because after all it's the
>operator that is responsible. Granted the fine is astronomical in comparison
>to a parking violation, but my point remains no physical harm is done.
>
****

Correct in the analogyof the severity of the offense. It really is not
one for great detriment to national security and for what ever that
means. Your arguement is now more on the line of decriminalization.

****
>Now, as far as this Neo Fascist scare tactic.
>
****

The FCC must operate under the guidelines set down by legislation from
Congress. Do you now insist that Congrees is Neo-facists?

****
>If you've read down this far you'll notice that the subject of the message
>contains the word illegal.
>
>The sender chose that subject to instill a sense of fear. I read nowhere in
>that memo any thing about the radios being contra-band. It just states that
>they cannot be imported into the United States.
>
****
Actually I thought he posted it as information. I think in your
interpretation of his post is where the fear lies.

****
>For those of you not in the United States that have read down this far I
>humbly apologize for the length of this memo regarding this explanation. On
>the other hand you're probably laughing at the whole message thread.
>
>The HR2510 is not Contra-Band... You can own one, sell one, etc... Just
>don't operate it on 11 Meters!
>
****

Clearly you did not listen to well in your 6 th grade civics clas or
may have been absent at that time. As I stated earlier, the FCC was
given permission to regulate and control of the usage and
distributionof transmitters in the US back in 1934 by an Act of

Congress. It was called the Communications Act of 1934. Under the
guidance of Congress, the FCC interprets the derective and powers
given them by Congress. One of those basically made operating an
HR2510 illegal on the CB band well over 40 years ago. But to you that
maybe acient history and not relavent law.

****
>I would also recommend not parking in front of a fire hydrant, or exceeding
>local speed limits!
>
****

I would not either. You may never get caught but that does not remove
the consequences.

****
>I would suggest that as of this very moment they would indeed qualify as
>collectors items. Just like the 1957 Chevy, 1960 Cadillac Convertible,
>etc....
>
****

I suggest you follow what was taught in that 6th grade civics class,
if you were present. Write your congress person. You have the right to
submit legislation to change the laws. You will need to get at least
one congress person to sign on to the bill and have them persue it. It
seems that you are into de-criminalization of the violations of the CB
band. You are within your right to do so. As also your are in the
rioght to petition the FCC and Congress for consideration of your
concerns. Suggest that others who agree toyour position do like wise.
Jus twuit sitting here on this news group and bitch about it and call
anyone who disagrees with your position a facist.

****
>Anyone who owns one should realise the sudden increase in value due to this
>FCC Memo as there will be no more units coming into the United States
>anymore.
>
****

Yes maybe they will increase some. but eventually with time they will
fall to lesser values. Consioder this that after ten years, ,Uniden
and others no longer are required to supply parts for repair. Thirty
years for now a none working unit will be worth what a cupof coffee
costs now.

****
>And that's all there is to this tiny little matter blown completely out of
>proportion by the original poster who chose a subject in an attempt to scare
>you out of your radio.
>
****

I don't think that it was a scare as it was posted as information. You
seem to be propogating the scare.

****
>It was very well done... I'd almost regard it as New York Times Material...
>
>VOTE FOR GORE OR WE'RE GONNA STARVE!!! -- get real --
>
>Fear... If you can find the humor in it you'll realize why the bible refers
>to the devil as a prankster.
>
****

What has the bible have to do with radio?

Did not Jesus say render unto Ceasar that which is Ceasar's?

****
>I really wish these fascist scare tactic fear mongering dipshits like the
>guy who posted the original message in this thread would go find something
>else to scare. He'd probably have to resort to puppies, kids, and animals
>though... Nice Try!
>
****

What are you afraid of? DO you feel that because a law is not worth
adhereing to, you just ignore it?

The law says that I can not possess a nuclear bomb. I would sure feel
more comfortable having a 100megaton thermal nuclear weapon in my
basement. Take out a whole bunch of commie bastards shoule they come
and try and knock down my door.

Now how rediculaus does that sound? Haveing a 100 megaton thermal
nuclear device is own's gasement does no one harm until it goes off!

yep T -8 hours! I thought you went backwards in time. Should you have
meant T + 8 hours?

Finally I find your comments as humorous as you will find mine. See
that is the beauty of this forum. Chances are that this will do
anything to change your belief is at best a prayer. I think the Sun
burning out tomorrow has a better chance. SInce you had the right to
express your idealogy, I do express mine.

Thanks and have a nice day

james

Wanna tell me that in person? Doubtful. Big mouth? Not really. Just tell it like it is. Back it up? OMG! You have to be kidding, right? Actually, the way you look, my eleven year old daughter could smack you around. Of course, I'd never let that happen....I keep my kids away from convicted child molesters.

BTW, wanna send me some more mail and see sadie106@juno.com get yanked? You've already been spanked for spamming.

4920. Re: OT - Gasoline Info

Oh one of little knowledge and great ignorance:

It is admirable that the research you and your fellow individuals have done in this work. Have you failed to investigate the intertwineing of corporate ownership and who owns who? August 11-1998 BP and Amoco merged their operations together. BP also is the parent company of ARCO, Castrol Oil, Buy the way do you know who Amoco Oil is or was. It was a company started by some guy named John D Rockefeller. Standard Oil come to mind? Well BP owns Standard Oil Lock Stock and Barrel. While BP no longer drills or pumps oil in teh middle east,it's beginning were is a little country back in1901 called Persia. Now for those of you who failed geography and history, Persia's modern name is IRAN. Beside it was not until the late 80's that BP divested itself of Iranian Oil.

I could go on and on. I found this info in just an matter of ten minutes on the internet. Just researching BP's webpage. Who knows what I find if I look at other oil companies. Oh by the way, these companies aer also into petrochemicals. These are used to make medicines, clothing, lubricants, and plastics. Do you plan to boycott these? One more note. There has been no new refinery built in the US for 25 years. In the US there is now more importation of already refiined gasoline. Your post does not reflect who imports already refined gasoline or partially refined oil products. It deal strictly with crude oil.

The only company that might not be buying any products from the middle east would be Citgo. They are solely owned by the government of Venezuela. (PDVSA). Hess claims not to but they get oil from Indonesia. Oh buy the way Indonessia has the largest population of Moslems outside the middle east. And they do not like us!

So who do yo buy your clothes from?
Which brand of oil do you putin your car?
Do you buy your sodas in plastic bottles?
How about bottled water?
How about plastic containers for you liver pills or your high blood pressure pills?

I could go on and on. If you really want to boycot the Arabs then do some more research and don't be so high and mighty. Come back and tell me who profits fromarab Oil. I think wou will find not only the oil companies, but Dupont, GE, Dow Chemical, Ford, GM, and gosh the list goes on and on. Do you plan to boycott these?

You posted and some have answered your questions well. Again I echo some of those.

1) varialbe power will only allow you to conrol the power capable of the unit. Generally in used in decreasing the power out to prevent overdriving linear? amps.

2) Depending on the transistors used inteh amplifier train, it may or may not be possible to get more power out. While some radios have the last transisitor (final transistor) sufficient for greater output, teh driver stage and the predriver stage may not have sufficient gain to drive the final transistor to it's full capability.

3) gaining more that about one to three watts more output is most likey the best you will do with a Radio Shack unit.

4) doubling the output power will not double your transmit range.

5) To make a reasonable improvement in overcoming noise and skip, own needs to increase the power to 20 to 25 watts carrier. This generally will require major modificationof the RS unit.

6) After all that it is still illegal to do so.

7) my suggestion is to invest into a directional antenna. Quality feedline to the antenna and a rotor to turn the antenna.

I forgot to answer what a linear amp is.

well by strict interpretation it is an external amp that amplifies the signal from your radio. Linear is often defined as:

input times gain of the amplifer equals output. So look at a box that has what is called a goesinto and a goesouta.

What goes out is a linear function of what goes in. thus
one watts in 20 out
two watts in 40 out

so forth.

The amp is siad to have a gain of 20. An amp that had a function like this would be non linear:

one watts in 1 watts out
two watts in 4 watts out
three watts in 9 watts out
four watts in 16 watts out

this amp operates on the principle that the input is squared to get the output. This is not a linear function.

hope that helps and let the flames begin!

Shut da fuck up you dirty redneck muthafucka you!!
Go Suck Yo Momma's Cock likes you been doin' !
You still Ho'in?
I'll bust yo 'tarded asses!
Krazy Key Klowns -- KKK!!
Ya Klan luvin' bitches you!!
You takes them damn K-mart bedsheets off ya, an' gits yerself a black woman one night an' let her turn yer ass out!!
'Cause they beez-a-lookin' fo some white dick!!
Ya better knows that a black womans gonna "treat ya right"!!
She'll smacks da hell out you fo ruin'in her bed sheets after youz don' put roun' holes in dem.
THEN, she'll luv the hell out you all damn night.
She gonna starts off suckin's dat dick like nobody bizness but her owns!!
Den, she'll snatch off her bra so fast it'll burn yo eyes.
She'll beg youz to suck her big tit-tees and she'll ride you bare back like she beez on a horse or a mule.
She luvs doin' it snoop-doggie-dog style!
You's a-gonna be smilin' all yo lives!!!
Heeheeheeheeheee!!
LAWDY MERCY!! MMMMmmm!

(drinkin' ma fo'ty and smokin my blunts!!)

I have a NorthStar-3000 mobile forsale. Bought about a year ago. I still have the box for it. I lost the mounting bracket. Has the stock mic. Has Hi Med Lo switch. It will key about 2 watts on hi and swing 25 watts on hi. Has extra channels, just like the galaxy models, but its built into the dimmer switch. has dual echo controls. has talkback ONLY when echo switch is flipped on. This is a real nice sounding radio...looks and works like BRAND spanking new. I'll take $100 plus $15 for shipping...thanks for looking

Again, when one requests certain information be posted and one responds
in kind, it is not spam.

It is not your NG to request anything, perhaps a side deal you and Lou Franklin
have cooked up, but you in no way dictate what is spam because you requested
it. If he loses his isp because of it will you tell them you requested it?

And right back at you! Merry Christmas and a safe and happy new year to all! We are going to get a white Christmas this year (a couple of inches of snow today and it should remain below freezing). Crazy weather in the North. I talked with a couple of folks from Quesnel, British Columbia, and one guy says he may mow his lawn on Christmas (!). (used to be it would be 40 below for a couple of weeks up there). Either it's global warming or too many guys are running footwarmers .... ;)

73 from Rochester, NY
Jim

White people have a saying, " if you're white, you're right "

Does this mean that if I'm black I'm wrong?

What if I'm half black and half white, does this make me
half wrong or half right?

30 year old Tech stuff..... Golleeeeeeeeeeee
Used this stuff in most VHF rigs of yesteryear tuning the front ends.
Pace marine radios used 'em extensively. RCI started using 'em
~5 years ago and its brand new tech...man.

Get into some modern tech SS DDS DSP or get left behind!
Somebody get this guy up to speed!

Could you please state us the law which says it is a violation of the law to possess a modified radio of any sort. Please do some research chunks and find this for us since you claim to be a legal scholar. Furthermore, if that is the case then there are thousands if not millions of people in violation. Not to mention the multitiudes of others who own amateur rigs without licenses. Not in my case since I have an amateur license, but I know there are others out there who do so because any monitoring of freeband using a shortwave receiver will turn up conversations of people using rigs such as Yaesu, Kenwood, RCI 2950, ETC. Please show us the justification for your comments.

4960. OT - WINDOWS 2000 TENNESSEE

Newsgroup: rec.radio.cb
Date: 2002-12-24 15:00:38 UTC
From: Keith Hosman <arcweb@bnnorth.net>
Message-ID: <6G_N9.3852$37.416866@cletus.bright.net>
Source record: 147496

Dear Consumers:

It has come to our attention that a few copies of the WINDOWS 2000 TENNESSEE EDITION may have accidentally been shipped outside of the STATE of TENNESSEE.

If you have one of these, you may need help understanding the commands. The TENNESSEE EDITION may be recognized by the unique opening screen. It reads: WINDERS 2000, with a background picture of Willie Nelson superimposed on a bottle of Jack Daniels.

Please also note:

The Recycle Bin is labeled "Outhouse"
My Computer is called "This Dern Contraption"
Dial Up Networking is called "Good Ol' Boys"
Control Panel is known as "The Dashboard"
Hard Drive is referred to as "4-Wheel Drive" Floppies are "Them little ol'plastic thangs"
Instead of an error message, "Duct Tape" pops up

CHANGES IN TERMINOLOGY IN TENNESSEE EDITION:

Cancel.....stopdat
Reset.....try 'er agin
Yes.....yep
No.....nope
Find.....hunt fer it
Go to.....over yonder
Back.....back yonder
Help.....hep me out here
Stop.....kwitit (WHOA!)
Start.....crank 'er up
Settings.....settins
Programs.....stuff at duz stuff
Documents.....stuff ah done did

Also note that the TENNESSEE EDITION does not recognize capital letters or punctuation marks.

Some programs that are exclusive to WINDERS 2000:

Tiperiter - a word processing program
Colerin' Book - a graphics program
Cyferin' Mersheen - calculator
Outhouse Paper - notepad
Inner-net - Microsoft explorer 5.0

Pitchers - a graphics viewer

We regret any inconvenience this may have caused. If you received a copy of
the
TENNESSEE EDITION, you may return it to Microsoft for a replacement version.

I hope this helps all y'all!

Billy Bob Gates

Again, when one requests certain information be posted and one responds
in kind, it is not spam.

>It is not your NG to request anything,

I know it's a great difficulty for you to remain on topic and not become
personal and befuddled by your limited attention span.The topic was
spam, not your deflated and threatened ego. Your assumptions that others
are of the control and power-hungry nature that you selfish few lids
share is incorrect.

>perhaps a side deal you and Lou Franklin >have cooked up, but you in no
way dictate >what is spam because you requested it.

I most certainly do, as valid as you claiming the opposite. This is a
public newsgroup and if one requests it and it is pertinent to the topic
and the room title, calling it spam is merely another personal problem
manifesting from the stink holes we have become familiar with that
accompanies you and your ilk.

>If he loses his isp because of it will you tell >them you requested it?

Why does a troubled hammie like yourself overly concern himself with the
personal lives of cbers?.

Damn! Chunks , You ruined My Christmas spirit .
I was so hoping to see a final suicide letter from You.
It's not too late though, Why don't You get Yourself one of those 357 mag's and crawl Yourself up in a sewer drainage ditch and blow Your fucking brains out .
This way if Your ever found , The police wouldn't be able to recognize You as a person but will see You as the piece of shit that You really are .
Chunk I could honestly say that by reading Your post's that I don't like You.
It's easy to see that You dad fucked You mother in the ass to make You .
That's right Your a asshole baby.
So with that now being known Chunks , Fuck You and fuck the motherfucker that fucked to get You here .
And to all the rest of You on this NG
Merry Christmas
Happy Quanza
Falis Navida
Happy Hanukah
Good Ramadan
In Your prayers this Holiday Season , Please remember the Men and Women in Our armed forces that are at the mercy of Our Government to keep this Country free from scum like Chunk's

I have the instruction sheet to unblock the BC200XLT. It came with my radio when I purchased it new. Now this was back in the mid 1980s and i don't know if radios manufactured after that can even be modified. All I can say is my radio works great and picks up the full 800 MHz range. I am not sure what the difference is between the 245XLT and the 200XLT but I have to say my BC200XLT performs as good as any new scanner I have tried recently. If you feel the modification sheet for my radio (BC200XLT) could help you let me know and I will fax it to you, Teddy in Vermont

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitterwith at least 100 watts out and receiver. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer)
I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2

meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that
I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading
Happy Holidays
73 Oris

Peaking a radio is a waste of money. The tiny increase in power output you get isn't noticeable.

>Another question I have is what
>is a linear amplifier and how is it installed. Maybe that is what i
>need. Thank all and Merry Xmass,

Just get used to the noise level. Every additional illegal amplifier that is put on the air just raises the "background noise" for somebody else. They in turn then want an amplifier, which just raises the "background noise" for you. Then you want more power etc., and the cycle never ends. Before you know it you are just another one of those ridiculous CBers who needs 100's of watts to talk to the guy a mile away. The only really sensible thing is not to use one. Besides using an amp on AM is a big waste of money anyway.

I would consider using a SSB set and would encourage everyone else to use one as well. On SSB there are no heterodyne squeals to put up with, except from other AM stations, and the effective range is better due to better use of the available power, 12 watts PEP.

For example a 50 watt amplifier can only put out 33.33 watts dead key, i.e. carrier power, with the head room difference being in the two side bands, for 16.67 watts under 100 percent modulation. That works out to only 8.33 watts per side band, which is only half of what you get with a legal SSB CB radio. Yup most of the big power ends up in the carrier, which does NOTHING to convey information, and just makes the "S meter" swing up higher at the other end, thus greatly increasing the noise level on the channel. All the audio information is in the sidebands, and you only need one of those to communicate.

Finally if you just want to communicate with a few friends around town then consider the other two CB bands, yes there is more than just one. There is the UHF CB band where people use FRS radios, and the VHF band where you can use radios up to 2 watts. You can buy the radios at Radio Shack and several other places. If you know the right people you can even buy a used VHF businesses band radio for a few bucks and have

it reprogrammed with the MURS frequencies in it.

leland are you drunk on christmas eve?!?!?

>due to better use of the available power, 12 watts PEP.
>
>For example a 50 watt amplifier can only put out 33.33 watts dead key,
>i.e. carrier power, with the head room difference being in the two
>side bands, for 16.67 watts under 100 percent modulation. That works
>out to only 8.33 watts per side band, which is only half of what you
>get with a legal SSB CB radio. Yup most of the big power ends up in
>the carrier, which does NOTHING to convey information, and just makes
>the "S meter" swing up higher at the other end, thus greatly
>increasing the noise level on the channel. All the audio information
>is in the sidebands, and you only need one of those to communicate.

4996. Merry Xmas

Yep, it is. I sold my 1st base station in years last week. Early 80's Stalker 12. Mint shape, LN. Also sold same guy bought a Starduster a month ago. Looks like a sign that CB, if not Base Stations are picking up, after many years of slumps. Anyone anywhere else noticing sales improving or more people on Bases?
Dave!

5005. Last weeks Wall St. Journal article on CHINA !

Newsgroup: rec.radio.cb
Date: 2002-12-25 01:52:43 UTC
From: Dave or Debby <truth@NOSPAMplanetc.com>
Message-ID: <3e090f2c$1_2@corp.newsgroups.com>
Source record: 147541

Last week, probably between the 16th and the 20th, there was an article in that paper on one of the front sections of the paper (front page of a section) that told about what happened to a Shoe company that was making shoes in China (New Balence I think).

Dig this article up and read it, because in it has what I had been thinking for years would happen--the people WITHIN the company made shoes outside the company's authority, and sold them FOR LESS. It said that the chinese courts are SLOW (opposite of what is Biblical) and that the company could do little about it. These lower cost shoes were being sold WorldWide ! So what you have are Communist Chinese THIEVES, along with Taiwan thieves, that are ripping off companies! It even talked about P&G soap bottles that were sold and bogus soap put in them! It talked about companies that stayed away from China, so that trade secrets were not given out so more of this doesn't go on! SO, DO NOT buy CB's or any electronics made in CHINA ! Dave!!!!!!!!!!!!!!!!!!!!!!!!!! (Cobra, Rat Shack,) ... !

I know a local shop has been selling more, and I know a bunch of guys
that are looking for older base radios, you know, when they were still
made with good american quality. I miss the old days with good quality
radios and good quality antennas unlike the crap they have these days
for the most part.

Have a safe and happy holiday

5013. Expanding Channels On CB Radio And Getting My Ham Ticket

Newsgroup: rec.radio.cb
Date: 2002-12-25 05:54:57 UTC
From: johnnycat89@hotmail.com
Message-ID: <26007-3E094831-533@storefull-2335.public.lawson.webtv.net>
Source record: 147550

I see posts on the CB news groups about people wanting to expand
the number of channels (more than 40) and expanding the CB frequencies.
What I don't understand is there seems to be plenty of room now with
unused channels so why the need for more. I am also curious why people
want 27.420 MHz - 27.860. Another question I have is the talk amongst
the CBers about the frequency of 27.555MHz. Why the preoccupation
with that frequency. Also I am in the process of becoming a Ham
and I don't understand thier snobbery. It's like overnight when rthey
get thier ham license us CBer's are nothing more than low life trailer
trash in thier eyes.
Granted the studying is difficult and one needs to learn a good ammount
of technical knowledge to get thier ham license but when I get my ham
ticket I will not look down on CB operators. Lets face it it is where
most of us got our feet wet. There are plenty of jerk CB operators that
act downright infantile which I will not miss. I have to say from
monitorinng the ham bands they have jerks there also even on the upper
levels but there are less. I am going to get my tech no code ham license
to start and am very very excited about it. I will be taking my test in
a month or so and hope I pass it. Are thier any Hams here?
Just curious. Merry XMass and Happy New 2003 !!!

I believe that article came out on the December 19th edition of the Journal.
I recall an amateur radio operator mention it.

They're = contraction of they are
there = opposite of here
their = belonging to (possessive form)

OK. Now that that's out of the way:

I my 25 years of CBing, I have never heard one CBer get their ticket
and stay the same person. No matter how sincere they are about being
the same, they never succeed. You can be a dual operator. Many do it
just fine. Others come back and talk bad about CB and then they are
heard on 2 meters trashing CB big time. They wonder why the only-CBers
don't answer them. Email and phone calls sure deflate their sails,
soon only the hams will talk to them. Unfortunately, this tends to
ruin the club somewhat. Attitude is everything.

I remain a CBer and a CBer only. Watch the nocodes continue to
spread disinformation. There are 2 on this NG that spew bad info.

Good luck and happy hamming.

I had this guy play some sort of game with me on ebay. Really a strange dude. I bought some little 10m amps at a garage sale and have had them a while. I thought I would put them on ebay. Just to get rid of them. This guy turns me in. THEN HE SENDS ME SOME OFF THE WALL CHILDISH EMAIL!! Tells me he is turning me in to the FCC. Look at his call sign in the www.qrz.com Look at his little 706 and the weird keyclown stuff. WEIRD GUY..

Thanks

Steve

-You kinda infer that this wouldn't happen in the US. Sorta like hiring a
tech and he/she does cb work on the side using your equipment. It doesn't
matter where things are made. You have thieves all over the place. Doesn't
matter what their nationality.

Crack the cases on that there computer your using and see if it hasn't got
foreign made parts in it.

You can't afford to buy American made stuff. Most American manufactures
can't afford not to buy the foreign made parts and accessories either.

You amaze me sometimes at your proliferation of ill comments and then infer that you may be a Christian? Look at Enron.

If there was a little more positivity and less negativity there just may be happier people. So surround yourself with positive people. If it makes you happy not to use or buy foreign made products then throw it all out. Someone else will be glad to pick it up and get the offensive little buggers out of your way.

Happy Holidays and God Bless you.

Deb

First off, Merry Christmas.

Secondly, HAM, CB'er, it doesn't matter. Either you're an asshole, or you're not. Doesn't matter what your hobby is, doesn't matter whether you have a ticket or not. (Chuck and Doug have proved this.) If you're an asshole, you're an asshole.

Mopar, thanks for the compliment, but the fact that I'm a HAM has nothing to do with it. Not to mention it being off topic. ::snicker::

Have a good one.

I wish you the best of luck...
I used to drive a "big truck" and CB'ed all the time I now have a ham license and do CB every so often (no longer driving a semi ...but like to tell drivers hi.) I don't understand the snobbery either- I don't do code so I am a half breed ham... But it is nice to have extra freq's, bigger equipment and areas to talk without fear. To me the biggest thrill as a ham was talking to the international space station crew. You will learn in the ham's they are a bunch of "good ole boys" that sometimes tolerate the "new kids" but still want the code test and snobery. It's not right but there are more of them than us no coders right now.

To the CB'ers
Don't let the bears bite your butts - this is the Tazmanian Terminator 'terminating miles with extreme prejudice' WE GONE ....

to the ham's
KB9YMX - out

I miss the good old days of CB'ing and it's been many years since I was active in the hobby. There was something about having a huge chunk of American Made Steel loaded with Vacuum Tubes that made the hobby so much more enjoyable. Even with the later solid state or hybrid radios such as the Brownings, Trams, Sonars it was great. My first solid state radio was a SBE Console II and it kicked butt for the time. We didn't need hundreds of watts, I spoke to all 48 Continental US States and better than twenty countries with 12 Watts of PEP Power and a cheap 3 element vertical beam.

No I dont they just a garage sale thing.. I had 4 and sold all of them before ebay took it down. I am a ham and still have one I use on 10m. I had to retap the tank but it does about 150 with my 2600 president. They were little varmit xl50 amps I also had a 1.5 KW , 400 cw txmiter and a xl 150 I sold one a while back and the others floated to fellow hams.. I picked a few CBs up too.. $50 for the entire lot. This guy must have had a CB store or something. It was radio equipment and I got gaga over it as I do with anything that transmits... ... I just thought it as strange this guy really went after me like that. I got this radio.cb NG site from his QRZ site... He mentions this NG on there. I see he has a lot of friends :-)... Im not worried about it, it was as I said a very weird deal for me... Ive never had anyone spam me from ebay like that.

Thanks and have a VERY MERRY XMAS!!

Steve

Well what you consider Spam is of no regard mopar, you need to look at the FAQ for the NG. Thats why rec.radio.swap was made to sell things. read the faq and then tell me what the originators of this group had in mind.

Just a friendly tip from one who has "been there and done that," albeit w/an
AR-3500. Grab a nice low pass filter (Bencher) and use premium quality coax.
(Bury-Flex from Davis RF) Good luck and happy holidays.

Right, a self-proclaimed ham who is afraid
to post his CALL LETTERS in a cb newsgroup.

That is of course, he actually is a ham which I doubt.

Wonder what callsign a CB'er gives when calling AES
or HRO? K4DUMSHIT?

"sideband" <> wrote in message

From: Jim Hampton <aa2qa@frontiernet.net>
Message-ID: <v0k7e5ovqmih90@corp.supernews.com>
Source record: 147589

There was an interesting article posted on our bulletin board at work (we are closing as all production is moving to China). Seems some companies have had problems. Extra molds are made in China. Suddenly, a knock off of the product appears on the marked. Same dimensions, same specs ... now the factory makes some of the stuff for the original manufacturer and some of it is made to be sold under a different name at lower prices. What goes around ....

73 from Rochester, NY
Jim
ps - anyone need some snow? Free ... just come and haul it away ;) .... 8 inches in 7 hours .... now I've shoveled again as another 2 inches have fallen ... now another 6 to 8 are predicted .....

Yep, and not all the old timers are quite as bad as you may think. You can have a lot of fun with the no code tech ticket - consider using an internet linked repeater ... you can talk with friends all over the world at any time so long as you both are up and about. You also needn't throw away the cb gear. There are no sanity tests for either amateur or cb operators, so expect to meet a few loose cannons along the way. Say, you need any snow? Free. Just come and pick it up. Please. 8 inches this morning and I shoveled at around 11:00 AM. Just shoveled again 2 hours ago and it's coming down like crazy. Another 6 to 8 inches predicted. About this time I'd even welcome a shoot out so long as they can guarantee melting a few inches of this danged white stuff!
;)

73 and Merry Christmas from Rochester, NY

Unless they're homebrewed, they're illegal. Manufacturers are
restricted from making amps that are 10m capable out of the box, and I
don't believe one single manufactuer makes a 10m only amp. If you look
up all band HF amps, they come without 15/12/10 meters enabled, but
they will provide you with directions on getting them on those bands.
Sell 'em on Yahoo auctions. They don't care what you sell there. :)

Points made below each comment !
Dave!

"DLHicks" <dlynnhicks@mchsi.com> wrote in message
news:IXhO9.456226$WL3.124402@rwcrnsc54...

> -You kinda infer that this wouldn't happen in the US.

No, but OUR court system would STOP this kind of thievery, where
China's communist court system doesn't do much about it. (OUR meaning the
Western world).

Sorta like hiring a
> tech and he/she does cb work on the side using your equipment. It doesn't
> matter where things are made.

YES IT DOES. Do YOU sell NEW Cobra CB's--YOU support communist
China, which is NOT Christian, but persecutes Christians! The Chinese Govt.
is as wicked as HELL !

You have thieves all over the place. Doesn't
> matter what their nationality.

And a lot of them are CB shops, which gives us GOOD ones a bad name,
unfortunately!

>
> Crack the cases on that there computer your using and see if it hasn't
got

Sorry--I don't DO crack ! I can't "crack" them! I have made them,
and expressed my disgust to by brother the computer engineer, and advised
him to buy non-China made stuff instead. But sometimes we are forced to !

> foreign made parts in it.
>
> You can't afford to buy American made stuff. Most American manufactures
> can't afford not to buy the foreign made parts and accessories either.

(that's because of the Deut. 28 mess we are in now. The Government
and Fed. Reserve System has made THIS happen)!

>
> You amaze me sometimes at your proliferation of ill comments and then
infer

Yes, YOU CB Shops that sell NEW CB's made in RED Communist Murderer
China DOES made me Ill. I get ANGRY, like an Angry White man, but I don't

sin, pursuant to Scriptures.

> that you may be a Christian?

I am. I keep God's Commandments and Believe THE Gospel, and
encourage others to do so too. Pointing out wickedness and exposing SIN
does NOT make me a "lesser" Christian! It is what the Holy Spirit's JOB is
!

Look at Enron.

Mostly Liberals look @ Enron. It is just the tip of the iceberg. IF
you looked at what the Federal Reserve System does to us, you wouldn't even
open your mouth of such sins the corporations do such as enron! BIGGER
things are going on they don't want YOU to know about! So they get you to
look @ Enron, when they are doing much worse other places!

>
> If there was a little more positivity and less negativity there just may
be
> happier people. So surround yourself with positive people.

Are you part of the "positive gospel" people? I AM Positive! Don't
worry--Bee Happy IS a lie ! You need to listen to 5070 SW on Sat. PM @ 8 or
Sun. @ 10pm. Then maybe The Lord will WAKE you UP !

If it makes you
> happy not to use or buy foreign made products then throw it all out.

I didn't SAY that ! We are forced pursuant in the Deut. 28
country we are in to buy foreign items, especially in the CB world since '76
or before. We still NOW have a CHOICE to NOT buy RED CHINA CB's ! IF you
ARE an American, you WON'T buy NEW CB's made in CHINA for resale! UNIDEN is
better! The Phillipinos still love Macarthur! So do I !

> Someone else will be glad to pick it up and get the offensive little
buggers
> out of your way.

No, I have been personally responsible for diverting thousands of $$$$
away from RED CHINA (our ENEMY) by not having people buy Cobra CB's. Would
you buy North Korea CB's too?!

>
> Happy Holidays and God Bless you.
>
> Deb

Happy Saturnalia to you too; and HE DOES, because I KEEP HIS
Commandments. Remember, it's NOT "God Bless America," but AMERICA BLESS
GOD ! God cannot nor will Bless a wicked, reprobate, Jesus Christ of
Nazareth (God in the flesh) HATING America !
Dave!!

> leland are you drunk on christmas eve?!?!?

No, but there is nothing wrong with the figures I provided. Look up in any electronics text that covers AM modulation. You'll find that the additional power required for one hundred percent sinewave modulation requires 50 percent more than the carrier power. The extra power is split evenly between the two sidebands.

Don't you think its a weird coincident that all your cheap AM CBs, with a 4 watt output, all happen to have a 2 to 2.5 watt audio rating? The audio amp is used to modulate the class "C" output stage used in those radios. The audio amp does double duty to save money. Using the figures above would require a two watt audio level modulator to supply the sideband power.

For more proof see the ARRL Handbook for Radio Communications, the 2003 edition, page 15.6 upper left hand corner. They use the exact same figures. For those who understand a bit of trig they can read the first several sections to chapter 15 that explaines what AM modulation is, and the how and why of where all the power goes. I suggest that you read it before responding.

You may not like the numbers Tim, but the theory has been around since nearly the beginning of the last century. For somebody who likes to pass themselves off as some kind of CB tech guru I'm surprised you would even question something this simple. Seems to me you don't know as much as you claim.

Did you read the section in Part 97 that covers the markting and sale of HF amps? If not then you should. That would answer some of your questions about N8 alone.

I do think your a little high, I see them used
depending on condition for between $85 to $175, so
IMHO your a little high, but hey, Best Offer?

Well.. Ill say this.. These amp I had were so old I doubt if any 97 rules applied then.. I would say these were pre 40 channel and a couple of them had 1978 and 1972 news papers around the tubes. But who knows.. NOT ME.. One time deal and they are gone now..

Thanks for the input..

Steve

PS.. Why the heck do hams even get on this board? Don't they have their own message boards?? Are they like the NATO of the News Groups and the air waves?? I would think they would be listening to the air waves and checking message boards for the TERRORISTS Like I told this N8WWM guy.. '' With our nation on the brink of war.. Why are you worried about some CB amp? Focus your tome on something really productive. If the FCC and ARRL really gave a crap they would never had released these 2m 5 wpm BASICALLY ANAL CBers on the HF bands.. AND hell we are all in a world of hurt if these guys that cant even pass 5wpm are running around policing ebay , News Groups and the airwaves. They are like small city cops.. NOT GOOD ENOUGH FOR THE BIG CITY so THEY FEEL THEY HAVE TO PUT THE ATTITUDE ON FOR THE PIG FARMER and MAKE LIFE MISERABLE FOR ANYONE THEY COME IN CONTACT WITH... This N8WWM guy has been a TECH for nearly 10 years. Obviously a few bricks shy of a full load. JUST MY OPINION THOUGH!!

Oh thou high and mighty

it was not about Arab Christians or Christians or Arabs. It was just
about gthe facts posted in the original post. IF one rally wants to
boycott Arab oil one needs to think of where almost half the barrel of
oil goes to. Not gasoline! At best a 55 gallon barrel of crude oil
will produce 30 to 39 gallons of gasoline. Some may only produce as
much as 20 gallons. The rest goes for the making of petro chemical
products such as plastic food containers, nylon hose and clothing
products, paint thinners, medical components, and many others. So to
do a decent boycott of Arab oil,one must not just include gasoline.
Gasoline today is only about half of the profits of the oil company.

I just thought it as strange this guy
really went after me like that. I got this radio.cb NG site from his QRZ
site... He mentions this NG on there. I see he has a lot of friends
:-)...
Im not worried about it, it was as I said a very weird deal for me...
Ive never had anyone spam me from ebay like that.
--
Did you read the section in Part 97 that covers the markting and sale of
HF amps? If not then you should. That would answer some of your
questions about N8 alone.
Leland C. Scott
KC8LDO
--

Ha! Lelnad, no section concerning the FCC answers for N8 the potty
mouth. But the line uttered below answers all the questions anyone may
ever have concerning the troublemaing lids on this group and you're at
the top. Back under your bridge. And stop drinking that cheap liquor and
trying to key....you're embarrassing the entire state of Michigan.
--

"Aaron H. Voobner"
If you got rid of me, you'd still have Sparky, Leland, George, Doug,
Dave Hall, and many others to contend with. -A

Well.. Ill say this.. These amp I had were so old I doubt if any 97
rules applied then.. I would say these were pre 40 channel and a couple
of them had 1978 and 1972 news papers around the tubes. But who knows..
NOT ME.. One time deal and they are gone now..
Thanks for the input..
Steve
PS.. Why the heck do hams even get on this board? Don't they have their
own message boards?? Are they like the NATO of the News Groups and the
air waves?? I would think they would be listening to the air waves and
checking message boards for the TERRORISTS Like I told this N8WWM guy..
''

--

(chuckle)..These you speak of are part of N8's "fun". Several, like N8,
Lelnad, Hall and Gilliland come here because they were blacklisted and
rejected by hammies,,,,it is apparently and painfully obvious *why* this
occurred to all but themselves.
A few, like N8 and Lelnad, had their clocks cleaned a few years ago so
bad by a couple of cbers in here that they were scarred for life with a
damaged ego and have actually pledged to remain here and share with the
world their lack of intellect. The embarrassment felt by them has lasted
a little over 2 years. What you see now is the result of what they have
been reduced to...mere leftovers and fodder to enjoy or not whenever we
choose..the choice is clearly ours and has been for quite some time.

--
>With our nation on the brink of war.. Why are >you worried about some
CB amp? Focus >your tome on something really productive.

To Lelnad and N8, this IS the extent of their production. They were
embarrassed so bad by hammies and bers alike, cbers are ALL they think
of. Couple this with the fact that Lelnad claims to not only not use a
cb but not own one as well, and the sheer importance he lends to us in
the scope of his pathetic and mundane life is illustrated.

>If the FCC and ARRL really gave a crap they >would never had released
these 2m 5 wpm >BASICALLY ANAL CBers on the HF bands..

The FCC doesn't care. Riley himself said these type are actually a
larger problem than
many of the violators..

>AND hell we are all in a world of hurt if these >guys that cant even
pass 5wpm are running >around policing ebay , News Groups and the

>airwaves. They are like small city cops.. NOT >GOOD ENOUGH FOR THE BIG CITY so >THEY FEEL THEY HAVE TO PUT THE >ATTITUDE ON FOR THE PIG FARMER and >MAKE LIFE MISERABLE FOR ANYONE >THEY COME IN CONTACT WITH...

BINGO...they were black-balled and rejected by the hammies turning their malice on others. It temporarily feeds their damaged egos to spew venom toward another unprovoked.

>This N8WWM guy has been a TECH for >nearly 10 years.

A "lifer" tech. Dogie couldn't even pass that test again if he had to.

>Obviously a few bricks shy of a full load. JUST >MY OPINION THOUGH!!

Didn't take you long.,,but then again, it ain't hard to distinguish those that walk on all fours.

Nope. Done it many times without any problems.
Lip mount or through the metal type?
with the latter, you can use heavier antennas.
if the former, you may want to buy a small spring mount for the antenna.
and if you go into car washes, they may have you remove it.

Man, Do you know what my Uniden rep just told me?

Uniden is made in China and Japan. More China. Darn.

I guess they are coming from the same plant as Cobra. Darn.

No wonder the parts inside them look alike. Darn. Now what are we going to sell.

Accuse me of anything you want and you may be wrong or right. I am not
the issue, twithed. The issue is the criminality of selling amps for
CB or freeband use. It is illegal and you can never change that.

There is a variable in accusing me of something...I may or may not
have done it. There is no variable at all in the statement that amps
are illegal on CB. All of you fluffy poodle like yapping can't change
that. Don't it suck that you have no legs to stand on?

Back to your glory hole, twithed. There's a line of truckers just a
waitin'.

Message-ID: <VIIO9.114$iE4.8894@eagle.america.net>
Source record: 147658

To the best of my knowledge what I am going to say is true, and forgive me if I am wrong, but:

1- The RCI-2950 is an Amateur radio, not a CB.
2- If it receives CB frequencies it has been modified and is illegal to operate on CB because of power output
3- If you operate it on any frequency other than the Amateur frequencies that it was originally intended to use and you do not have an amateur license, you are violating the law
4- If caught, you can be fined and any fine is too much to pay for being uninformed

If all you want is a standard CB, you can find them easily
If you want an export type CB, they are also easy to find but illegal to operate. You can own them, but you're not supposed to use them, but as the old saying goes.. "A lot fo people are doing it"
If you are a CBer who wants to move into the Amateur radio world, I wish you the best because I started in CB when I was 13 with an old Radio Shack base unit and after many years of putting it off for various reason I finally got my Ham ticket

5124. Radio gear 4 Trade

Newsgroup: rec.radio.cb
Date: 2002-12-26 19:40:30 UTC
From: Oris <orisnospam@dirtball.com>
Message-ID: <3E0B5B09.5040903@dirtball.com>
Source record: 147660

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. In the deal you will get the technical supplement too (AKA Service manual), as well as the owners manual. I also Have the 3 kW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000. I have been using the FT 920 as a backup rig. Drop me a line so we can work out a deal.
oris@dirtball.com
I have a Icom ICR71A Shortwave receiver that I will trade for a working DX 100 and SX 300 or Hamuland HQ 110. I'm looking for a good AM Ham station. I will trade this Receiver for a good working AM station. I want both transmitterwith at least 100 watts out and receiver. I hope to find something to work with my Audio rack.
I also have a Henry Amp 2 KD 5 Desktop, (It needs a new Plate amp meter) two 3-500s 100 in will give you 1250 out, New Caps, that I will trade for a Globe King or full legal output Ham band AM transmitter. this is a pickup trade only. I will be willing to travel 100 miles from Athens GA.
I also have a Hallicrafters S 38 C Shortwave receiver. Its in great shape. It works but I have no idea what its worth. It is a old old receiver. (Make Offer)
I have a MFJ Versa Tuner II and a Roadtalker 40-channel sideband CB radio that somebody converted to 10 meters. It works quite well. I talked to a guy in South America on it. (Make Offer)
I also have a CBS 1000 transceiver. 25 MHz to 29.795 MHz. In 10 kHz steps. I got it at a hamfest in Georgia. I'll trade it for a SX 300 or NC 300 HQ 110 HQ 170 HQ 200 or similar HF receiver.
I have a Kenwood TM-2530A that I used as a 2 meter packet station. It needs a Mic and the light that lights up the liquid quartz dial. The radio works fine and is in good shape. I looking for a good AM transmitter.
I have a Kenwood TR 7850 This radio I used as the BBS access on 2 meters. It needs a Mic and needs a new lithium battery backup. I turn the radio off and back on it forgets where it was and defaults to 144.000Mhz. Other than that the radio works fine. I want a working AM transmitter.
I have a Kenwood TM 201a. I used this 2 meter radio as sat transmitter. I worked Mirror before it came down. It Needs allot of work. It needs a dial. The Freq. read out is all screwed up. This is a fixerupper. It receives fine and transmits fine. It needs a mic too I will though this in too with either one of the above 2 meter rigs
I have a Versa Tuner II 949c and a Palomar PT 340 tuner tuner that I would through in too with either one of the above 2 meter rigs. I also Have a Kenwood KDC 1011 mobile CD player that has the plugs set up for a the older fords. I will through it in too with either one of the above 2

meter rigs.
I also have a Behringer Ultra Graph Pro GEQ 3102 31 band equalizer that
I will through it in too with either one of the above 2 meter rigs.
Hey thanks for reading
Happy Holidays

This post is off topic and contains foul language.
Complaint of abuse sent to Yahoo, yet again...
Fun being anal, isnt it. Happy new Year !

P.S. By the way, the Asatic Final Edition Silver Eagle microphone in the display case was a great gift i got this year ! Just to keep my posting on topic, of course

Damn! Sorry I missed a chance at them! I think Cb band should go back to the hams and the truckers should move to FRS and all non licensed folks that are left on 11-meters should be allowed to use their CB radios as a Noclass ham ticket. Thus the 150 mile rule would be history and type acceptance could be thrown out the window! and we would have added over 4 million people to the ranks of amateur radio. Wouldn't it be nice to call how bout it skipland and it be legal?
That is my opinion!
happy new year

From: Oris <orisnospam@dirtball.com>
Message-ID: <3E0B7E9F.101@dirtball.com>
Source record: 147666

Adrian
I have 20 grand in ham radio gear and I have 300 bucs in CB gear and most of the time I have more fun with the CB gear. Most Hams are anal, stuff shirts. When you get your ticket I say my hat is off and I glad you did it. I am happy that I got mine. Don't get me wrong ham radio is fun. I will say this be prepared to were thick skin. That bunch on 75-80 meters are hard to get in with. The whole band is filled up with clicks. The AMers on 3.885 and above 29 Mhz can be allot of fun. They are also allot more friendlier than allot of the SSB operators up and down the band. Allot of Hams are real Anal because they took a test and passed. So they feel that they are of a elite class. Allot of them came from the ranks of CB and wanted to shoot skip legally. I myself fall into that group. That is the reason I got my ham ticket. Although I will say "how bout it skip land" or "how bout it DX land" is a whole lot more fun then calling CQ. I think that the ham radio group is afraid that some of the discipline that is in ham radio would be lost if the FCC continues to make it easier to be a ham radio operator. For those reasons I think that the 11 meter band should go back to Ham radio but it should be a free for all band. The USA is supposed to be a free place to live so the free band should be kept FREE! As far as expanding channels go for it. I would gladly give up 220 Mhz for 11 meters. 25 Mhz to 28 Mhz
A slot for the No Class ham operator. I'm sorry the free class amateur radio ticket. Why not its what most of us want anyway. It all ready a can of worms! Change no matter how radical can only make it better.

73 Oris

A+ condition AH-100 handheld 10 and 11 meter radio with am and upper and lower sideband! a neat and rare radio as it is not made anymore. Many companies offer accessories yet tho. It comes with the box, owners manual antenna car kit, export conversion, and its the upgraded version so it has the recharge batt. pack and charger.
Its a neat and obscure radio for the hobby as it is hand held with a digital display. When converted with car kit its about the size of a cig. pack!!

Ive actually worked DX on it to Chicago- about 450 miles away. Unit will run aan amp as well. It only has about 3 hours on it.

$210 shipped in the US!

Best of DX all!

Daniel

Daniel,

I want to buy your radio. Please ship it to me
for inspection and if it checks out ok, I'll send you a
money order ok?

5146. Uniden CB's are NOT made in China !

Newsgroup: rec.radio.cb
Date: 2002-12-27 01:37:05 UTC
From: Dave or Debby <truth@NOSPAMplanetc.com>
Message-ID: <3e0bae7d_3@corp.newsgroups.com>

```
YOU tell her Mr. Wesser ! YOU is da MAN !
To the blind, everything is from China!
First of all, there are NO "Uniden Reps." I haven't seen one since the
early 80's under the President series. I still have his card. He got me a
President Clock! And you're right, Mr. Wesser, there IS a DIFFERENCE from
the Phillipine Uniden CB's when you look inside them, as compared to the
JUNK COBRA Made in CHINA TRASH CB's. But the dollar signs and Cobra DRUGS
she is on, plus the brainwashing, plus her low tech ability (maybe she don't
know HOW TO open a CB), doesn't let her see THE BIG Difference in the
radios. She must be on some HEAVY DRUGS to see that the word PHILLIPINES
looks like the word CHINA ! Plus Cobras break down more because of the
SLAVE LABOR manufacturing that is done when they are made. The Unidens
smell & reak of QUALITY; the Cobras of tech DOGGY TRASH ! ANY CB Shop that
would sell brand new Cobra CB's made in China is NOT an American CB shop !
They have sold you out to the Murderous RED CHINESE ! LA will HATE you one
day, when they are hit by China! I keep $$$ out of their hands so the day
will be delayed for you left coast pinkos! They WILL BURY you !
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

> > Man, Do you know what my Uniden rep just told me?

There are NO "Uniden Reps.", especially YOUR Uniden Rep. You just talked to a Distributor that wants to push JUNK (Cobra)!

> >
> > Uniden is made in China and Japan. More China. Darn.

NO CB's have come out of Japan since the early 80's. NO UNIDEN CB's are made in CHINA. Does Crystal Meth make you think they are? Say NO to Cobra DRUGS !

> >
> > I guess they are coming from the same plant as Cobra. Darn.

Do you people there in NC just sell CB's, or did you ever work on one? JUST LOOK @ the back of one and see that the Cobras say "CHINA" on them, and the Unidens say "Phillipines" on them. Phillipinos STILL love Macarthur; China HATED him!
You "guess" is a WRONG GUESS ! You can't "guess" when working on CB's.

> >
> > No wonder the parts inside them look alike. Darn. Now what are we going
> to
> > sell.

Parts "look" alike? What parts are you referring to? Certainly NOT the resistors or caps. They are smaller and neater looking in the

Unidens. The Uniden has been modernized; the cobra NOT. In fact, the parts
in the new PC-78 have been MOVED AROUND, compared to your 29 piece of JUNK !
Soes that look the same to you? What is your vision? ! You will NEED your
Pee Paid Legal IF you continue to put out such LIES ! WHY would you justify
LYING to support Communist RED CHINA? Are you Hicks from the mainland
(China) or where?!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!

I have a NorthStar-3000 mobile forsale. Bought about a year ago. I still have the box for it. I lost the mounting bracket. Has the stock mic. Has Hi Med Lo switch. It will key about 2 watts on hi and swing 25 watts on hi. Has extra channels, just like the galaxy models, but its built into the dimmer switch. has dual echo controls. has talkback ONLY when echo switch is flipped on. This is a real nice sounding radio...looks and works like BRAND spanking new. I'll take $100 plus $15 for shipping...thanks for looking

I render famous but that although the state of this apparatus is most
perfect of posseggo the precious one not scato it that of it it would sure
have enriched the value. I have the possibility to send in all Italy with
courier. Very gladly I invite the eventual ones interested to visit to me
near mine qth for being able to visionare the apparatus.

> Sono a disposizione di coloro che invece desiderano anche soltanto

They are to disposition of those who instead wish also only to ask
information but I preput that not withdrawal exchanges why I have already an
other apparatus HF and therefore they are not interested.

Damn! Sorry I missed a chance at them! I think Cb band should go back to the hams and the truckers should move to FRS and all non licensed folks that are left on 11-meters should be allowed to use their CB radios as a Noclass ham ticket.

Thats what CB is {NO CLASS} I think those that are left should go to frs.
The only reason I talk on the cb is to talk with other travelers while on the road.

Thus the 150 mile rule would be history and type acceptance could be thrown out the window! and we would have added over 4 million people to the ranks of amateur radio. Wouldn't it be nice to call how bout it skipland and it be legal?

Nobody pays any attention to the 150 mile limit anyway. [its not an issue]
If you want a ham ticket and its privileges you can earn them like everyone else.
The last think we need in ham radio is;
"How bout it skip land! Come on Good Buddy! No doubt about it! AUDIO!!"
We allready have that in cb radio. Thats whats wrong with the world today.
there too many people that think they can do what they want, with no rules to follow, no accountability, no responsibility, and no consequenses. Just give it to me! NOW!

That is my opinion!

happy new year

>
>The thought is good, but the math is wrong. I won't argue on
>Christmas Eve. Have a merry one.
****

I think you should not argue with the math.

PT = PC * (1-m^2/2)

where PT is the total power and PC is the carrier power. M is the
modulation index. For a modulation index of 100% m is 1. So take our
equation above and plug and chug.

50 = PC (1 + 1^2/2)

50= PC*1.5
50/1.5 = PC

33.3333 = PC

the rest is in the two side bands and is split equally.

50 - 33.3333 = 16.666667

16.66667 / 2 = 8.333333 in each sideband.

it is refreshing to see an amatuer radio operator that knows the math
around double sideband large carrier AM.

Pretty neat, eh? Sometimes inaccuracies in stories are intentional for
various reasons. Nevertheless, I am glad to see such activity covered in
an amateur magazine, despite Lelnads claim that magazines have a
(chuckle) "responsibility" not to print stuff he doesn't agree with and
that the magazine lacks "journalistic integrity" for doing so.....

5179. Re: THE "positive" gospel according to RED CHINA !

Dave:

I suggest that you make just about everything you use. I would get rid of your computer, your TV, cell phone, blender, and so many more that it becomes a waste of time to list. You pop off against China made products like some do against Arab oil. Well guess what that boycott isn't going towork either. There is just about no electronic products that are sold that in some way that China does not profit in. It maybe as small as a single IC that goes into a camera to complete CB radio or even a TV or even a computer. Sorry to burst your bubble. Or better yet educate you.

For someone so critical of Chinese people and their way of life that I wonder how you gained your expertise? Perhaps you may have lived over there for some time? Studied there? Conversed with one from China? Debated ideology with someone from China?

I find it quite humorous reading your narrow minded posts. I do hope you will not change. I need a good laugh once and a while. I am glad people like you are not in power. I would hate to live under a christian talliban. At least our founding fathers knew that an over opressive religeous dogma will lead to a totalitarian state.

james

ps I wonder if Benny Hinn, Jerry Fallwell, Jimmy Swaggart, and others like them are going to Heaven? Are you like them?

read Matthew 19:23 and 24 and find out obout their great wealth.

There's a pretty interesting article in this month's QST about the
"Freeband." (Notice the quotation marks.) It even mentions the Alfa
Tango group. A few small (& one big) inaccuracies aside, it's actually
pretty pleasant reading.
--
73 de Bert
WA2SI
--
Pretty neat, eh? Sometimes inaccuracies in stories are intentional for
various reasons. Nevertheless, I am glad to see such activity covered in
an amateur magazine, despite Lelnads claim that magazines have a
(chuckle) "responsibility" not to print stuff he doesn't agree with and
that the magazine lacks "journalistic integrity" for doing so.....

Make no mistake, there's no "endorsement" of said activities in the
article...quite the opposite. Having said that, yes, it is refreshing to at
least see it covered rather than pretending it doesn't exist.

Yeah. I am shocked from s so called righteous man insinuating that the
language skills of a group of people are humorous and less than his
own skills. Is that not a sin? Oh I forget he lives without sin
because he follows the teaching of the Gospel?

I really wonder if he has ever turly understood the teaching of the
Gospel?

> you mean to say your getting unidens made in china from a east coast
> distributor? i bet uniden would like to know about this.....
>
I must of said something wrong? Not sure what this comment above means. Sorry, I meant to say:

The distributor for Uniden, that we purchase our products from on the east coast, is who I posed the question too. He was kind enough to tell me that their Uniden product is shipped directly to them from either Japan or China. His quote to me was "Japan or China more from China though" This is the distributor I deal with. Didn't know if other distributors were getting their Uniden products from other countries or if it mattered what coast you were ordering your product from. Now the specifics on how this distributor receives his product was not revealed to me. Maybe he is trying to hide his sources.

I suspect me as a small fry would not qualify to buy direct from Uniden, regardless of how they ship me the product. But one of these days. :) who knows. Wish I could see my future sometimes. Maybe it would reduce my stress level.

Please everyone accept my deepest and sincere apologies for stirring Dave up. I know better. I was just having a bad moment. I am bad.

Now I must go through the house and make sure that everything that has China made parts is discarded. Oh wait. Not the refrigerator. Well good thing its cold outside for now. At least the milk won't spoil. Oh now I don't even want to look inside this NEC. Wonder where these parts came from.

I will check my cell phone. Good idea. Maybe they won't have to pass those laws afterall. Save more tax dollars. Oh, man, the Kenmore washer and dryer set is toast.

Hey, I got everything cleaned out. Unfortunately, even the control panel in the furnace had China made sub-components on it so I have to go out and chop wood. Since I live in the woods and have this woodchuck out here I am relatively sure that the wood is American made the woodchuck looks fairly young so it is probably American born and the flint I dug up in the back yard should work. Got to get to work on that fire to heat the old house. Then I will go through all the wiring and insulation to make sure nothing there could be offensive.

Man I got to get busy.

Happy Holidays.

> language skills of a group of people are humorous

Yes, they are EXTREMELY humorous on the CB on THEIR non-segregated
channels! They have been for over 30 years now! I use to listen to them
for hours and LAUGH ! Dey is Funny!
AND I am not a "so called." I AM a rightous man, and God called me! He may
call you IF you repent of all your left wing liberal pinko bias!

and less than his

WHO said anything like "less?" YOU liberal commies want to homogenize
everything up so everything is the same in a UN "brown" man, which IS Tiger
Woods; and ALL I got to say to you is what me black CB friend said to me in
OH and a dime land "TIGER Woods DON"T EVEN KNOW WHO he is!" Is he (a)
White; (b) Black, or a (c)PC-78 Phillipino? !

> own skills. Is that not a sin? Oh I forget he lives without sin

Saints of God that keep HIS commandments usually do, but sinners,
that's why they are called Sinners! The Liberals DO NOT define what "sin"
is, THE Bible does. I suggest you start reading it, so you will QUIT FALSE
Accusations against God's people (the Christians)! (Not yo Mooselims,
Mohammedens, or other non-Christian religion)!

> because he follows the teaching of the Gospel?

WHY don't you READ Matthew through John in the King James
translation Bible so you will KNOW what the "good news" (Gospel) is, instead
of listening to what your left wing PINKOS say it is on the TV ? !
>

> I really wonder if he has ever turly understood the teaching of the
> Gospel?

Well TELL ME what it is! IF you HATE the black man, you will try
to destroy him through interracial marriage. GOD made him, so WHY would you
be so EVIL as to get rid of his race? I like da Broz, 'cause dey are DA MEN
! YOU be da man and start reading!!!!!!
Dave!!!!!!!!!!!!!!!!!!!

That's NOT what we are talking about. We are talking about WHERE they are made. They ARE made in the Phillipines, and may be shipped to Korea or Japan, before DAS BOAT heads to da USA. Maybe the boat stops in Hong Kong after Phillipines before going to USA. SO WHAT if it does. Shipping does NOT change what is inside OR where it was made!

--
Pretty neat, eh? Sometimes inaccuracies in stories are intentional for various reasons. Nevertheless, I am glad to see such activity covered in an amateur magazine, despite Lelnads claim that magazines have a (chuckle) "responsibility" not to print stuff he doesn't agree with and that the magazine lacks "journalistic integrity" for doing so.....

>They should do an article on N8 and all the commies on the NG and how they
>are so loved worldwide!

They are already in many publications. Just pick up any
mental health magazine. They are the subject matter listed
under articles pertaining to.....

1. Pathological perception of reality
2. Delusional thoughts of self importance
3. Abnormal need of attention
4. Controlling behavior disorder
5. ....
6. ......
7. ...

There are more. I haven't the time to list them all.
Maybe someone else can continue the list.

Dave:

Funny you should reference those two verses. Which are you? Jew or One
who claims to be a Jew and is not?

Or really the meaning behind the reference is and the usage is that
you might just be a tad anti-semetic? Now Now Dave. Would you cast
such horible intentions on the people who gave the King of Kings and
the Son of David?

james

Points below each misunderstanding!
Dave!
--

Naaah! This is the internet, man. Many are already lost, unable to separate reality from cartoons and internet land.....Dave has never been malicious..unlike the commies that attack people for their beliefs,,like Hall, Lelnad, N8, Gilliland, and George...these are your Koresh types....those who are unable to distinguish reality from fantasy, those who are unable to accept anything but what they know, those who are unable and unwilling to listen, learn, and compromise.

LeLand doesn't even OWN a CB, so WHY would he care? ! They should do an
article on N8 and all the commies on the NG and how they are so loved
worldwide!
Dave!!
--
Wouldn't that be an "endorsement" ? <g>

They should do an article on N8 and all the commies on the NG and how
they are so loved worldwide!
--
They are already in many publications. Just pick up any mental health
magazine. They are the subject matter listed under articles pertaining
to.....................
1. Pathological perception of reality
2. Delusional thoughts of self importance
3. Abnormal need of attention
4. Controlling behavior disorder
5. ....
6. ......
7. ...
There are more. I haven't the time to list them all. Maybe someone else
can continue the list.

--

What for? They'll just shamelessly plagiarize it and use it in the
future...but there is a certain satisfaction to be had watching them
mime.

>
> Thanks,
> Jim

If the NEW Cobra 18 WXST II has vertical circuit boards on it, you will have problems off road.

Without the PA the 75wxst is pretty rugged. Have it installed on several 4 wheelers. We keep them in weather proof compartments when not in use. Works for us.

If you have room for a cobra 18 then a 25 w/wx no scan but has the PA. They hold up pretty good. A PC68LTW will also offer you the options but no scan.

The Cobra 25 and the Uniden 68xl (ltw if you want weather, and its lighted) are very good radio's. They will both perform well for you.

Happy Shopping.

Well as far as I am concerned that's exactly what the FCC did under the prodding of the ARRL when they opened the band to BASICALLY CBer with 5wpm licenses. Then.. Lets talk about the holier than thou 2m cbers.. YES 2m CBers.. That's all that crew is are a bunch of CBers with a few rules and they pretty much think they are better than everyone else. Have you ever set around and listened to that BS that SPEWS from their mouths?? Man.. I LOVE CB.. Its GREAT!! AND I would guarantee you there are many CBers out there that have MUCH MORE SENSE than 50% of the 2m geeks out there.. JUST MY OPINION THOUGH!!!!

Steve

Um.. Chunks.. Make sure you get your facts straight..

I post my callsign every time I post to this newsgroup. If you're too blind to see it, then maybe you need to get that pair of nuts off your face and look a little closer.

I'm an Amateur Extra. Keith knows it, Twist knows it, Mopar knows it, hell, even the infamous Dougie knows it. I made sure to point it out to Doug the day I passed the test.

Now go lay down by your bowl like a good little puppy and leave the newsgroup to those mature enough to handle it properly.

Depends how you look at it. One may also say it illustrates the
popularity of the activity from within the hammie ranks. One can also
say it was always so, only now more are willing to admit it and freely
discuss it without fear of the intellectually-challenged "shooting
freebanders in the head".

>Seems the level of visibility is getting higher ;)

Level of visibility? Face it, freebandings high visibility is proof
that freebanding is more popular than amateur radio.

5229. FS Mount

Newsgroup: rec.radio.cb
Date: 2002-12-27 22:46:54 UTC
From: Lou <tech@dp.net>
Message-ID: <auingk$2020$1@news.dp.net>
Source record: 147766

FS Hump mount for a CB/Scanner/Etc. Contains speaker with cord and plug and a mic holder. Not quite sure where/how the radio "was" supposed to "attach" to this thing, but there is a space to put one on. In real good condition - minor wear marks. $7.50 plus shipping. Postal MO only.. E-mail if interested.

Thanks for the reply. I have the 75wxst in my Chevy truck right now
and it performs well, but again no PA. I do like the scan.

Since I haven't found a radio with all the features I'm looking for, I
ranked the "extra" feature I want with the top two being maditory.

1. Scan. I would like to be able to scan the channels for activity.
2. PA. This is a good one when you want to page someone who is away
from camp without a radio.
3. Weather. Always good to find out if you're about to be in trouble.

Thanks again for your help.

Jim

Good point of itself, Twist. My point was only that they are publishing it in QST. Visibility is getting higher. Reality is that some of the amateur contests are not much more wholesome than the proverbial shoot-outs. Regardless of anyone's take on the DX, I personally feel there is much more to 24 GHz moonbounce with 85 watts than DXCC (or the shoot-outs with CB). All grousing aside, how much difference exists between some of the 14.313 crowd, some of the 75 meter crowd, and some of the idiots on CB (and certainly not all cbers nor amateurs are like that). Dang, Twist, the more I try to uncover the differences to point out to you, the more I find that we are very similar (amateur and cb). The control freaks exist on both sides of the ledger; heck, tell ya what - I'll extend the hand of friendship. I'll even give you Doug .... Bwahahahaha! (sorry, I couldn't pass up that opportunity!). If nothing else is ever learned in the newsgroup, I'd hope most of us realize there are loose cannons on both sides of the group - and most of the gang are simply human beings (flame 'em and you're likely to get flamed back). Certainly none of us is totally innocent all of the time (I just try and hide it).

73 and hope your Christmas was a gooder (I got 100 pounds of anthracite coal!)

Jim

Depends how you look at it. One may also say it illustrates the popularity of the activity from within the hammie ranks. One can also say it was always so, only now more are willing to admit it and freely discuss it without fear of the intellectually-challenged "shooting freebanders in the head".

With your toes. Making sure that you are sitting on your whoopee cushion.
Use a d104 desk mike. You know the all metal one. Good luck! Don't use
the one with the eagle scribed on the back. You don't want to mark up a
very nice looking mic.
:) I'm bad.

Deb

Are you sure you got the right "LOU"? There are a few people here that use a part of this name.....
I just figured someone may have a use for it.. SHEEEESH......As to price, it may be worth more, I don't know nor do I care. I have no use for it... Lighten up...This is certainly not worth arguing over.... And it isn't like I post here a lot. THIS is "my" first FS post here in probably 2 years or more unless something got cross posted. There was a few other posts with my name attached (cross posted - unfortunately) but they weren't radio related. It was a topic I jumped in on and gave an opinion on. SO..... It's amazing how some can try to pick and choose who should post and who shouldn't. I don't bother you nor do I tell you what or when to post.. SO STUFF IT.

Probably for the same reasons why so many 440mhz repeater owners in CA
try to turn every freq they can get into "members only": pure greed
and ego.

> Also I am in the process of becoming a Ham
> and I don't understand thier snobbery. It's like overnight when rthey
> get thier ham license us CBer's are nothing more than low life trailer
> trash in thier eyes.

Doubtless a lot of hams who are members of radio clubs feel the same
way about unaffiliated hams such as me... and a lot of ARRL members
probably feel the same way about non-ARRL hams. But the real reason I
never joined ARRL is because it wouldn't give me any "perks" I could
use, especially because I never went in for the contests &
awards---NOT because I felt I couldn't "cut the mustard".

> Granted the studying is difficult and one needs to learn a good ammount
> of technical knowledge to get thier ham license but when I get my ham
> ticket I will not look down on CB operators.

I never did look down on CBers, partly because I *was* one & partly
because some 2m hams are worse lids than any CBers I know of! (hmm,
antikeyclowns might be useful after all, if we can turn 'em onto
cleaning up '435...)

> I have to say from
> monitorinng the ham bands they have jerks there also even on the upper
> levels but there are less.

Believe me brother, they're out there... but this is what we get for
not psychiatrically screening people who apply for ham licenses. There
will always be sneaks who will get their ticket honestly & then act
like a kid in a candy store once they've got it.

5261. FCC AND " FREEBAND " TRANSCEIVERS

Newsgroup: rec.radio.cb
Date: 2002-12-28 08:00:37 UTC
From: Buzzy <buzzy@sucksemupgood.com>
Message-ID: <AKdP9.1380$166.313831519@news.inreach.com>
Source record: 147797

FCC ISSUES REMINDER ABOUT FREEBAND CAPABLE TRANSCEIVERS

The FCC has issued a friendly reminder about those HF transceivers ostensibly marketed for "amateur" use, but actually designed and intended specifically for the so-called "freeband" radio operators, who operate primarily in the 26 to 28 MHz frequency range.

The FCC points out that it's a violation of FCC regulations to import or market a transmitter designed or intended to operate outside the amateur bands unless the equipment has been issued a grant of equipment authorization for the radio services it's capable of operating. The FCC says it wanted to clarify its rules on equipment that's "intended to operate in various radio services in the high frequency radio spectrum, including '10-meter' Amateur Radio Service (ARS) equipment." The notice--directed to "manufacturers, importers, vendors and users of these transceivers"--emphasizes that transmitters intended for use by FCC-authorized radio services except the Amateur Radio Service must be type-accepted.

In the words of the Public Notice: "The Commission considers that the transceivers discussed above are intended to be operated on frequencies where the use of type-accepted equipment is required, because of the simplicity of modifying them to extend their operating frequency range."

The FCC also noted that it's illegal to import, market or operate a transmitter that requires a grant of equipment authorization but for which no grant has been issued, and that it's a violation to transmit on frequencies allocated to a licensed radio service "without the appropriate Commission-issued station license." Violators could be subject to fines or imprisonment as well as equipment seizure and forfeiture

>forehead, maybe knock some sense into you.
****

No that will not help. Considering the man's language skill, he
appears to lack formal education. He needs to understand that the
whacking across his forehead is meant to get his attention. I am not
certain that he can comprehend that. Then again his manner of writing
could be a ploy to make us think he is poorly educated. Not sure.

On reconsidering, maybe a whack across the forehead just maybe the
ideal thing for him.

Dave:

I see in you a pathetic man. You have somehow manage to wrap ethnocentric nationalism and deep orthodox religion together and strike out at all that differs from you. As you walk down your path toward what end you meet, you will grow more and more ethnocentric. Combine that with your deep orthodoxy, this will justify any and all actions you take. For the unclean that do not heed your perversion of the Word should be eliminated as they are doomed to the eternal flames of Hades. See you have justified your action. It is easy to condem those that are not like you. Tolerance is not in your being.

If one looks in history the road of ethnocentric nationalism led to Hitler's rise. Add in a deep orthodoxy in religion and you get the talliban and the teachings Ayahtollah Khomeni. To add further the deep orthodoxy of religion and ethnocentric nationalism one looks to 17th and 18th century England. In fact the history of England. The bitter fight among Saxons and Angles. then the split of the Church of England from Rome by Henry VIII. That led to a conflict between Catholic and Anglican churches. Not only conflict but persecution. I caution you to look down the road you head.

You see, it is easy to strike out at that which you fear under a cloak of nationalism and religion. It is unique that God had a collection of writings that man could use to his means. He could use them for good or for what he interprets as good. One can use the words to beat one into submission or use those same words to convince others that path they trravel is wrong.

****

We should not revile this man for he is a chosen of God. He feels justified by all attacks on his beliefs. He feels persecuted for his beliefs and thus his faith is strengthen. He then lashes out at those that persecutes him. He insults others and then he preaches more to himself than to us. His use of biblical quotes are to strengthen his faith and not as a tool to convert us. They are to justify his actions.

Snippity Snip Snip

Dave,

God did not, has not nor ever will distinquish between races.
If you believe that you aren't reading the Bible. You are quoting some racism BS.

There is nothing in the Bible that says no inter racial marriages. God told the Jews not to marry with the Egyptians. As always, mere man couldn't follow that rule. God told people not to intermarry with the unbelievers. That wasn't headed either. God would have wiped man out if someone hadn't stepped in and said, "aren't you a just God? Known the world out as the God of Love? Have mercy on them because they do not know.

Man was not merely stupid, they remained ignorant to the blessing afforded them because they wanted to do it their way. Old Testament!

So God made a promise. He sent his Only son to live and die for mere mortal Humans. You need to get up with the times and stop living the old testament. There is only 10 rules that must be followed. It is, after all, pretty simple. Everyone got in too much trouble in the old. It really does give a new meaning to out with the old and in with the new.

Being hateful is not what being a Christian is about. You are just plain hateful. Spouting your racial and ethnic slurs. There will be a special place for you to rant one day. There is only one true way to ensure your place is held in Heaven. But in order to teach the Word, you must live by the word without extorting the Word. Benny Hind comes to mind here.

There is always a fine line. I believe you have crossed over. Perhaps you should heed your own advise and read the entire word and not just exerts that apply to your way of thinking. That is the downfall of a "good Christian". Narrow-mindedness.

Its amazing how you will generalize a whole population just because of their government or religion. Like 98 percent of them had or have a choice. It sounds like if your not blond and blue eyed your not the perfect human so to the gallows with you.

You know what would serve you better. Keep talking about CB's instead of bringing what is obviously a subject you are too narrow minded to talk about. Oh wait, there shouldn't be any cb's you can talk about since they are all manufactured in or using parts made in China or some other place that doesn't fit your perfect world. Maybe you need to go out and work with some missions abroad. You will then appreciate the CB's you talk against. You might be totally surprised at how much 11 meters is used to spread the true word.

You make Christians who are trying to spread the word and be nice and understanding, because that's what you are supposed to be, work harder. Tolerance would be a good word to study and put into use in your life. Man if you just close out all the people who don't conform to your beliefs you will be a very lonely person and not doing what your are told to do by the Word. Which probably classifies as a "SIN". OOPS. Not you!!

How can you get the word out if you have turned everyone off? I know this falls on deaf ears. But I hear people everyday who are turned off by some "HOLYROLLER" You just might fit that bill. Benny Hind is looking for a few good men just like you. If I were you, make haste to the door with that resume and get a job. He is warped as well. No doubt in the beginning he thought he too was doing good and spreading the Word. Now look at him.

Carefully choose the path you wish to choose. The most powerful thing we as mere humans have is the gift of choice, the gift of communication by speaking or hearing. It is by that choice your future will be determined. And that my friend is in the Bible you so like to refer too. It might take you a year but you need to read the entire book. The historical documentation as well as the future predictions. The most miss quoted book in the Bible is Revelations. Don't Quote it unless you understand it. There are many a men trying to this day to understand it. The only problem

is, its not something that is to be understood as of yet. You will not know the time, because that time will come "as a thief in the night". It seems as though you have skipped all the Gospels in between the Book of Daniel and Revelations. That is a bad mistake made by many a Christians. But once they read to comprehend a little more, then they too get it and it usually changes their life.

Now if you are just a person who likes to stir up all this commotion, then you need to really study what a "good Christian" is. Because you are not the poster child for that cause.

We hope that God will Bless you. We will certainly pray that He will. Maybe you need to visit the alter the next time your pastor has an alter call. You need to spend some serious time on your knees.

Now lets get back to CB's. Most everyone here will talk about them all without reference to their origin.

Deb

Playing with the blue hairs would just be an added benefit for us youngsters. Gosh, I like the idea of thinking I am that young, but alas, I fear I am not.

Radios today have much more bells and whistles compared to yesteryear, why not the three things I want? I thought if Cobra doesn't currently make one, maybe they did another year and simply discontinued it. Or perhaps Midland or another maker has one I don't know about.

Jim

How about a link to the FCC site you pilfered this from so we can
see how OLD this memo is.

5287. Didn't Palomar make a Radio?

Newsgroup: rec.radio.cb
Date: 2002-12-28 16:59:55 UTC
From: DLHicks <dlynnhicks@mchsi.com>
Message-ID: <sKkP9.341255$pN3.25309@sccrnsc03>

Didn't palomar make a radio that had two cb's in it. Not sure it had weather. Weather is a fairly new addition to the cb world. Boy when it first came out had a lot of scared truck drivers, wx alert going off in the middle of the night. That will get your adrenaline going.

But it may have had a pa too. I have only seen one in the 15 years we have been working on them. Just not sure. OH I am getting old.

Deb

Don't bet on it a copy of the Xforce (cb) web page, and a few posts such as
your will do wonders to close your little loophole.

Ok. Why is that. He is advertising the thing, On Ebay, as a 10 meter amp.
Now, putting it in the ham section would be the correct place, yes or no.
That is all I was referring too.

I am not sure what "my loophole" is referring to. But I am a little old.
Unless you are the ebay police. I have had an auction closed down for
listing in the wrong category. It didn't take but one time and I learned.
So when I do list I take extra care to put it where it should be.

I not trying to stir up trouble, just appreciating someone listing properly
on ebay.

Sorry if I offended you.

Deb.

Not so sir, Auction is doing fine, it is a 10 meter amp, used by hams who know quality made 10 meter ham equipment.

Rat as much as you wish, it won't do you any good.

Ok, this is attempt number 3 at listing this auction, first off ATTENTION to EBAY or WHOEVER it may concern: THE AMPLIFIER FOR SALE IN THIS AUCTION FULLY COMPLIES WITH YOUR EBAY LISTING POLICIES BELOW, IT IS NOT: *A CB amplifier *An Amplifier specified for use on the 11 Meter band *An Amplifier designed for use in frequencies 24 MHz to 35MHz *An Amplifier posted within the CB category *A CB Radio that is amplified to exceed 4 Watts using the AM Settings or 12 Watts using the SSB settings Therefore, it FULLY complies with all rules and guidelines per Ebays listing policies. Also, this amplifier complies with -ALL- F.C.C. Rules and guidelines stated for Ebay auction purposes. This amplifier is for amatuer radio use ONLY! Ebay, if you dont know what this is then please e mail me before you kick it off unfairly for the 3rd time and make me type this all over again, and let me know why theres so many other people with auctions similar to this on your website that ARE listed illegally outside of your, and the F.C.C.'s guidelines that you let run their full term. Best regards, turad108.

I don't think Dave would understand it, but it never hurts to allow one to observe knowledge to try to better themselves. We don't want to be selfish, so share, or we might have to answer why we didn't try to steer him in the right direction.

It seems that he is still in the learning stages. Maybe we can help that growth along.

Or maybe not. :)

Deb
Yeah I know, I'll quit.

Well it might fly if you take reference out of the narrative to 11 meters.
Especially since your are touting it as being a 10 meter amp in the
description.

Ebay and their watchdogs have a way to search under every criteria you can
imagine. If they keep closing your auction you may find yourself outside
the gates of ebay not able to list and sell. You know how they are.

Now this is strictly a guess on my part.

Deb

You know, I think it is an old listing. It was sent to me
a fairly long time ago by a ham friend who was trying
to convince me to join him in holy hamdome.

I told him the last thing I would ever do is get a license
and make the whole world aware of who I was, where
I lived and what I did.

Once you get a ham license, the FCC knows everything
about you. Bullcrap!

For what it is worth, regulations forbid amplifiers capable of being driven to full output with less than something like 50 watts (I don't have the inclination to go to the FCC site and quote the rules). An amp capable of 100, 200, 500 or whatever watts driven by a watt or a watt and a half do not meet requirements to be a legal amplifier at this frequency).

Kind regards from Rochester, NY
Jim

Jim,

I think the rules have changed since 911, the fcc is too busy
doing the homeland security thang to care about what's
happening on ham/cb. It's kinda like the watts riots in LA.
Everybody looting the stores and not a single cop in sight.

Besides, nobody is getting hurt and it's good for the economy.

No, it was the note to e-bay that wasn't likely too good an idea.
Regardless, I'm not the individual who is blowing in the auctions to e-bay.
You contended that the amp was stone cold legal which it isn't. I doubt 911
changed anything. Does anyone remember any serious enforcement (besides a
very few nut cases that went out of their way to attract attention - like
ramming another car) in the last dozen or so years? As far as the riots go,
I hope you aren't looking for a replay.

73 from Rochester, NY
Jim

If it works 24-35 mhz out of the box with a drive power of less than
50 watts it is illegal. Idiot. Liar. Keyclown chump.

I'm still waiting for you to buy me that Cobra AM/SSB radio. I see several models at the "Pilot" travel centers selling for around $150 to $180 each. I can't believe that some CBer is dumb enough to shell out $300 to $400 for one of those so-called 10m export radios those places sell.

Jim,

I'm not turad108, and I was just posting his Ebay auction ad here for
everyone.
I don't agree with everything he says but feel he's got a good point.
I myself would not try to sell amplifiers on Ebay for fear of losing my
account.

And yes, 911 did change things, many things especially on the net.
What used to be available for public inspection has now gone away.
Example is www.rootsweb.com. Before 911 the California (among others)
birth index was available for anyone to view. You punch in anybody's name,
find out how many kids they had, their names, birthdates and mother's
maiden
name. Not anymore. It has been pulled thanks to 911

My family moved from LA just after the riots. We now have a beautiful little
ranch
not far from Clint Eastwood's estate. It's very quiet and secluded. We
have many
old trees which I have hung many wire antennas from besides my 2 towers
which
support my big antennas for 11 meter work.

Just another example why 11-meters should be given back to the hams.
Also another reason that the FCC should invent another class of amateur
radio operator. The free band class.

the following is a copy of paperwork in fcc administrative hearing reguarding the so-called notorious hacker .....kevin mitnick, who was trying to get his ham call back, and who , in my opinion was royally screwed by our dear old uncle sam for pissing in the wrong pile of cornflakes.....

makes interesting reading.....

Before the

Federal Communications Commission

Washington, D.C. 20554

In the Matter of WT Docket No. 01-344

KEVIN DAVID MITNICK File No. 00000-58498

Licensee of Station N6NHG in the

Amateur Radio Service for Renewal

of Station License

KEVIN DAVID MITNICK

For Renewal of Amateur Radio

General Class Operator License

To: Honorable Richard L. Sippel

Chief Administrative Law Judge

JOINT PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW OF

KEVIN DAVID MITNICK AND THE ENFORCEMENT BUREAU

Kevin David Mitnick ("Mr. Mitnick") and the Enforcement Bureau, by respective counsel, and pursuant to the Order, FCC 02M-58, released June 28, 2002, hereby submit their Joint Proposed Findings of Fact and Conclusions of Law.

I. Preliminary Statement:

1. By Hearing Designation Order, 16 FCC Rcd 22,740 (2001) ("HDO"), the Commission commenced this proceeding to determine whether the above-captioned Amateur Radio Service renewal applications filed by Kevin David Mitnick should be granted. The Commission concluded a hearing was necessary because Mr. Mitnick is a convicted felon whose

illegal activities have included the interception of electronic communications, computer fraud, wire fraud, and causing damage to computers. The Commission concluded that Mr. Mitnick’s criminal behavior raised a substantial and material question of fact about his character.

2. Accordingly, the Commission specified the following issues for resolution in this proceeding:

To determine the effect of the criminal convictions of Kevin David Mitnick on his qualifications to be and remain a Commission licensee.
In light of the evidence adduced pursuant to the foregoing issues, to determine whether Kevin David Mitnick is qualified to be and remain a Commission licensee.
(c) In light of the evidence adduced pursuant to the foregoing issues, to determine whether the captioned applications filed by Kevin David Mitnick

should be granted.

3. The Commission further specified that the burden of the introduction of evidence and the burden of proof rested with Mr. Mitnick.

4. A hearing on the issues was held in Washington, D.C., on June 18, 2002. Additional witness testimony was taken by speakerphone from David G. Hall on June 24, 2002, and from Carol A. Long on June 26, 2002. At the conclusion of Ms. Long’s testimony, Chief Administrative Law Judge ("ALJ") Richard Sippel closed the record and directed the filing of proposed findings of fact and conclusions of law no later than September 19, 2002 (Tr. 167).

II. Findings of Fact

A. Background

5. Mr. Mitnick began hacking computers when he was 17 and continued these activities

until he was about 31 (Tr. 97-100). To Mr. Mitnick, "hacking" means unlawfully accessing other peoples’ computers and reading their source codes (Tr. 80-81). To him, it was an "intellectual challenge" (Tr. 94). Mr. Mitnick explained how he got into hacking, as follows:

THE COURT: [W]as there some kind of a compulsion thing in connection with

this hacking or getting into sites?

THE WITNESS: I was tunnel visioned. I don’t believe it was a mental disorder.

I guess it was I was kind of obsessive in what I do. I tunnel vision on a particular project. And see, when I started into this field of

hacking, it was all cool and entertaining back then.

In fact, my teachers awarded me for writing programs and obtain[ing] people’s passwords. In fact, in those days it was accepted as it was all right to do. And then, as society changed around and it became a very serious subject. Like I guess I could relate it to the analogy of the smoking pot back in the ’60s was the cool thing to do. Right now, there is war on drugs.

Well, because I was so into my - - so tunnel visioned into my hobby, was that society was changing around me. Kevin didn’t change. I went on doing what I started doing when I was in high school.

THE COURT: You say that you viewed it as being an accepted thing at that time?

THE WITNESS: It was at that time. There was no law[] against it at that time, and the people - - the role models that I - - like the teachers in school when I would write programs that would, like, ca[tch] people’s passwords, for example, I used to get credit. I used to be encouraged by my teachers that, that’s an okay thing to do.

THE COURT: This is at what age?

THE WITNESS: 17 - - 16 years old.

THE COURT: High school?

THE WITNESS: Yes. And then I got so into it, and it was so fascinating to me, that I even became - - you know, they passed legislation and society changes where it became a very negative thing to do, and I still continued doing it anyway for a number of years. (Tr. 95, 96.)

Mr. Mitnick’s hacking eventually got him into trouble. In December 1988, Mr.
Mitnick was arrested for hacking computers owned by Digital Equipment Corporation, and he was held in pretrial detention for eight months (Tr. 57). Ultimately, Mr. Mitnick signed a plea agreement that provided for a year of imprisonment and three years supervised release, which expired on December 7, 1992 (Tr. 57). In January, 1993, Mr. Mitnick learned that a warrant had been issued against him for violation of the terms of his supervised release (EB5, p. 9). Instead of turning himself in, Mr. Mitnick became a fugitive from justice, using false names to avoid arrest (Tr. 57-60). Mr. Mitnick also used counterfeit access devices (stolen telephone numbers) to make cellular telephone calls without paying for them (Tr. 56-57, 98-101). Finally, Mr. Mitnick continued to hack into others’ computer systems (EB 5, pp. 2-9).

After two years on the run, Mr. Mitnick was arrested again in February 1995 (Tr. 55,
57). He spent almost all of the next five years in jail. First, he

resided a North Carolina prison. After being sentenced to eight months by a North Carolina court for possessing unauthorized access devices, Mr. Mitnick was transferred to a federal prison in California (EB 5, p. 2). On September 26, 1996, an Indictment was handed down against him in the United States District Court for the Central District of California, Case No. 96-881 (EB 1). The Indictment charged Mr. Mitnick with having "carried out a scheme to defraud, and to obtain property by means of false pretenses, representations and promises, by: (a) obtaining unauthorized access to computers belonging to numerous computer software and computer operating systems manufacturers, cellular telephone manufacturers, Internet Service Providers, and educational institutions; and (b) stealing, copying, and misappropriating proprietary computer software belonging to the companies described below" (EB 1, pp. 1-2). As a result of a plea agreement in that case, Mr. Mitnick admitted that he obtained proprietary software from various entities by fraudulent means (EB 5, p. 2). As a result, the Court sentenced him to 46 months (which included the time already served subsequent to his February 1995 arrest) and directed him to pay restitution of $4125.00 (EB 3. p. 2, EB 5, p. 2; Tr. 102, 104). Mr. Mitnick was released from prison on January 21, 2000, and placed on supervised release until January 20, 2003 (Tr. 50, 92).

8. In December 1999, approximately one month before being released from prison, Mr. Mitnick completed an application to renew his amateur radio licenses (Tr 53, 65). Item 15 of the application directs an applicant to supply his address (EB 6, p 1). Mr. Mitnick provided an address in Las Vegas, Nevada (EB 6, p. 1), which was his grandmother’s address (Tr. 65-67). Mr. Mitnick, however, was incarcerated at a California prison at the time he filled in his application (Tr. 47-48, 65-68). At the hearing, Mr. Mitnick explained that he had provided the Las Vegas address because he had once lived there, his radio equipment was located there at that time, and he used his grandmother’s address as his mailing address while in prison (Tr. 65-67). Mr. Mitnick’s grandmother would then either forward his mail to the prison, or hold it for him (Tr. 67). Mr. Mitnick further explained that he provided his grandmother’s telephone number as his contact number because he could not receive direct-dialed calls while in prison (Tr. 67-68). According to Mr. Mitnick, his grandmother would then relay any phone messages to him in prison (Tr. 68). Mr. Mitnick testified that, at the time he submitted his application, he believed the FCC knew that he was incarcerated because of the notoriety of his criminal activities (Tr. 68).

9. In relation to amateur radio, Mr. Mitnick has been licensed to operate as a General Class Operator under call sign N6NHG since March 4, 1986. Mr. Mitnick testified that his hobby as an amateur radio operator started with his intense desire to learn about and help improve technology and the amateur radio service. During his younger years, Mr. Mitnick provided assistance at special events (charitable events such as the March of Dimes) as an amateur radio operator

(Mitnick 1, p. 3; Tr. 85). Mr. Mitnick also testified that he assisted repeater owners with the maintenance and operation of their equipment (Mitnick 1, p. 3; Tr. 86). Mr. Mitnick testified that, since his release from prison, he communicates with his amateur radio station daily (Tr. 89-92). Mr. Mitnick values his license because amateur radio is a communications medium where he feels comfortable conversing with others and discussing particular topics that interest him (Mitnick 1, p. 3).

B. Rehabilitation Evidence

(1) Testimony of Kevin David Mitnick

10. One week prior to Mr. Mitnick’s release from custody, his father suffered a heart attack (Mitnick 1, p. 1). The doctors treating Mr. Mitnick’s father ordered him to undergo a triple bypass surgery within several hours of Mr. Mitnick’s release (Mitnick 1, p. 1). Mr. Mitnick’s father became infected with a staph infection he contracted during the surgical process, and he was treated with a powerful antibiotic (Mitnick 1, p. 1). Despite such treatment, however, his infection persisted (Mitnick 1, p. 1).

11. In light of these circumstances, Mr. Mitnick spent a majority of his time caring for his father and helping him run his business, a construction company (Mitnick 1, p. 1). Several months after Mr. Mitnick was released from prison, Mr. Mitnick’s father was diagnosed with lung cancer, so Mr. Mitnick continued to care for his father and his business during his father’s illness (Mitnick 1, p. 1). Eventually, Mr. Mitnick’s father passed away on July 4, 2001 (Mitnick 1, p. 1).

12. Mr. Mitnick testified that during the time he cared for his father, he engaged in serious introspection and reflected on what he had done with his life (Mitnick 1, p. 1). Mr. Mitnick decided to turn his life around and dedicate his life to a career in broadcast radio, public speaking, and writing to help government, businesses, and individuals minimize the risks associated with computer intrusions (Mitnick 1, p. 1).

13. In March 2000, at the invitation of Senator Thompson, Mr. Mitnick testified before Congress. The subject related to the security and reliability of information systems owned and operated by, or on behalf of, the federal government (Mitnick 1, p. 2; Tr. 73-74).

14. Later that year, Mr. Mitnick provided information to the U.S. Commission on National Security in support of their efforts to create a report for the president-elect of the United States on protecting our national critical infrastructures from enemies foreign and domestic (Mitnick 1, p. 2). The Commission spent two full days with Mr. Mitnick in Los Angeles to discuss the strategies, methods, and tactics used by computer intruders, and to identify specific types of safeguards that would help the nation protect these vital assets

(Mitnick 1, p. 2).

15. Beginning in January 2001 and continuing into December 2001, Mr. Mitnick hosted a weekly radio show called "The Darkside of the Internet" on a Los Angeles radio station (Mitnick 1, p. 2; Tr. 69-72). The show was about demystifying the Internet for the public and helping people and businesses better protect their privacy and security when using the Internet (Mitnick 1, p. 2). The show gave Mr. Mitnick an opportunity to share valuable information with the public on threats and vulnerabilities related to computers and telephone systems and to emphasize the importance of computer security (Mitnick 1, p. 2).

16. Also in 2001, an owner of a business who had been victimized by an unknown person retained Mr. Mitnick as an expert witness to investigate the cause and identity of the person responsible for blocking, redirecting, or otherwise interfering with telephone calls to his business (Mitnick 1, p. 2; Tr. 74-75).

17. In December 2001, Mr. Mitnick signed a book contract with John Wiley & Sons (Tr. 75-76). In June 2002, Mr. Mitnick finished co-writing the book, which focuses on the non-technical strategies and methods of how computer systems and confidential business information can be compromised (Tr. 75-76; Mitnick 1, p. 2). The content is not a personal story of Mr. Mitnick’s past transgressions, but rather an in-depth educational tool designed to raise awareness in people who own, operate, and use computer systems (Mitnick 1, p.2). This book has been written to assist government, business, and the general public to defend against attacks to computer systems to minimize financial losses, and the loss of public confidence in their organizations (Mitnick 1, p. 2).

18. In addition to his writing activities, Mr. Mitnick continues to pursue a career in public speaking and consulting (Tr. 54). Mr. Mitnick has made a demo tape for a new radio program, in the hope that Premier Radio Networks will produce a nationally-syndicated talk show (Tr. 71-72). Mr. Mitnick also is currently creating a corporate training film on computer security (Tr. 54).

19. While researching the material for the book and previous magazine articles that Mr. Mitnick has written, he has come to understand the serious financial consequences, or other collateral damage to any organization, that suffers a serious security incident, whether a break in to a computer system, or loss of proprietary information (Mitnick 1, p. 2; Tr. 79-82). The losses could result in substantial financial damages, loss of customers, or a loss of public confidence in the company itself (Mitnick 1, pp. 2-3; Tr. 79-80).

20. Mr. Mitnick testified that during his long hacking career, it was never his intent to profit or otherwise harm the victims (Mitnick 1, p. 3; Tr. 81-82). Mr. Mitnick testified that his motivation was to learn about technology by exploring computer systems and networks, and

to enjoy the intellectual stimulation of out-witting other programmers (Mitnick 1, p. 3; Tr. 81-82). Although Mr. Mitnick testified that his motives were not malicious or evil, he acknowledges that his actions, nevertheless, were illegal. Mr. Mitnick now realizes and regrets that his actions did, in fact, cause harm and damage to others (Mitnick 1, p. 3).

21. Mr. Mitnick also acknowledges that, until he was released from prison, he was bitter. However, following his release from prison, he came to accept that what he had done was wrong, and he felt "terrible about it" (Tr. 100). Mr. Mitnick gave the following testimony concerning his unauthorized use of cell phones:

THE WITNESS: I thoroughly regret it because, at least, I can reflect back to my dad, when he was alive, and people would clone his cell phone. They call it "cell phone cloning." He would get these bills and then he would have to call the phone company and go with a highlight and, yes, I made this call and no, I didn’t make this call.

Eventually, the phone company would take off the charges, but I saw the trouble that I ended up - - you know, after the fact, that I caused my dad of having to go through this painstaking process, which was a real pain in the butt - - excuse the expression. I feel terrible, obviously, that I made people - - several people go through this process.

THE COURT: Well, when did you start having those kinds of feelings of remorse or regret?

THE WITNESS: To be honest, I was bitter up until the time that I was

released from federal prison. Then after a period of time, I began to

accept - - the bitterness subsided somewhat, and I came to accept, you

know, what I was doing was very wrong, especially, the cell phone stuff and how that hurt innocent people. I feel terrible about it and I wish I never did it, but I can’t take back the past. It’s a done deal. All I can do is assure everybody I’m not going to do that again. (Tr. 99-100.)

22. Mr. Mitnick testified that, following his release from prison, he has been leading the life of a law-abiding citizen, and he enjoys that life immensely. Mr. Mitnick testified that he has no desire to return to his former life and that he is never even tempted to do so (Mitnick 1, p. 3; Tr. 100).

23. In response to another question from the Court, Mr. Mitnick testified that:

THE WITNESS: I matured - - hacking is like a young man’s crime. You eventually grow out of it. You mature. Right now, my goals in life is to live a productive life and to earn a living and try to make up for all the time that I lost and try to be a productive citizen.

That’s part of the reason why, you know - - one of the reasons I wrote this book was to help people. I try to take my background, experience and all in order to help government, business and people. That’s what I can do now because that’s all the experience I have. I can take it to the table. That’s what I’m trying to do. (Tr. 103.)

Today, Mr. Mitnick is enjoying a better income than at any time in his life. He knows, however, that if he goes back to hacking, he will go back to jail, and he is never tempted to go back to his former life (Tr. 94-95).

(2) Statement of Larry Hawley

24. Larry Hawley is Mr. Mitnick’s probation officer. Mr. Hawley submitted a statement which reads, in pertinent part, as follows:

Mr. Mitnick has been on supervised release since January 21, 2000. He is scheduled to terminate supervision on January 20, 2003. While under supervision he has maintained total compliance with the terms and conditions set down by the Court and the U.S. Probation Officer. He has channelled his energies in the law abiding, productive avenues, such as talk radio. He is presently co-authoring a book on how to protect against social engineering and computer breeches.

While under supervision Mr. Mitnick was given permission to use his ham radio. He has done so without incident and we have no objection to Mr. Mitnick retaining his ham radio license.

During the course of supervision, Mr. Mitnick has remained free of any law violations and has made a very positive adjustment back into society. (Mitnick 4, p. 1.)

(3) Testimony of Alex Kasper

25. Alex Kasper ("Mr. Kasper"), whose full legal name is Alex Kasperavicius, is and has been a Los Angeles telecommunications consultant for the past five years (Tr. 108). Mr. Kasper is also a former amateur radio licensee (Tr. 113). Mr. Kasper has known Mr. Mitnick since 1987, when Mr. Mitnick hacked into, but did not damage, a computer database Mr. Kasper managed (Tr. 108-109). Mr. Kasper appeared as a witness at the hearing and submitted a statement which reads, in pertinent part, as follows:

I first met Kevin Mitnick in the summer of 1987. A partner and I had developed one of the first computer dating systems in Los Angeles and Kevin and his friend Lewis DePayne promptly hacked into it. While very annoyed I had to admire the clever way he had done it and we eventually became friends.

As I grew to know Kevin over the following years I was often perplexed and also fascinated by his almost possessed drive to gain access to computer systems. He could not and would not stop - more often than

not throwing caution to the winds in his attempt to get the goal of "access" in order to answer some question -of-the-hour. He was so good that he had unlimited access to most any system imaginable - and as such was an intriguing resource for information one could not gain by any other means.

Unfortunately, Kevin had more than a chip on his shoulder, believing he was invincible and that he should be allowed to do anything he wished simply because it was "he". This invincible attitude was pervasive in Kevin’s thought and deed and combined with his uncanny knack for compromising computer systems made him a quite obnoxious and threatening foe for any entity unlucky enough to fall in his sites [sic].

What’s even more interesting is that Kevin didn’t see it this way. No matter what argument was presented to him, he continually asserted that what he did was merely for intellectual pleasure - and that what he did never "hurt" anyone. The government, in its attempts to rein him in, simply didn’t understand and were "misguided" and felt the need to persecute him because of his notoriety.

Despite much warning from me, other friends and family, Kevin continued his pursuits and eventually found himself incarcerated again. During his prison term I kept in contact with him via telephone and listened as his mood went from anger to disbelief and frustration - initially refusing to accept that he could possibly deserve the treatment his [sic] was receiving.

After a while, however, I did become aware of a change. I think Kevin started to realize that what he did had had a real and severe impact on the lives of people he had affected. And while still frustrated at the situation, Kevin did begin to express some remorse for what he had done.

Over the last two years since his release, Kevin has been successful in personally contacting many of the individuals responsible for the systems he had hacked. He has apologized directly to them and also heard first hand accounts of the sleepless nights and endless frustration caused by his "intellectual stimulation." I have been present for several of these meetings, and while it’s obvious he has had a hard time facing these people, I get the impression that he has some sort of cathartic drive to do it and show remorse. (Mitnick 2, pp. 1-2.)

26. When asked about Mr. Mitnick’s reputation for honesty, Mr. Kasper

responded that "he’s always been honest with me" (Tr. 114).

(4) Testimony of David G. Hall

27. David G. Hall ("Mr. Hall") is currently the senior vice president in charge of

programming at the Premiere Radio Networks in Sherman Oaks, California (Tr. 125). Before that, however, he was for 14 years the vice president of programming at talk radio station KFI, Los Angeles, California (Tr. 125). In his capacity as a programming executive, Mr. Hall is quite familiar with the FCC’s rules (Tr. 135-136).

When Mr. Hall was at KFI, he heard Mr. Mitnick appear as a guest on a talk
show. Mr. Hall was impressed by Mr. Mitnick’s informative, likeable, and approachable demeanor, so Mr. Hall asked Mr. Mitnick about the possibility of doing a talk show (Tr. 126). As a result, Mr, Mitnick began doing a weekly show, entitled "The Dark Side of the Internet with Kevin Mitnick" (Tr. 127). The show ran about a year, but was cancelled in the fall of 2001 due to budgetary constraints (Tr. 128). Recently, Mr. Hall offered Mr. Mitnick the use of Premier’s studio, so that Mr. Mitnick could make a demo tape for a new radio program (Tr. 131-132).

29. During the course of the KFI show, Mr. Mitnick and Mr. Hall would meet in Mr. Hall’s office, "irregularly but frequently," to discuss the general direction of the show (Tr. 130). As an authority figure to Mr. Mitnick, Mr. Hall was familiar with the restrictions contained in Mr. Mitnick’s probation agreement (Tr. 130-131, 133). Mr. Hall noted that Mr. Mitnick reacted positively to his coaching (Tr. 130). Mr. Hall also noted that, during the time Mr Mitnick worked for him, there were many opportunities for him to violate the terms of his probation by, for example, using computers (Tr. 133). Mr. Mitnick always resisted these temptations, however, saying that he never wanted to go back to prison (Tr. 133-135).

30. Mr. Hall testified as follows:

QUESTION: And to what do you attribute his, I guess, change of heart in terms of his prior criminal activities and his current behavior?

WITNESS: I have the feeling that he wants to - - he really wants to just fly straight, like he’s - - he feels like has paid his debt. You know, he has done what he can. He has - - he just seems to be looking at life differently than he once did.

And you have to remember I didn’t know him back then, so it’s kind of a lopsided reference, but I mean, he just - - you know, every conversation or meeting, it just seemed like he’s so focused on doing the right thing and really straightening out his life and going forward and doing whatever is necessary to make that happen.

QUESTION: So you have confidence - - how confident are you that he has changed his behavior permanently?

WITNESS: Based on my experience with him, 100 percent

(Tr. 135.).

Asked whether he had any concerns about Mr. Mitnick’s ability to deal with the FCC in an honest and forthright manner, Mr. Hall stated that he had none (Tr. 132).

(5) Testimony of Carol Long

31. Carol Long ("Ms. Long") has for five and one-half years been employed as an Executive Acquisitions Editor for John Wiley & Sons, a book publisher with offices in Southborough, Massachusetts and New York City (Tr. 149-150). In that position, she identifies topics for books and identifies and conscripts experts to write on these topics. She does this approximately 50 to 60 times a year and estimates that she has been responsible for the publication of approximately 300 books (Tr. 151-152).

32. In the fall of 2000, a representative of Mr. Mitnick contacted Ms. Long about a potential book proposal (Tr. 152-153, 155-156). At that time, Ms. Long knew of Mr. Mitnick’s reputation as a hacker and knew that he had spent time in prison (Tr. 153-154). Approximately 15 months then elapsed between the presentation of the proposal and the execution of a formal book contract (Tr. 158). During that period, Ms. Long met with Mr. Mitnick twice, once in Santa Monica, California, and again in San Francisco, California. Each meeting lasted approximately six hours (Tr. 159). Eight months later, in December of 2001, John Wiley & Sons entered into a formal book contract with Mr. Mitnick (Tr. 160-161). The book is now complete (Tr. 161).

33. While Mr. Mitnick was writing the book, Ms. Long had occasion to meet

with him in San Jose, California. These meetings took place during a security conference held in February of 2002 and extended over a period of four days (Mitnick Ex. 5, p. 1; Tr. 161). Additionally, during the period in which the book was being written, Ms. Long spoke with Mr. Mitnick on the telephone approximately 20 times (Tr. 162). As the person responsible for ensuring that Mr. Mitnick fulfilled the terms of his contract with Wiley and Sons, Ms. Long observed that Mr. Mitnick was cooperative and very good at taking direction (Tr. 161).

Based upon her observations of Mr. Mitnick, it is Ms. Long’s opinion that
"he is not likely to return to the ways that put him in jail in the first place" (Tr. 162). Moreover, when asked about Mr. Mitnick’s reputation for honesty, Ms. Long responded that, "I have not experienced anything except his being honest with me." (Tr. 162). Ms. Long provided two examples supporting her opinion. First, as regards his book contract, Ms. Long notes that Mr. Mitnick could have "signed his book contract any time during his father’s illness, ensuring himself of much-needed book advance money, but he didn’t. The book and the money was the last thing on his mind. Getting the right kind of care that would work in making his father’s last days as pain free as possible was his #1 priority. In my experience, this is not the behavior of a criminal personality. A criminal personality

would have signed the book contract, taken the money; and blown off the publisher for months. Kevin never did that." (Mitnick Ex. 5)

Ms. Long also observed Mr. Mitnick’s behavior at the security conference.
According to Ms. Long, Mr. Mitnick could have used his status as a former radio talk show to attend the conference for free (Mitnick Ex. 5). Mr. Mitnick refused to do this, however, because, at the time of the conference, he was no longer an active member of the media and he wanted to register "by the book" (Mitnick Ex. 5).

III. Proposed Conclusions of Law

The HDO requires the Commission to assess the effect of Mr. Mitnick’s
criminal convictions on his qualifications to be and remain a Commission licensee. In assessing an applicant’s qualifications, the Commission seeks to predict whether he will be honest in his dealings with the Commission and will abide by the Commission’s rules and the Communications Act. See Policy Regarding Character Qualifications in Broadcast Licensing, 102 FCC 2d 1179 (1986) (subsequent history omitted) ("Character Policy Statement"). As discussed herein, the Bureau and Mr. Mitnick ("the Parties") agree that, on balance, the evidence supports a conclusion that Mr. Mitnick has the requisite character qualifications, notwithstanding the seriousness of his convictions and the fact that the evidentiary hearing occurred while Mr. Mitnick was completing the final months of his probation.

The Commission considers various factors in determining whether an applicant possesses the requisite character qualifications to remain a licensee. In evaluating the weight of an applicant’s prior misconduct, the Commission will consider "the willfulness of the misconduct, the frequency of such behavior, and its currency," as well as the seriousness of the misconduct, any efforts made to remedy the wrong, and the applicant’s record of compliance with Commission rules. Character Policy Statement, 102 FCC 2d at 1227-1228, para. 102. The Commission also recognizes that evidence of "rehabilitation is significant," and the Commission will consider the following as indicia of rehabilitation: 1) whether the applicant has avoided any significant wrongdoing since the prior disqualifying misconduct; 2) the amount of time elapsed since the misconduct; 3) the applicant’s reputation for good character in the community; and 4) meaningful measures taken by the applicant to prevent the future occurrence of misconduct. Character Policy Statement, 102 FCC 2d at 1228-1229, para. 105.

Mr. Mitnick’s convictions are serious, involving, as they do, fraud and
deception in gaining access to computer systems, and additional fraud and deception in making cellular telephone calls, charged without authorization, to other people’s accounts (F. 5-6). Mr.

Mitnick’s criminal conduct was willful and spanned a period of seven years (F. 6-7). The serious nature and duration of his criminally fraudulent activities directly implicate his propensity to obey the law, as well as his propensity to deal honestly with the Commission. Absent any significant mitigating factors, the Commission should not grant Mr. Mitnick’s renewal applications. The record, however, contains ample and compelling evidence of Mr. Mitnick’s rehabilitation, honesty, and propensity to obey the law.

39. In the instant case, Mr. Mitnick has taken several significant efforts to remedy the impact of his criminal conduct. First, Mr. Mitnick has forthrightly acknowledged his criminal activities, and he has paid $4125 in court-ordered restitution to many of his victims (F. 5-7). Second, Mr. Mitnick has expressed remorse over his criminal activities, and he has apologized to several of his victims (F. 20-23, 25). Finally, Mr. Mitnick has shared with society his unique knowledge of computer security, with the intention of helping the government, the private sector, and the public protect against the type of computer crimes Mr. Mitnick perpetrated (F. 12-18). Based on the record, the Parties believe that the serious nature and duration of Mr. Mitnick’s criminal activities have been mitigated by his efforts to remedy the impact of his crimes,.

Similarly, the Parties believe that Mr. Mitnick’s post-prison behavior
counterbalances the limited period of time Mr. Mitnick has had to establish his rehabilitation. Specifically, Mr. Mitnick’s last criminal activity occurred more than seven years ago, just prior to his arrest in February 1995 (F. 6-7, 24). Mr. Mitnick, however, spent five of those seven years in prison, where his opportunity to commit additional crimes was essentially nil (F. 7). In fact, Mr. Mitnick was still under federal supervision at the time of the hearing. Thus, although seven years have elapsed since his misconduct, Mr. Mitnick has had a relatively short time in which to demonstrate whether he has truly reformed. Nevertheless, the record indicates that Mr. Mitnick has undergone a significant transformation in that time period, as discussed below.

During the time when he was incarcerated, Mr. Mitnick was bitter and had what might be considered a "bad attitude" (F. 21). The "invincible" Mr. Mitnick had, after all, been apprehended and ultimately spent the first half of his thirties in prison. Upon his release from prison in January 2000, though, Mr. Mitnick was confronted with the mortality of his father, who had suffered a recent heart attack and then contracted a serious infection (F. 10). Mr. Mitnick spent a majority of the next 18 months caring for his terminally ill father and looking after his business until his father’s death in July 2001 (F. 11). It appears that at some point while caring for his father, Mr. Mitnick had an epiphany. As Mr. Mitnick testified, he became determined to "turn his life around" (F. 12).

42. There is ample external evidence that Mr. Mitnick has indeed turned his life around. Within months of being released from prison, Mr. Mitnick began a career as a computer security consultant. Senator Fred Thompson invited Mr. Mitnick testify before Congress on the topic of computer security, which Mr. Mitnick did in March 2000 (F. 13). Later that year, Mr. Mitnick consulted with the U.S. Commission on National Security (F. 14). Beginning in January 2001 and continuing throughout the year, Mr. Mitnick hosted a local radio talk-show dealing with the Internet (F. 15). Later that same year, Mr. Mitnick was asked by a client to provide expert testimony to the Nevada Public Services Commission on telecommunications network security, which he expects to do (F. 16). And at the end of 2001, Mr. Mitnick signed a contract with Wiley & Sons to co-author a book on computer security (F. 17). Mr. Mitnick satisfied the terms of his contract and completed the book in June 2002 (F. 32).

43. David Hall, an experienced radio program executive and someone very familiar with FCC rules and regulations, arranged for Mr. Mitnick to host a talk-radio show for a year (F. 27-28). The show had some success, and Mr. Hall has left the door open to further negotiations with Mr. Mitnick regarding a nationally-syndicated talk-radio program hosted by Mr. Mitnick (F. 28). Mr. Hall noted that it would have been possible, even easy, for Mr. Mitnick to violate the terms of his probation by using a computer unsupervised, but Mr. Mitnick refused (F. 29). Based on these personal observations, Mr. Hall has no concerns about Mr. Mitnick’s ability to deal with the Commission in an honest and forthright manner (F. 30).

44. Carol Long, a successful book editor, also gambled on Mr. Mitnick. She signed a contract with him to co-author a book, and he delivered it, on time (F. 32-33). Like Mr. Hall, Ms. Long had the opportunity to observe Mr. Mitnick’s behavior for more than a year, and she has no doubt as to Mr. Mitnick’s genuine rehabilitation (F. 34). Ms. Long notes that Mr. Mitnick could have legitimately used his status as a former member of the media and attended a conference for free, but Mr. Mitnick refused because he did not want to give even the appearance of impropriety (F. 35). Ms. Long also testified that, had Mr. Mitnick intended to con her, he easily could have done so (F. 34). Mr. Mitnick could have promised to write the book and accepted the advance, and then dragged his feet (F. 34). Mr. Mitnick chose to deal with her honestly, however, and did not sign the book contract until he knew he could devote the time necessary to honor his commitment (F. 34). Based upon these personal observations, Ms. Long is of the opinion that Mr. Mitnick is not likely to return to the ways that put him in jail (F. 34).

45. Within two and one half years of being released from prison, noteworthy members of the U.S. government, a prominent Los Angeles radio station, and a respected publisher gave Mr. Mitnick the opportunity to use his considerable computer expertise for the benefit of society. The individuals who worked with Mr. Mitnick were aware of his criminal past before they hired him. They nevertheless decided to

take a calculated risk that Mr. Mitnick had decided to redirect his intellectual energies to legitimate purposes. Mr. Mitnick did not let them down.

46. Mr. Mitnick’s probation officer, Mr. Hawley, provided the final testimony regarding Mr. Mitnick’s rehabilitation. According to Mr. Hawley, Mr. Mitnick has "maintained total compliance" with the terms of his supervised release during the two years Mr. Hawley has supervised him (F. 24). This evidence, along with the testimony of Mr. Hall and Ms. Long, provide compelling evidence that Mr. Mitnick has redirected his considerable energy away from criminal activities and into productive, legal activities.

47. There is also sufficient evidence of Mr. Mitnick’s current reputation for honesty. Mr. Hall and Ms. Long affirmed that Mr. Mitnick was honest (F. 30, 34). And Mr. Kasper, one of Mr. Mitnick’s former victims and now a long-time friend and associate, believes that Mr. Mitnick has truly changed (F. 25-26). Finally, Mr. Mitnick’s testimony during the hearing was candid and forthright. He did not equivocate when discussing the nature of his convictions, and he disclosed all information in response to queries regarding his criminal past and his amateur radio operations (F. 5-9).

48. One final area the Commission will consider in assessing an applicant’s

character is his overall history of compliance with Commission rules and regulations. Mr. Mitnick has been authorized to operate an amateur station for over twenty-five years (F. 9). Mr. Hawley affirms that Mr. Mitnick has operated his ham radio without incident subsequent to his release from prison (F. 24). And although there is a single allegation of interference dating from 1984 (F. 9, note 6), there is nothing in the rest of the record to suggest that Mr. Mitnick has violated the Commission’s rules. Mr. Mitnick has been using his radio regularly since his release (F. 9); given his notoriety and the amateur radio community’s penchant for self-policing, we find it significant that there have been no complaints regarding his radio operations. The Parties thus believe that Mr. Mitnick has an overall record of compliance with the Commission’s rules.

49. Based on the totality of the evidence, the Parties agree that Mr. Mitnick’s post-prison conduct demonstrates his rehabilitation, notwithstanding the relatively short period of time since his release from prison. The Parties also agree that Mr. Mitnick can be relied upon to deal honestly with the Commission, and that he can be relied upon to comply with the Commission’s rules and regulations.

IV. ULTIMATE CONCLUSIONS

Kevin David Mitnick committed serious crimes. However, he has paid his debt to

society, both with five years of imprisonment and by apologizing and making restitution to many of the entities harmed by his crimes. The evidence indicates that he has experienced a dramatic change of attitude and is living the life of a responsible citizen. It is concluded, therefore, that he

has been adequately rehabilitated and that he possesses the requisite character to remain a Commission licensee. Accordingly, the applications of Kevin David Mitnick for renewal of his amateur station and operator licenses should be GRANTED.

Respectfully submitted,

That is something I did **not** know. Having all of that information for public view may be one reason we have all of the stolen identity problems going around. Is this true (I don't know)? It would be odd for this to be true since census data are not available for 70 years; why would they publish **current** data? Wheee .... maybe one chap was right when he stated he'd never have a ham license - his reasoning was that he didn't want someone else having access to that data (which, of course, is freely available on www.qrz.com as well as other sites). Glad to see someone else likes wire antennas. They can develop some **real** gain.

73 from Rochester, NY

"Sir" James da 1st:

Sorry we can't all be as Edjumucated as you are, since you were taught in the finest Humanist brainwashing mills there is! REMEMBER: The Bible says that ATHE FEAR of the Lord IS the beginning of Wisdom, Understanding and Knowledge, so IF you didn't start with that, and it is obvious that you didn't, since you sound like a approver of what the Taliban does (hits people with wood, boards, and other items the Liberals can't take away from you), then I admonish you to FEAR GOD and KEEP HIS Commandments; for that is your duty; not to rid yo digital world of people more conservative that YOU !
Dave!!

Any HF amp that operates 160-10 meters cannot produce full power with less
than 50 watts drive. Furthermore, any amp that is capable of operation
above 24 Mhz has to be FCC certified..

I dont care what turad108 says, it's still intended for 11 meter operation.
He's grossly misinformed about RF amplifiers..

> Dave,
>
> God did not, has not nor ever will distinquish between races.

Yes he did. When they got together under the tower of Babel, he
CONFUSED them and made them go their seperate directions! He made a
distinction between the Isreal race and the heathens around them.

> If you believe that you aren't reading the Bible. You are quoting some
> racism BS.

There is NO SUCH thing as "racism." This is a newfangled made up
word that was designed to STOP resistance to interracial marriage and
anything that would stop the people in control wanting to create the UN
"brown man." Look in a OLD dictionary. It is a NEWspeak word!

>
> There is nothing in the Bible that says no inter racial marriages.

What about the scripture that says that GOD SET the boundries
according to the number of the children of Isreal? Also in Rev. 21 about
"the leaves of the tree were for the HEALING of the Nations." Why would the
nations, which are races, need to be "healed?"

God told
> the Jews not to marry with the Egyptians. As always, mere man couldn't
> follow that rule.

It was LAW; not a "rule."

God told people not to intermarry with the unbelievers.

that's right--with ancient Isreal as well as THE Church today!

> That wasn't headed either. God would have wiped man out if someone hadn't
> stepped in and said, "aren't you a just God? Known the world out as the
God
> of Love? Have mercy on them because they do not know.

>
> So God made a promise. He sent his Only son to live and die for mere

mortal
> Humans. You need to get up with the times and stop living the old
> testament. There is only 10 rules that must be followed. It is, after
all,

Those I believe are called COMMANDMENTS. Jesus gave 2 more, too.

> pretty simple. Everyone got in too much trouble in the old. It really
does
> give a new meaning to out with the old and in with the new.

The only "OLD" Testament law that was "done away" with was JUST
the laws that applied to THE sacrifice (Jesus Christ). He fullfilled those
laws, and ALL the rest still apply today, unless of course, you go to a
"state Church." The state church has a DUMB DOG preacher pursuant to
Jerimiah, because he gets his bennies from the state, not from GOD.

>
> Being hateful is not what being a Christian is about. You are just plain
> hateful.

You ought to KNOW what "hateful" is all about. I never knew what
hateful was until I lived in "the South." What am I hateful about? I HATE
what GOD HATES ! He hates murderers (Communist China), and violators of his
10 Commandments. Your problem is that you got too much "love" SUGAR in your
mouth from the state church you attend! It is lawful TO HATE ! What do I
"hate" that you perceive is unlawful to hate? Better read Romans 1 before
you answer this, as well as do a study on what GOD HATES in the Bible.

Spouting your racial and ethnic slurs.

Are these unlawful? What "slurs" are you referring to?

There will be a special
> place for you to rant one day.

It's called the CB Newsgroup, and you liberals can't stand the
truth, can you?!

There is only one true way to ensure your
> place is held in Heaven. But in order to teach the Word, you must live by
> the word without extorting the Word. Benny Hind comes to mind here.

It's Benny HIN and he is an Anti-Christ that has been ripping people
off for years. To equate me with him, when I HATE his GOOFY
Pentacostalness, shows how far lost in space you really are!

>
> There is always a fine line. I believe you have crossed over.

Which line, and where did I cross it?

Perhaps you
> should heed your own advise and read the entire word and not just exerts
> that apply to your way of thinking. That is the downfall of a "good

> Christian". Narrow-mindedness.

Jesus said SEEK the old paths, and the narrow way, because the
BROAD way leads to DESTRUCTION !

>
> Its amazing how you will generalize a whole population just because of
their
> government or religion. Like 98 percent of them had or have a choice.

They DO. Stuart Craine once said that people will put up with despotic
government as long as they want to, and when it becomes unbearable, they
WILL throw it off. Which generalization did upset you? The Chinese? The
Mohammedens?

It
> sounds like if your not blond and blue eyed your not the perfect human so
to
> the gallows with you.

It sounds like you have been BRAINWASHED by the 52-890mc toilet box,
that anybody more conservative than THEY are, make them look bad, so
everyone comes back to the liberal way of thinking. If anything I have
typed on this newsgroup would even hint that I would have THAT unlawful
position, then I should go to da gallows! But YOU should probably go there
instead, because YOU are violating scriptures by your EVIL speaking of me,
when you have NO evidence that I have even THOUGHT a ridiculous thing like
that!

>
> You know what would serve you better. Keep talking about CB's instead of
> bringing what is obviously a subject you are too narrow minded to talk
> about. Oh wait, there shouldn't be any cb's you can talk about since
they
> are all manufactured in or using parts made in China or some other place

Other places, OK, not ALL made in China by the murderous Chinese
government!

> that doesn't fit your perfect world. Maybe you need to go out and work
with
> some missions abroad. You will then appreciate the CB's you talk against.

Boy YOU gave it to yourself THIS TIME ! First of all, as a 23+
year CB shop, I DO NOT nor will I ever "appreciate" DOGGY CB's that are JUNK
made in RED CHINA. They are TRASH and a waste of customers $$$$ because
they are made by SLAVE LABOR under TERRIBLE conditions, and their quality is
TRASH compared to CB's made in the Phillipines! Plus, the $$$ you GIVE the
RED CHINESE to buy your Cobra 25's & 29's go to support TERRORISM against
Chinese CHRISTIANS (don't you like the yellow Christians?) and others in the
FREE EAST, not to mention the THREAT that China made to BLOW UP Los Angeles.
DO YOU have a problem with them threatening THE MAINLAND of the USA, or are
you with Taliban control and approve of the Muslim murdering of US

"unbelievers?" !

> You might be totally surprised at how much 11 meters is used to spread the
> true word.

I do it too, in violation of Plank part 95/ 6 !

>
> You make Christians who are trying to spread the word and be nice and

Nothing scriptural about "nice." !

> understanding, because that's what you are supposed to be, work harder.
> Tolerance would be a good word to study and put into use in your life.

study IN the BIBLE on "tolerance." See what GOD Tolerated? Not much!

Man
> if you just close out all the people who don't conform to your beliefs you
> will be a very lonely person and not doing what your are told to do by the

I only "close out" you liberals & Humanists who have been ruining
the Republic for decades. The Kingdom of God is mad up of Children who come
to HIM, not you liberals & Humanists that will have Judgment to bear, IF you
don't REPENT !

> Word. Which probably classifies as a "SIN". OOPS. Not you!!

Where Have I sinned here? Is it go go against the liberal
brainwashing we all got from the media? Sin is a Violation of GOD's LAW.
10 Commandments. Not liberal directives! Not "thought" crimes nor alleged
"hate" crimes! Don't you KNOW that the kingdoms of this world, will BECOME
the Kingdoms of OUR GOD, and HE shall REIN forever & ever? WHICH kingdom
are you promoting? Sounds like THE world system!

>
> How can you get the word out if you have turned everyone off?

I'm sure they said this about JESUS too!

I know this
> falls on deaf ears. But I hear people everyday who are turned off by some
> "HOLYROLLER" You just might fit that bill. Benny Hind is looking for a
few

It's Benny HIN and I've been warning people against him FOR YEARS.
Just because THE LIBERAL media told you about him last night, DOES NOT MEAN
you can apply him to me, o simple one!

> good men just like you. If I were you, make haste to the door with that
> resume and get a job. He is warped as well. No doubt in the beginning
he
> thought he too was doing good and spreading the Word. Now look at him.

He was bad from the beginning! Look @ what the liberal media has
done; either they have exposed a thief, or they have an alterior motive,
which is Anti-Christ, because the Liberal Media IS!

>
> Carefully choose the path you wish to choose. The most powerful thing we
as
> mere humans have is the gift of choice, the gift of communication by
> speaking or hearing. It is by that choice your future will be
determined.
> And that my friend is in the Bible you so like to refer too. It might
take
> you a year but you need to read the entire book. The historical
> documentation as well as the future predictions. The most miss quoted
book
> in the Bible is Revelations.

You can't even TYPE it, let alone quote it. It is REVELATION.

Don't Quote it unless you understand it.
> There are many a men trying to this day to understand it. The only
problem
> is, its not something that is to be understood as of yet. You will not
know
> the time, because that time will come "as a thief in the night". It seems

> they read to comprehend a little more, then they too get it and it usually
> changes their life.

I ain't skipped ANY of it; your NIV "Bible" had Sodomites on the
board when they made it!

>
> Now if you are just a person who likes to stir up all this commotion, then
> you need to really study what a "good Christian" is. Because you are not
> the poster child for that cause.

Was Jesus a "good Christian" in your book? Did upsetting the
money changers tables and WHIPPING THEM with a cat of 9 tail whip upset you?
He came to MAKE DIVISION; not the 1 world Harlot Church of Rev. 17 !

>
> We hope that God will Bless you. We will certainly pray that He will.

He DOES because I KEEP HIS Commandments. IF you don't you won't be
Blessed! And ALWAYS remember it's NOT "GOD BLESS America" anymore, but
AMERICA BLESS GOD instead!

> Maybe you need to visit the alter the next time your pastor has an alter
> call. You need to spend some serious time on your knees.

You mean to ask forgiveness for upsetting you liberals?
Jesus said YOU Must be Born again. IF you was, you wouldn't sell CB's made
in RED CHINA, knowing that the anti-Christ Commies will take taht $$$ and
persecute Christians and Liberty loving people Worldwide, 10-4 ? Ain't NO
Doubt!

>
> Now lets get back to CB's. Most everyone here will talk about them all
> without reference to their origin.

"Most" everyone DON'T KNOW. That's what I do. I am an Isaiah
58 trumpeter of COUNTRY of ORIGIN ! DON'T BUY CHINA made RADIOS
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
Dave!!!

He called me one of HIS people; HIS son; his anointed (Christian).
Christian IS THE superior religion. It is the ONLY one today with God's
blessing & sanction on it, because it is the ONLY one who keeps HIS
commandments today! ANy onther one VIOLATES HIS laws (10 Commandments) and
Jesus's teachings, which he WAS and IS GOD in the flesh!
Dave!!!!!!!!!!!!!!!!!!!!

What was right about what HE said? HE SAID that THE COUNTRY would be BETTER OFF IF the 100 year old Senator from SC would of became president in 1948 instead of Harry Truman ! That is WHY he was cast down! THIS was the MAIN issue!

The other issue as to WHY there was so much YELLING at him for this is because IF he left office, they would put a Dummycrat in his place, making the Dummycrats control the Senate!

So let's see; IF no Harry Truman, then NO Macarthur--we would of WON the Korean War, Vietnam wouldn't of Happened! We would have MORE CB's today because the 1 world controllers wouldn't of been in power as fast or as soon, or at all, maybe!

But as usual, the liberal media goes OFF POINT and starts hollering about the segregation party. The Dixicrats. Southern Democrats. All their power couldn't bring back segregation then, or keep it in instead of the commies bringing forth their "civil rights," which are man created rights instead of God created !
Just think; the govt. wouldn't of killed MLK to bring in more communism to the USA, and if George Wallace made it in '68, then how much better would we be than now? Something to THINK about, rather than get SIDE tracked by liberal agandas!
Dave!!!

That kinda depends on what the design is, doesn't it?
I ahve seen amps that took 5 watts and ran 25 out.... and would get
really dirty if you gave them hotter input.

Now, legal is another matter.

Interesting you should post this.
you do realize that you have just publically admitted to being guilty of violating FCC rules and regulations by even being in possession of this equipment?

I did a little checking. that particular device may be listed as a 10 meter amp, but it is far too widebanded to be type accepted by the fcc (thus it is prohibited equipment).

far be it from me to tell you what the law is (I am not a lawyer), but I do know a few things about the FCC and how they enforce the rules. You, sir, are in over your head on this one.

My suggestion, lose the amp. its not wiorth the fines and jail time it will probably get you.

> and transmitting, you have agreed to abide by those rules.
-- Bingo --
Let me quote: "By the mere act of picking up "....

It's an action, not equipment already deemed property of a U.S. Citizen.
Such as a 1969 Ford Galaxy, 76 Thunderbird, 59 Corvette.

The action, not the property!

> In essence, by
> using
> the CB, you have already contracted, if you will, with the government to
> operate the station within the applicable rules. Therefore, if you break

> so if that equipment
> is already deemed to be illegal to import to begin with.

-- Bingo - IMPORT!
Import and / or Market

Meaning: You can't make one and sell it, and you can't import one from another country that makes one.

The ones that are already deemed property of U.S. citizenry are therefore - in a nutshell - "Collectors Items".

Picking up the Mic and keying it on anything other an 10M without a license is where the contract is broken and where the breach occurs, and where ADMINISTRATIVE LAW comes into effect. Because the breach is what causes "process".

> Yes, darn it, you
> can buy one of those bootleg Galaxys, sit it on the shelf and look at it,
> and nobody can just arbitrarily come and take it away.

-- Precisely!

I'm glad we're all clear on this now. What I didn't like about the original thread was the fact that it led people to believe that it was illegal to own, buy, sell or trade. USE is TOTALLY different.

The reason I got "concerned" was because some people do collect them, odd as it may seem! Cabbage patch, hub caps, you name it, people collect it.

A lot of those units are from roughly the mid 1980's to mid 1990's. Roughly the end of the C.B. fad which started off in the 70's.

For instance, some people I know have collections going all the way back to the Tram D201 tube units.
Some have every 10M ranger/rci model ever made. There are a lot of people who collect these units, and do indeed "shelf" them for one reason or another.

I know one guy who has a barn full of mid 1940's AM Broadcast gear.

The point is, that just because FCC rules and regulations may change about frequency allocation, the equipment that is part of that history and property is not "contra-band".

It is the USE of that property that is/may-be inapropriate behavior. (FCC Jurisdiction) And I don't only mean transmit either. IE, analog cell phone band and scanners with mods, etc...

> You can buy an X
> Force amp, sit it on the shelf, and it would sit there forever. No one's

> with it. But splatter over your neighbor's TV--even without the amp in
> line--and the agents come to call, they CAN confiscate it under current
law;
> read the regulation, it's there. Try applying "property rights" in the
> above scenario, sorry---you'll lose!

-- YES!! PRECISELY!!!

Action, not property.

I outlined in another post how some legislation may be able to get the local authorities involved. Cause the FCC can't justify the "fox hunt". Similar legislation to having a portable scanner deemed burglary tools would probably be enough to get local enforcement involved.

FCC fines $10K, so great... Put some legislation in so the state gets to fine $2K on top of that. That'd get state enforcement involved. Question is, how to do it in their "jurisdiction". Technically the local enforcement has no jurisdiction over the airwaves, so perhaps this could be done under the ?cause? of "intent to disrupt emergency communications"... Something like that...

Yes, I acknowledge that certain individuals use these units in an un-lawfull manner. It just goes to show how foolish they are when the parts become more and more scarce, and the value of the unit keeps going up.

In short, it'll die.. Want it to die faster? Get local enforcement involved somehow.

But dag it all... Don't start smashing museum pieces!

>

could
> gather layers of dust.

A lot of the collectors I know all have cell phones and e-mail by now, and most units are stored in closets, attics, garages, sheds, and I'm certain several basements. Some have even owned shops and kept one of every model t hey sold.

People collect the danrdest stuff! I can't explain it. It just happens. From coins to buttons, pins, multi-sided dice, guitar amplifiers, stanley bailey hand planes, and yes, for some unforsaken reason cabbage patch dolls.

I understand that ebay won't allow most/all of the units mentioned on their site at all. And why should they? What good would controversy get them? ok ok... Yes... Ratings...

But, ebay is proof that people collect the darndest things.

> I am fully aware that I do not "own" spectrum, and I fully understand the

> hams
> worldwide to get rid of this sh**.

Jerry... You're not seeing the forest for the tree's. The HAM band has always been a self policed band. All you guys need is some way to make it possible to call on local enforcement to knock on the door. You go fox hunt the problem, then all you have to do is finger the local enforcement number into a cell phone. Bammo. Problem solved, example made, things quiet down real fast.

Without the local enforcement, the only option you have is to continue whining, and using scare tactics. I don't mind the whining part. That doesn't bother me one bit. But the scare tactics I don't get along with. When I was young I used to get scared. Made me lose my appetite. Since then I have gained 20lbs.

I've been on a few fox hunts. If you want to make the job really easy this is what you need.

3 cars
3 people with cell phones (one w/ 3 way calling)
-- If in New York State driver must wear head set while jabbering on cell.
3 spectrum analyzers w/ directional antenna. (the more directional the

better.)
3 hand held GPS units.

At least one person with knowledge in mathematics, or one laptop and one spreadsheet application.

HF is easy to track.

Microwave you sometimes find that one party in the 3 has been chasing an echo. So 900Mhz and up is where it becomes interesting.

>
> Jerry
>

> > state that you can't make them, and you can't import them. Just like
the
> > DOT Regulations state that you cannot make the Mazda 280ZX any more. It
> > won't pass DOT crash or emissions tests.

Presicely Jerry. That's exactly my point. I would also like to point out that people often make an analogy to a gun instead of a car regarding these units. (and yes people collect those too!) The gun analogy is not applicable because the transceivers are no more physically harmfull than any old blunt object that may present itself as a weapon. If anything of those original units could be used in an un-lawfull manner I'd have to say it absolutely positively has to be the microphone. And for two reasons:

1.) It can be used to key the radio in a fashion not in compliance with FCC regulations..
2.) You could use the mic in a 12th century mace weapon.

In short, if someone comes at me swinging a heavy microphone with a battery in it I'd deem it a threat. Someone throws one of those units at me I'll be tempted to try and catch it. New in the box with owners manual I'd probably jump for it if they missed. But I'd never duck, that's for sure!. ;-)

Now if that doesn't kill this dead horse of a subject I hope someone brought the wooden stake and mallet.

5343. Re: ILLEGAL CB TRANSCEIVER LIST

I suggest that it is valid:

1.) Both require an operators license.
2.) You may only operate them where intended. (frequencies / roadways)
3.) They can both be deemed personal property of U.S. Citizenry.

>
> **

Who said anything about ignorance. I'm merely pointing out time and time again that there is a distinction between the property and the action taken with that property. As far as your mention of concealed weapon, yes, you are correct. But a 10M radio is a far cry from a "weapon".

>
> **********
> >One thing is different about it though. If someone does key the radio on

> illegal radio. Because no physical harm is done does that mean it is
> not illegal operation?

No not at all. I honestly don't see how you draw that conclusion. My point is that the handgun analogy is invalid because the transceiver is not a "weapon.". I don't know how you connected illegal acts directly to aspects of physical property. I don't see your connection... That's because there isn't one. If it were a weapon I'd be tempted, but not likely to agree that there may be exceptions. But that's a matter for another whole thread.

[snip]

No, far from it. You better check your glasses, I think you may have a spot on one of the lenses because you're not connecting the right dots in this picture. In my other posts what I have suggested is to find a way to make the use of that unit (at least partially) under local jurisdiction somehow. I'm not going to go over that again, you'll have to read my other posts.

>
> **********

> >Now, as far as this Neo Fascist scare tactic.

Check yer corrective eyewear again. Not at all. What I suggest is that the original author of this message thread is a Neo Fascist fear monger. Through the use of selective facts and a misleading subject/headline I suggest the original author intended for unsuspecting readers to get the false impression any and all units mentioned in the FCC regulations were deemed contra-band / illegal to own.

Can I spell it out any plainer? Laser pointer perhaps? Pictures? Diagrams? Cause I don't think you've played connect the dots before.

>
> **

I think it was blatant misprepresentation of new regulation is what was intended. Subject clearly states "ILLEGAL CB TRANSCEIVER LIST". When in fact he's misleading on 2 counts. One. They aren't "illegal", Two they aren't "CB's". I also suggest that through the use of quoted regulation knowing full well that the average reader of this unsuspecting newsgroup is at all capable of understanding such regulation as quoted by the author and might otherwise be confused into accepting the subject chosen by the author as that of fact without full understanding of regulations as quoted by the author.

In short, I would bet dollars to doughnuts that most readers here aren't attorneys, and would be swayed by merely the subject and limited content provided by the original author.

Ok, I'll quote from your material, "regulate and control of the usage and distribution of ".

Doesn't say anything about personal property. You key it, that's when you enter the jurisdiction of the FCC.

>

I call em like I see them. The author did try and mis-lead people by fear.

I did pay attention in 6th grade civics class, and I don't have to write my congress person to make a change to something that is perfectly fine to begin with. I'm not going to write congressional representatives to de-criminalize an object that isn't criminal to own in the first place!

Dear Hillary;

I'm writing to you about a problem that doesn't exist. I'm doing this because one lone individual obviously doesn't understand the differences in property laws, and Federal Communication Commision Regulations. I know your time is valuable, and that's why I let this wing nut talk me into wasting yours.

Yours Truly,
Ben Dover
PS: Enjoy the cigars. And did I mention that ever since my neighbor two doors down assumed room temperature he's decided to become a democrat?

One word sums up the likeliness of me writing the above. NOT!

>
> What has the bible have to do with radio?
>
> Did not Jesus say render unto Ceasar that which is Ceasar's?

Knew I shouldn't have written that paragraph, but I'm glad you took the bait. What I'm pointing out is that often with fear mongering and scare tactics it's often funny to see the individuals get spooked. Halloween prank. That sort of thing. I didn't quote from it or nothing. Man... You'd probably jump on holy hemoroids to keep commandments out of the hands of children I bet! Seems those stone tablets are about as physically harmfull as any 10M transceiver. Could stub a toe! Sandals or commandments must go, or one could stub a toe! har dee har har... Excuse me for "HAMMING" it up.

>

Dude. Dots... Are you feeling ok? You're confusing the issue of personal property with that of an individuals action. What I'm saying is really very simple.

>
> The law says that I can not possess a nuclear bomb. I would sure feel

> more comfortable having a 100megaton thermal nuclear weapon in my

> and try and knock down my door.

Rollin out the holy hemoroids.. Just as I thought... Oh, hand gun doesn't
apply? I'll blow it completely out of proportion and make reference to
thermonuclear weapons.

I hear real estate is really cheap in Afghastan nowadays, but rumor has it
there will be several prime bunkers available outside of New Houston,
errrrr.. Baghdad opening up this spring. Perhaps you can get in on a time
share to see what the area is like before you make a final decision?

>
> Now how rediculaus does that sound? Haveing a 100 megaton thermal
> nuclear device is own's gasement does no one harm until it goes off!

I have never heard of a 10M radio getting to the point of critical mass, but
I have seen a few melt down. Not sure where you're going with this, but
I'll give ya some room for expression and my own entertainment.

Depends on reference. To have a point of reference in a 3D space, one must
have at least observe 3 known points in that space.

In other words, connect the dots. It isn't hard to do.

>
> Finally I find your comments as humorous as you will find mine. See

That's what makes America great. Don't worry about the commies and
terrorists. They're easy to spot. They're the ones wanting to shake hands
after you give em the finger. I'm all for cultural diversity.

Some washed ashore up on lake ontario the other day. Looks like one of our
fine upstanding Canadian Neighbors talked em into thinking it was safe to
cross in the rapids above the falls! Knowing Canadians and their good
business sense I would expect the fine neighbor charged for each head.

Let's see... That's a $24.00 vinyl raft, $5,000 US a head * 6 terrosists
minus the $24.00 for raft, gas for van, and one free complimentary
flashlight with half dead batteries if I get a full tank. Picture it;

Abduhl, now remember the roaring you hear means you're getting close.
That's the noise of the evil capitalist beast.

You are right 100%. The "Liberal Agenda" never lets up....in their out of
touch mindset. Their main goal was to retake the Senate. Oh, but it didn't
quite go their way. LOL

And he doesn't know how to use his spell checker either. Oh well.
Sometimes it good to just do something else. Still a lot of mmm well Hate
there. I won't humor him any more because it really doesn't belong on this
news group. Sorry. He is probably still jumping up and down.

My CB is working great. I try not to use it of the evening since I am on it
all day. Have a wonderful day. I think I will go out and fly an R/C
Airplane since its going to get close to 60 and turn off the cb for a day.

Not if you build it yourself, but only one per calendar year.

> I dont care what turad108 says, it's still intended for 11 meter
operation.

Agreed.

I'm need a new mic for my mobile cb.
Got any suggetions? I know you can go from real cheap to expensive, what's out there best for performance and what's a best buy?
Thanks

You should consider a noise canceling mike for mobile use.
An amplified mike is not always the best choice.

Do you want to be loud or clear? I hate hearing "10-9",
and I won't talk to anyone I can't understand.

How about an Astatic 636L? Never needs batteries.

Scott are you the spelling Bee police, if all you can worry about is spelling mistakes I think you need to go for a ride in the jeep to get out of the house. Take a ride to Beefalo Bob's they got some killer sandwiches there.

well think about it.....what is wrong with segregation? it happens all the time.....look around. people hang with people of their own race most of the time anyways.....what's wrong with that??.....it isn't a put down of others or is it saying that one race is wrong and one race is right.....all this crap was faust upon the american people by do-gooder socialist democrats who think that they know what is right.....bullshit.....they have totally screwed up everything.....is racism wrong??? yes!!!!!! is busing to achieve racial integration wrong..??? yes...!!!!! are all of these afirmative action programs wrong?? yes.....!!!! you look at the black man of the fifties before all of this crap started and see what is there.....you see articulate americans who had thriving strong families, even though, even though mind you, they were put down and treated as second class citizens.....now then, you compare that to now.....no comparison.....so now the thought police are out and everytime a opportunistic black politician hears anything that he thinks is 'racist'.....he cries to the moon, because a continuation of the status quo is in his best interest and in the interest of the liberal democrats, who want power back so badly.....the seperate but equal doctrine passed by the supreme court said that their was nothing wrong with seperation and it was constitutional...then the libs got their guys on the supreme court and reviewed the matter again and said something totally different.....imagine that.....listen folks.....we are not all alike.....and we do not like the same things or think the same way.....and that is the way it was intended.....and this forced togetherness just breeds contempt.....you look the schools today.....hell, johnny can't even read, and you wonder why.....when they forced the black kids to go to school with the white kids.....they brought the level of education down instead of bringing it up, which i feel was their intent all along.....dumb people are much easier to control.....dig it?????????

Perhaps they've never heard the term of "FOX HUNTING" in radio. That is the purpose of this "event".
To FIND transmitters, usually for Emergency purposes but for other purposes as well. If you have some decent equipment (not necessarily lab type), it isn't hard at all.. Takes a little practice though. I've done it myself....
With a map or familiarity with the area and a few people situated in at least a couple places (triangulation is usually used (3 bearings)) - it doesn't take much. So, whether you broadcast your location or not, you can be found IF they want to find you. Lou/Tech@DP.NET

Again, another misinformed person concerning mere
possession, to use.

>
> I did a little checking. that particular device may be listed as > a 10

> (thus it is prohibited equipment).

For use on the cb band, not 10 meter band

>
> far be it from me to tell you what the law is (I am not >lawyer), but I

Probably and I'm sure it's for the Cb Band anyways.

> My suggestion, lose the amp. its not wiorth the fines and jail > time it
> will probably get you.

Yes, you're right. After multiple warnings and notices
it will produce some sort of fine, Jail time? After years
of ignoring the notices & fines.

5364. Ham license? Gun registration? NO WAY!

Newsgroup: rec.radio.cb
Date: 2002-12-29 17:18:57 UTC
From: Buzzy da Buzzbomb <buzzy@feelgood.com>
Message-ID: <00HP9.1443$TG3.333503607@news.inreach.com>
Source record: 147904

Both mean that the government knows where you live
and what you got. It also means that the government
can walk right into your home and take your guns, radios
and anything else that you have a " legal license " for.

Sure, you can say it would never happen here but do
you know for sure? If history is correct, it's only a matter
of time. Radios can be used for spreading anti-government
propaganda and like guns, are tools for anarchy.

If I ever owned a gun (heh heh), I would make sure it's
never been registered and it's stashed away from public
view. Same goes for radio equipment. Out of sight, out
of mind. Keep a low profile, it will save your life someday.

And in regards to direction finding techniques, it's a simple
matter to create false and deceptive signals to fool any DF
device. The best defense against DF hunters is to go 100
percent digital. The new digital mode radios and ecryption
devices are impossible to detect. Just like Spread Spectrum
cordless phones. Scanners can't hear em and neither can
DF equipment.

I prefer a Electro-Voice RE20 driving a EQ box for great audio.

Add a kilowatt or so and you'll sound better then any commercial
radio station in town.

I can tell the difference between a slip of the finger and a lack of education. Just finishing up lunch. I had to run out and beat all the church goers to all the good sale bargains this morning. Don't wait or hesitate or the good stuff is gone by 5PM! Good deals on Folger's go really fast around here. 34.5 OZ for $3.99 at Walgreens. RUN!!!

Another good deal I saw: 120GB/7200RPM HD at Circuit City for $160. (After rebate). Was that dust I just saw from your chair? Hello?

Hate to tell you this, but the Gov't already knows where you live and what you got. The IRS is a Gov't agency, and if you have an SSN, they know where you are, and what you have.

Buzzy da Buzzbomb wrote:

Getting a HAM license is a small price to pay for the camaraderie you get in the Amateur Ranks. Not to mention the privileges you get for taking a test or two, and not really providing the Gov't with any more information than what you already have.

Since when is the free exchange of information anti-American? Methinks you need to pull your head out of your ass.

Besides, if you think about it, the Constitution of these United States does not guarantee freedom.. "Life, Liberty, and the Pursuit of Happiness" is specifically spelled out. Look up the definition of Liberty in any Dictionary. Now look up the definition of the word Freedom. You'll find that they're a bit different. Again, pull your head out of your ass. This is NOT a free country. This is a country that guarantees Liberty to its citizens.

> If I ever owned a gun (heh heh), I would make sure it's
> never been registered and it's stashed away from public
> view. Same goes for radio equipment. Out of sight, out

>
What are you afraid of? As long as the Second Amendment is in force, the gov't isn't going to do a thing to take your guns. You can, of course, get involved in Gov't, write your Senators and Congressmen, vote, etc, to help ensure that your opinion on the 2nd Amendment is heard. That's part of the Liberty that's guaranteed to us. If you aren't willing to get involved, you deserve what you get.

> And in regards to direction finding techniques, it's a simple
> matter to create false and deceptive signals to fool any DF

> percent digital. The new digital mode radios and ecryption
> devices are impossible to detect. Just like Spread Spectrum
> cordless phones. Scanners can't hear em and neither can
> DF equipment.
>
Not really that easy.. A good doppler unit can find just about any
signal in a few seconds, regardless of what mode you're in. Digital
signals still have to be transmitted from somewhere, and the
transmitted waves are no different than the old "analog" or voice
modes. The data contained in the sidebands is different, but the
signals are still there, and easy to track.

>

So, in closing, you really need to reach down between your legs, grab
ahold of your shoulders, pull really hard, and get your head out of
your ass. You've only thought things half way through, and such
behavior is going to bite you in the ass someday.

Doesn't even take that much.
Years ago we used to do foxhunts around Rochester, every Friday night.
All it takes is a fairly directional Antenna... say a 1/4 stick
mounted on the middle of the back bumper. Turn a few circles, note
the peaks, and go.

this is a simple question who makes superstar rigs....
I have two one a superstar 3500 this one is for sale on ebay at this time
its in very good condition all black. six bands of 40 channels am/fm.
built in swr meter e.c.t..
and the second is my pride and joy superstar 3900 its in mint condition
and is totally standard never been messed about with....10w am/fm and 20w
ssb
I want to find out the company who makes the superstar range of cb radio.s
as I am keen to see what new sideband rigs are for sale on today's
market.....and maybe sell my pride and joy and buy the latest model...
many thanks for any help sent......
please email me you web links for the maker of these rigs

no... I beg to differ. I have seen some of the actions the FCC takes. in
so far as they are concerned 9and this is a matter of policy on their
part): possession denotes guilt automatically, whether or not the device
is used.

well, having worked on a few of this type of amplifier, I can tell you
with a certain degree of knowledge that the amp in question is VERY
CAPABLE of working in 11 meters with no retuning. It was designed to
operate there by the manufacturer (you can even check the website for the
technical specs on it). and it requires less than 10 watts drive. that,
in combination with what the FCC ruules have to say, makes this amp
"prohibited equipment".

hmmmm. well, I;ve seen a few people that ignore the fcc. they don't
ignore for very long (read the latest ARnewsline under enforcement).

You ARE da man, Cheeze! Johnny can't read because of the NEA Teachers Union, period. They have been makin' us dumber since the 1840's ! Da mo $$$ you give dem, da dummer yo git!

Also, segregation would of stopped the commy agenda for destroying the races! Actually if there was no segregation in the 1st place, then the commies would have had to find a different issue to cry about to CHANGE the USA !
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!

RF:

It was an UNUSUAL program to say the least! I had to call in to get it "going." The BEST part of the program is when you had the fcc instructor train the agents in the CB lingo! That was great!
Did N8 or McVooble really call ? This truly WAS the NG's first worldwide radio program !!!!!! Debby didn't like it--said it was a waste of airtime!
All good things start strange with humble beginnings!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

5384. HAMS & CB'ers: Don't buy WRTVH !

Newsgroup: rec.radio.cb
Date: 2002-12-29 20:56:56 UTC
From: Dave or Debby <truth@NOSPAMplanetc.com>
Message-ID: <3e0f614b_3@corp.newsgroups.com>
Source record: 147920

Hams & CB'ers, DO NOT BUY the so called "World Radio TV Handbook any more.
I remember reading in the front of one a few years ago, that they ARE
liberal HATE pinkos that were advising people NOT TO listen to "Hate Radio,"
mainly WWCR 5070 on shortwave. The reason WHY is because of their
programming. Not controlled by THEM and the major media, it is the FREE-est
medium outside of CB radio. They just don't want you to hear the other
side, OR the CB Radio Show of last night! So since they consider this fine
station "Hate Radio," we won't buy any more of your communist BIASED
propaganda, known as the WRTVH !
What do YOU think ?
Dave!!

> the Son of David?

They were NOT connected to ancient Isreal @ all! Just look at
their ancestry from their own encyclopedia and it will tell you that they
were descendants from the KHAZARS ! They themselves say NO commection by
blood to ancient Isreal! They converted to Babylonian Talmud religion in
the past! Shem is not with them; not is GOD !

Who? The pointy hat idiots who are funded by the Rev. 2:9 & 3:9 people?
They are NOT Christians. Christian Gov. Brownlow in TN 1865-1869 went
against them big time! Why burn crosses? Why not burn a 6 pointed "star"
instead? I prefer to BURN UN flags!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

WHY not? I believe the Bible; the Apostles creed; I've repented of my sins and BELIEVED THE GOSPEL (the GOOD news) as saving me from the BAD news, that I was going to HELL (Lake of FIRE). My advice to you is to REPENT of your SINS (turn from them and be SORRY for them), believe that Jesus took on himself YOUR payment for them, and start reading a King James Bible. It will be the best thing you ever did!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Message-ID: <QFLP9.1461$RQ4.338334814@news.inreach.com>
Source record: 147939

True dat but...

1. I'm not on the list of known firearm owners.

2. I don't have a radio license indicating radio ownership.

3. I live in a rented house under a different name

4. I don't work nor do I pay taxes. (piggybank)

Basically, I'm invisible. I don't have a set pattern of actions
such as going to the store, barbershop, shopping etc., so
I don't stand out. I change my looks daily so those who do
see me never see that person in the same week.

Yep it will be. 2008 CB will be 50 ! CB is still going strong, despite attacks on this NG from dysfunctional paranoid Hams that have NO jobs, since they were laid off when the former Soviet Onion went kerplunk!

How can we improve CB this year? Or the NG ? !
Dave!

Don't worry. They really are following you.

You can run, but you can't hide...

Dey had to let him back on the ham bands, because if dey didn't, he would probably go to da FREEBAND !

Actually it wasn't cornflakes--it was digital rice crispies!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Too easy. Stick a beacon transmitter inside a shoebox behind
the dumpster at 4th and Main. A blind man with a deaf dog
can find it.

Real foxhunts hide it in moving objects....

".Bithead." <bithead@rochester.rr.com> wrote in message

No, believe it or not, it only attracts attention to yourself.

People will see you and remember what they saw.

Spray paint the tinfoil with flatblack spray paint and wear
it under a baseball cap that supports a local sports team.

This will create anonymity and shield you from satellite
radar detection signals from above.

Nope, nowhere in the Bible does it say that. The "true Israel" is still the same Israel, all those descended of Israel, father of Joseph.

> Dave!!!!!!!!!!!!!!!!!!!!!!

You know, Dave keeps making this claim. What happened to all of them? Did they all die off and a new race of Jews spring from the Ether? Just because all of the records were destroyed in 71AD doesn't mean that they stopped being Jews does it? Yes, Dave IS anti-Semitic but I don't hold it against him, I don't have the right to since I'm not of a Jewish bloodline. However, as Dave seems to skip over in his cafeteria Christianity, we are not of Christ's bloodline, He has none in actuality. What we are, through Him, are son's of God. Does this mean that we have Christ's blood in us? No, it means that we have His inheritance. I won't go into what that is but that's all it means. You have to know what it meant, in that culture and at that time, to be a "son" of someone and apparently Dave's "church" doesn't teach that part of the Bible since it's the "Jewish" part. What his

"church" fails to teach is that all of the blessings spoken of by Paul and Jesus are "to the Jew first and also to the gentile." This does not mean in chronological order but in order of priority since the Greek root is not kronos meaning time but is caheao which means in order of rank or importance.

You see James, Dave is totally anti-semetic which also makes him not a true Christian. You see, ALL and I mean ALL of the first Christians were Jews.

Apparently Dave's church doesn't teach that Jesus Himself was Jewish, all of the apostles were Jewish, all the writers of the New Testament, with the possible exception of Luke, were Jewish. Luke was a physician, so who knows... ;) Back then believing in Jesus was a very Jewish thing to do. As a mater of fact when the first gentile wanted to believe in Him man did they have a problem with that! Never before had a gentile wanted to believe in the God of Abraham, Isaac and Jacob without first becoming a convert to Judaism. So, in the Book of Acts when Corneleus wanted to believe in the Jewish Messiah it was something completely different and God had to give Peter THREE VISIONS before he got up enough guts to visit Corneleus' house. When he did all of the family were converted and there was such an uproar that the first church counsel had to be held to figure out what to do with all of the "gentiles for Jesus."

The Bible also states that the wicked run away when no one is chasing them. What's all this I hear from you, and others, about "the commies are coming, the commies are coming" and "the bad old gov'ment is coming to get you." If you are "righteous" as you claim to be then you have nothing to fear from any man or any government.

Nope, wrong Dave. Remember ALL of the people in that area are from the same
"race." They were all descendents of Noah, remember. They were different
NATIONS not different RACES.

>
> >
> > There is nothing in the Bible that says no inter racial marriages.

the
> nations, which are races, need to be "healed?"
>

He's right Dave, the Bible does not forbid "races" from intermarriage. It
forbids you from marrying outside your faith, there is a difference. If a
white Christian wants to marry a black Christian there is nothing in the
Bible to forbit it. If a Christian of middle-eastern descent from Tennessee
wants to marry a Moslem of middle-eastern descent from Tennessee, both born
in the United States and both American Citizens, the Bible does have
something to say about that.

>
> God told
> > the Jews not to marry with the Egyptians. As always, mere man couldn't

too.

Yep, "love your neighbor as yourself" was one Dave. Can you love your neighbor when you call him a faggot or a commie? Jesus also said that if you hate anyone without cause you have committed murder. Have you hated anyone "just because" he's a sodomite or just because he's a commie?

>
> >

HATE
> what GOD HATES ! He hates murderers (Communist China), and violators of
his
> 10 Commandments. Your problem is that you got too much "love" SUGAR in
your
> mouth from the state church you attend! It is lawful TO HATE ! What do I
> "hate" that you perceive is unlawful to hate? Better read Romans 1 before

> you answer this, as well as do a study on what GOD HATES in the Bible.

Please tell us where the Bible tells us to hate anyone? Jesus tells us to love our enimies, remember? Nowhere in the Book of Romans are we commanded to hate. In fact the word "hate" is used only once in Romans and it's a "scribble insertion" that is not in the original Greek text.

>
>
> Spouting your racial and ethnic slurs.
>
> Are these unlawful? What "slurs" are you referring to?

If you follow Jesus's laws yes it is. Jesus commands us to Love Our Neighbors. How can you love someone that you are speaking slander against?
>

Enough for now.

Oh, that happened, occasionally.But when you've got 50 or so chase
cars, a moving target can get downright dangerous.

One moving hunt was particularly memorable; the transmitter was on a
boat in the canal. Kinda hard to trace from a moving car.

Hello ALL:

Heres one that cautch my eye. On a German CB Museum web page at:

http://www.cb-museum.de/index2/Station-Base/station-base.html

Click on to "Black Widow"

Is this a Prototype of a old General Radiotelephone CB radio?
Or a very rare and old CB Radio, made in Europe some where????

Bob you know all this stuff.

Jay in the Mojave

5440. Cobra 2010 SSB Problem

Newsgroup: rec.radio.cb
Date: 2002-12-30 02:24:00 UTC
From: docwakins@aol.com
Message-ID: <20021229212400.02780.00000603@mb-ch.aol.com>
Source record: 147974

I just got a new Cobra 2010. The only base i have ever owned was a Nahavo with SSB. With the Nahavo SSB was a breeze, up to 12 people on SSB and everyone was on frequency and sounding great. NOW with the Cobra 2010 here is the problem. On AM is works great on SSB everyone tells me I am way off, everyone has to clarify me in, And once I get one person clarified the next time they key up its moved again
Seems to me the SSB frequency is screwy! Like it floats around

To talk any SSB at all I have to spend 3/4 of the time clarifying, unlike the Navaho.

Is this a problem with Cobra 2010's? A bad PLL from factory? Or just mine?
I have very limited access to NGs so a response to tripleduece@veedubya.com would be greatly appreciated.

Thanks in advance

Is this radio "new in box" or "new to you"? It sounds like the
clarifier may be unlocked and someone did a bad job of aligning
receive to transmit. Find a good, reputable radio shop with the
proper equipment to properly align your radio.

5458. Re: Cobra 2010 SSB Problem

Newsgroup: rec.radio.cb
Date: 2002-12-30 04:39:28 UTC
From: sideband <KRNO8SPAMLR@cac.net>
Message-ID: <3E0FC13E.8020204@cac.net>
Source record: 147991

Could be a few things...

The radio could be out of alignment, meaning the transmit and receive aren't lined up, or one of a couple of other problems in the frequency alignment of the rig. Find a reputable shop (usually not at your local truck stop. Find one that deals with Amateur equipment, ask to see their bench. If you don't see an Oscilloscope on the bench, grab your rig and run.)

There could be a voltage regulation problem inside the radio. Again, find a reputable repair shop. (See above)

The last problem could be power regulation outside the radio. I don't recall if the 2010 was AC only or if you can run it on 13.8V DC or off of wall power. If it has a power plug for 13.8V DC, try running it on a car battery or a good, hefty (5A or bigger) power supply. If the problem disappears, you have a bad voltage regulator in the internal power supply, which, again, should be taken to a reputable shop (see above) for repair.

If it's not any of these, then you should swap it.

Sometimes a little investigation of the problem for yourself can save you a few dollars and alot of time in the shop.

HTH.

It's a good dea to get guns without paperwork. In my state we have private sales with no paper. If you do have guns you bought from a dealer you can say Hey ATF asshole I sold it. GUN LAWS WORK REALLY GOOD. LOOK WHO WROTE THE BOOK ON GUN CONTROL. ADOLPH HITLER. THEY WORKED GREAT FOR HIM. WE MODELED OUR 1968 GUN CONTROL ACT AFTER HITLERS. I KNOW ONE THING. THE OLDER I GET THE LESS LIKELY I AM TO GIVE UP ANY GUNS

really ? virtually NO one has a 2970 on there . I see them listed and pulled the same day IN HAM 10-12 meter STOCK listed.

Now , they let 2950s in no prob but not 2970s , I seen one listed

as stock rci 2970 out of the box. was GONE next day i contacted the seller he was 10 x kind of mad because they yanked his and told him they wont allow ANY rci 2970 with no other explanation so far

http://page.auctions.shopping.yahoo.com/auction/71517706?&aucview=0x70

is still there on yahoo... im trying to set up an account to bid on it

Has anyone had any good or bad experiences with yahoo auction service ?

Hey Brian,

I think maybe Dave should replace Trent Lott. Just think what a "Righteous"
man could do in that position. He is so "anti-Christian" he just might be
the "anti-_______. Someone else can fill in the blank.

Well Im sorry that you don't appove of the large pics. The reason
behind the large pics so you or who ever else would be able to get a
close up veiw of what they are buying.
As far as the pile of rust Yea right if you think so. So don't buy
it. You don't have to be mean about it. Couple of hours to prep and
paint bomb like new tower. Go price 80 ft of tower. what Im asking is
around 75 a section.
Have a nice day. I'm sorry that you don't approve.

Source record: 148061

gee,
at that price, I can buy the parts to make 5 of those and still have
money left over for an HF rig to drive them.

I do't care how much the original manufacturer lists for MSRP on their
site, the market is the prevailing force here and that *thing* you are
selling is nothing more than a "class - c" amplifier (not even legal on
the HF bands).

care to lower the price to something a little more reasonable (like
$50.00)?

oh yeah, before you start BITCHING about this being a supposedly legal
amp, it ain't! Its on the list of prohibited devices (as listed on the
FCC database). Just so you know, I have personally owned one of these
devices (before I became a ham) and I know exactly what its capabilities
are, so please do me the favor of not lying to me in public!

you wanna sell it on Ebay, go right ahead. However, at that price, I
doubt very much you will see any takers anytime soon.

So you've never used a digital spread spectrum telephone?

Or understand the basics of how they work?

Wal Mart has em for under $50, get one and try to listen in
with your radio shack scanner.

Or for that matter, flip on your frequency counter and see if you
can obtain a signal reading from the transmitter.

By the way, I'm still waiting for the name, model or maker
of the device that DF a digital signal....

Depends on your bandwidth filter in your transmitter.

And yes, if you use AM with a linear amplifier
you will be heard over a 6 channel spread.

(CB channels I assume)

A poorly adjusted power microphone will
do the same thing.

I have a road talker 40,,, sears, with power mike im wanting to part with
works perfect if you want a photo email me at

bennyc03@earthlink.net

Ill take 30 plus shipping for it ... i believe shipping to be 12 bucks...
any where in us... this radio looks and works good, needs power mic
batteries, i took them out before storing so acid wouldnt go everywhere , it
takes those hearing aid batteries...

5488. Re: "N8" in this month's QST !

Newsgroup: rec.radio.cb
Date: 2002-12-30 19:55:47 UTC
From: twistedhed@webtv.net
Message-ID: <3109-3E10A4C3-3@storefull-2314.public.lawson.webtv.net>
Source record: 148075

From: aa2qa@frontiernet.net (Jim Hampton)
Good point of itself, Twist. My point was only that they are
publishing it in QST. Visibility is getting higher. Reality is that some
of the amateur contests are not much more wholesome than the proverbial
shoot-outs. Regardless of anyone's take on the DX, I
personally feel there is much more to 24 GHz moonbounce with 85 watts
than DXCC (or the shoot-outs with CB).

--

>I get the same thrill with 3 watts to Africa. And I don't utilize
something necessitating a rebroadcasting or an assisting of my
signal.....just me rig and me antenna.<

--

All grousing aside, how much difference exists between some of the
14.313 crowd, some of the 75 meter crowd, and some of the idiots on CB
(and certainly not all cbers nor amateurs are like that). Dang, Twist,
the more I try to uncover the differences to point out to you, the
more I find that we are very similar (amateur and cb). The control
freaks exist on both sides of the ledger; heck, tell ya what - I'll
extend the hand of friendship. I'll even give you Doug ..
Bwahahahaha! (sorry, I couldn't pass up that opportunity!).

--

>Shux, Jim, I already have Dogie...been in my back pocket along with a
few sets of lips I cut off of a few disgruntled hammies on the freeband.
It's not me you have to convince, Jim. If you're extending a hand
anywhere near these control freaks and troublemakers, it will get
bitten. They're rabid.<

--

If nothing else is ever learned in the newsgroup, I'd hope most of us
realize there are loose cannons on both sides of the group

--
>This is true, but in all fairness, it certainly isn't illustrated
around here. One doesn't see many cbers posting on the hammie boards
raising cane about hammies illegal behavior..it is limited to merely
responding to their ill behavior on this board....butcheckitout.. the
disgruntled, pizzed and jizzed upon hammies that have ego problems have
been getting sliced and diced on a regular basis by those so-called
imports. It's not illegal to listen Jim,,,,you ought to check us
out..........having this much fun ought to be
illegal...<g>..seriously..you oughtta see the mark some of these imports

are leaving across our boys foreheads...on a daily basis!!
<

--

and most of the gang are simply human beings (flame 'em and you're
likely to get
flamed back). Certainly none of us is totally innocent all of the time
(I just try and hide it).

--

>So do many of the hammies, but that's all good. It's when one of these
boyz starts a-trying to walk on water that they get wet and curse.
Desperation calls for reinforcements..(chuckle)...but they just can't
help scratching their balding heads wondering why the hell they can't
achieve what they're used to on 2 meter repeaters...heheheh!
I'm in agreement the MAJORITY of the group are great folks. The four or
five who have an underlying agenda don't even make a blip on the radar
screen..they've been bagged, tagged, stuffed and served. <

--

73 and hope your Christmas was a gooder (I got 100 pounds of
anthracite coal!)
Jim

--

>Excellent.....means you can stay warm without the flame. You oughtta go
fishing, Jim. It's the most wonderful time of the year. I was on the
Silver River in Ocala the other day and with the drop in temps (30's in
the early AM) making the fish sluggish you can just about hog-grab
anything you see. My Christmas was awesome..another beautiful day in
paradise. Take it ez up there and I'll try and send some of this 70
degrees today your way.

So you've never used a digital spread spectrum telephone?
Or understand the basics of how they work?
Wal Mart has em for under $50, get one and try to listen in with your
radio shack scanner.
Or for that matter, flip on your frequency counter and see if you can
obtain a signal reading from the transmitter.
By the way, I'm still waiting for the name, model or maker of the device
that DF a digital signal....

Good grief, do you think all digital signals are spread spectrum?
What about when television and radio go digital? Do you think they
will be spread spectrum? Just because a signal is digital does not
automatically make it spread spectrum.

I think that Dave means well he just doesn't know any better. It's that church that is filling his mind with trash. It's called cafeteria Christianity. They follow the parts of the Bible that "support" their hate filled racist ideas. These churches build themselves up as "righteous", more self-righteous, and do it by tearing others down to make themselves look better. There is a wonderful saying that my grandmother used to say. "When someone says something unkind about you just live your life in such a way as to prove them a liar." Trouble is that many people from churches like Dave's live their lives to prove that they are exactly what people say about them...purveyors of hate and racism.

Again, I repeat...

Do you think any signal that is digital is spread spectrum? A digital signal is no different from any other signal other than the information on the carrier is digital information. It is still a radio signal that can be traced with the same devices used to trace any signal.

Subject: No party for Essie Mae..!!!!!
Date: Monday, December 30, 2002 5:33 PM

I have my black eyes on today
No Party for Essie Mae
By Colbert I. King
Saturday, December 21, 2002; Page A23
The Washington Post

Sen. Strom Thurmond's 100th birthday party will go down in the annals of Washington soirees as an event most noted for who was there and, above all, what was said and by whom. But the celebration was also remarkable because of a person not in attendance.

The audience was full of luminaries, including current and former members of Congress, Supreme Court justices and friends and family of the retiring South Carolina senator. But the party failed to include a retired schoolteacher in her late seventies now living in Los Angeles. A widow since 1964, the former teacher, Essie Mae Williams, was born Essie Mae Washington in 1925 in Edgefield, S.C. Washington reportedly is the fruit of a relationship between a white Edgefield school superintendent and a black teenager, Essie Butler, nicknamed "Tunch," who worked as a maid in the superintendent's stately house.

Now, it could have been an oversight, a deliberate snub or maybe Essie Mae Washington was invited but chose not to come. But this much is true: The fair-skinned woman, a member of Delta Sigma Theta sorority and a 1950 graduate of traditionally black South Carolina State College, was not on hand to help honor the man believed by many to be her father, the former Edgefield school superintendent and the oldest and longest-serving senator in U.S. history, Strom Thurmond.

This is not a groundbreaking column on the story of Thurmond's alleged black daughter. Marilyn Thompson, The Post's assistant managing editor for investigations,

included a chapter about
then-Gov. Thurmond's alleged support for an alleged black daughter
named Essie Mae in "Ol'
Strom," an unauthorized biography of Thurmond that she wrote with
Jack Bass in 1998. Thompson,
a veteran South Carolina reporter who had spent the better part of
10 years tracking the story, also
wrote a lengthy article about the senator and his longtime ties with
an African American woman for
The Post's Style section in 1992. Both Thurmond and Washington have
acknowledged a
relationship, but she denies he is her father, though the senator
has never issued a categorical
denial.

The purpose of today's column is not to rehash the strong
circumstantial evidence or to repeat
interviews with knowledgeable sources about the long-standing and
secret relationship between
Thurmond and Washington. Thompson unearthed all that. But this
annotation to Thurmond's life is
worth highlighting, given that his fiery advocacy of segregation did
more to stifle racial progress in
America than the actions of any single human being in the postwar
era until Alabama Gov. George
Wallace came along.

Strom Thurmond was among the vanguard of southerners who passed and
enforced laws
legalizing segregation and discrimination in virtually every aspect
of daily life. And leading the list of
noxious Jim Crow laws were statutes specifically put on the books
outlawing and punishing
interracial cohabitation and marriage.

Thurmond was chief among those who believed and argued that drawing
a tight color line and
strictly segregating the races was the only way to prevent what
Theodore Bilbo of Mississippi
called "the mongrelization of the Nation." Thurmond was so motivated
that he captured the Senate
floor in 1957 and filibustered for 24 straight hours against a civil
rights bill and "race-mixing." It was
Thurmond who vowed to preserve the integrity of the white race and
to keep the races distinct.

And it was Strom Thurmond who, according to published reports, did
not practice what he so
fervently preached.

The very thing Thurmond condemned, he did. Learn the story of
Thurmond, Essie Mae and her

mom, and come to understand the true meaning of deception, arrogance and what it means to be
unprincipled. But this is not the time to wage war against Strom Thurmond. His day has come and
gone. Rather we must address the damage that he did and his legacy of racial ill will that live on.

Thurmond helped create a world with walls separating people from people, the vestiges of which
still exist. He was among those who vowed to protect the virtue of the white women of the South
even as he allegedly used the back stairs to have his way with a woman of the darker race,
surreptitiously exercising a prerogative preserved for Southern white men.

While doing that, he and they preserved an evil social system that used the gun and the noose to
say that the gift of love cannot come to people of different races. Segregation, to be sure, left
generations of African Americans with broken dreams and unrealized ambitions, even as others
enriched themselves with better schools, jobs, housing, health care and the like. But the official
rules and racial customs of Thurmond's Jim Crow era also made it possible for untold numbers of
people to miss out on the mystery of love, to never know the pleasure of sharing, if even for a
moment. Thurmond stood between the natural coming together of men and women, even as men
like him gave themselves a pass.

And now he goes out glorified. Because in Washington, that's the way it is. But the birthday party is
not the last word or act. For some of us, this is the season to put aside our agendas and turn to
quiet reflection, repentance and recommitment.

This is also a time of giving. So reach out with a thought to the one untouched by the joy of Ol'
Strom's birthday party: the woman who wasn't there.

5512. TV AMP question (settle DOWN N8 !)

Newsgroup: rec.radio.cb
Date: 2002-12-31 02:48:11 UTC
From: Dave or Debby <truth@NOSPAMplanetc.com>
Message-ID: <3e110527_2@corp.newsgroups.com>
Source record: 148000

I have a Channel Master TV amp. I can't remember exactly what this plug is for, but in it it has a plug that you can turn on or off a "FM TRAP," I believe it is called. (Don't have directions any more).

I can't remember in which position I put it, so I THINK I remember that the purpose of this trap is to block out the FM radio band so the amp won't amplify it too. IS this just used IF you live near FM radio transmitters (88-108mc)?

IF I have this on an FM band only antenna, for the purpose of picking up VHF TV, then should the trap be ON or OFF ? OR does it matter? Thanks for the imput!
Dave!

5513. JAY--Got the 7' Parabolic up again!

Newsgroup: rec.radio.cb
Date: 2002-12-31 03:00:22 UTC
From: Dave or Debby <truth@NOSPAMplanetc.com>
Message-ID: <3e1107f7_2@corp.newsgroups.com>
Source record: 148002

HEY Jay! :
I got the 7' Parabolic UHF antenna up today, put it on an existing mast right below my Penetrator 500. What a JOB it is to put this used antenna on an existing upright mast, instead of the way I did it origionally on the ground!

I used the OLD collector for it instead, so it will all look old, instead of bright GOLD put on a faded aluminum dish!
I think my old 300 ohm transformer was bad I had on it--I got NO reading from the center of the 75 ohm output to any other terminal on it, either the to the outside or the 300 ohm wires. I had another 2 transformers and got readings with them, so I figured it was bad.

It looks like SOMETHING ELSE, to see that 500 Penatrator right on top of a 7' UHF dish antenna! The commies will even be happy, since it is under 50' high! But we don't care what their stinkin' antenna regs are anyway!
That's cause I is da (American) MAN!
Dave!!

I want to use a hifi mobile cb antenna that need a ground to work but the minivan I am going to use has no ground plane. I have made a home made bracket from 1 4 inch L and one 12 inch straight pices of metal with a mirrow/lugage rack brack. If I bloted this bracket to the frame in the rear on the passanger side just on the other side of the rear door will it work with a 65 inch mobile antenna at 70mph. What do u guys reccommon I should do if my idea do not work, where should I place a 65 inch antenna so that it will work on a minivan that the body is made of plastic. I do not want to use a special firestick that work with on ground plane. I want to use a 65 inch tram skyhaw antenna and I am only goin to drive this car for 6 months so I need something easy to install on a pontiac trans sport.

This is where Marriage Licences came form. The definition of
licence is permission to do something illegal, unlawful a trespass or a
tort. Marriage Licences until the 60's were used to prevent interracial
marriage. They got rid of that, and LOOK what you have NOW ! The UN "Brown
Man" (Tiger Woods). Is it "natural" to go interracial? Did GOD set
"boundries?" WHY would Nations have to be "healed" in Rev. 21? What would
mess them up? A nation use to be A RACE of people. Some countries still
are, like Korea. Something to think about! WHO is pushing for people to go
interracial? !

You only need to turn the trap on if you have nearby FM transmitters.
The video distortion caused by a strong FM station shows itself by
putting diagonal lines on channel 6

5521. Help you with the height of you mobile antenna

Newsgroup: rec.radio.cb
Date: 2002-12-31 03:23:19 UTC
From: Recordking@Hotmail.com
Message-ID: <e8d89b3f.0212301923.52dc8042@posting.google.com>
Source record: 148010

To determin how high your mobile antenna should be get a truckers road atlas. Their is a section in most truckers atlas that tells you the height of low bridges and tunnels in each state & canadian provinces. I live in Texas and the lowest bridge is 12ft so my antenna should not be higher than 11ft 9 inches to give extra room always give your self 3 inch space. So if you state has a bridge or tunnel that is only 11ft high your antenna should only be 10ft 9 inches high. Get a trucker road atlas and find out how high your antenna should be in your state.

5522. Teddy should of got it, since he is more WACO !

Yep, Kevin THEY SHOULD pursuant to Romans 1. I was just comparing the Molesting that Reno was suppose to help prevent (yeah right) as to the MURDER she did in yo state! You should of got the Militia down there to STOP her ! I know people who went there. They made them stay away so they couldn't tell what was going on close, like FLAMES comming out of the tank to burn up the Davidian coumpound, killing the 17 children and more adults. I wish they would of done it to the Kennedy Coumpound instead in Taxachussets! This way Teddy would of paid for his MURDEROUS past ! Instead the DUMMYcrats re-elected him!

Ho brother---somebody put them out on CD now??? Make it, and they will buy... *sigh*
>
> Frank is still missed.

Poor old Frank Retard. The one way to piss him off was to drive by his condo in the Marina and jam his 440 remote---yes, KE6VRK has done it! Me & VRK used to shoot DX on CB sideband and cruise L.A., jamming phones on "49" together and surprising the shit out of dimwitted callers, then he decided he wanted to become a 24-hr party animal. Exit KE6VRK.

The 435ers who really cracked me up tho were Jim (N6UKN), that old duffer Rudy, and nutty honyock Laszlo, who writes just like he talks---in mangled Hunglish.

Say, would you perchance know if this Cobra 148GTL I have is a "lawfucker" nowadays? It has sideband, and I bought it new in '91, it's one of the last of the old 5w jobs... I have the mods for it, but I wouldn't dare cut it up because it's a collector's item now!

You're under the grave misunderstanding that an exact frequency is
necessary to track a signal. Hate to tell you this, but it's not.
Signals can be traced using a bandpass filter for the band involved
and a field strength meter. The FCC has custom equipment to do just
that, only faster than the homebrew stuff can. Think about it.

I see you haven't pulled your head out of your ass yet.. Pity that.

ALL RECORDS destroyed on 70 AD, so the TRUE JEWS are the ones IN CHRIST, period ! All others are Rev.2:9 & 3:9 !
The Father will show them that HE LOVED US (READ the Scripture)! The question is GOD's eyes is not going to be "Are you anti-Shemetic," but are YOU ANTI-CHRIST (Jesus & the Father are ONE) IF you LOVE the Father, you MUST love the SON (Jesus)!!!!!
Dave!!

The reason many VHF/UHF TV amps have a switchable FM trap is to minimize FM interference to TV channel 6. If you do not have a local ch6 you probably wont even see a difference. If I remeber correctly TV channel 6 sound is transmitted around 87.7 mhz and the video and sync is about 6mhz lower. If your TV looks good with or without the trap swich on, I would leave it off, and hook up your stereo to the outdoor antenna. It is amazing how many FM stations you can pick up form 50 to 100 miles away, sometimes even more. Good luck!

In addition to bridges and such, think about gas stations
and their lights.

On this Dave and I are in 100% agreement! He is not the abusive father but
He will allow His rebellious children to get themselves in trouble. Being a
Christian doesn't mean that all will be rosy and bright. What it does mean
is that your reward will be in Heaven and not necessarily in this life.

Over the decades, there's only been one, or two problems with the height.
Public garages.
With these damn things having an average clearance of barely 8 foot, you'll
need to remove your antenna, or bend it to get into them.
the other problem is car washes. not that I've had any problems, but most
will tell you, if it breaks, they ain't replacing it.
even semis don't have any real problems because most truckers will use the
shorter fiberglass whips.
which means they'll be below the roof line of the trailer.
if they use bigger ones, they angle mount the antennas.
I've used practically every style there is. never had a problem on the road
with them.

5543. Re: No ground plane on a pontiac trans sport minivan

You'll still get some good ground plane effect directly from the ground
itself.
I ran a cb off my motorcyle and never had a problem.
Your idea sounds feasible, but you may need to ground the plate to the
chasis.
you could take a piece of plywood, cover it with metal sheeting, then mount
the antenna on it.
may look odd, but if it works, why knock it?
as far as that goes, since it's plastic, you could even mount the metal
sheet inside under the roof.

I never said that I love what they do. God loves you no matter what you do
and wants you to come to repentance. He will also give you what you want
and send you where you deserve to go.

I love "them" enough to pray for them that "they" will come to repentance.
Do you pray for their destruction or for their repentance and salvation?
Which would be more glorifying to God, having Sadam Osama and be killed or
have them come to repentance and salvation? So you are "anti rev 2:9 and
3:9?" Who are you to make the judgement as to who fits into that
"category?" Who are you to judge a person's heart? Who are you to tell
them that they are the "Synagogue of Satan" when you know so little about
them other than what your preacher tells you? Is that all your church
teaches? Romans 12/13 and Revelation 2:9, 3:9? That and the Communist
Manifesto are the only things you talk about. I suppose that the book of 1
Cor is not in your Bible and neither are the passages about loving those who
hate you and loving your enemies, which Jesus commands.

So just because the records kept by MAN are destroyed an entire bloodline is severed and all those after 70AD are no longer "real Jews?" Wow that makes sense.

Other than that, what you say is true, Jesus and the Father are One and you can't love the one without the other. What are you doing to show the Jews that Jesus and the Father are One? Are you repelling them or are you receiving them?

Kevin:

Kind of reminds me of the words from a song back in the 60's.

" Go ahead and kill your neighbor
Go ahead and cheat a freind
Do it in the namve of Heaven
You can justify it in the end
...."

From the song
One Tin Solder by Coven

The Bible is an interesting book. It has been used to justify discrimination to out right murder. And never in any place did Jesus command those to do those act. He only commanded them to preach the word.

james

To DAve

Yopu have preached here. We no longer listen. Dust the dirt off your shoes and leave!

james

That was SIXTY YEARS AGO, man. And if you don't think Japan paid
dearly for that, and to some extent are STILL paying, think again.
There are about 250,000 ways, CIVILIAN ways, that they paid, and
in some cases are STILL paying.

It's convenient how we've made nice with Germany, the other enemy from
that war, and Russia, the enemy from the Cold War, but for some reason
nobody can forgive Japan.

Look, I'm not a big fan of the rice cars, either, but damn, buddy...
Just how long are you gonna hold a grudge? I'll lay odds that the
vast majority of those who frequent this newsgroup weren't even alive
when that happened.

Do you still hate the British, too? After all, we were at war with
THEM in the 1700s.

Just where do you draw the line?

No I do not want him to be flogged. He has the right to preach and I
have the right to criticize that which he may or may not preach about.
As long as I do not incite violence, I am within my rights to object
to some things he says. Free speach is not a one way street.

What I think of the patriot act? Don't get me started on that! I am
enjoying me free speech while I have it.

The most grave problem faced by this planet's population today is the threat of illegal radio operation. If this problem is not solved soon all life on Earth will cease. The effects could very well affect other dimensions and planes of existence. We must therefore exert our every waking hour to the cessation of this abominable and deadly practice.

Let's get out there and do it!!! The world....nay, THE UNIVERSE IS DEPENDING ON YOU!!!!

Let's see now, you are an EXTRA class ham right?

You've done real good, and judging from the effective
date of your callsign and your old callsign, I'd say you're
also one of those 5WPM Extras to boot.

Well, I won't hold it against you, even 5WPM is not easy
for some EXTRAS....... (snicker)

Let's look at your web page, http://www.qsl.net/kr8lr/

Wow! You've built two extremely technical projects!

A 2 meter antenna and a CW key. Just amazing!

http://www.qsl.net/kr8lr/coathanger.html

And the antenna was built out of a coathanger!
How original, bet nobody's ever done that before!
You are so smart, bet you made your mommy proud!

Did you use the same piece of coathanger to build
your (chuckle) CW key too? I've seen 6th graders do
a better job...(really)

http://www.qsl.net/kr8lr/coatkey.html

Gosh..wish I had a callsign listed on the internet
for the whole world to see.....

Guess I'll just have to stay a lowly CB'er ......

Callsign: KR8LR Class: Extra Codes: HVIE USA
Name: CHRISTOPHER G PETTY
Addr1: 412 WHIPPLE
Addr2: SOUTH LYON, MI 48178

kr8lr@qsl.net

1. My mother taught me TO APPRECIATE A JOB WELL DONE.
"If you're going to kill each other, do it outside. I just finished cleaning."

2. My mother taught me RELIGION.
"You better pray that will come out of the carpet."

3. My mother taught me about TIME TRAVEL.
"If you don't straighten up, I'm going to knock you into the middle of next week!"

4. My mother taught me LOGIC.
"Because I said so, that's why."

5. My mother taught me MORE LOGIC.
"If you fall out of that swing and break your neck, you're not going to the store with me."

6. My mother taught me FORESIGHT.
"Make sure you wear clean underwear, in case you're in an accident."

7. My mother taught me IRONY.
"Keep crying, and I'll give you something to cry about."

8. My mother taught me about the science of OSMOSIS.
"Shut your mouth and eat your supper."

9. My mother taught me about CONTORTIONISM.
"Will you look at that dirt on the back of your neck!"

10. My mother taught me about STAMINA.
"You'll sit there until all that spinach is gone."

11. My mother taught me about WEATHER.
"This room of yours looks as if a tornado went through it."

12. My mother taught me about HYPOCRISY.
"If I told you once, I've told you a million times. Don't exaggerate!"

13. My mother taught me the CIRCLE OF LIFE.
"I brought you into this world, and I can take you out."

14. My mother taught me about BEHAVIOR MODIFICATION.
"Stop acting like your father!"

15. My mother taught me about ENVY.
"There are millions of less fortunate children in this world who don't have wonderful parents
like you do."

16. My mother taught me about ANTICIPATION.
"Just wait until we get home."

17. My mother taught me about RECEIVING.
"You are going to get it when you get home!"

18. My mother taught me MEDICAL SCIENCE.
"If you don't stop crossing your eyes, They are going to freeze that way."

19. My mother taught me ESP.
"Put your sweater on; don't you think I know when you are cold?"

20. My mother taught me DARK HUMOUR.
"When that lawn mower cuts off your toes, don't come running to me."

21. My mother taught me HOW TO BECOME AN ADULT.
"If you don't eat your vegetables, you'll never grow up."

22. My mother taught me GENETICS.
"You're just like your father."

23. My mother taught me about my ROOTS.
"Shut that door behind you. Do you think you were born in a barn?"

24. My mother taught me WISDOM.
"When you get to be my age, you'll understand."

25. And... my mother taught me about JUSTICE.
"One day you'll have kids, and I hope they turn out just like you!"

I just was wondering how the FCC knows what equiptment you by just
having a lincense? The last time I saw there were no sections that
required you to present an equiptment list on the application for
license. As for gun registration well ....

**********.

Well the minute you used them they are no longer out of sight and now
you become a much easier target of the state. I can visualize
scenarios where a guncould be used to save one's life. If you are the
only one with in say 100 miles that has a radio besides teh state, How
is that going to save your life?

****

Evidentially you need a little more education of direction finding and it's technique. To find someone you do not have to understand what they are saying, just find the transmitter. Finding transmitters is not as imposible as you think using digital prootcol.

So go ahead and think you are safe. It will be idiots like you that go in teh beginning.

james

Certainly you can DF a digital signal. The only
difference between an analog xmtr and a digital xmtr is how it's
modulated. The RF section on each xmtr is nearly identical (a digital
xmtr has to be more linear than it's analog counterpart), so DF'ing the
signal would be no trouble. You would need a digital receiver for a
digital transmission.

Hewlet Packard, Tektronics

james

Oh Buzzy. have you ever heard of a spectrum analyzer? It could care
less of the whather you are using AM, FM, PM, or even what ever
protocol you use. You transmit, you leave a radio frequency spectrum
fingerprint.

james

Gee

Buzzy I am surprized! you actually showed some intellegence. I really thought that you were completely devoid of being able to research and find information. That is starting to show advanced techniques of reason.

Congradulations Buzzy.

Maybe tomorrow we can learn about Electromagnetic Waves. Oh by the way that is not a branch of the Navy.

--
>Let's see now, you are an EXTRA class ham >right?

Uh-oh...heres where the lid attempts to get personal on one who disagrees....attacks should be forthcoming...

>You've done real good, and judging from the >effective date of your callsign and your old >callsign, I'd say you're also one of those >5WPM Extras to boot.
>Well, I won't hold it against you, even 5WPM >is not easy for some EXTRAS....... (snicker)

You wouldn't know..you're a nocode that has never had a chance to grow up.

>Let's look at your web page, >http://www.qsl.net/kr8lr/

His web page doesn't have anything to do with your lies or acting like a jerkoff to those who share other views than the limited ones you hold.

>Wow! You've built two extremely technical >projects!
>A 2 meter antenna and a CW key. Just >amazing!

Just think what you could accomplish if your choker chain was released.....

>http://www.qsl.net/kr8lr/coathanger.html
>And the antenna was built out of a >coathanger! How original, bet nobody's ever >done that before!

Just because you are rendered incompetent doesn't mean the rest are..you are in the extreme minority where not many share your views..it is partly resposible for what destroyed you...that and your brilliant moves.

>You are so smart, bet you made your mommy >proud!

Your claws are showing.
You've been effectively neutered and subdued, and I was so concerned with the parasites you borne that cling to you I plumb forgot about your claws....we'll get them removed fiirst chance we get.

>Did you use the same piece of coathanger to >build your (chuckle) CW key too?

"Chuckle" and "snicker" don't really wear well coming from you...don't get me wrong..the imitation thing is what gives me such great dominance over my minions that you rushed to head. Is there any chance at all we may see you utter anything original or non-malicious in your canine lifetime, or have I exhausted your entire compilation (consisting of two) of witty-things-to-say?

>I've seen 6th graders do a better job...(really)

I've seen middle school kids surpass your status without exerting half the effort it takes you to stand up...recently, too.

>Gosh..wish I had a callsign listed on the >internet for the whole world to see.....

But you do...and you wouldn;t have been reduced to dressing as a woman and denying your identity if anyone had ever taken the time to teach you to act and think like a man. Someone failed big time. You weren't raised in a nuclear family..that much is blatantly obvious. You have a damaged ego problem and are befuddled as what to do next. Try this...stop your lying, and treat those as you wish to be treated. Simple,,even for you.

>Guess I'll just have to stay a lowly CB'er ...

Can't blame you for that...most folks like being near those that have educated them. Your homage has always been special.

Kevin

This is the tatic that the sheep use. They can not hold an intellegent conversation about religion. They are taught to let someone think for them on religious matters. The ways of the Lord are to mysterious for them to understand so it requires a learned man to teach them. They are taught to reply with certain words and quotes to tell the unbelievers and hopefully quide the wicked tothe Lord. It helps them feel that they are justified and have salvation.

You see they are nothing more than windup dolls that go forth and multiply. They are afraid to think on their own as for they may loss their salvation.

having a

They don't. He's lying again for attention, trying to sell that "fear"
bullshit that he's hung upon.

****
Sure, you can say it would never happen here but do you know for sure?
If history is correct, it's only a matter of time. Radios can be used
for spreading anti-government propaganda and like guns, are tools for
anarchy.
****

>No one can predict the future.

It's not really a prediction..more like common sense which the sty
dwellers rejected as per Lelnad KC8LDO claim that logic is but a mere
"belief". Talk about a twist.
It was easy to see those who joined Aaron's hate posse were destroying
their reps worldwide and to the entire hammie contingency as well, but
it was the right thing to do to warn them. Watching them bleed as they
thrashed around wildly claiming it was only Kool Ade was but a mere
bonus.
****
If I ever owned a gun (heh heh), I would make sure it's never been
registered and it's stashed away from public view. Same goes for radio
equipment. Out of sight, out of mind. Keep a low profile, it will save
your life someday.

>IF you ever owned a gun? That's a scary >thought..you can't even master
internet >manners, personal courtesy, or the art of >communication. You
with a gun is >like,,well,,like giving a baby a razor blade to >suck
on..it's only a matter of time before you >injure yourself.
****
Well the minute you used them they are no longer out of sight and now
you become a much easier target of the state. I can visualize scenarios
where a guncould be used to save one's life. If you are the only one
with in say 100 miles that has a radio besides teh state, How is that

going to save your life?
****
And in regards to direction finding techniques, it's a simple matter to create false and deceptive signals to fool any DF device. The best defense against DF hunters is to go 100 percent digital. The new digital mode radios and ecryption devices are impossible to detect. Just like Spread Spectrum cordless phones. Scanners can't hear em and neither can DF equipment.

>You really need schooled on just what >technology is capable of. The HFDFC in >Laurel, Md. will and can pinpoint your exact >coordinance in nanoseconds.

I think, that will probably make Dave mad that I do, that we all need to pray for Dave.

Have a happy New Year. Be kinder to your neighbor. You just might make a new friend.

Maybe this year will be a good skip talking year. Hope we can talk about good things all year long.

Have a wonderful Day.

Deb

5579. Serious Short of CB Techs? What a JOKE!

Newsgroup: rec.radio.cb
Date: 2002-12-31 15:46:26 UTC
From: Power House <Power_House@PrivateBox.com>
Message-ID: <v13ev2legfrc0a@corp.supernews.com>
Source record: 148115

That's right... According to this website, there is a "Serious shortage of trained CB Radio Technicians" and because of this, it "has surprising Money Making Opportunity". You could "Make $500-$1000 per week."!!

Depending on how many thousands of dollars you have to start out with, they will send you the books and test equipment you need to "be your own boss"! Amazingly, "This is a Serious money making opportunity and closely guarded secret"!! Closely guarded secret??? GET REAL!!

They have QuickTime training videos available on CD! Better have a THICK wallet!

*Checking and adjusting SWR 1, 2 ,3's for big trucks Price $129.95
*Microphone Rewiring 101 $99.95
*Cobra 29 Peak and Tune and alignment video package. only $99.95
*Cobra 29 Echo and Talkback Install $89.95

And there's more! But guess what... " These packages are currently not available. If you are truly interested, send me an email," and, "[These] video[s] [aren't] currently available. If you are interested, Email me at [XXXXX@XXXXXX.COM]"

Check it out! It's hoot to read!
http://www.proclassradio.com/CBRepair.htm

The problem IS that there IS a shortage of GOOD, HONEST Techs and 1 man operation CB shops in general. The problem is that these IDIOTS teach people with NO electronics background how to be LOUSY CB Shops!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

true
> Christian.

What you are saying here is that Those whose book IS the
"Traditions of the Elders (the TALMUD)" which Jesus spoke against, that you
are NOT a "True Christian" if you don't believe that they are "God's
People?" Ever read about "the Synagog of Satan?" Maybe you are NOT
Chrisian at all if you hold that ludicrist position! They DO NOT go by THE
BIBLE. They go by THE Babylonian Talmud. I have seen it with my own eyes
their UnBiblical teaching. They call us "CATTLE and DOGS" because we don't
subscribe to their Anti-God & Anti-Christ LIES ! And I'm not a Chrisian
because I tell you THE TRUTH about them?!
2 Chron. 7:14 was put down FOR YOU ! REPENT !
Dave!!!

Dave

What liberal media?

Follow the money trail and you will really find out who runs teh
media! It is not liberal either.

i don't know dave.......you had better check out the comedy show on
bet and tell me if you wouldn't throw down on some of those gorgeous
brown sugar babes.............i would be first in line to get my
marriage license and then proceed to get hen pecked........no doubt
about it........

Buzzyboy thinks when you modulate with digital, it suddenly
becomes a spread spectrum signal.

Guess that leaves you out. Anyone who thinks a digital signal
can't be dfed should say a lot about your technical disabilities.

--
Why? That's an average of a little more than 4 posts per day for the
time I've been here..a total of a few minutes each day.......you
probably spend 24 times the amount online I do.
Besides, If you weren't so yellow and signed your call everytime you
posted, I would pale in comparison. Do you not find it odd that you have
now been reduced to such statistical endeavors merely because I chose to
point out your lie? Tsk Tsk....you wear it well.

Ok, I'm a liar and a cheat and bullshit artist but you take the cake
for having no life...spending thousands of hours online in one
single newsgroup, now that's totally bizzare....

Go find a girlfriend, develop a healthy desire for sex. You'll live longer,
happier and it might just improve your communications skills. Take a
walk, or if you can't walk, have somebody push you down the street.
Go outside. See the sky, breathe the air...there really is something
better then spending your entire life online....

Hell I am not bashful.

1) get a spell checker

2) Learn the English language

3) Learn to stand on your two feet and think for yourself.

Yep, 3 murdered medical Christian missionaries, just so one Mooselim could get closer to The Lake of Fire! Mohammedens; Moon Worshippers. Luney Anti-Christs. Killing Christians helping their own people! Killed for "spreading Christianity. Jesus has had his people doing that for centuries, improving conditions in every country that wanted them. When this Mooselim finds out that Jesus IS God, boy will be be in for a HOT Shock !
What does this have to do with CB's? NO CB's in Mooslim countries! When they say that Islam is a "Religion of Piece," they mean a piece of YOU !
Convert or they will piece you out!
Dave!!!

Current news is that novices will be once again granted privileges
on 2 meters. That means no code test and a theory test so simple
a 3rd grader could pass it.

But no skip, or very little of it on 2 meters. And much easier for the
FCC to monitor and send you violation notices.

Won't be long before parts of the ham radio spectrum will be
license free just to help end the mess on 27mhz.

5609. Rec.radio.cb FAQ att: twistedhed@webtv.net please read

Newsgroup: rec.radio.cb
Date: 2002-12-31 18:25:04 UTC
From: Buzzy da Buzzbomb <buzzy@feelgood.com>
Message-ID: <iamQ9.1567$Bi2.360494119@news.inreach.com>
Source record: 148141

Rec.radio.cb Frequently Asked Questions (Part 1: Introduction)

This is a regular posting of frequently-asked questions (FAQ) on rec.radio.cb. It is intended to summarize the more common questions on this newsgroup and to help beginners get started. This saves network bandwidth and tries to maintain a good signal-to-noise ratio in the discussions.

The FAQ cannot always prevent people from posting repetitive questions. But even if hundreds of questions get posted, it saves you from having to answer them hundreds of times. Also, a friendly pointer to the FAQ in your first answer can help that person refer to the FAQ in the future. That is when we can begin to get a real savings of network bandwidth.

To keep the size of each article down, the FAQ has been split into 4 parts:

Part 1: Introduction

Part 2: Getting Started

Part 3: Communication

Part 4: Technical Trivia

If you are a new reader on rec.radio.cb, we suggest that you print and review the FAQ articles. If you are new to Usenet, please also see the news.announce.newusers newsgroup before posting any articles.

THIS ARTICLE IS INTENDED TO BE A FREE RESOURCE FOR THE BENEFIT OF USENET READERS. YOU MAY COPY AND REDISTRIBUTE IT UNDER THE CONDITION THAT THIS MESSAGE AND CREDIT TO THE EDITORS AND CONTRIBUTORS ARE INCLUDED WITHOUT MODIFICATION. Material from the FAQ may be used to answer any questions. Corrections and updates are welcome.

Acknowledgements

The following people are recognized for their contributions (by e-mail or news) that were included in the rec.radio.cb FAQ: Origional FAQ Coordinators:

Jean-Marc Bonnaudet jeanmarc@calix.greenie.muc.de (Munich, Germany)
Yumeto Funahashi 7K2EUP funa@sramha.sra.co.jp (Saitama, Wakoh, Japan)
Ian Kluft KO6YQ (Santa Clara, CA, USA)
Paul W Schleck K3FU (Omaha, NE, USA)

Technical Contributors:

Michael Larish KD6CTZ (nomad@ecst.csuchico.edu, Chico, CA, USA)
- helped write the original version of the FAQ
- served as an editor on the project for 3 years

Paul Zander AA6PZ (paulz@hpspdla.spd.hp.com, Palo Alto, CA, USA)
- comments and input on the SWR discussion
Bob Myers KC0EW (myers@fc.hp.com, Fort Collins, CO, USA)
- news article on antenna grounding in mobile installations
Bret Musser (bjm@f.gp.cs.cmu.edu, Pittsburgh, PA, USA)
- news article on reduction of engine noise in mobile installations
Benn Kobb KC5CW (bkobb@access.digex.com, Houston, TX, USA)
- information on the General Mobile Radio Service (GMRS)
Bob Witte KB0CY (bob@col.hp.com, Colorado Springs, CO, USA)
- additional info on GMRS - frequencies, fees, useful contact organization

International/Regulations Contributors:

Neil Robertson (conjgr@lut.ac.uk, Leicestershire, UK)
- original info on CB in the UK
Rob Adams (topfm@darwin.ntu.edu.AU, Darwin, Northern Territory, Australia)
- CB in Australia (operating regulations)
Tetsuo Kobayashi JH8LEF (tetsuo@nttica.ntt.jp, Atsugi-city, Japan)
- CB in Japan
Patrick Wendt (root@chamber.in-berlin.de, Berlin, Germany)
- CB in Germany
Martin Grundy (grundy@rtf.bt.co.uk, Brighton, UK)
- sent faxes of UK CB information sheets
- included summary of CEPT standards and the list of conforming countries
Nick Gibbs (nick@bean.apana.org.au, Stirling, South Australia, Australia)
- CB in Australia (licensing and repeaters, type acceptance)
Jean-Claude Michot (jcmichot@teaser.com, Sevres, France)
- update for CB regulations in France
Jon Clarke (jonc@status.gen.nz, Parnell, Auckland, New Zealand)
- CB in New Zealand
Vassili Leonov (vassili@sbcs.sunysb.edu, Stony Brook, New York, USA)
- CB in Russia
Mike D'Urso (mike%40790.decnet@icnucevx.cnuce.cnr.it, Salerno, Italy)
- CB in Italy
Zbigniew Chamski (Zbigniew.Chamski@irisa.fr, France)
- update for new regulations and tax in France
Steve Perry (zonic@enterprise.net)
- update for equipment and license requirements in the UK.
Avatar (141085@alfa.ist.utl.pt)
- update for license and frequency requirements in Portugal
Andre' Mulder (psam@giraffe.ru.ac.za)
- provided information on South Africa

Notes on "Netiquette"

With a growing user community, the rec.radio.cb newsgroup will operate more efficiently if the following netiquette guidelines are used. Please take them seriously:

* When posting a followup article, ALWAYS try to minimize the number of lines of quoted material from the original article. But DO post something so readers will know what you are referring to.

* As a general rule when you try to determine whether to reply to someone by e-mail or with a followup article, remember to "praise in public, criticize in private." It's OK to disagree on the content but be careful not to attack the person with whom you disagree. Also, be careful with your use of the word "you" when posting a follow-up article. Many unnecessary flame wars have started that way.

* Use a descriptive subject. For example, "Antennas" covers a vary large area so some better choices might be, for example, "Antenna tuning" "Antenna installation question" or "Antenna theory question". Also, if a discussion wanders off the original subject, you should modify the subject of your message to match the new topic. For example:

Subject: Re: co-phasing (was: truckers with 2 antennas) or, even better: Subject: Re: co-phasing * Before answering a question, check if the FAQ adequately answers it or if someone else already answered it. If you have more to add, make sure to reference either the FAQ or the related articles. * If a user posts a question which is directly answered by the FAQ, there is no need to post an answer - the information is already available on the newsgroup. Instead, just send an e-mail message which politely explains where to find the FAQ. They will probably appreciate it if you include the answer to their question. (Don't send a "nastygram" - that would just discourage future participation.)

* Pay attention to the size of your audience - use the "Distribution:" header. If you leave it blank, your message will go to every civilized country in the world and occupy disk space in all news systems in all those places. If that's what you intend, it's fine but be aware that CB is not the same everywhere. Otherwise, use a distribution for your continent or country as appropriate for the subject of the message. For example, "na" (North America) "europe" "us" "uk" "japan" "france" etc. can be used similar to the following example: Distribution: usa or substitute your continent or country. Also, this regional distribution works for each state of the USA - just use the two-letter postal code for your state (i.e. ca, ne, co, pa, etc.) * If you have an item for sale, please limit the distribution area so that, for example, an article about a radio for sale in New Jersey won't get to California or Europe. If you wish, you may cross-post your for-sale article to rec.radio.swap.

* Discussion on any UseNet newsgroup is expected to be within the chartered subject of the group - there is no such thing as unlimited discussion here. This newsgroup is chartered for discussion of all aspects of CB radio. Though some topics are clearly outside these bounds, use some good judgement when talking about borderline cases. Please take seriously any complaints about the appropriateness of a subject.

Rec.radio.cb Frequently Asked Questions (Part 2: Getting Started)
THIS ARTICLE IS INTENDED TO BE A FREE RESOURCE FOR THE BENEFIT OF USENET READERS. YOU MAY COPY AND REDISTRIBUTE IT UNDER THE CONDITION THAT THIS MESSAGE AND CREDIT TO THE EDITORS AND CONTRIBUTORS ARE INCLUDED WITHOUT MODIFICATION. Material from the FAQ may be used to answer any questions. Corrections and updates are welcome.

* What is CB?

CB stands for "Citizen's Band" radio. It got that name because its main idea is to be a kind of radio anyone can use. Depending on the country you live in, it is either a minimally-regulated or an unregulated set of radio channels used for short-range (under 150 miles) communications. Many people use CB radios in their vehicles, homes or both.

This UseNet newsgroup "rec.radio.cb" is all about CB radio. The FAQ also covers non-licensed or minimally-regulated radio bands internationally. Readers can expect to find discussions, questions, and answers about all uses of CB and related bands here. There are also other newsgroups for other radio applications, such as rec.radio.shortwave, rec.radio.broadcasting, and several subgroups of rec.radio.amateur, for amateur or "ham" radio. Radios either wanted or for sale are the subject of rec.radio.swap. (Though, an article about a CB radio for sale should be cross-posted to rec.radio.cb and rec.radio.swap with a distribution limited to your city, state or region.)

* Do I need a license to operate a CB radio?

The answer to this question depends on the country you reside in. We currently have information on the USA, Australia, New Zealand, Japan, the UK, France, Germany, Italy, Portugal, South Africa, and Russia. Note that all of these are from e-mail reports contributed by readers. As regulations change, we can only keep up when people notify us. Please check your local regulations because you are responsible to know and obey them.

--- in the USA You are no longer required to have a license to operate a CB radio in the United States. The FCC (Federal Communications Commission) did at one time require a Class "D" license for for Citizen's Band which required nothing more than filling out a form and sending it in to the FCC with the license fee. The FCC then sent you a call sign which might look like "KPS 2720" or something similar. During the CB craze in the mid-70's, the FCC decided that the paperwork burden outweighed the benefits and put CB under blanket authorization.

The FCC permits the use of the following to identify yourself:

1. Your old Class D callsign, if you have one.
2. K, your first and last initials, and your zip code (i.e. KPS 68123)
3. your name (i.e. "Paul")
4. some unique nickname or Handle (i.e. "Cobra", "Rubber Duck", etc.)

A rule change in May 1992 now allows one-way transmissions about highway conditions on CB. This was intended to allow local authorities to use unattended audio warnings about road construction or other hazards.

In the USA, there are two additional radio bands besides CB which are intended for use with minimal regulation by individuals.
1. GMRS, the General Mobile Radio Service, is located in the 460-470 MHz band. A license is required. More information is included in Part 4.
2. The FCC has recently opened up the 31.0-31.3 GHz microwave band to licensed users of several fixed and mobile radio services including GMRS.
3. The Family Radio Service, located in the vicinity of the GMRS. Low power

Handheld operation only. No license required.

--- in Canada
No license is required. You may identify yourself by your name or a handle
of your choice.

--- in Japan
No license is required. You may identify yourself by your name or a handle
of your choice.

--- in Australia
No license is required for 27 Mhz CB in Australia.

--- in New Zealand
A license is required in New Zealand. A callsign will be issued with your
license. You must identify yourself by at least your callsign.

Callsigns look like AK1122 ("Auckland 1122") or WN63 ("Wellignton 63".)
There are 16 callsign districts using a 2- to 4-letter code for the region
name and the radio station number. Some callsigns may be issued for
experimental use and will have an "X" after the district name (i.e. AKX1
"Auckland Experimental 1".)

--- in the UK
A license is required. For more information, contact:
Queries about the issue or renewal of a licence:
Subscription Services Ltd,
Radio Licensing Centre,
P.O. Box 885,
Bristol,
BS99 5LG.
Tel: (+44) 0117 925 8333

Queries about C.B. policy:
Amature and Citizens' Band Radio Unit,
Radiocommunications Agency,
11N/27.2,
New King's Beam House,
22 Upper Ground,
London,
SE1 9SA.
Tel: (+44) 0171 211 0160
(+44) 0171 211 0159
(+44) 0171 211 0158

The CB Licence currently costs 15 UK Pounds and needs to be renewed each
year.
You can be prosecuted is you operate a CB without a valid Licence.
Application forms are available from Subscription Services Ltd, who issue
licences on behalf of the Radiocommunications Agency. Forms are also
available from the radiocommunications agency (Particularly if bulk supplies
of application forms are required). There is also a CB Information sheet
available from the agency and this is issued upon request, free of charge.

It includes information on equipment regulations and what you can and cannot do. If more information on any aspect of CB Radio is required, both the Agency= and SSL may be contacted.

The UK will honor licenses from other countries using CEPT-approved radios. (See the CB Frequencies section below on CEPT for more information.) Your license may be used under the terms from the country which issued it.

--- in France
As of 1993, France no longer requires a license for you to operate a CB. But there is a 296.50FF tax on CB radios which is close to the cost of the old license. The main difference is that the old license was good for 5 years. Now you will pay the tax every time you buy a radio.

Like most (or possibly all) of Europe, France does not give you a callsign. So you may identify yourself by your name or a handle of your choice.

France will honor licenses from other countries using CEPT-approved radios. Your license may be used under the terms from the country which issued it.

--- in Germany
No license is required to operate FM CB in Germany. A license, costing 5DM per month is required if you plan to operate both AM and FM.

--- in Italy
A license is required to operate a CB in Italy. Licenses may be obtained from Ministero PP.TT. You will need to provide them with your CB's model, serial number, and certification number. They will also want to know your "handle" (if you go by a fictitious name on the radio) and whether you want your license to apply to other members of your family. The total cost is (equivalent to) US$50 plus $10 per year. You must notify the PP.TT if you sell your radio or buy a new one because the license applies to a person and a radio. Our reporter in Italy says it takes about 2-3 months for the license to arrive. It is valid for 10 years.

--- in Portugal
A license is required A license is good for 2 years, but licenses issued after the year 2000 will be valid for 5 years. "Handles" may be used, but you must use your ID when asked.

--- in Russia
A license is required. You must identify yourself by the callsign that is issued with your license. Callsigns look like "3A4157".

--- in South Africa
A license is required. they are valid for a year and are renewable.

--- notes for all countries
There are rules and regulations that must be complied with while using CB, no matter which country you live in. If you don't have a list of those rules (which most likely were included with your CB), you will probably find them at any store that sells CB radios. If your government issues a callsign to you, you must identify yourself at least with that callsign.

* What are the CB Frequencies?

The answer to this question depends on the country you reside in. We currently have information on Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Luxembourg, Italy, Japan, the Netherlands, New Zealand, Portugal, Norway, Russia, Sweden, the UK, the USA, and Vatican City.

--- in the USA
CB transmitters use the operator's choice of AM (amplitude modulation) (with 4 watts maximum power) or single sideband (with 12 watts maximum power) on the following frequencies:

Frequencies (MHz) modulation description

26.965 - 27.405 AM/SSB Citizen's Band (CB)

Special-use channels:

9 - emergency, monitored in some areas by "REACT", a volunteer group coordinated by the local Sheriff's office (not in all areas), and the State Highway Patrol.
17 - unofficial "trucker's" channel (California & western states.)
19 - official "trucker's" channel for traffic, weather and speed trap advisories.
16, 36, 37, 38, 39, 40 - Often are used for single sideband (SSB) activity, by Gentlemen's agreement.

Note that US regulations disallow "DX" long-distance communications (over 150 miles in this case) with CB. However, directional antennas may be used to enhance communications within the legal range. (Of course, if your signal "skips" off of the ionosphere, it can't be helped).

--- in Canada
The CB frequencies, modulation, and power limits are the same as the 26-27 MHz CB band in the USA. Radios must be type accepted for use in Canada.

--- in Australia
Australia has 2 bands for CB. The use of AM or FM depends on the band.

Frequencies (MHz) modulation description

26.965 - 27.405 AM/SSB 40 channels, same frequencies as USA
max power: 4W AM, 12W SSB (same as USA)
476.500 - 477.475 FM 40 channels, .025 MHz (25 kHz) spacing
max power: 5W

We've been told there are "no antenna restrictions" though you'll probably need to double-check with local regulations if you're thinking of putting up a tower.

Radios for the Australian 26MHz band are essentially the same as radios made for the USA. However, all CB radios used in Australia (either band) must be type accepted by the Department of Transport and Communications (DOTAC).

The following AM/SSB band frequencies have special uses in Australia:
Channel 8 Road channel (truckers)
Channel 9 Emergency (same as USA)
Channel 11 AM calling
Channel 16/LSB SSB calling, also used for DX (distance)
Channel 35/LSB unofficial additional SSB calling, also for DX

A unique feature of Australia's 476-477 MHz band is that repeaters are allowed. Inputs are on Channels 31-38 and outputs are on Channels 1-8. A repeater must use the proper channel pair, i.e. 1/31 to 8/38. The maximum power output for a repeater is 21W input. Note: as with repeaters on other bands, do not begin to operate one without obtaining and fully understanding the applicable regulations. Additional information about the technical aspects repeater operation is available from amateur (Ham) radio sources such as the ARRL Handbook.

-- in New Zealand
The CB frequencies, modulation, and power limits are the same as the 26-27 MHz CB band in the USA and Australia.

The following frequencies have special uses in New Zealand:
Channel 5 European call (USB)
Channel 11 truckers' channel (AM)
Channel 15 AM calling
Channel 35 SSB calling

--- in Japan
Japan has 3 radio bands that do not require licenses. Two of them are limited to extremely short-range use because of low power limits. The other, with maximum power output of 5 watts, is more like CB as it is known in North America, Europe and Australia.

Frequencies (MHz) modulation description

26.968 - 27.144 AM (no SSB) "Citizen's Radio" maximum power 0.5W
channels 1-8 on 26.968, 26.967, 27.040, 27.080, 27.088, 27.112, 27.120, and 27.144.
Other channels in between these are assigned to fishing vessels (with 1W max power).
421.8125 - 422.300 FM "Specific Low Power Radio", also known as "UHF CB" maximum power 0.01W (10mW)
newly-authorized in 1989, mostly used for handy-talkies and ski patrols, 9 duplex channels with 12.5kHz spacing 421.8125/440.2625 ... 421.9125/440.3625
9 simplex channels with 12.5 kHz spacing 422.2000 ... 422.3000

Note: other frequencies in this band are allocated for business use:
903.0125-904.9875 FM "Personal Radio" maximum power 5W
158 channels with 12.5 kHz spacing
External antennas are permitted.
Radios must be equipped with a control ROM for automatic ID.

As in Europe, made-for-the-USA CB radios are illegal in Japan. There have been cases where such radios have caused interference with maritime emergency traffic.

--- in countries subscribing to the European CEPT conference The following countries have implemented the CEPT (Conference of European Postal and Telecommunications administrations) recommendations T/R 20-02 and T/R 20-07 for CB radios: Austria, Belgium, Cyprus (see Note 1), Denmark (see Note 2), Finland France, Germany, Luxembourg, Netherlands, Portugal (see Note 2), Norway (see Note 2), Sweden, United Kingdom, and Vatican City.

Notes:
1) as of last report, confirmation was pending in Cyprus
2) special markings are required on the radios so, for example, UK radios marked "CEPT PR 27 GB" are legal but ones marked "PR 27 GB" are not. Radios from other countries may also be similarly affected.

CEPT approval is significant because, with the exceptions listed above, CEPT- approved CBs from any one of the countries listed above can be used in any other on the list.

Frequencies (MHz) modulation description
26.965 - 27.405 FM 40 channels, same frequencies as USA 4W max power

If you travel to another CEPT-conforming country, you may use your CB under the terms of your license from your own country. Be aware that only FM is CEPT-approved so AM and SSB may not be legal to use once you cross the border.

Important note: CEPT-approved CB radios are not legal in the USA and made-for- the-USA CB radios are not legal anywhere in Europe. The difference is because CEPT radios use FM and American radios use AM or SSB. There are no agreements allowing a radio which is type-accepted in North America to be used in Europe or vice versa.

Channel 19 appears to be the calling channel in most CEPT-conforming countries. When exceptions are known, they are listed specifically for the country.

--- in the UK
The UK has 3 bands for CB as follows:
frequencies (MHz) modulation description 26.965 - 27.405 FM 40 channels, same frequencies as CEPT & USA 4W max power. Radios using this band are marked "PR 27 GB" or "CEPT PR 27 GB" and are CEPT-approved.
27.6 - 27.99 FM 40 channels, 0.01 MHz (10 kHz) spacing 4W max power. Radios using this band are marked "27/81-UK" and are only legal in the UK
934.0125-934.9625 FM 20 channels, 0.05 MHz (50 kHz) spacing 4W max power. Radios using this band are marked "CB 934/81" and are only legal in the UK, no new radios of this type are being made but existing equipment may continue to be used legally.
Antennas must be omnidirectional - beams and yagis are prohibited. Antennas must stand vertically, no higher than 6.85m (not including ground plane.)

AM and FM are not compatible so a US-legal CB cannot communicate with any UK-legal CB even though they may use the same frequencies. And each is illegal on the others' soil so this only prevents use of atmospheric skip between them. (See Part 4.)

--- in France
France uses the same frequencies (in 40 channels) as CEPT and the USA. AM, FM and SSB are permitted. The only legal CB radios in France are those which are approved by France Telecom or visiting CEPT-approved radios. Frequencies (MHz) modulation description
26.965 - 27.405 AM/SSB/FM 40 channels, same frequencies as USA max power: 1W AM, 4W SSB, 4W FM

Channel 9 AM used to be for emergencies but was deregulated because no one monitored it for that purpose.
Channel 19 AM is the calling channel (used to establish contact then move to another channel.)
Channel 11 FM is used for DX/skip long-distance contacts.
Channel 27 AM is sometimes used as a calling channel for base stations (at home.) AM is the most commonly-used modulation method in France.

When traveling outside France, remember that most countries in the CEPT conference do not permit the use of AM or SSB. France has adopted the CEPT rules for CB in Europe - see below for more information.

--- in Germany
Germany also uses the same frequencies as CEPT and the USA. AM and FM are the only legal modes of modulation. (SSB is not allowed.) AM is only allowed on some channels.

Frequencies (MHz) modulation description
26.965 - 27.405 AM/FM 40 channels, same frequencies as USA
max power: 1W AM and 4W FM
AM is allowed on Channels 4-15
FM is allowed on all 40 channels
SSB is not permitted
All signals must have vertical polarity.

Channel 4 FM is the calling channel. FM is the more commonly-used modulation method in Germany.

Notes: to meet the vertical polarity requirement, antennas must stand vertically. Also, tone-call transceivers are allowed so you can use touch tones to call someone if they are within receiving range and have a radio that will recognize the tones.

When traveling outside Germany, remember that most countries in the CEPT conference do not permit the use of AM. Germany has adopted the CEPT rules for CB in Europe - see below for more information.

--- in Italy
Italy also uses the same frequencies as CEPT and the USA. AM, FM, and SSB are permitted.

Channel 9 is recommended as an emergency channel. Truckers often use Channel 5 on AM. It has been reported that Q-codes are popular in Italy. Our reporters in both Italy and Germany have said that many Italian CB'ers can be heard using linear amplifiers even though they are illegal.

--- In Portugal
Portugal after the year 2000 will only allow CEPT approved radios on the abovementioned CEPT bandplan. Currently AM, FM, and SSB are permitted. There is no distance limit, however 5 watts power output is the limit. Amplifiers are forbidden, as well as directional antennas.
Common channel usage:
Ch. 9: Emergencies
Ch.11: AM calling
Ch 34 Truckers (ssb)
Ch 6 : Taxicabs

--- in Russia
CB radios in Russia use the same frequencies as the USA and CEPT (European) countries. AM and FM are both permitted. The maximum transmit power is 5 watts. Our reporter from Russia says there is no restriction on the distance of communications so, technically, use of skip (see Part 4) can be assumed to be legal.

Because both AM and FM are legal, Russian CB radios can communicate with European radios (in FM) and with North American or Australian radios (in AM.)

--- in South Africa
South Africa allows AM and SSB on nine channels. These correspond to channels 19-27 on the US CB bandplan. 4 W AM and 12W SSB are authorized. Unity gain antennas are required. Amplifiers and Long-distance communications are forbidden.
Calling channel:US 19
Emergency Channel:US 21
SSB use is typically on channels US 26 & 27

--- in other countries
This is the "grab bag" section. We have incomplete information on these countries but we'll tell you what we've heard. We'll add more information as people send it to us. (If you know more, please tell us!)

* Switzerland uses FM on the same frequencies as CEPT but CBs do not appear to be very common there.

* Channel 19 is the calling channel in Poland. Some probably-outdated info said that this was also the case in Czechoslovakia but that may not necessarily be true under the new governments of the Czech Republic and Slovakia.

* The calling channels in Austria are 4 AM and 9 AM.

* From California, we can hear a lot of CB activity in Mexico via skip but no one has provided us with any details yet. However, we know that Mexico uses AM on the same frequencies as the USA's 27 Mhz CB band.

In every country we know of where CB is legal, radios must be type-accepted, meaning they must have been manufactured specifically for use with one or more that country. The exception is CEPT-approved radios, which may be used in any country which has implemented the conference's recommendations.

* What are the common brands of CB radios?

Some of the more common brands that you will find out in the USA market are as follows: Uniden, Cobra, Midland, Realistic (Radio Shack), Archer (Radio Shack) and others. Made-for-the-USA CB radios are also legal in Canada and Australia though they must be properly labeled ("type accepted") for sale and use in those countries.

In France some common brands of radios are President and Midland. These are somewhat similar to Germany but the President brand is known as "Stabo" there.

In Italy, Midland, Lafayette, and President are among the popular brand names.

We currently don't have any corresponding information for other countries. Note that radios must be marked properly for sale in your country, even in countries using American or CEPT (European) radios.

* What should I consider when choosing a location for my antenna?

The answer to this question differs greatly between base and mobile installations. Each will be answered separately.

In mobile installations, things to consider are whether you're willing to drill holes or want to use a magnet mount, gutter mount, trunk mount, or a bumper mount. If you say "no" to all of those (which would probably mean you have a very nice car) your list of options is pretty short - use a handheld with a rubber duck antenna.

Otherwise, you can start making choices with the following things in mind: 1) the closer your antenna is to the top & center of the vehicle, the better. So the roof is better than the rain gutter or trunk and all of those are far better than the bumper. But they'll all work.

2) a drilled/permanent mount is better than a magnet mount in the same location. (This is so that the antenna gets a better "ground plane".) If you use a magnet mount, run your coax feed line through the door or hatch that gets the least use and then leave it alone. Don't use any path where the coax would get pinched.

For base installations (i.e. at home) the best places are "as high as you can" within legal limits. The roof is normally fine. If you're in an apartment complex, you may be limited to a balcony but ask the manager - they may just want you to keep it "invisible." (Check your national and local regulations. In the USA, the FCC regulations limit CB antennas to 60 feet above ground level or 20 feet above the tallest structure on your building. Maybe shorter if you live close to an airport - one foot high for every hundred feet from the nearest runway.)

Base station antennas should have a good ground in case of lightning. (In the rare event of a lightning strike, this can mean the difference between burning down the building or just the radio.) Most cold water pipes that go into the ground will work. But the best choice for a ground would be an 8-foot (2.4m) copper rod stuck in the ground near the antenna. (If you want

to use anything other than the rod for a ground, contact someone knowledgeable about housing construction and safety - you don't want to accidentally use a hot water or gas pipe. You also need to know your local building codes.)

* Once I hook up my CB and antenna, is the radio ready to use?

No. When you get a new CB and/or new antenna, the CB and the antenna must be tuned or "matched." To do this, you need an SWR meter which is a device that measures the impedance between the radio and the antenna. SWR stands for "Standing Wave Ratio." The lower your SWR, the better your match. First timers are recommended to get help from a knowledgeable person but some notes about the process are included here.

You do NOT want your SWR reading to be over 3:1 ratio on any channel. It can damage your radio. A "perfect" match is 1.0:1 which gives you the best efficiency for your radio's output. However, "perfect" isn't possible so 1.1:1 is the best you can hope for. Even 1.5:1 is acceptable, but it isn't as good.

You will only be able to achieve your best match on one or a small group of channels. The SWR will increase on each channel as you get further from that point. So 2:1 may even be unavoidable on the extremes, like Channels 1 and/or 40. If you know you're going to use one channel most of the time, try to put your best match there. Otherwise, just center it at Channel 20 so you can use all 40 channels optimally.

You may find SWR meters at places like Radio Shack or amateur radio dealers. Further information about Standing Wave Ratio can be obtained from the ARRL Handbook. (ARRL is the American Radio Relay League. Their annual handbook is full of information on many different aspects of amateur radio but the basic concepts apply in all radio bands.)

Most stores that sell CB radios will have an SWR meter and someone who knows how to use it. But they will charge for their services.

* What are good antenna characteristics and what are some good antennas?

Antennas have to be designed to transmit and receive on the band that you are using. CB is located in the 11-meter band. (They call it that because the wavelength is about 11 meters.) CB antennas range in height from a little under 2 feet (24 inches) up to 108 inches.

The 1/4 wave whip (108") will offer better reception and transmission capability over a shorter, coiled or "loaded" antenna.

VERY short antennas, or multiple antennas that aren't "phased" properly will result in a very poor signal. Remember, for co-phasing antennas, they must be 1/4 wavelength apart which, for the 11 meter band, is around 9 feet. Most cars aren't wide enough to allow antennas to be placed 9 feet apart. The other characteristic of co-phasing is that it is much more directional- than a single antenna. It will transmit and receive MUCH better along the axis of the car than sideways off the car so if you want a omnidirectional antenna,

you don't want co-phasing (so you only want one antenna.)

Another subject of common questions is about antennas which receive AM/FM broadcast stations and act as a CB transceiver antenna. User experiences on this newsgroup vary widely with each brand. (The motorized ones seem to have the least favor among the postings we've seen.) In general, these antennas work but are not nearly as good as a dedicated CB antenna. You have to weigh the advantages and disadvantages for your circumstances.

Good brands of dedicated CB antennas in the USA include (but are not necessarily limited to) Hustler, Wilson, Antenna Specialists, Solarcon, Jo Gunn, FireStick and K-40.
In France, some common brands are President and Magnum.

Rec.radio.cb Frequently Asked Questions (Part 3: Communication)
THIS ARTICLE IS INTENDED TO BE A FREE RESOURCE FOR THE BENEFIT OF USENET READERS. Material from the FAQ may be used to answer any questions. Corrections and updates are welcome.

* Which 10-codes are most commonly used?

When getting started, remember at least the following 10-codes:

10-1 Receiving Poorly
10-4 Ok, Message Received
10-5 Relay message
10-7 Out of Service, Leaving Air (you're going off the air)
10-8 In Service, subject to call (you're back on the air)
10-9 Repeat Message
10-10 Transmission Completed, Standing By (you'll be listening)
10-20 "What's your location?" or "My location is..."
Commonly asked as "What's your 20?"
10-33 EMERGENCY - NOTE: NOT an auto accident like many people think.
10-42 vehicle accident
10-100 Need to go to Bathroom

Also, remember that 10-4 only means "message received". If you want to say "yes", use "yes". For "no", use "no".

* What are the CB 10-codes?

10-1 Receiving Poorly
10-2 Receiving Well
10-3 Stop Transmitting
10-4 Ok, Message Received
10-5 Relay Message
10-6 Busy, Stand By
10-7 Out of Service, Leaving Air
10-8 In Service, subject to call
10-9 Repeat Message
10-10 Transmission Completed, Standing By

10-11 Talking too Rapidly
10-12 Visitors Present
10-13 Advise weather/road conditions
10-16 Make Pickup at...
10-17 Urgent Business
10-18 Anything for us?
10-19 Nothing for you, return to base
10-20 My Location is ..... or What's your Location?
10-21 Call by Telephone
10-22 Report in Person to: _____.
10-23 Standby
10-24 Completed last assignment
10-25 Can you Contact .....
10-26 Disregard Last Information/Cancel Last Message/Ignore
10-27 I am moving to Channel _____.
10-28 Identify your station
10-29 Time is up for contact
10-30 Does not conform to FCC Rules
10-32 I will give you a radio check
10-33 Emergency Traffic at this station
10-34 Trouble at this station, help needed
10-35 Confidential Information
10-36 Correct Time is ..... Or What time is it?
10-38 Ambulance needed at .....
10-39 Your message delivered
10-41 Please tune to channel .....
10-42 Traffic Accident at .....
10-43 Traffic tieup at .....
10-44 I have a message for you (or .....)
10-45 All units within range please report
10-50 Break Channel
10-62 Unable to copy, use phone
10-62sl unable to copy on AM, use Sideband - Lower (not an official code)
10-62su unable to copy on AM, use Sideband - Upper (not an official code)
10-65 Awaiting your next message/assignment
10-67 All units comply
10-70 Fire at .....
. 10-73 Speed Trap at .....
10-75 You are causing interference
10-77 Negative Contact
10-84 My telephone number is .....
10-85 My address is .....
10-91 Talk closer to the Mike
10-92 Your transmitter is out of adjustment
10-93 Check my frequency on this channel
10-94 Please give me a long count
10-95 Transmit dead carrier for 5 sec.
10-99 Mission completed, all units secure
10-100 Need to go to Bathroom
10-200 Police needed at .....

* Where are 10-codes used?

10-codes originated in the USA and are, apparently, only used in English-speaking countries. However, no matter which codes are used in your country, be aware that there are local dialects in every urban area and region. You have to listen to others to learn the phrases and codes in you area.
Be aware that the use of codes specifically to obscure the meaning of a transmission is probably illegal in most countries. The difference is this: codes which are well known and make communications shorter or more efficient are normally allowed.

* What are some of the more common Q-codes?

Q-codes are used in many kinds of radio communications, including CB sideband but not typically on CB AM. (If your radio doesn't have sideband, don't worry about Q-codes.) Q-codes originated with amateur radio but their use in CB, even more so than 10-codes, can vary depending on who published the list. The following is an abbreviated list of Q-codes borrowed from amateur radio:

QRM man made noise, adjacent channel interference
QRN static noise
QRO increase power
QRP reduce power
QRT shut down, clear
QSL confirmation, often refers to confirmation cards exchanged by hams
QSO conversation
QSX standing by on the side
QSY move to another frequency
QTH address, location

Q-codes may be used to ask questions (QTH?) or to answer them (QTH is 5th & Ivy Streets.)

The ARRL Handbook and the ARRL operating guides have more complete listings of those used for amateur radio. (ARRL is an amateur radio organization.) Historically, the Q signals were instituted at the 'World Administrative Radio Conference' (WARC) in 1912. Because of their international origin, Q-codes may be more accepted outside English-speaking countries than 10-codes are.

* What are some tips for communicating with others on the CB?

The following is a list that is generally considered proper procedure or polite when using a CB radio. It can also be considered a beginner's survival guide. This list was compiled from common problems that have plagued beginners since CBs first became popular.

- When two people are talking, essentially they temporarily "own" the channel. US FCC regulations say that they have to give other people opportunities to use the channel if they're going to use it more than several minutes. But it is not up to an outsider to "take" the channel from them.

- Take care not to "step on" other units (i.e. transmitting at the same time as they are, thereby making both your transmissions unreadable.) This usually means that you should adjust your break squelch level so that you can hear the other unit and then only begin to transmit when you can't hear anyone else.

- NEVER deliberately key over someone else. Nobody likes that.

.- If you hear one unit break for another unit, give some time for the unit to respond before you say anything yourself. (Keep in mind that they may have to fumble for a microphone in a moving car or dodge furniture enroute to a base station.) Remember, the calling unit has the channel.

- If you want to talk on a channel that is in use, it is very likely that your initial transmissions will accidentally "walk over" someone elses. So you must keep them short. The word "break" is generally accepted. Try to time it in a pause in the conversation.

- Even when your "break" has been recognized, keep your next transmission short. For example, "Break one-seven for Godzilla" if you're on Channel 17 and looking for someone whose handle is Godzilla. If Godzilla doesn't answer in a reasonably short amount of time, it doesn't hurt to say "thanks for the break" to the units that stopped their conversation for you.

- If you break on an open (unused) channel, you don't have to be as brief. For example, "Break 17 for Godzilla. Are you out there Godzilla?". However, the short form is perfectly acceptable, too. Use what fits your style.

- If someone speaking to you gets "walked over" so that you can't understand the message, you basically have two options. You can tell the person you were listening to, "10-9, you were stepped on", or you can find out what the breaker wants, "Go ahead break", before returning to your original conversation. You should eventually recognize the breaker and find out what they want.

- If two people are talking and you would like to interject a response, you will probably just walk over someone. Use the procedure above to properly break into the conversation.

- If someone doesn't answer your breaks after two or three attempts. Stop and wait for several minutes or, in mobile units, for several highway miles or city blocks. Others may have their radios on and don't want to listen to the same break more than three times in succession.

- In other circumstances, improvise. Take into account other people's points of view. Give people proper access to the channel and try not to do anything to annoy other units.

- If you make a mistake in any of the procedures above, don't waste air time on a busy channel by apologizing. (If the channel isn't busy, it's your choice.) Just try to do it right in the future. Everyone takes a little time to learn.

OK, now you know how to conduct yourself on the radio. However, there are and will probably always be units that don't. Be patient. You don't have

authority to enforce any rules so don't break any by trying.

Rec.radio.cb Frequently Asked Questions (Part 4: Technical Trivia)
THIS ARTICLE IS INTENDED TO BE A FREE RESOURCE FOR THE BENEFIT OF USENET REA
DERS. YOU MAY COPY AND REDISTRIBUTE IT UNDER THE CONDITION THAT THIS MESSAGE
AND CREDIT TO THE EDITORS AND ORIGINAL CONTRIBUTORS ARE INCLUDED WITHOUT
MODIFICATION. Material from the FAQ may be used to answer any questions.

* What is single sideband?

To understand single-sideband (SSB), one must first have a picture of what's going on in a normal AM (amplitude modulation) transmission. For example, on Channel 21 (in North America, Australia, and Europe), a "carrier" is transmitted at 27.215 MHz. Your voice (or whatever you're transmitting) is used to change (modulate) the height (amplitude) of the signal so that it can be reconstructed as your voice on the receiving end.

Actually, the amplitude of the carrier does not change. The addition (modulation) of another signal, like your voice, onto the carrier will increase the amplitude at other frequencies adjacent to the the carrier. A 300 Hz tone, for example, would add signals 300 Hz above and below the carrier. Every frequency component of your voice has the same additive effect. These modulation effects are the upper and lower sidebands of the transmitted signal. Normal AM transmissions include the carrier signal, the upper sideband (USB) and lower sideband (LSB).

The difference in frequency from the bottom of the lower sideband to the top of the upper sideband is called the bandwidth of the signal; it will be twice as wide as the highest frequency modulated onto the carrier. (For poorly filtered radios, this can unintentionally interfere with adjacent channels if the bandwidth is too wide. Poor filtering becomes easily noticeable at higher power levels.)

There is enough information in either sideband to reconstruct the original signal. Therefore, radios which can use single sideband are able to filter out the carrier and the opposite sideband before transmitting them, leaving either the upper sideband or lower sideband, as selected by the CB operator. Obviously, for a conversation to take place, both the transmitting and receiving radios have to be on the same channel and sideband setting (i.e. Channel 25 LSB.) Some additional tuning will be necessary with a "clarifier" control.

Assuming proper filtering within the radios, it should be possible for separate conversations to occur on the upper and lower sidebands of a given channel without interfering with each other.

* Do I really get 120 channels on a radio with single sideband?

[This applies to the USA, Australia, Canada, and any other countries that use AM and SSB on the same 40-channel band.]

Yes and no. SSB does give you 120 different communications paths (40 AM, 40 USB, and 40 LSB) but they are not free of interference from each other. The upper and lower sidebands will interfere with the AM channel and vice versa. With some radios, even the opposite sidebands can interfere with each other.

For example, (and this works for any channel - just fill in a different number from 1 to 40) Channel 17 has an AM channel that every radio can use. Radios with SSB will also be able to use the upper and lower sidebands. However, within a few miles of each other, you can't effectively use the AM channel if people are talking on either sideband. Though not as strong, users of sideband will know if someone is using the AM channel but the higher legal power settings on sideband give them an advantage.

* How can I reduce engine noise on my mobile CB?

If you have problems with engine noise in a mobile installation, there are several things you can do to reduce or eliminate the problem. - Make sure you've completely installed your CB and the antenna is grounded properly. Check the amount of noise with and without the antenna connected. If the noise is greater when the antenna is connected, the source is probably the ignition system. If the noise remains unchanged after disconnecting the antenna, the source is probably in the CB's power supply.

- For ignition noise, there are several parts of the vehicle that can act like RF noise transmitters if not properly grounded. Check (and connect to ground on the chassis/frame, if necessary) the engine block, hood, muffler, and exhaust pipe. - Ignition noise can be further reduced by installing "magnetic suppression" spark plug cables. (These are significantly more expensive than normal spark plug cables.) - For power supply noise, check if you have a capacitor attached to your ignition coil, alternator, and distributor. These can act as filters right at the source of the noise.

- Ensure that your antenna feedline and power lines are as far as possible from any of the noise sources mentioned above, especially the engine block. - A shielded power cable can help as well. Make sure it is of sufficient gauge to handle your radio's power consumption and that the shielding has a good, strong connection to ground on the vehicle chassis or frame. - Electronics stores such as Radio Shack sell cheap power filters for noise-reduction purposes. You get what you pay for, though - most comments on this newsgroup are that they are not as effective as the other measures above.

Of course, the best performance can be obtained from a more expensive radio with better noise suppression circuits. These measures, however, will improve the engine noise levels for nearly any mobile radio.

* What is GMRS?

[This applies only to the USA.]
The General Mobile Radio Service is another personal radio band. Its frequency allocation is in the ultra-high frequency (UHF) spectrum, co-located with some other radio services in the range from 460-470 MHz. It requires a license but there is no examination. Though GMRS is not CB, it is listed here because it is intended for use by individuals. A single GMRS

license also covers the members of the licensee's household. The license fee is US$35 for 5 years.

Frequencies (MHz) modulation description
460 - 470 FM General Mobile Radio Service (GMRS)
regular channels (simplex or repeater outputs, repeater inputs are 5MHz higher)
462.550 462.575 462.600 462.625 462.650 462.675 462.700 462.725
simplex low-power channels
462.5625 462.5875 462.6125 462.6375 462.6625 462.6875 462.7125
31.0-31.3 GHz any mode microwave band now open for individuals to use, requires GMRS license

GMRS is used for mobile-to-mobile or base-to-mobile communications but base-to-base communications are prohibited. One useful aspect of GMRS is that repeaters are allowed so that a mobile GMRS station can extend its range well beyond the limits of an ordinary 5-watt mobile transmitter.

Only individuals may obtain GMRS licenses. Some businesses still have licenses from before the rules were changed in 1989 but no new licenses are being issued to "non-individuals."

Recent changes in regulations have given GMRS licensees access to the micro-wave band at 31.0-31.3 GHz for both fixed and mobile use. The licensee must notify the FCC of each transmitter with a standard FCC form.

A source of information is the Personal Radio Steering Group. A reader said they have lots of good information and are enthusiastic about GMRS.

* What is the Family Radio Service?

[This applies to the U.S.A only]
Recently, in the US, the FCC authorized a new service for use by the general public. The Family Radio Service is a new service for use by individuals. Tandy Corporation has pressed the FCC for this new service.

The FRS is a very short range UHF Radio service. This service consists of 14 channels in the UHF band. Equipment is restricted to a handheld radio with non-detachable antenna, and 500 mW Effective Radiated Power on output. CTCSS tones are permitted, and will be used on some equipment. Range has been said to be "a few city blocks", although this service is so new, equipment (as of this edition) has not yet made it to the general public for use.

Repeater operation is not permitted, nor is data communications. Only type-accepted FRS equipment is permitted for use on this service.

* Where can I learn more about radio?

If you like what you see here and want to learn more about the technical aspects of radio, you may be interested in getting an amateur ("ham") radio license. These licenses are available in almost every country in the world, including all of the countries that have CB.

Amateur radio is very different from CB. This is neither good nor bad - they have different purposes. With the training that a licensed amateur radio operator is expected to have, much more powerful transmitters are allowed - but the operator should know when that power is not necessary and refrain from it. Amateurs have no limits on the range of their communications (at least, by law or treaty) so it is possible to make distant "DX" contacts using atmospheric skip, satellites, or even bouncing signals off the Moon. Again, training and the willingness to cooperate (to avoid interference with others) are necessary for obtaining and using these privileges.

Japan, Sweden the USA and many other countries have authorized a new amateur radio "no-code" license which requires only a written test (no morse code). However, the test is challenging enough to necessitate several weeks of study (or a few days if you already have some familiarity with the subject) so don't go unprepared. More information, see the FAQ articles in the rec.radio.amateur.misc newsgroup or contact the American Radio Relay League at: http://www.arrl.org/

Even if you don't want the license, books intended for amateur radio operators make available a wealth of information on understanding transmitters, recei- vers, antennas, modulation, signal propagation, electronics, and many other topics which also apply to CB.

Why? That's an average of a little more than 4 posts per day for the
time I've been here..a total of a few minutes each day.......you
probably spend 24 times the amount online I do. Besides, If you weren't
so yellow and signed your call everytime you posted, I would pale in
comparison. Do you not find it odd that you have now been reduced to
such statistical endeavors merely because I chose to point out your lie?
Tsk Tsk....you wear it well.
==

>Ok, I'm a liar and a cheat and bullshit artist

Now, that wasn't so hard, was it? But make no mistake about it, you are
no artist of any kind, merely a liar....the "artist" is nothing more
than a damaged ego term for yourself......didn't know you were a cheat
as well. With those admitted qualities, we can now dismiss the rest of
what you set forth.... as is done when you put forth your call.
Try and be a cooler person in the future,,life will seem much easier.
.maybe get an education in math, or I can teach you more..either way,
your interpretations, ramblings, and calculations are of a
simpleton-like nature.

Hey Doc

Only did it once years ago, but we used a Wilson floating ground plane kit
on a fiberglass wonder. It worked out ok. Not a big fan of the set up,
hate installing them and sometimes you must work hard to get them to tune,
but in a pinch?

5615. 27.545 Militia Tactical freq?

Newsgroup: rec.radio.cb
Date: 2002-12-31 19:20:41 UTC
From: Uncle Reamus <5yipayforhamcall@aol.com>
Message-ID: <3e11ee2d@snipnews.snip.net>
Source record: 148148
Cross-posted to: rec.radio.cb,rec.radio.shortwave

I've been monitoring 27.545 mHz for a number
of weeks and have been hearing alot of stations
in the Midwest and South. Topic of communications
was either coded traffic, sitreps (situation reports)
and info pretaining to Domestic Patriot and Militia
topics. On curious case was a mobile calling themself
"Orange Blossom Express" saying he was enroute to
some point in Michigan where the FED's and local
Sheriff allegedly had some tax-protester under survelance.
Any ideas or other Militia freq's anyone else know of?
Rather curious stuff! (...one guy claimed he had 20K
of .223. .50 cal and .357 hollowpoint in the trunk of
his car - hope he didn't hit a pothole in the road enroute!)

5616. What Freaks do the Liberals use (other than ALL of them)?!

Honestly, I think you will win more people to the LORD if you speak kindly, yet truthfully. I suggest you avoid angry, disrespectful speech.

May you be blessed with more complete understanding of His Word. May we all enjoy such a blessing!

5619. Anyone remember the Spartans and others on 27.145?

Newsgroup: rec.radio.cb
Date: 2002-12-31 19:49:01 UTC
From: Imareal Tbar <itbar73@NOSPAMhotmail.com>
Message-ID: <tds31v00io6sq28hac06opbci335pm6nkn@4ax.com>
Source record: 148151

About 20 years ago (and beyond), I frequented 27.145, one of the RC channels, and often QSO'ed a lot of folks on SSB. One of the main groups that hung around there was called the "Spartan" group, many out of the U.S. West Coast (propagation often favored that area from my area - U.S. Midwest). Now I don't hear any activity there like I did years ago. The channel seems to be used almost exclusively by AM stations south of the U.S. border, with only few-and-far-between AM stations from the U.S.

Anyone else here on the NG remember 27.145 SSB stuff? I know some of the other RC channels are presently in use by U.S. AM stations. I can only presume the SSB'ers have moved up, way up, the band.

I remember the Spartans Group.

You are correct that no one hides out on 27.145 except the South Americans.

5625. Looing for a moile antenna mast like 36" to 48"

Newsgroup: rec.radio.cb
Date: 2002-12-31 21:07:12 UTC
From: Recordking@Hotmail.com
Message-ID: <e8d89b3f.0212311307.1258af49@posting.google.com>
Source record: 148163

I have my antenna placed behind the rear door on a minivman and I got a antenna with a two coils. I need like a 36" to 48" inch antenna mast where can I get one, I have though about getting the hustler 54" one but though it might make the home made bracket to heavy. The bracket is like 10" off the ground and the top of the car is like 6ft to 7ft high. I need the coils higher than the roof of the car so what hight antenna mast should I use and where can I get it online.

Yay.. he grew a brain..

Yeah, Buzzy... I'm a Slow-Code Extra. I'm also Dyslexic and ADD. I didn't waiver past the code test, I worked on it until I got it.

SO what's your point. BFD. I'm an Extra, and you're apparently just a little peon who's afraid to take a little test.

What's your point?

Wow.. You pulled a Doug and posted my name and address on the internet. Woe is me. Whatever will I do now? Like it hasn't been done before.

Those two projects were done and documented to show how easy it really is to make working, effective equipment from nearly nothing at almost no cost. So what have you done to further the radio hobby lately?

I'm also surprised you didn't mention the other link on the website... the one to my truck pictures (http://www.qsl.net/kr8lr/TruckPics/) describing the HF antenna I had on the truck I sold recently. Selective dissemination of information to make a point, eh? Heh. That's so weak it's not even pitiful.

What exactly are you trying to prove? What's your point? You tried to make fun of me, and it didn't work. I'm neither insulted nor embarrassed by your vitreous diatribe (use the dictionary, I'm done dumbing things down so you can understand them). You've done nothing but make an ass out of yourself, and in so doing, proven the point I was making earlier, weakening your own position.

You may have grown a brain, but you still need to get your head out of your ass.

> Notes on "Netiquette"
>
> With a growing user community, the rec.radio.cb newsgroup will operate more
> efficiently if the following netiquette guidelines are used. Please take
> them seriously:
>
>
> * When posting a followup article, ALWAYS try to minimize the number of
> lines of quoted material from the original article. But DO post something so
> readers will know what you are referring to.
>
> * As a general rule when you try to determine whether to reply to someone by
> e-mail or with a followup article, remember to "praise in public, criticize
> in private." It's OK to disagree on the content but be careful not to attack
> the person with whom you disagree. Also, be careful with your use of the
> word "you" when posting a follow-up article. Many unnecessary flame wars
> have started that way.
>
> * Use a descriptive subject. For example, "Antennas" covers a vary large
> area so some better choices might be, for example, "Antenna tuning" "Antenna
> installation question" or "Antenna theory question". Also, if a discussion
> wanders off the original subject, you should modify the subject of your
> message to match the new topic. For example:
>
> Subject: Re: co-phasing (was: truckers with 2 antennas) or, even better:
> Subject: Re: co-phasing * Before answering a question, check if the FAQ
> adequately answers it or if someone else already answered it. If you have
> more to add, make sure to reference either the FAQ or the related articles.
> * If a user posts a question which is directly answered by the FAQ, there is
> no need to post an answer - the information is already available on the
> newsgroup. Instead, just send an e-mail message which politely explains
> where to find the FAQ. They will probably appreciate it if you include the
> answer to their question. (Don't send a "nastygram" - that would just
> discourage future participation.)
>
> * Pay attention to the size of your audience - use the "Distribution:"
> header. If you leave it blank, your message will go to every civilized
> country in the world and occupy disk space in all news systems in all those
> places. If that's what you intend, it's fine but be aware that CB is not the

> same everywhere. Otherwise, use a distribution for your continent or country
> as appropriate for the subject of the message. For example, "na" (North
> America) "europe" "us" "uk" "japan" "france" etc. can be used similar to the
> following example: Distribution: usa or substitute your continent or
> country. Also, this regional distribution works for each state of the USA -
> just use the two-letter postal code for your state (i.e. ca, ne, co, pa,
> etc.) * If you have an item for sale, please limit the distribution area so
> that, for example, an article about a radio for sale in New Jersey won't get
> to California or Europe. If you wish, you may cross-post your for-sale
> article to rec.radio.swap.
>
> * Discussion on any UseNet newsgroup is expected to be within the chartered
> subject of the group - there is no such thing as unlimited discussion here.
> This newsgroup is chartered for discussion of all aspects of CB radio.
> Though some topics are clearly outside these bounds, use some good judgement
> when talking about borderline cases. Please take seriously any complaints
> about the appropriateness of a subject.
>

> Rec.radio.cb Frequently Asked Questions (Part 2: Getting Started)
> THIS ARTICLE IS INTENDED TO BE A FREE RESOURCE FOR THE BENEFIT OF USENET
> READERS. YOU MAY COPY AND REDISTRIBUTE IT UNDER THE CONDITION THAT THIS
> MESSAGE AND CREDIT TO THE EDITORS AND CONTRIBUTORS ARE INCLUDED WITHOUT
> MODIFICATION. Material from the FAQ may be used to answer any questions.
> Corrections and updates are welcome.
>
> * What is CB?
>
> CB stands for "Citizen's Band" radio. It got that name because its main idea
> is to be a kind of radio anyone can use. Depending on the country you live
> in, it is either a minimally-regulated or an unregulated set of radio
> channels used for short-range (under 150 miles) communications. Many people
> use CB radios in their vehicles, homes or both.
>
> This UseNet newsgroup "rec.radio.cb" is all about CB radio. The FAQ also
> covers non-licensed or minimally-regulated radio bands internationally.
> Readers can expect to find discussions, questions, and answers about all
> uses of CB and related bands here. There are also other newsgroups for other
> radio applications, such as rec.radio.shortwave, rec.radio.broadcasting, and
> several subgroups of rec.radio.amateur, for amateur or "ham" radio. Radios
> either wanted or for sale are the subject of rec.radio.swap. (Though, an
> article about a CB radio for sale should be cross-posted to rec.radio.cb and
> rec.radio.swap with a distribution limited to your city, state or region.)
>
> * Do I need a license to operate a CB radio?
>
> The answer to this question depends on the country you reside in. We
> currently have information on the USA, Australia, New Zealand, Japan, the

> UK, France, Germany, Italy, Portugal, South Africa, and Russia. Note that
> all of these are from e-mail reports contributed by readers. As regulations
> change, we can only keep up when people notify us. Please check your local
> regulations because you are responsible to know and obey them.
>
> --- in the USA You are no longer required to have a license to operate a CB
> radio in the United States. The FCC (Federal Communications Commission) did
> at one time require a Class "D" license for for Citizen's Band which
> required nothing more than filling out a form and sending it in to the FCC
> with the license fee. The FCC then sent you a call sign which might look
> like "KPS 2720" or something similar. During the CB craze in the mid-70's,
> the FCC decided that the paperwork burden outweighed the benefits and put CB
> under blanket authorization.
>
> The FCC permits the use of the following to identify yourself:
>
>
> 1. Your old Class D callsign, if you have one.
> 2. K, your first and last initials, and your zip code (i.e. KPS 68123)
> 3. your name (i.e. "Paul")
> 4. some unique nickname or Handle (i.e. "Cobra", "Rubber Duck", etc.)
>
>
> A rule change in May 1992 now allows one-way transmissions about highway
> conditions on CB. This was intended to allow local authorities to use
> unattended audio warnings about road construction or other hazards.
>
> In the USA, there are two additional radio bands besides CB which are
> intended for use with minimal regulation by individuals.
> 1. GMRS, the General Mobile Radio Service, is located in the 460-470 MHz
> band. A license is required. More information is included in Part 4.
> 2. The FCC has recently opened up the 31.0-31.3 GHz microwave band to
> licensed users of several fixed and mobile radio services including GMRS.
> 3. The Family Radio Service, located in the vicinity of the GMRS. Low power
> Handheld operation only. No license required.
>
>
> --- in Canada
> No license is required. You may identify yourself by your name or a handle
> of your choice.
>
>
> --- in Japan
> No license is required. You may identify yourself by your name or a handle
> of your choice.
>
> --- in Australia
> No license is required for 27 Mhz CB in Australia.
>
> --- in New Zealand

> A license is required in New Zealand. A callsign will be issued with your
> license. You must identify yourself by at least your callsign.
>
> Callsigns look like AK1122 ("Auckland 1122") or WN63 ("Wellignton 63".)
> There are 16 callsign districts using a 2- to 4-letter code for the region
> name and the radio station number. Some callsigns may be issued for
> experimental use and will have an "X" after the district name (i.e. AKX1
> "Auckland Experimental 1".)
>

>
>
> The CB Licence currently costs 15 UK Pounds and needs to be renewed each
> year.
> You can be prosecuted is you operate a CB without a valid Licence.
> Application forms are available from Subscription Services Ltd, who issue
> licences on behalf of the Radiocommunications Agency. Forms are also
> available from the radiocommunications agency (Particularly if bulk supplies
> of application forms are required). There is also a CB Information sheet
> available from the agency and this is issued upon request, free of charge.
> It includes information on equipment regulations and what you can and cannot
> do. If more information on any aspect of CB Radio is required, both the
> Agency= and SSL may be contacted.
>
> The UK will honor licenses from other countries using CEPT-approved radios.
> (See the CB Frequencies section below on CEPT for more information.) Your
> license may be used under the terms from the country which issued it.
>
> --- in France

> As of 1993, France no longer requires a license for you to operate a CB. But
> there is a 296.50FF tax on CB radios which is close to the cost of the old
> license. The main difference is that the old license was good for 5 years.
> Now you will pay the tax every time you buy a radio.
>
> Like most (or possibly all) of Europe, France does not give you a callsign.
> So you may identify yourself by your name or a handle of your choice.
>
> France will honor licenses from other countries using CEPT-approved radios.
> Your license may be used under the terms from the country which issued it.
>
> --- in Germany
> No license is required to operate FM CB in Germany. A license, costing 5DM
> per month is required if you plan to operate both AM and FM.
>
> --- in Italy
> A license is required to operate a CB in Italy. Licenses may be obtained
> from Ministero PP.TT. You will need to provide them with your CB's model,
> serial number, and certification number. They will also want to know your
> "handle" (if you go by a fictitious name on the radio) and whether you want
> your license to apply to other members of your family. The total cost is
> (equivalent to) US$50 plus $10 per year. You must notify the PP.TT if you
> sell your radio or buy a new one because the license applies to a person and
> a radio. Our reporter in Italy says it takes about 2-3 months for the
> license to arrive. It is valid for 10 years.
>
> --- in Portugal
> A license is required A license is good for 2 years, but licenses issued
> after the year 2000 will be valid for 5 years. "Handles" may be used, but
> you must use your ID when asked.
>
> --- in Russia
> A license is required. You must identify yourself by the callsign that is
> issued with your license. Callsigns look like "3A4157".
>
> --- in South Africa
> A license is required. they are valid for a year and are renewable.
>
> --- notes for all countries
> There are rules and regulations that must be complied with while using CB,
> no matter which country you live in. If you don't have a list of those rules
> (which most likely were included with your CB), you will probably find them
> at any store that sells CB radios. If your government issues a callsign to
> you, you must identify yourself at least with that callsign.
>
> * What are the CB Frequencies?
>
>
> The answer to this question depends on the country you reside in. We
> currently have information on Australia, Austria, Belgium, Canada, Cyprus,

> Denmark, Finland, France, Germany, Luxembourg, Italy, Japan, the
> Netherlands, New Zealand, Portugal, Norway, Russia, Sweden, the UK, the USA,
> and Vatican City.
>
> --- in the USA
> CB transmitters use the operator's choice of AM (amplitude modulation) (with
> 4 watts maximum power) or single sideband (with 12 watts maximum power) on
> the following frequencies:
>
>
> Frequencies (MHz) modulation description
>
> 26.965 - 27.405 AM/SSB Citizen's Band (CB)
>
> Special-use channels:
>
>
> 9 - emergency, monitored in some areas by "REACT", a volunteer group
> coordinated by the local Sheriff's office (not in all areas), and the State
> Highway Patrol.
> 17 - unofficial "trucker's" channel (California & western states.)
> 19 - official "trucker's" channel for traffic, weather and speed trap
> advisories.
> 16, 36, 37, 38, 39, 40 - Often are used for single sideband (SSB) activity,
> by Gentlemen's agreement.
>
>
> Note that US regulations disallow "DX" long-distance communications (over
> 150 miles in this case) with CB. However, directional antennas may be used
> to enhance communications within the legal range. (Of course, if your signal
> "skips" off of the ionosphere, it can't be helped).
>
> --- in Canada
> The CB frequencies, modulation, and power limits are the same as the 26-27
> MHz CB band in the USA. Radios must be type accepted for use in Canada.
>
> --- in Australia
> Australia has 2 bands for CB. The use of AM or FM depends on the band.
>
> Frequencies (MHz) modulation description
>
> 26.965 - 27.405 AM/SSB 40 channels, same frequencies as USA
> max power: 4W AM, 12W SSB (same as USA)
> 476.500 - 477.475 FM 40 channels, .025 MHz (25 kHz) spacing
> max power: 5W
>
>
> We've been told there are "no antenna restrictions" though you'll probably
> need to double-check with local regulations if you're thinking of putting up
> a tower.

>
> Radios for the Australian 26MHz band are essentially the same as radios made
> for the USA. However, all CB radios used in Australia (either band) must be
> type accepted by the Department of Transport and Communications (DOTAC).
>
> The following AM/SSB band frequencies have special uses in Australia:
> Channel 8 Road channel (truckers)
> Channel 9 Emergency (same as USA)
> Channel 11 AM calling
> Channel 16/LSB SSB calling, also used for DX (distance)
> Channel 35/LSB unofficial additional SSB calling, also for DX
>
>
> A unique feature of Australia's 476-477 MHz band is that repeaters are
> allowed. Inputs are on Channels 31-38 and outputs are on Channels 1-8. A
> repeater must use the proper channel pair, i.e. 1/31 to 8/38. The maximum
> power output for a repeater is 21W input. Note: as with repeaters on other
> bands, do not begin to operate one without obtaining and fully understanding
> the applicable regulations. Additional information about the technical
> aspects repeater operation is available from amateur (Ham) radio sources
> such as the ARRL Handbook.
>
> -- in New Zealand
> The CB frequencies, modulation, and power limits are the same as the 26-27
> MHz CB band in the USA and Australia.
>
> The following frequencies have special uses in New Zealand:
> Channel 5 European call (USB)
> Channel 11 truckers' channel (AM)
> Channel 15 AM calling
> Channel 35 SSB calling
>
>
> --- in Japan
> Japan has 3 radio bands that do not require licenses. Two of them are
> limited to extremely short-range use because of low power limits. The other,
> with maximum power output of 5 watts, is more like CB as it is known in
> North America, Europe and Australia.
>
> Frequencies (MHz) modulation description
>
> 26.968 - 27.144 AM (no SSB) "Citizen's Radio" maximum power 0.5W
> channels 1-8 on 26.968, 26.967, 27.040, 27.080, 27.088, 27.112, 27.120, and
> 27.144.
> Other channels in between these are assigned to fishing vessels (with 1W max
> power).
> 421.8125 - 422.300 FM "Specific Low Power Radio", also known as "UHF CB"
> maximum power 0.01W (10mW)
> newly-authorized in 1989, mostly used for handy-talkies and ski patrols, 9
> duplex channels with 12.5kHz spacing 421.8125/440.2625 ... 421.9125/440.3625

> 9 simplex channels with 12.5 kHz spacing 422.2000 ... 422.3000
>
>
> Note: other frequencies in this band are allocated for business use:
> 903.0125-904.9875 FM "Personal Radio" maximum power 5W
> 158 channels with 12.5 kHz spacing
> External antennas are permitted.
> Radios must be equipped with a control ROM for automatic ID.
>
> As in Europe, made-for-the-USA CB radios are illegal in Japan. There have
> been cases where such radios have caused interference with maritime
> emergency traffic.
>
> --- in countries subscribing to the European CEPT conference The following
> countries have implemented the CEPT (Conference of European Postal and
> Telecommunications administrations) recommendations T/R 20-02 and T/R 20-07
> for CB radios: Austria, Belgium, Cyprus (see Note 1), Denmark (see Note 2),
> Finland France, Germany, Luxembourg, Netherlands, Portugal (see Note 2),
> Norway (see Note 2), Sweden, United Kingdom, and Vatican City.
>
> Notes:
> 1) as of last report, confirmation was pending in Cyprus
> 2) special markings are required on the radios so, for example, UK radios
> marked "CEPT PR 27 GB" are legal but ones marked "PR 27 GB" are not. Radios
> from other countries may also be similarly affected.
>
> CEPT approval is significant because, with the exceptions listed above,
> CEPT- approved CBs from any one of the countries listed above can be used in
> any other on the list.
>
> Frequencies (MHz) modulation description
> 26.965 - 27.405 FM 40 channels, same frequencies as USA 4W max power
>
> If you travel to another CEPT-conforming country, you may use your CB under
> the terms of your license from your own country. Be aware that only FM is
> CEPT-approved so AM and SSB may not be legal to use once you cross the
> border.
>
> Important note: CEPT-approved CB radios are not legal in the USA and
> made-for- the-USA CB radios are not legal anywhere in Europe. The difference
> is because CEPT radios use FM and American radios use AM or SSB. There are
> no agreements allowing a radio which is type-accepted in North America to be
> used in Europe or vice versa.
>
> Channel 19 appears to be the calling channel in most CEPT-conforming
> countries. When exceptions are known, they are listed specifically for the
> country.
>
> --- in the UK
> The UK has 3 bands for CB as follows:

> frequencies (MHz) modulation description 26.965 - 27.405 FM 40 channels,
> same frequencies as CEPT & USA 4W max power. Radios using this band are
> marked "PR 27 GB" or "CEPT PR 27 GB" and are CEPT-approved.
> 27.6 - 27.99 FM 40 channels, 0.01 MHz (10 kHz) spacing 4W max power.
> Radios using this band are marked "27/81-UK" and are only legal in the UK
> 934.0125-934.9625 FM 20 channels, 0.05 MHz (50 kHz) spacing 4W max power.
> Radios using this band are marked "CB 934/81" and are only legal in the UK,
> no new radios of this type are being made but existing equipment may
> continue to be used legally.
> Antennas must be omnidirectional - beams and yagis are prohibited. Antennas
> must stand vertically, no higher than 6.85m (not including ground plane.)
>
> AM and FM are not compatible so a US-legal CB cannot communicate with any
> UK-legal CB even though they may use the same frequencies. And each is
> illegal on the others' soil so this only prevents use of atmospheric skip
> between them. (See Part 4.)
>
> --- in France
> France uses the same frequencies (in 40 channels) as CEPT and the USA. AM,
> FM and SSB are permitted. The only legal CB radios in France are those which
> are approved by France Telecom or visiting CEPT-approved radios. Frequencies
> (MHz) modulation description
> 26.965 - 27.405 AM/SSB/FM 40 channels, same frequencies as USA max power: 1W
> AM, 4W SSB, 4W FM
>
> Channel 9 AM used to be for emergencies but was deregulated because no one
> monitored it for that purpose.
> Channel 19 AM is the calling channel (used to establish contact then move to
> another channel.)
> Channel 11 FM is used for DX/skip long-distance contacts.
> Channel 27 AM is sometimes used as a calling channel for base stations (at
> home.) AM is the most commonly-used modulation method in France.
>
> When traveling outside France, remember that most countries in the CEPT
> conference do not permit the use of AM or SSB. France has adopted the CEPT
> rules for CB in Europe - see below for more information.
>
> --- in Germany
> Germany also uses the same frequencies as CEPT and the USA. AM and FM are
> the only legal modes of modulation. (SSB is not allowed.) AM is only allowed
> on some channels.
>
> Frequencies (MHz) modulation description
> 26.965 - 27.405 AM/FM 40 channels, same frequencies as USA
> max power: 1W AM and 4W FM
> AM is allowed on Channels 4-15
> FM is allowed on all 40 channels
> SSB is not permitted
> All signals must have vertical polarity.
>

>
> Channel 4 FM is the calling channel. FM is the more commonly-used modulation
> method in Germany.
>
> Notes: to meet the vertical polarity requirement, antennas must stand
> vertically. Also, tone-call transceivers are allowed so you can use touch
> tones to call someone if they are within receiving range and have a radio
> that will recognize the tones.
>
> When traveling outside Germany, remember that most countries in the CEPT
> conference do not permit the use of AM. Germany has adopted the CEPT rules
> for CB in Europe - see below for more information.
>
> --- in Italy
> Italy also uses the same frequencies as CEPT and the USA. AM, FM, and SSB
> are permitted.
>
> Channel 9 is recommended as an emergency channel. Truckers often use Channel
> 5 on AM. It has been reported that Q-codes are popular in Italy. Our
> reporters in both Italy and Germany have said that many Italian CB'ers can
> be heard using linear amplifiers even though they are illegal.
>
> --- In Portugal
> Portugal after the year 2000 will only allow CEPT approved radios on the
> abovementioned CEPT bandplan. Currently AM, FM, and SSB are permitted. There
> is no distance limit, however 5 watts power output is the limit. Amplifiers
> are forbidden, as well as directional antennas.
> Common channel usage:
> Ch. 9: Emergencies
> Ch.11: AM calling
> Ch 34 Truckers (ssb)
> Ch 6 : Taxicabs
>
>
> --- in Russia
> CB radios in Russia use the same frequencies as the USA and CEPT (European)
> countries. AM and FM are both permitted. The maximum transmit power is 5
> watts. Our reporter from Russia says there is no restriction on the distance
> of communications so, technically, use of skip (see Part 4) can be assumed
> to be legal.
>
> Because both AM and FM are legal, Russian CB radios can communicate with
> European radios (in FM) and with North American or Australian radios (in
> AM.)
>
> --- in South Africa
> South Africa allows AM and SSB on nine channels. These correspond to
> channels 19-27 on the US CB bandplan. 4 W AM and 12W SSB are authorized.
> Unity gain antennas are required. Amplifiers and Long-distance
> communications are forbidden.

> Calling channel:US 19
> Emergency Channel:US 21
> SSB use is typically on channels US 26 & 27
>
>
> --- in other countries
> This is the "grab bag" section. We have incomplete information on these
> countries but we'll tell you what we've heard. We'll add more information as
> people send it to us. (If you know more, please tell us!)
>
> * Switzerland uses FM on the same frequencies as CEPT but CBs do not appear
> to be very common there.
>
> * Channel 19 is the calling channel in Poland. Some probably-outdated info
> said that this was also the case in Czechoslovakia but that may not
> necessarily be true under the new governments of the Czech Republic and
> Slovakia.
>
> * The calling channels in Austria are 4 AM and 9 AM.
>
> * From California, we can hear a lot of CB activity in Mexico via skip but
> no one has provided us with any details yet. However, we know that Mexico
> uses AM on the same frequencies as the USA's 27 Mhz CB band.
>
> In every country we know of where CB is legal, radios must be type-accepted,
> meaning they must have been manufactured specifically for use with one or
> more that country. The exception is CEPT-approved radios, which may be used
> in any country which has implemented the conference's recommendations.
>
> * What are the common brands of CB radios?
>
> Some of the more common brands that you will find out in the USA market are
> as follows: Uniden, Cobra, Midland, Realistic (Radio Shack), Archer (Radio
> Shack) and others. Made-for-the-USA CB radios are also legal in Canada and
> Australia though they must be properly labeled ("type accepted") for sale
> and use in those countries.
>
> In France some common brands of radios are President and Midland. These are
> somewhat similar to Germany but the President brand is known as "Stabo"
> there.
>
> In Italy, Midland, Lafayette, and President are among the popular brand
> names.
>
> We currently don't have any corresponding information for other countries.
> Note that radios must be marked properly for sale in your country, even in
> countries using American or CEPT (European) radios.
>
> * What should I consider when choosing a location for my antenna?
>

> The answer to this question differs greatly between base and mobile
> installations. Each will be answered separately.
>
> In mobile installations, things to consider are whether you're willing to
> drill holes or want to use a magnet mount, gutter mount, trunk mount, or a
> bumper mount. If you say "no" to all of those (which would probably mean you
> have a very nice car) your list of options is pretty short - use a handheld
> with a rubber duck antenna.
>
> Otherwise, you can start making choices with the following things in mind:
> 1) the closer your antenna is to the top & center of the vehicle, the
> better. So the roof is better than the rain gutter or trunk and all of those
> are far better than the bumper. But they'll all work.
>
>
> 2) a drilled/permanent mount is better than a magnet mount in the same
> location. (This is so that the antenna gets a better "ground plane".) If you
> use a magnet mount, run your coax feed line through the door or hatch that
> gets the least use and then leave it alone. Don't use any path where the
> coax would get pinched.
>
>
> For base installations (i.e. at home) the best places are "as high as you
> can" within legal limits. The roof is normally fine. If you're in an
> apartment complex, you may be limited to a balcony but ask the manager -
> they may just want you to keep it "invisible." (Check your national and
> local regulations. In the USA, the FCC regulations limit CB antennas to 60
> feet above ground level or 20 feet above the tallest structure on your
> building. Maybe shorter if you live close to an airport - one foot high for
> every hundred feet from the nearest runway.)
>
> Base station antennas should have a good ground in case of lightning. (In
> the rare event of a lightning strike, this can mean the difference between
> burning down the building or just the radio.) Most cold water pipes that go
> into the ground will work. But the best choice for a ground would be an
> 8-foot (2.4m) copper rod stuck in the ground near the antenna. (If you want
> to use anything other than the rod for a ground, contact someone
> knowledgeable about housing construction and safety - you don't want to
> accidentally use a hot water or gas pipe. You also need to know your local
> building codes.)
>
> * Once I hook up my CB and antenna, is the radio ready to use?
>
> No. When you get a new CB and/or new antenna, the CB and the antenna must be
> tuned or "matched." To do this, you need an SWR meter which is a device that
> measures the impedance between the radio and the antenna. SWR stands for
> "Standing Wave Ratio." The lower your SWR, the better your match. First
> timers are recommended to get help from a knowledgeable person but some
> notes about the process are included here.
>

> You do NOT want your SWR reading to be over 3:1 ratio on any channel. It can
> damage your radio. A "perfect" match is 1.0:1 which gives you the best
> efficiency for your radio's output. However, "perfect" isn't possible so
> 1.1:1 is the best you can hope for. Even 1.5:1 is acceptable, but it isn't
> as good.
>
> You will only be able to achieve your best match on one or a small group of
> channels. The SWR will increase on each channel as you get further from that
> point. So 2:1 may even be unavoidable on the extremes, like Channels 1
> and/or 40. If you know you're going to use one channel most of the time, try
> to put your best match there. Otherwise, just center it at Channel 20 so you
> can use all 40 channels optimally.
>
> You may find SWR meters at places like Radio Shack or amateur radio dealers.
> Further information about Standing Wave Ratio can be obtained from the ARRL
> Handbook. (ARRL is the American Radio Relay League. Their annual handbook is
> full of information on many different aspects of amateur radio but the basic
> concepts apply in all radio bands.)
>
> Most stores that sell CB radios will have an SWR meter and someone who knows
> how to use it. But they will charge for their services.
>
> * What are good antenna characteristics and what are some good antennas?
>
> Antennas have to be designed to transmit and receive on the band that you
> are using. CB is located in the 11-meter band. (They call it that because
> the wavelength is about 11 meters.) CB antennas range in height from a
> little under 2 feet (24 inches) up to 108 inches.
>
> The 1/4 wave whip (108") will offer better reception and transmission
> capability over a shorter, coiled or "loaded" antenna.
>
> VERY short antennas, or multiple antennas that aren't "phased" properly will
> result in a very poor signal. Remember, for co-phasing antennas, they must
> be 1/4 wavelength apart which, for the 11 meter band, is around 9 feet. Most
> cars aren't wide enough to allow antennas to be placed 9 feet apart. The
> other characteristic of co-phasing is that it is much more directional- than
> a single antenna. It will transmit and receive MUCH better along the axis of
> the car than sideways off the car so if you want a omnidirectional antenna,
> you don't want co-phasing (so you only want one antenna.)
>
> Another subject of common questions is about antennas which receive AM/FM
> broadcast stations and act as a CB transceiver antenna. User experiences on
> this newsgroup vary widely with each brand. (The motorized ones seem to have
> the least favor among the postings we've seen.) In general, these antennas
> work but are not nearly as good as a dedicated CB antenna. You have to weigh
> the advantages and disadvantages for your circumstances.
>
> Good brands of dedicated CB antennas in the USA include (but are not
> necessarily limited to) Hustler, Wilson, Antenna Specialists, Solarcon, Jo

> Gunn, FireStick and K-40.
> In France, some common brands are President and Magnum.

> * What is single sideband?
>
> To understand single-sideband (SSB), one must first have a picture of what's
> going on in a normal AM (amplitude modulation) transmission. For example, on
> Channel 21 (in North America, Australia, and Europe), a "carrier" is
> transmitted at 27.215 MHz. Your voice (or whatever you're transmitting) is
> used to change (modulate) the height (amplitude) of the signal so that it
> can be reconstructed as your voice on the receiving end.
>
> Actually, the amplitude of the carrier does not change. The addition
> (modulation) of another signal, like your voice, onto the carrier will
> increase the amplitude at other frequencies adjacent to the the carrier. A
> 300 Hz tone, for example, would add signals 300 Hz above and below the
> carrier. Every frequency component of your voice has the same additive
> effect. These modulation effects are the upper and lower sidebands of the
> transmitted signal. Normal AM transmissions include the carrier signal, the
> upper sideband (USB) and lower sideband (LSB).
>
> The difference in frequency from the bottom of the lower sideband to the top
> of the upper sideband is called the bandwidth of the signal; it will be
> twice as wide as the highest frequency modulated onto the carrier. (For
> poorly filtered radios, this can unintentionally interfere with adjacent
> channels if the bandwidth is too wide. Poor filtering becomes easily
> noticeable at higher power levels.)
>
> There is enough information in either sideband to reconstruct the original
> signal. Therefore, radios which can use single sideband are able to filter

> out the carrier and the opposite sideband before transmitting them, leaving
> either the upper sideband or lower sideband, as selected by the CB operator.
> Obviously, for a conversation to take place, both the transmitting and
> receiving radios have to be on the same channel and sideband setting (i.e.
> Channel 25 LSB.) Some additional tuning will be necessary with a "clarifier"
> control.
>
> Assuming proper filtering within the radios, it should be possible for
> separate conversations to occur on the upper and lower sidebands of a given
> channel without interfering with each other.
>
> * Do I really get 120 channels on a radio with single sideband?
>
> [This applies to the USA, Australia, Canada, and any other countries that
> use AM and SSB on the same 40-channel band.]
>
> Yes and no. SSB does give you 120 different communications paths (40 AM, 40
> USB, and 40 LSB) but they are not free of interference from each other. The
> upper and lower sidebands will interfere with the AM channel and vice versa.
> With some radios, even the opposite sidebands can interfere with each other.
>
> For example, (and this works for any channel - just fill in a different
> number from 1 to 40) Channel 17 has an AM channel that every radio can use.
> Radios with SSB will also be able to use the upper and lower sidebands.
> However, within a few miles of each other, you can't effectively use the AM
> channel if people are talking on either sideband. Though not as strong,
> users of sideband will know if someone is using the AM channel but the
> higher legal power settings on sideband give them an advantage.
>
> * How can I reduce engine noise on my mobile CB?
>
> If you have problems with engine noise in a mobile installation, there are

Anytime you MUST have a particular antenna, you must compromise.

It's your cake, now eat it.

You never heard the cowboy n indian n mooslim story? Well here it is...

A cowboy, an Indian, and a Muslim were waiting for a plane in Dallas, that had been delayed.

"Once," the Indian said, "my people were strong and we were many."

"Now," the Muslim said, "my people are strong and we are many. Why is that?"

The cowboy put down his beer and looked him in the eye. "It's cuz we ain't played cowboys and Muslims yet."

You can mount your radio with the mounting bracket screwed under the dash.

It won't be a new vehicle forever. Do you still knock the farts out of the seat?

5640. Re: Ham license? Gun registration? NO WAY!

The ARRL is organized by Hiram Percy Maxim to help relay messages, typical ranges were 25 miles. QST magazine appears in 1915. Hiram Percy Maxim was the son of Sir Hiram Stevens Maxim who invented the machine gun (the Devil's Paint Brush), father and son are often confused, although Hiram Percy Maxim did invent a weapons silencer.

Here we have it:
Father=machine gun, son=Ham radio. From machine gun came Ham radio.

I is gonna stay away from dem black woman, because (a) I is married now, and
(b) It would be AGAINST GOD's LAW for me to Marry the BROZ womans!
Sing with me:

Jesus loves all da little Children; All da children of da world; Yellow,
Black, Red & White;
Just don't MIX dem in his sight;
Jesus Loves all da children of da world!
(He Hates da UN too)!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Got one on this milleneeum pooter pwogram. I'm digitally
disfunctionate to use it!

>
> 2) Learn the English language

Blame yo liberal public fools system for dat!

>
> 3) Learn to stand on your two feet and think for yourself.

WHY should I do that when I have you liberals to do it for me?!
It is WORK to think, and the more you think, the morte PAIN you will have!
I have enough pain already (with much knowledge come much PAIN, Proverbs
says!)!
